xm Post Leg

The xm Post Leg is a secondary support used to provide additional support at the front of a worksurface as an aesthetic alternative to the Semi-Suspended Post Leg (TLSP).

WHAT’S INCLUDED

1 leg (as specified) and mounting hardware.

NOTES

Height dimensions include thickness of the worksurface.

Adjustable leg offers 3" adjustability for uneven floors to reach 29" nominal height.

Xpress Available through Teknion’s Xpress Program.

PRODUCT OPTIONS

Leg Type	Finish
