APPLICATION GUIDE 21

PRICE & PRODUCT GUIDE. 233

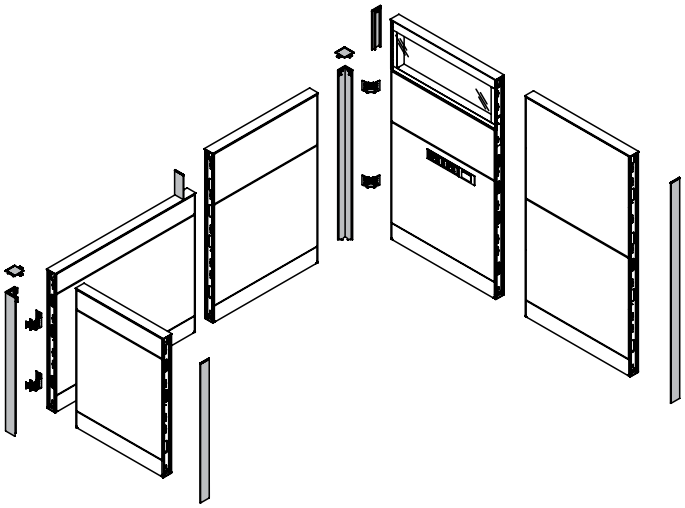

how to specify leverage

panels

This illustration indicates all the panels required

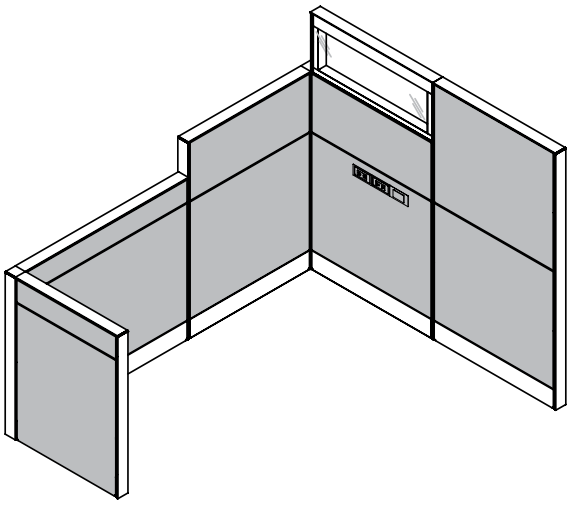

- Standard default panels are ordered complete with elements. For details see the Panels section

panel connections & trims

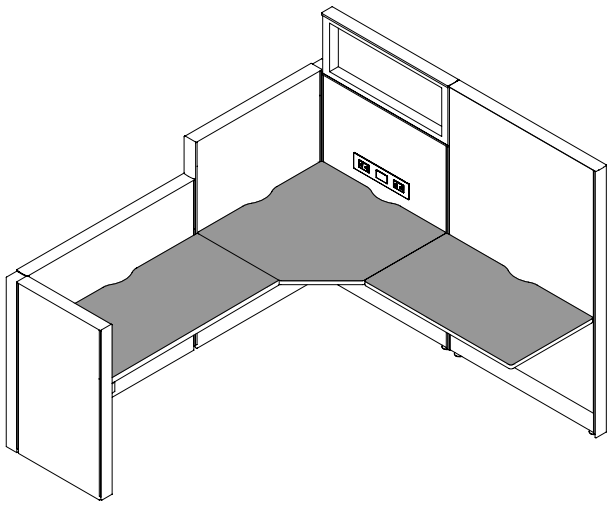

This illustration indicates all the panel connections required

- Panel Connections must be selected carefully according to the instructions relating to the panel configuration chose. For details see the *Panel Connections & Trims* section
- Trims are listed at the end of the *Panel Connections & Trims* section

elements

This illustration indicates all the elements required

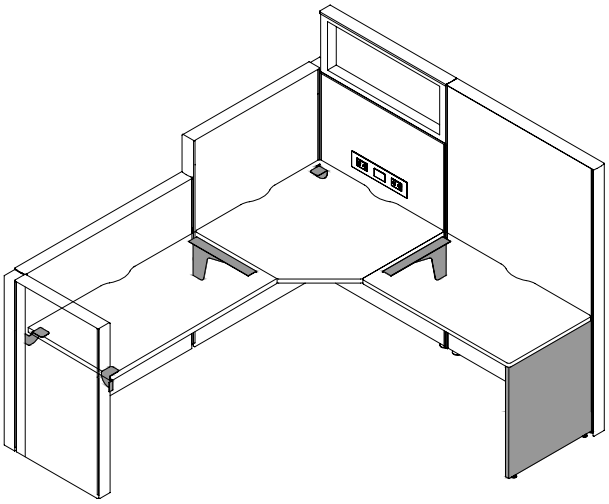

worksurfaces & countertops

This illustration indicates all the Leverage Worksurfaces required

- Leverage worksurfaces are available in a variety of shapes and sizes appropriate for various configuration requirements
- There is also a countertop that can be ordered. For details see the listings at the end of the *Worksurfaces & Countertops* section

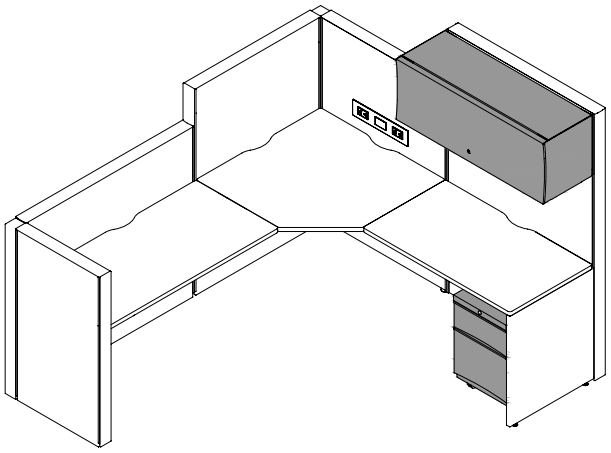

how to specify leverage (continued)

worksurface supports & accessories

This illustration indicates all the Worksurface Supports required

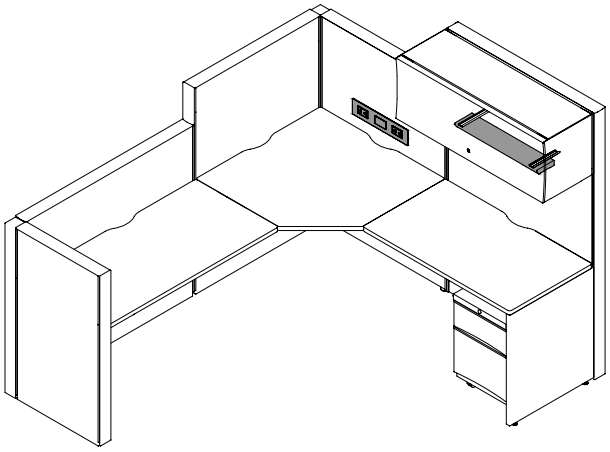

- Choice of worksurface supports depends on whether the worksurface is to be panel-mounted, or semi-suspended. For details see the *Worksurface Supports & Accessories* section

storage

This illustration indicates all the Storage Products required

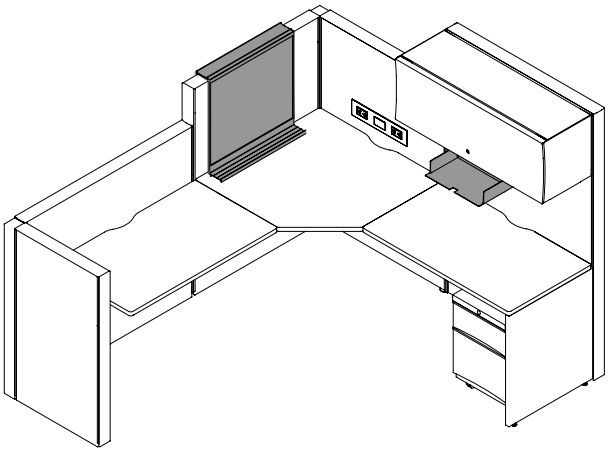

- Leverage offers two types of storage: Freestanding Storage, which requires no fitting, and Mounted Storage for application in panel-mounted situations. For details see the Mounted Storage section or Freestanding Storage section

