

The Diecast Grommet is designed for the round cut outs to be place on center, left or right locations on the worksurface.

WHAT'S INCLUDED

2 piece round grommet. Data cable nest which accommodates cables up to CAT 6 (approx 0.25").

NOTES

The Die Cast Grommets must be specified separately. A cut out must be specified on the related worksurface. The grommet can be applied to any Teknion District worksurface thickness with a grommet cut out specified. Pass through accommodates power cables up to 0.5" thick. Grommet can be finished in a Foundation, Mica or Accent finish.
