

The Storage-to-Panel Bracket attaches to the back or side of a storage unit and mounts into the vertical channel of a District panel to provide support to the panel wall.

WHAT'S INCLUDED

1 top bracket, 1 bottom bracket, 1 plate (for some standard configurations) and attachment hardware.

NOTES

A Perpendicular Back (B) application is **not** available with a Wire Gap (W).

Handedness is determined by the side of the panel (when facing it) onto which the storage is mounted.

For details as to which application to choose, please see Planning Basics in the Supports section of the Application Guides chapter.