lighting, electrics & communications

This illustration indicates the Lighting and Electrics required

- Leverage electrics specified for panels and wire trays are used for the management of data and communication wires. For details see the *Lighting, Electrics & Communications* section

accessories

This illustration indicates all the Accessory Products required

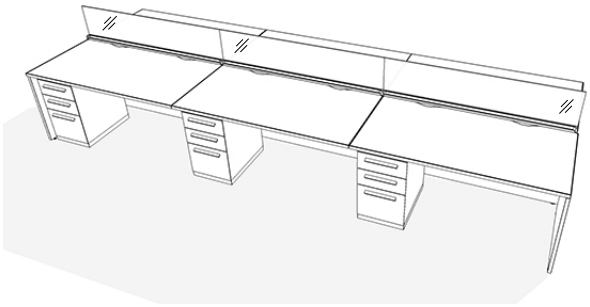

- For a comprehensive range of ergonomics and workstation accessories, see Complements*: Teknion's Ergonomics & Accessories* Program

leverage workstation typicals

The following typicals demonstrate various workstation planning styles and features of Leverage.

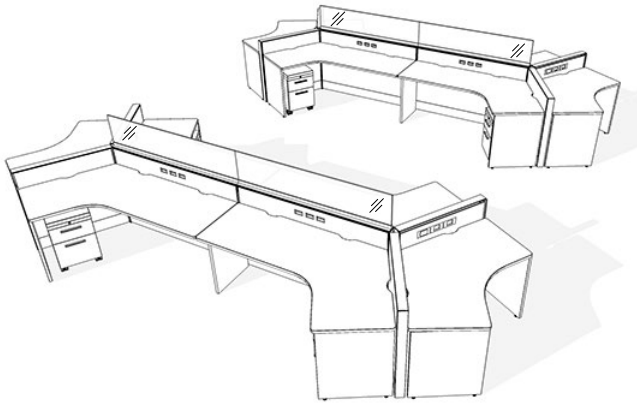

high density

Whether planning for high density among workers or more storage for each workspace, Leverage offers an extensive feature set to expand planning possibilities.

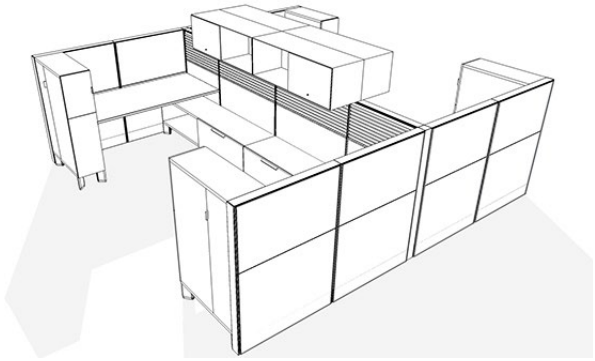

30" x 60" Benching Workstation

- 30" high panels provide support for worksurfaces, and power and communications access while still maintaining an open benching application
- Frameless glass add-on screens provide translucent visual separation between users
- Power is accessible below desk surface

36" x 60" 120° Workstation

- 36" high panels provide support for worksurfaces, and allows access to power and communications above the worksurface while still maintaining an open feel
- Frosted acrylic add-on screens provide translucent visual separation between users
- 120° planning can increase workstation density

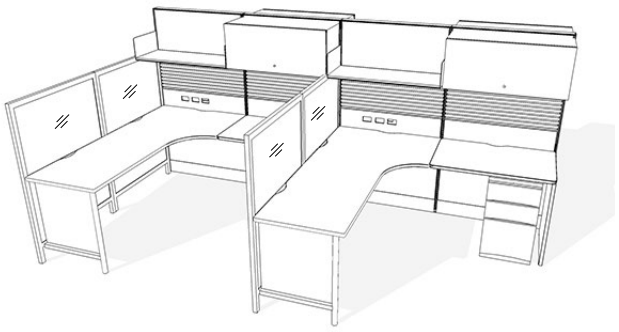

72" x 72" High Density Storage Workstation

- Corridor width, non segmented elements provide a clean monolithic aesthetic on the outside of the workstations
- Leverage blends seamlessly with a variety of Teknion's storage lines to allow for high density storage
- Upmounted overheads minimize the need for high panels

leverage workstation typicals (continued)

compact workstations

Leverage offers extensive space division choices to create efficient compact workstations

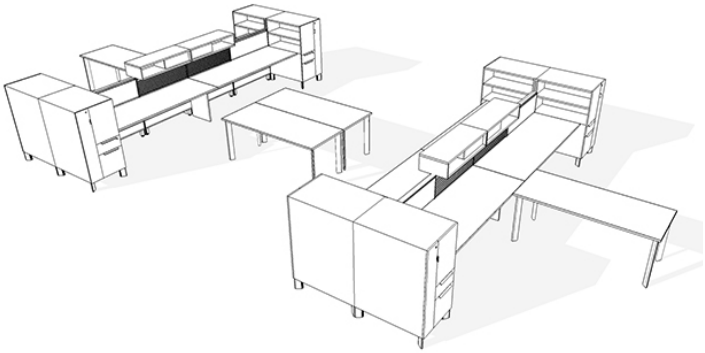

72" x 72" Leverage/Lyft Workstation

- Lyft panels provide a lightweight inexpensive alternative for wing panels
- A variety of worksurface shapes are available to accommodate differing work styles
- A combination of open and closed storage maintains a light feel in a compact workstation

leverage workstation typicals (continued)

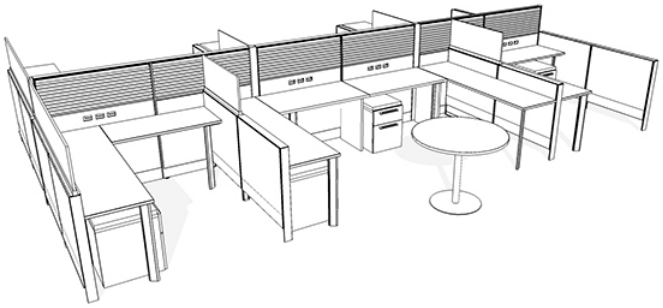

mobility

Leverage easily combines with other Teknion lines to expand mobility options, providing freedom to adjust storage, desks and space division to meet individual workstation requirements

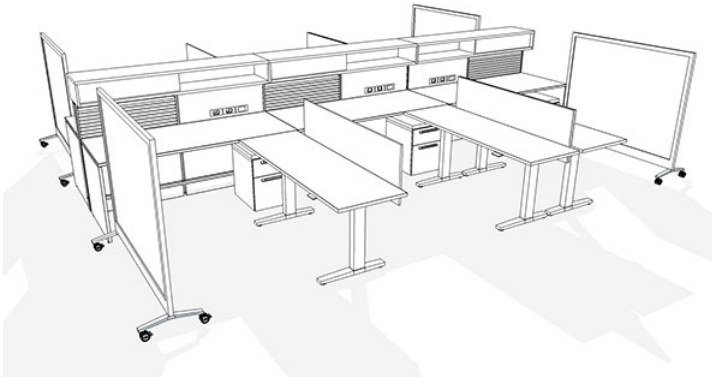

66" x 90" Mobile Workstations

- Leverage panels are used to support worksurfaces and storage and route power and communications cables, allowing other workstation components to be mobile
- A wide variety of mobile tables and storage components are available from Teknion's product offering, allowing coordination of fabrics and finishes throughout
- Mobile tables can be used as individual worksurfaces or combined to create meeting areas

