xm Post Leg

The xm Post Leg is a secondary support used to provide additional support at the front of a worksurface as an aesthetic alternative to the Semi-Suspended Post Leg (TLSP).

WHAT’S INCLUDED

1 leg (as specified) and mounting hardware.

NOTES

Height dimensions include thickness of the worksurface.

Adjustable leg offers 3" adjustability for uneven floors to reach 29" nominal height.

Xpress Available through *Teknion’s Xpress Program*.
