Chicago Power Box

Facing Sides (B)

Facing Down (B)

This Chicago Power Box is a module that mounts inside a Chicago structural beam to provide power outlets that are facing sides or facing down.

WHAT'S INCLUDED

1 Chicago power box with power outlets and mounting hardware.

WHAT'S EXCLUDED

Electrical wires (field supplied by electrician), Cable Tray and Cable Tray for Access Door.

NOTES

The Chicago Power Box mounts inside a single-sided or double-sided beam.

When Facing Down Mounting Style (D) is specified, the Double-Sided Configuration (D) is not available.

The connections must be executed by a qualified electrician.

Receptacle outlet matches with shroud finish.

Refer to application guide.