72" x 96" Off-Module Workstations

- Leverage panels are connected off-module to allow maximum planning flexibility
- Mobile pedestals and meeting tables can be easily reconfigured to allow workstations to change as required
- Clamped on add on screens can be quickly relocated to provide privacy where required

72" x 72" Height-Adjustable Workstations

- Leverage panels are used to provide a spine only for power and communications routing, mounting of accessories and worksurface support
- Quick Shift tables provide mobile height adjustable worksurfaces allowing maximum flexibility for reconfiguration
- Mobile Ability screens can be used in combination with Leverage panels, to provide semi-transparent space division

leverage workstation typicals (continued)

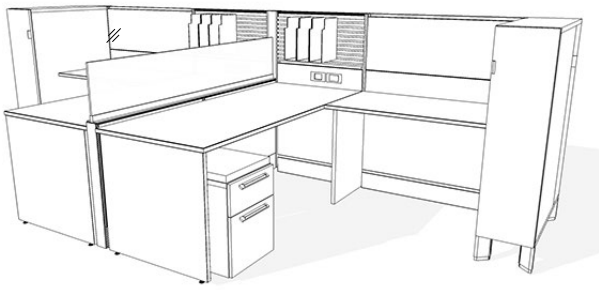

open stations

Leverage panels anchor open plan workstations, enabling adjoining furniture to create and define varied open plan styles

72" x 96" Shared Workstation

- Leverage panels are used on the spine for supplying electrical and communications to the workstations, and for supporting the worksurfaces
- A combination of monolithic elements and glazing can provide an open feel and help to meet LEED requirements for Daylight and Views
- Lyft panels provide support on the workstation wings

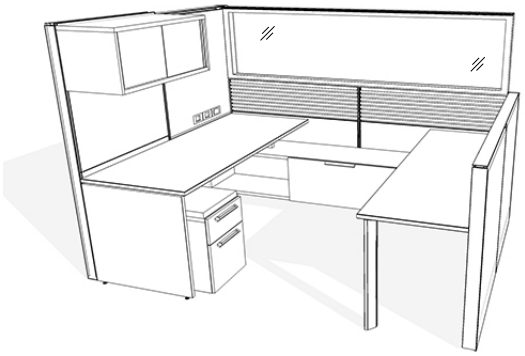

72" x 72" Collaborative Workstations

- 30" high panels provide desk height space division between face to face users
- The frameless glass add-on screen can span over two panels to provide continuous glazed space division and is available clear or frosted
- The 30" high datum line can be continued around the entire station to provide a clean aesthetic above the worksurface

leverage workstation typicals (continued)

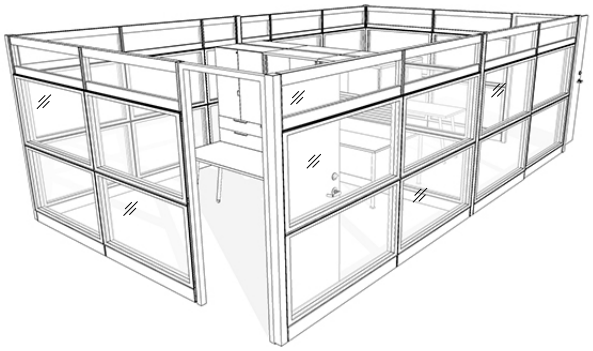

management workstation

From fully enclosed private offices to managerial workspaces in the open plan, Leverage offers an extensive range of space planning options.

72" x 96" Semi-Private Managerial Office

- Corridor width floor flush elements provide a clean monolithic look to the outside of a workstation
- A variety of panel rail heights and element sizes provides the ability to choose the datum height that best suits the workstation layout
- Add-on Glazed Elements can be installed onto two panels to provide large spans of glass for a clean open aesthetic – glass can span up to 36" high and 96" wide

10' x 12' Enclosed Executive Workstations

- Leverage panels are available up to 81" high in solid or transparent finishes to provide fully enclosed work areas
- A door option is available to provide complete privacy
- A wide variety of element options are available to provide complete flexibility in a workspace including accessory rails, tackboards, etc.

introduction

xpress program

what is xpress

Teknion's Xpress Program is designed to offer expedited shipment to a large base of teknion customers needing delivery in an abbreviated time frame. Products that are available through *Teknion's Xpress Program* will include this Xpress .

order information

Orders received before 12:00 pm eastern standard/eastern daylight savings time will be processed on that same day. Orders received after 12:00 pm eastern standard/eastern daylight savings time will be processed on the next business day.

Teknion's Xpress Program is not intended to replace our standard product lead time. For this reason, the following guidelines are in effect:

1. Quantities may be limited on individual items based on product availability.

5-day Program*	Expansion Learning	Maximum $50,000 list
	Expansion Casegoods, Expansion Desking	Maximum $75,000 list
	Seating (non-wood)	Maximum 50 chairs
	Complements (excludes Height-Adjustable Tables)	Maximum 25 all items
10-day Program*	Leverage	Maximum $200,000 list
	District	Maximum $200,000 list
	District Storage	Maximum $200,000 list
	Filing & Storage (excludes wood fronts, cushions and special paint)	Maximum 50 units
	Altos	Maximum $75,000 list
	Tek Vue	Maximum $150,000 list
	Seating (Wood)	Maximum 25 chairs
	Expansion Casework+	Maximum $30,000 list

* Refer to the weekly Teknion Lead Time Sheet published on My Teknion for the relevant lead times. Delivery follows standard shipping schedules that may affect departure dates.

2. Orders can only be accepted in the fabrics, finishes and sizes outlined in Teknion's price list (special variations cannot be accepted).
3. Orders must be submitted via the Order Submission application on OnePlace.

changes and cancellations

No changes or cancellations are accepted on Xpress orders.

terms and conditions

All other terms and conditions of sale are available online at **www.teknion.com**.

Not all products are available through *Teknion's Xpress Program*. Refer to the specification software for complete product offering.

understanding application guide pages

This application guide will include the following types of pages.

application guide

understanding screens

Leverage offers a variety of screens at varying heights and in multiple materals to provide casual privacy and functionality.

desk edge screens

Desk Edge Screens are available in five styles, each attaches to the worksurface edge:
• Glass
• Infinity
• Framed
• Smooth Felt
• Desk Edge Screen with Glass

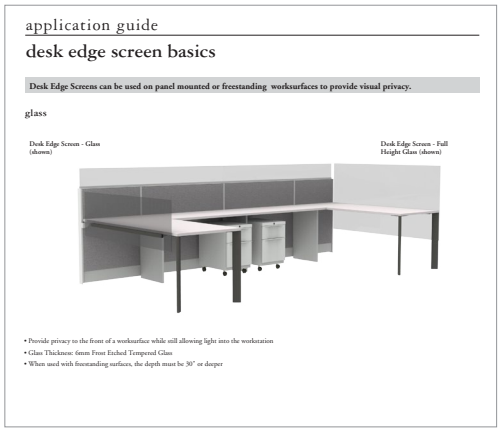

Glass Desk Edge Screens
• A glass screen that provides privacy to the front of a worksurface while still allowing light into the workstation
• 42", 51" and 57" heights (depending on style)

Infinity Screen
• A lightweight thin screen with a soft curvilinear aesthetic
• Available
- Curved Desk Edge Screen,
- Desk Edge Screen,
- Quilted Desk Edge Screen,
- Side Desk Edge Screen,
- Desk Edge Floor Screen,
- Side Desk Edge Floor Screen
• 42", 51" and 57" heights

