

worksurface supports & accessories

K F E N L

Flush End Gable – Laminate

The Flush End Gable – Laminate is a non-handed, on-module primary support, used to provide full closure at the end of a worksurface run.

WHAT'S INCLUDED

1 gable and fasteners.

NOTES

This product must be specified left or right for pre-assembly but can be changed in the field. The handedness is determined by the location of the gable (from the users perspective).

K F E N M

Flush End Gable – Metal

The Flush End Gable – Metal is a non-handed, on-module primary support, used to provide full closure at the end of a worksurface run.

WHAT'S INCLUDED

1 gable and fasteners.

NOTES

This product must be specified left or right for pre-assembly but can be changed in the field. The handedness is determined by the location of the gable (from the users perspective).

K F E N W

Flush End Gable – Wood

The Flush End Gable – Wood is a non-handed, on-module primary support, used to provide full closure at the end of a worksurface run.

WHAT'S INCLUDED

1 gable and fasteners.

NOTES

This product must be specified left or right for pre-assembly but can be changed in the field. The handedness is determined by the location of the gable (from the users perspective).
