understanding seating

# understanding zones seating

**Zones is a complete and cohesive collection that populates or pollinates across the entire office landscape. Included are more than 20 seating solutions which individually and collectively reflect Zones' poetic expression of a humanistic work culture.**

- Zones seating is proportioned to accommodate the growing needs of the North American market and tested to ANSI/BIFMA standards.
- All Standard Upholstery Fabrics will be applied Off-the-Bolt with the exception of sofas and benches which are applied Railroaded. (See *Fabric Direction Guidelines* page in the *Textiles & Finishes + Materials* section for more information)

## multi-use seating

A collection of benches, arm chairs and stools that can be used in a variety of locations. They are planned around Zones tables, used in Enclosures or blended with other product lines.

### arm chair, side chair and side stool

Arm Chairs and Side Chairs reflect Zones' characteristic domesticity and materiality without sacrificing today's need for performance in various work environments.

- The Arm Chair is a modern mixed-material interpretation of a classic all-wood chair.
- The Side Chair is more casual and appropriate for more compact spaces.

### benches

Shared benches convey a sense of community and act as a natural humanizing touch point, best suited around a Workshop Table.

### backless stools

Stools at task, bar and counter heights provide a casual aesthetic to commercial workplaces or hospitality spaces.

- Counter and bar height stools allow the user to be at a closer eye level to someone standing.
- Mixing seating heights helps to architecturally break up large spaces.

## understanding zones seating (continued)

### soft seating

A collection of club chairs, sofas and lounge chairs that can be used in a variety of locations. They can be planned around Zones tables or used in Enclosures.

### club chairs

There are four variations that integrate while simultaneously answering different functional seating needs for focused and collaborative spaces.

- Provide freedom to select multiple coordinating seating solutions across a floorplate

### lounge chairs

Offered as a Conference Lounge Chair with upright posture, swivel and height adjustment; a Sled Lounge Chair with fixed-height sled base and reclined posture, fixed-height and a swivel-return mechanism to facilitate ease of use and organization.

### sofas

One and two-person In-The-Zone Sofas have been designed specifically to fit within the Zones Screen Enclosures.

- The Settings Chaise Sofa, Sofa 2.5-Seater and 108° Corner Sofa have been designed to integrate with Zones Screens, to create Settings.
- All Sofas can still be used outside of the Zone, in the open plan.
- Sofas provide options for power and some have tablet options that are appropriate for various applications.

## planning with zones multi-use seating

The beauty of Zones Multi-Use Seating is its ability to mix with Tables or Enclosures to create both formal and casual environments that cater to users functional needs and designers aesthetic visions.

The large variety of Multi-Use Seating options in Zones provides the ability to create both formal and casual environments.

Creating different seating heights in adjacent areas adds variety, depth and delineation of space. The variety of options allows for the expression of an aesthetic vision, the level of formality, the short or long term ergonomics needs, and the desired price point.

Adding backless stool to the ends of tables provides for larger meetings, for side sitting postures. The visual variety encourages others to join the group.

Varying landscapes can be created in the open plan by combining work, counter and bar height layouts.

## planning with zones multi-use seating (continued)

Arm chairs provide additional support and substance around a table. Low stacking stools provide casual overflow seating and the all-wood version can double as a quick side-table.

Placing Arm Chairs at the head of the table indicates stature or hierarchy while Side Chairs are used along the table length. Benches can be used at the perimeter wall for over flow seating.

## planning with zones soft seating

The beauty of Zones Soft Seating is its ability to mix with Tables, Enclosures and other products to create settings that cater to users functional needs and designers aesthetic visions. The variety of options allow them to be used across an entire floor plate, both inside and outside of Enclosures.

The Club Chair Swivel Tilt with 4-Prong Base and swivel return is ideal for meeting and conferencing with a prestigious look and feel.

The Club Chair Swivel Tilt with 5-Star Base is height-adjustable which is ideal for touch down stations. Other seating and tables can be used to utilize the space outside of Enclosures.

Club Chairs with 4-Wood Legs are an ideal guest chair solution in private offices.

The Zones Solo Lounge Chairs can be clustered together to create casual meeting areas. Delineate space with storage and touch-down meeting spaces at bar or counter height. The Club Stools' height-adjustment range is suitable for both heights.

## planning with zones soft seating (continued)

Zones Lounge Zones-Sofa Kit provides a casual semi-private place for discussions.

In-The-Zone Sofas can be planned within an Enclosure or in a stand-alone lounge setting. Consider using them on the outside face of the Enclosure to create additional lounge areas.

Mix Zones Soft Seating, Multi-Use Seating and other Zones products to create countless and unique solutions to suit architectural spaces and customer need.

## planning with zones soft seating (continued)

In a public space where strangers may be sitting adjacent to each other, a Zones Setting Sofa - 2.5 Seater surrounded by the coordinating Open Lounge Zone Half Enclosure is ideal.

The slotted version provides some privacy while providing passers by on the other side a visual queue that the space is occupied.

Create different ambiances by mirroring this configuration around a coffee table or by specifying other seating solutions such as Club Chairs with Swivel-Return.

The Zones Screen with upholstered Buffers can be used to divide two spaces and provide a more private, opaque solution.

When combined with the 108° Corner Sofa, the sofa's end will peak out to hint it's availability.

Adding the Zones Arc Lamp as a focal point, and coffee tables and Club Chairs will create a more traditional seating solution for additional guests.

The Zones Screen can define and separate two activity zones. Combining a Chaise Lounge Sofa with Low-Stacking Stools creates a more casual, intimate space that is more spatially separated from the surroundings.

## planning with zones soft seating (continued)

The Zones Conference Lounge Chair and 25" high Dialogue Workshop Table creates a casual meeting space with a more informal and relaxed posture. It has a more upright posture, swivel-tilt and height-adjustable to suit needs within a meeting.

The Zones Solo Lounge Chairs can be clustered together to create casual meeting areas.

Zone Sled Lounge Chair provides a space for casual seating and tables and allow for a relaxed posture which creates a casual space to read, take a quick phone call or have a brief informal meeting.

Use the Zones Solo-Lounge Chair in Enclosures to create an individual place to retreat, read, write or check-in on your phone or tablet.

# planning with zones seating

The following chart outlines the compatibility between Zones seating and Zones table heights.

	 <p>Lounge Height (14"-19" high table)</p>	 <p>Dialogue Height (25" high table)</p>
Zones Stacking Low Backless Stool (ZNMS)	n/a	
Zones Solo Lounge Chair (ZNSX)		n/a
Zones Sled Lounge Chair (ZNSW)		n/a
Zones Conference Lounge Chair (ZNSY)