Framed Fabric Desk Edge Screens
• A square edge screen that is outlined with a frame
• Available
- Desk Edge Floor Screens

overview pages

Used to describe the intent and common features of a group of products.

application guide

desk edge screen basics

Desk Edge Screens can be used on panel mounted or freestanding worksurfaces to provide visual privacy.

glass

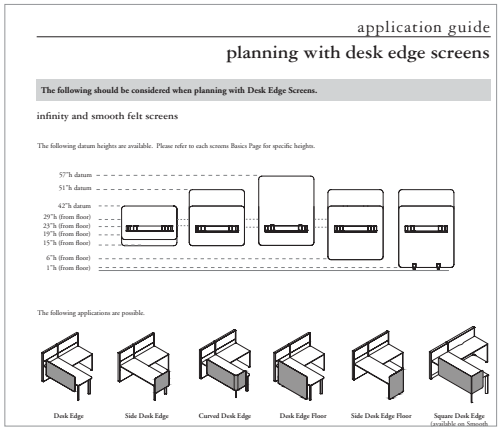

Desk Edge Screen - Glass (shown)

Desk Edge Screen - Full Height Glass (shown)

• Provide privacy to the front of a worksurface while still allowing light into the workstation
• Glass Thickness: 6mm Frost Etched Tempered Glass
• When used with freestanding surfaces, the depth must be 30" or deeper

basics pages

Used to describe the details of each individual product including:
• Product codes
• Dimensions
• Options
• Features
• Links to the price page

application guide

planning with desk edge screens

The following should be considered when planning with Desk Edge Screens.

infinity and smooth felt screens

The following datum heights are available. Please refer to each screens Basics Page for specific heights.

57"h datum
51"h datum
42"h datum
29"h (from floor)
25"h (from floor)
19"h (from floor)
15"h (from floor)
6"h (from floor)
1"h (from floor)

The following applications are possible.

Desk Edge | Side Desk Edge | Curved Desk Edge | Desk Edge Floor | Side Desk Edge Floor | Square Desk Edge (available on Smooth

planning pages

Used to outline the rules and restrictions that should be considered when planning with products.

PLANNING WITH PRIVACY SCREENS 54

PRIVACY SCREEN APPLICATIONS 55

panels overview

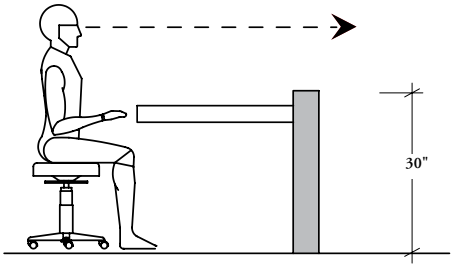

Panels are the basic building block for Leverage Workstations. The following is an overview of the basics of Leverage panels.

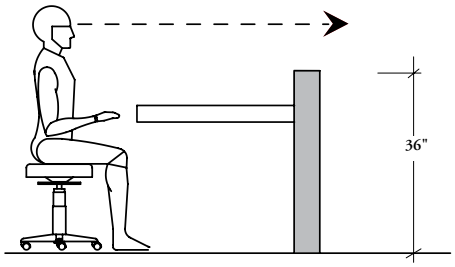

1. **Panel frames** are constructed of welded steel with an integrated baseboard (Conventional Panel) or have an inset baseboard enabling the baseboard to be covered to the floor (Floor-Flush Panel). Panels are 3" thick and panel widths are exact and are sized to eliminate dimensional increases (creep).
2. **Levelers** are included with the panel frame, and have an adjustment range of 2-1/2" to allow for consistency of panel height.
3. **Pass Through Holes** are punched into the frame structure to enable the passage of communication cables. Up to 60 Category 5 communication cables can be accommodated in each hole.
4. All panels include one **fixed horizontal rail** 36" above the floor. Additional rails are located at 21", 30" and 51" heights depending on the panel type selected allowing maximum planning flexibility.
5. **Segmented with 30" Rail Panels** allow for a cleaner aesthetic and element segmentation to align with worksurface height.
6. **Acoustic Elements** are the default elements for both inner and outer sides of the panel. A variety of optional element types are available including glass, accessory, whiteboard, metal, wood and laminate. Elements are available with a corridor width option which covers the vertical mounting channels, or a Floor-Flush option which extends to the floor when a baseboard is **not** required.
7. **Monolithic Elements** allow for a clean aesthetic.
8. **Electric and Communication** capabilities for panels are available above or below worksurface height.
9. Leverage offers a variety of **glass** options, either as an add-on to a single panel, as an add-on that spans over two panels, or as an add-on screen that also can span over two panels. Glass add-ons are available.
10. **Top trims** can span a single panel, or span across two panels to provide a clean aesthetic.

ergonomic heights

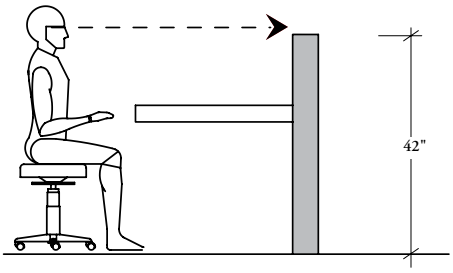

Leverage Panels are available in five heights to provide a variety of functions. The following outlines the benefits of each height.

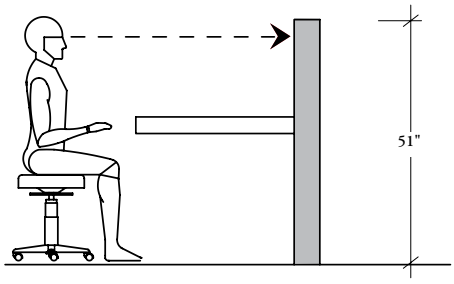

- 30" high panels allow for complete visual access and a clean above worksurface aesthetic
- Is ideal in benching type applications when above worksurface panel functions are **not** required

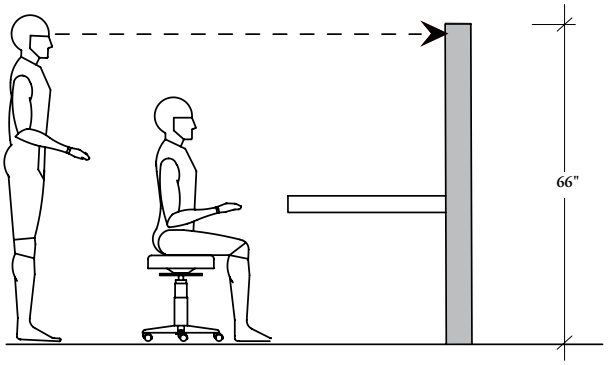

- 36" high panels allow for complete visual access while still allowing for above worksurface power access

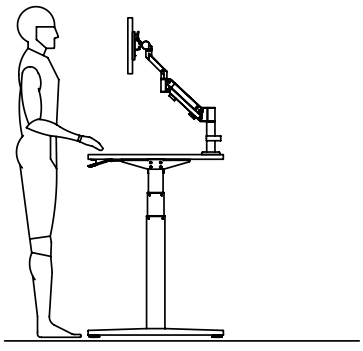

- 42" high panels allow for partial seated privacy
- Provides the ability to add 12" high elements for functional heights from 30" to 42"
- Meets LEED criteria for Daylight and Views

- 51" high panels allow for full seated privacy
- Provides greater ability to add a variety of element types

- 66" high panels allow for full seated privacy and partial standing privacy
- Provides the greatest ability to add a variety of element types
- Allows for the mounting of overhead cabinets

