

# height-adjustable run-offs

## Z J N R H

### Height-Adjustable Run-Off with Partial Modesty & Overlap Low Credenza Connection

#### WHAT'S INCLUDED

1 worksurface, 1 partial modesty, height adjustable mechanism, height adjustable switch, 1 credenza storage unit to house height adjustable leg, worksurface grommet (if specified), standard integrated wire management includes modesty grommet, wire looms, metal wire management sleeve, four-outlet power bar, metal cable tray

#### NOTES

Height Adjustable Range: 27-1/2" - 43-1/2".

Credenza Height is 19-5/8".

Credenza storage must be anchored to an adjacent storage unit or gable on at least one side.

Width and Depth measurements of the overall Run-Off includes credenza and pinch points. Therefore;

- User open knee space will vary by 4" based on credenza depth

- Run-Off worksurface will be 2" less than the overall Run-Off Depth (i.e. nominal 30" = 28" actual)

Default HA Switch location will be on the Gable side.

Flush or full modesty options are not available.

For Cabinet with Doors Credenza Style, only one of the two doors is functional to avoid impact with the modesty.

Wire Management Notch is specifiable for ease of cable routing from the credenza storage to adjacent units.

After cable routing through the run-off, the HA mechanism and power bar will have approximately two feet of cable leftover to reach a wall or floor receptacle through the credenza storage component.
