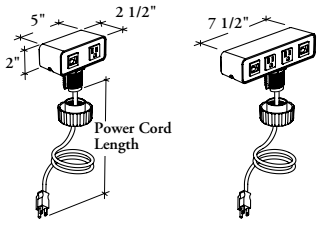
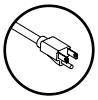
Power Qube

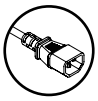
One Table
One Plug



Connector and Cord Type



Plug-In (A)



IEC Connector (C)

This product is mounted above a worksurface with Square Cut-Out and fixed inside Square Grommet Ring. It is used to provide quick power, data and USB access at the worksurface level.

WHAT'S INCLUDED

1 power qube, 1 twistable attachment ring and 1 square grommet ring.

NOTES

Must be installed in Square Grommet Ring.

Data Faceplate **not** included (if specified).

The Square Cut-Out mounting option can be specified on worksurface to allow Power Qube installation.

IEC Connector option (C) can only be used in combination with a Height-Adjustable Worksurfaces.

For more information about IEC Connector option (C), refer to One Table One Plug Application Guide in Complements: Teknion's Ergonomics & Accessories Programm.

Simplex outlet finish to be Soft Gris.

Power Cord is a grey cloth covered type.

Each USB Outlet has one USB-A port and one USB-C port for charging only.

The USB-A port always supplies 10 Watts maximum at 5 Volts DC when used alone.

Standard USB-C Capacity (S):

The USB-C port supplies 18 Watts maximum at 5 to 12 Volts DC when used alone.

Maximum combined output is 15 Watts when both ports are used together: 5 Watts for USB-A port and 10 Watts for USB-C.

High USB-C Capacity (H):

The USB-C port supplies 65 Watts at 5 to 20 Volts DC when used alone.

Due to limitations with transformer design, the maximum combined output is 30 Watts when both ports are used together: 10 Watts for USB-A port and 20 Watts for USB-C port

This reduced output in dual port mode **will not** support charging of laptops or quick charging of some phones/tablets that require more than 5 Volts DC.

The USB-C port will charge laptops up to 65 Watts and support Quick Charge when used in single port mode.