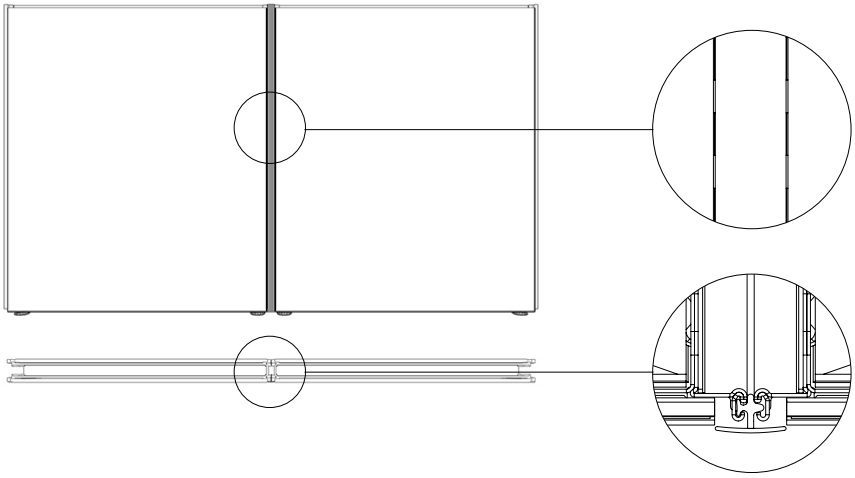

- Height-adjustable tables allow for efficient height-adjustability in personal workstations where no panels are used

panel gasket overview

Gaskets are used to conceal the slots between panels

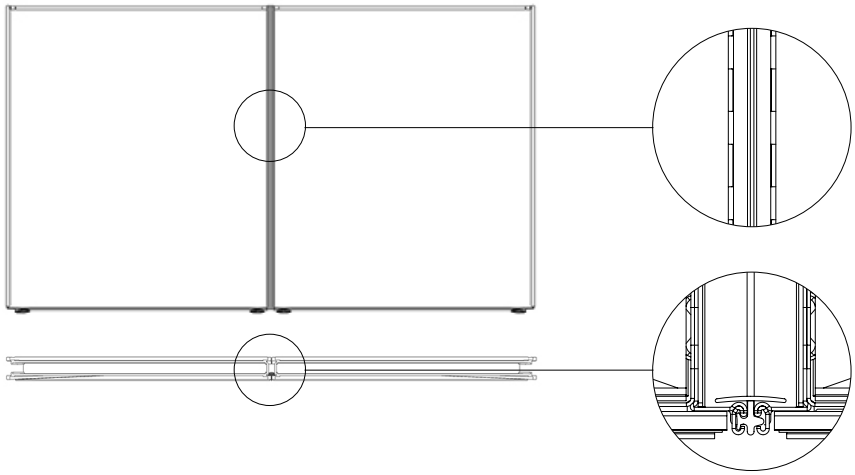

Below are applications that are used when using the Wide Gaskets (KGWP).

wide gasket with standard width element

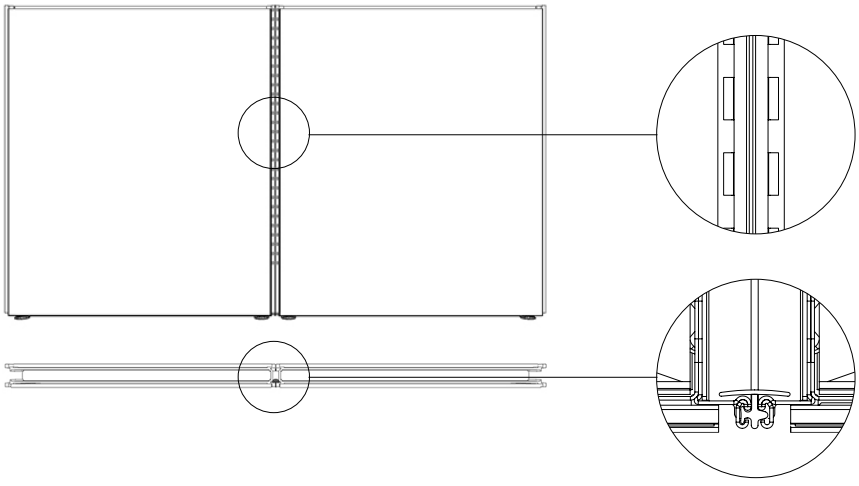

When using Standard Width Elements the Wide Gasket will conceal the slots between panels when used facing forward while still allowing for mounting brackets due to the flexible nature of the material.

wide gasket with corridor width element reversed

When using Corridor Width Elements the Wide Gasket will conceal the slots between panels.

wide gasket with standard width element reversed

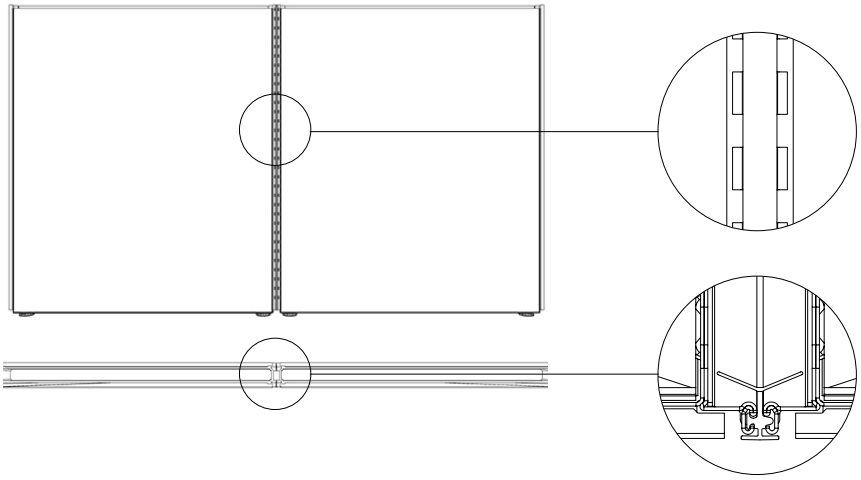

When using Standard Width Elements the Wide Gasket will **not** conceal the slots between panels if the gasket is reversed.

panel gasket overview (continued)

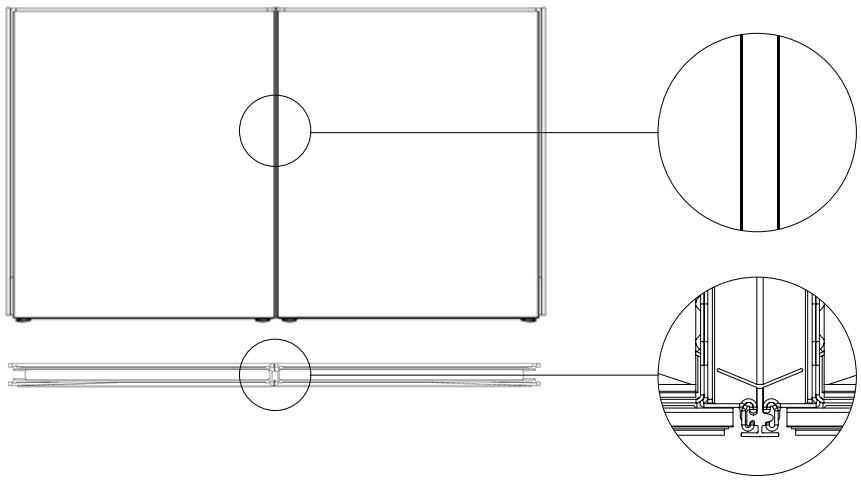

Below are applications that are used when using the Slim Gaskets (KGSA).

slim gasket with standard width element

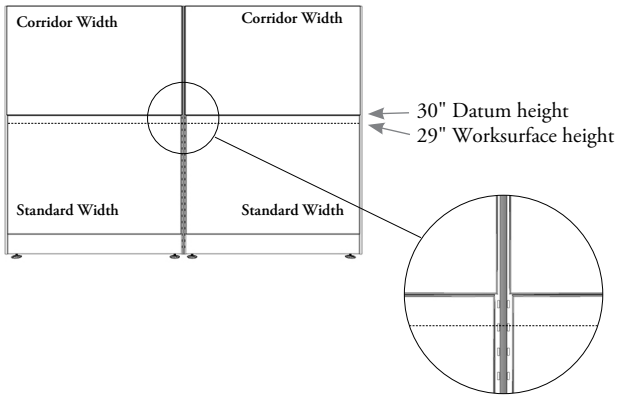

When using Standard Width Elements the Slim Gasket will **not** conceal the slots between panels, they will be exposed.

