

The Side Support Bracket is an off-module, panel-mounted bracket used as secondary support at the end of a worksurface that must be used in conjunction with a major support.

**WHAT'S INCLUDED**

2 brackets with fasteners.

**NOTES**

If supporting a semi-suspended worksurface (WSR, WSP, WPC, WSN), Locking Side Brackets (BSL) must be specified separately.

The Locking Side Brackets (BSL) **cannot** be applied to panels where 32" Base Elements (PAAB and PAAS) are used.