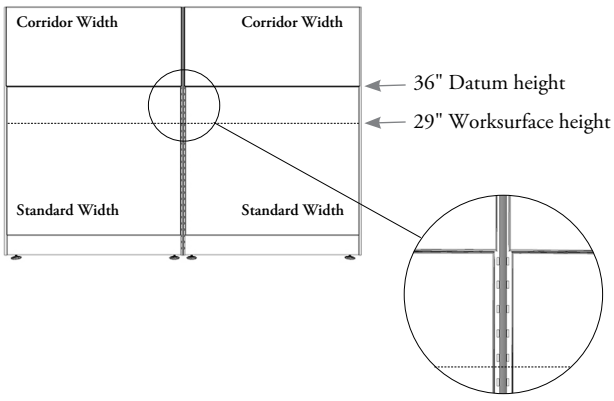

slim gasket with corridor width element

When using Corridor Width Elements the Slim Gasket will conceal the slots between panels.

It is recommended when planning with Slim Gaskets, which leave the slots exposed, that the Segmented Panel with 30" Rail (KP_L) be used, therefore minimizing the amount of slots that will be seen.

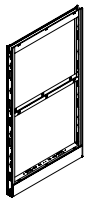

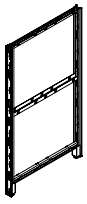

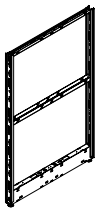

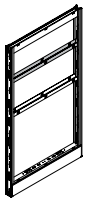

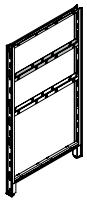

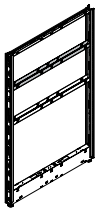

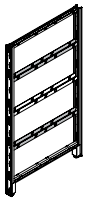

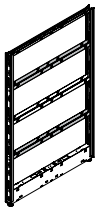

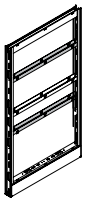

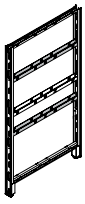

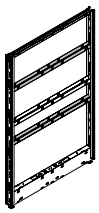

panel segmentation

The following outlines the panel types available.

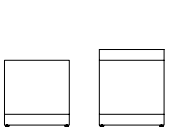

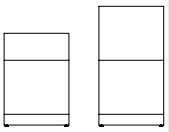

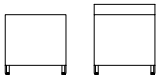

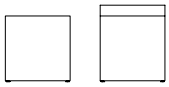

- Leverage offers four panel types: Standard (KP_T), Semi-Segmented (KP_S), Segmented (KP_C) and Segmented – 30" Rail (KP_L). Each provides varying levels of segmentation
- Each panel type 36" high and above is available with four panel frame styles: Conventional, Universal, Elevated, Floor-Flush
- The 30" high panel type is available with three panel frame styles: Conventional, Elevated and Floor-Flush
- All rails, (other than the 36" high fixed rail) can be relocated, therefore, the 21" high rail on a Segmented Panel (KP_C) can be moved to 30" high to convert the panel to a Segmented 30" high Rail (KP_L)

	Conventional and Universal Panels (Universal shown)	Elevated Panels	Floor Flush
Standard • fixed rail at 36" high			
Semi-Segmented • fixed rail at 36" high • 1 rail added			
Segmented • fixed rail at 36" high • 2 rails added • lower rail at 21" high			
Segmented - 30" high rail • fixed rail at 36" high • 2 rails added • lower rail at 30" high			

panel frame style summary of benefits

The following chart outlines the benefits of each Leverage Panel style.

panel style

	Conventional Frame (KPW)	Universal Frame (KPU)	Elevated Frame (KPE)	Floor-Flush Frame (KPX)
benefits				
Lay-In Cabling	✔ (6 Category 5 cables @ 60% fill)	✔ (40 Category 5 cables @ 60% fill)	✔ (6 Category 5 cables @ 60% fill)	✔ (6 Category 5 cables @ 60% fill)
Panel widths of 54" and 60"	✔	✔	n/a	n/a
Application of Symmetric Glass Element (KETW) and Symmetric Architectural Glass Element (KEGW) **at top level of panel**	✔	n/a	✔	✔
Application of Symmetric Glass Element (KETW) and Symmetric Architectural Glass Element (KEGW) **at other levels besides top level of panel**	✔	✔	✔	✔
Power and Communication Outlet at worksurface height on 36" high panel	✔	n/a	✔ *	✔
Elements to floor	n/a	n/a	n/a	✔
Benching Height Panel (30" high)	✔	n/a	✔	✔

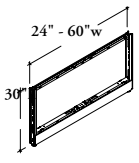

* No power at the base height

conventional & universal panel frame basics

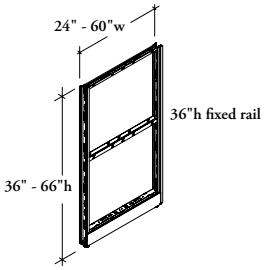

The following outlines the features of Conventional and Universal Panel Frames.

- Allows for a larger glass area in the top element because the Symmetrical Glass Element is used with it

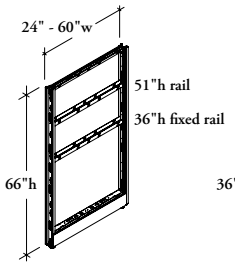

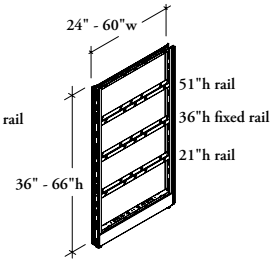

Standard Panel
30" High (KPWT)

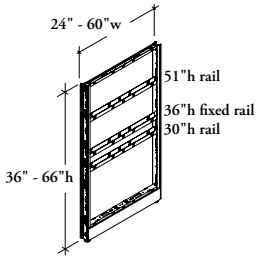

Standard Panel
(KPWT)

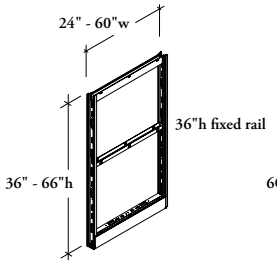

Semi-Segmented Panel
(KPWS)

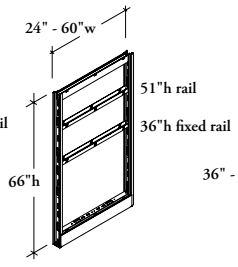

Segmented Panel
(KPWC)

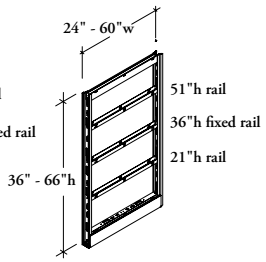

Segmented Panel
30" High Rail
(KPWL)

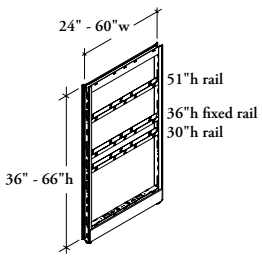

Standard Panel
(KPUT)

Semi-Segmented Panel
(KPUS)

Segmented Panel
(KPUC)

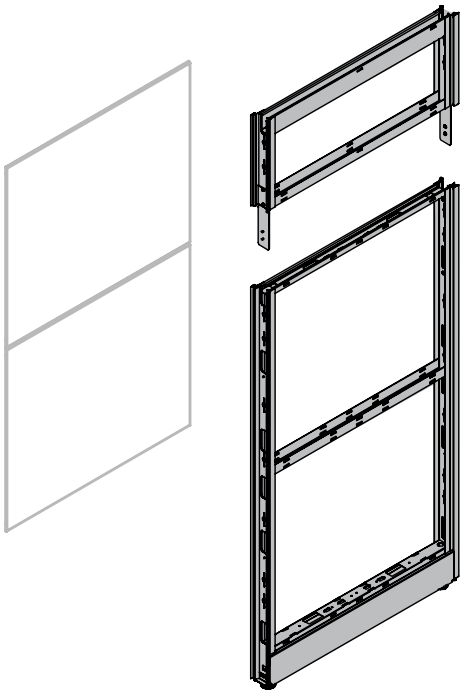

Segmented Panel
30" High Rail
(KPUL)

conventional & universal panel frame basics (continued)

Conventional - Standard Panel (KPWT)

Elements mount into the slots in the frame and are available to match each segment size or monolithic.

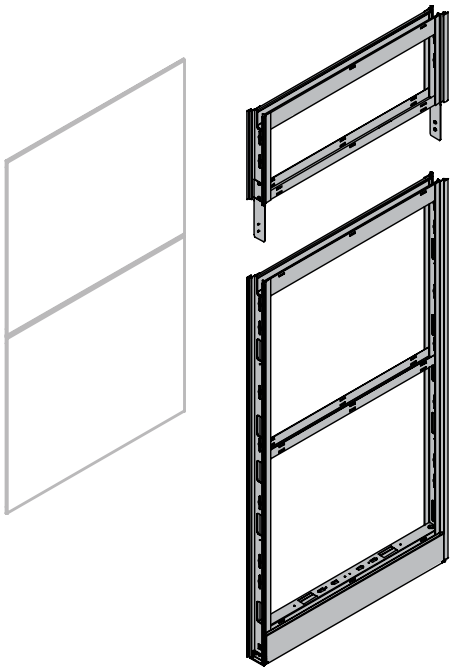

- Panel Add-Ons (KPO) can be added to the top of Standard and Universal Panels
- Cable lay-in capacity of 6 category 5 cables at 60% fill
- The thinner lay-in cable allows for a larger symmetric glass area in the top section
- A structural **horizontal rail** is always fixed at 36" from the floor (except for the 30" high panel)

Finishes

Frame and metal top trim are available in Foundation and Mica colors

Universal - Standard Panel (KPUT)

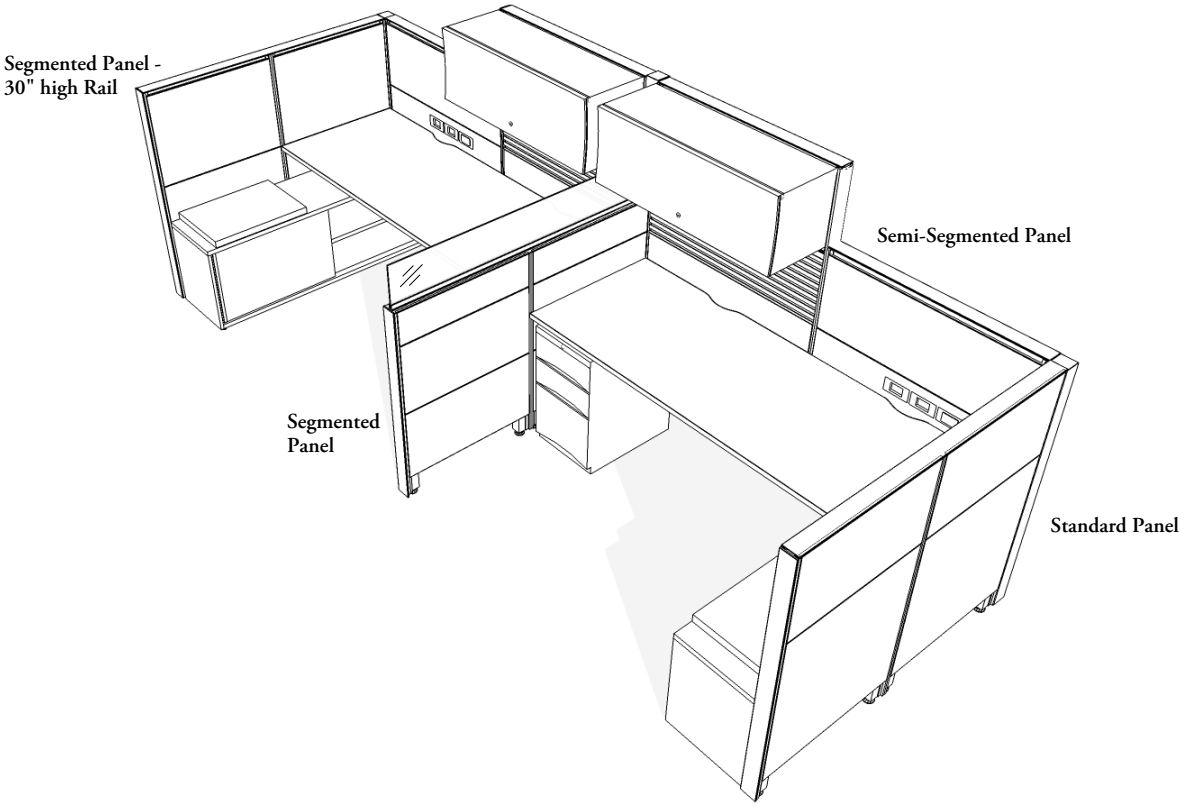

Elements mount into the slots in the frame and are available to match each segment size or monolithic.

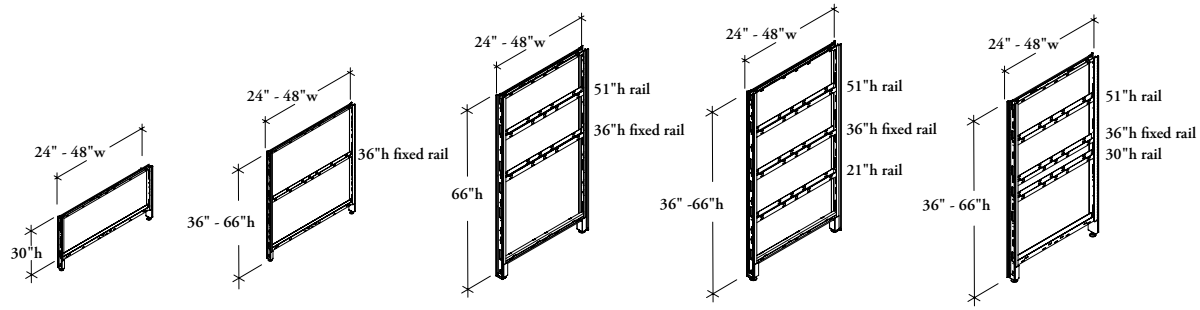

- The glass is used to fit with the 3" high capacity lay in trough
- A structural **horizontal rail** is always fixed at 36" from the floor

elevated panel frame basics

The following outlines the features of Elevated and Panel Frames.

Standard Panel 30" High (KPET)

Standard Panel (KPET)

Semi-Segmented Panel (KPES)

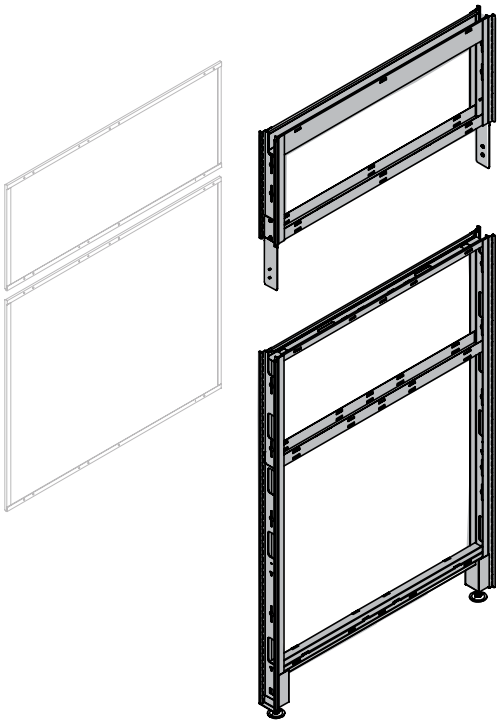

Segmented Panel (KPEC)

Segmented Panel 30" High Rail (KPEL)

elevated panel frame basics (continued)

Elevated - Standard Panel (KPET)

Elements mount into the slots in the frame and are available to match each segment size or monolithic.

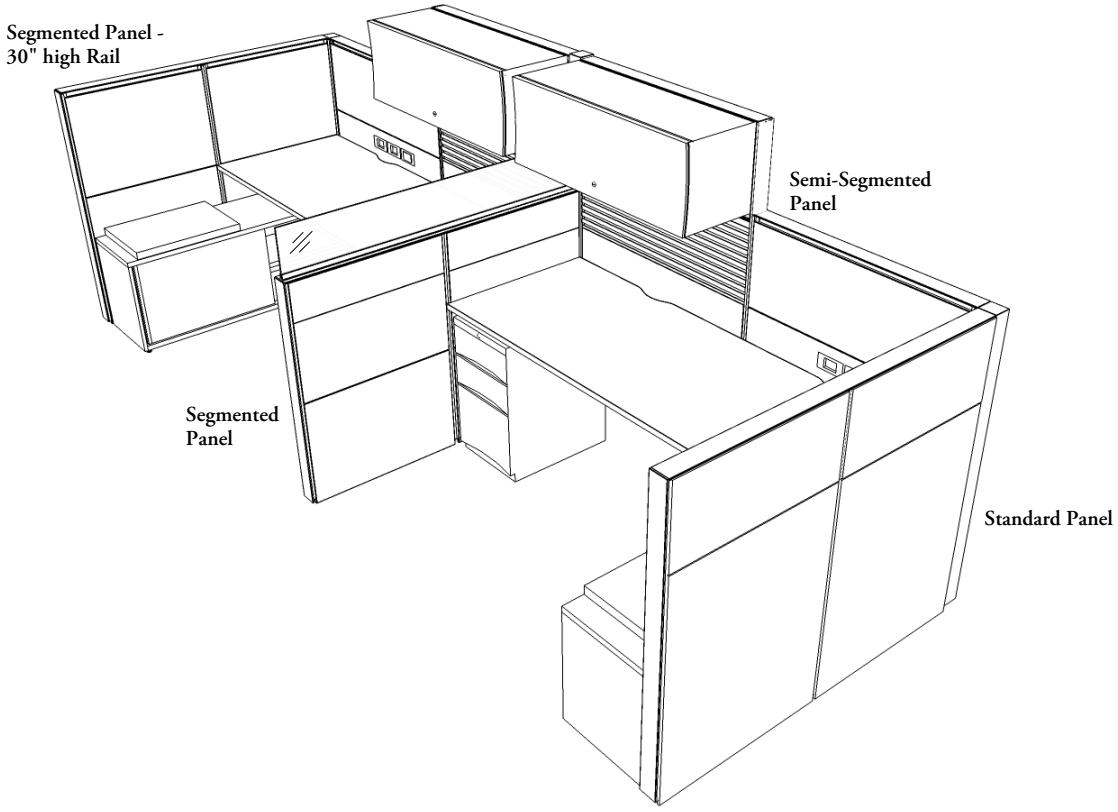

- Panel Add-Ons (KPO) can be added to the top of Standard and Universal Panels
- Cable lay-in capacity of 6 category 5 cables at 60% fill
- The thinner lay-in cable allows for a larger symmetric glass area in the top section
- A structural **horizontal rail** is always fixed at 36" from the floor (except for the 30" high panel)

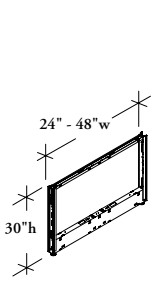

Finishes

Frame and top trims are available in Foundation and Mica colors

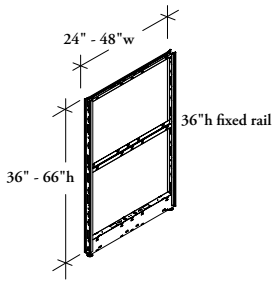

floor-flush panel frame basics

The following outlines the features of Floor-Flush Panel Frames.

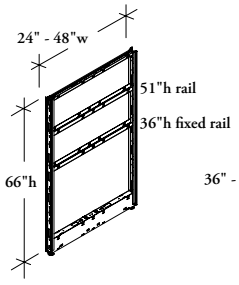

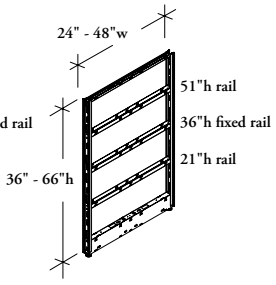

Standard Panel
30" High (KPXT)

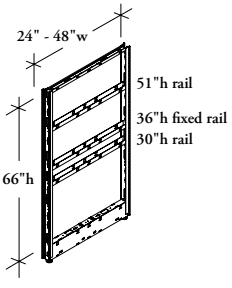

Standard Panel
(KPXT)

Semi-Segmented
Panel (KPXS)

Segmented Panel
(KPXC)

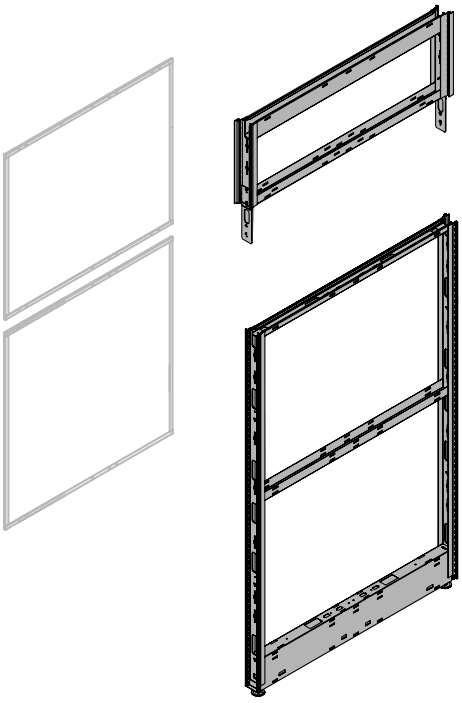

Segmented Panel
30" High Rail
(KPXL)

floor-flush panel frame basics (continued)

Floor-Flush - Standard Panel (KPXT)

Elements mount into the slots in the frame and are available to match each segment size or monolithic.

- Panel Add-Ons (KPO) can be added to the top of Standard and Universal Panels
- Cable lay-in capacity of 6 category 5 cables at 60% fill
- The thinner lay-in cable allows for a larger symmetric glass area in the top section
- A structural **horizontal rail** is always fixed at 36" from the floor (except for the 30" high panel)

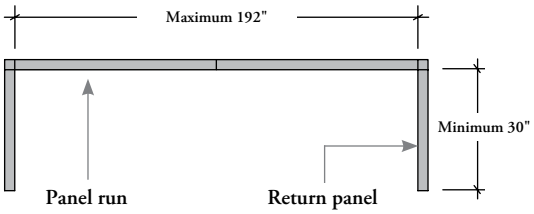

Finishes

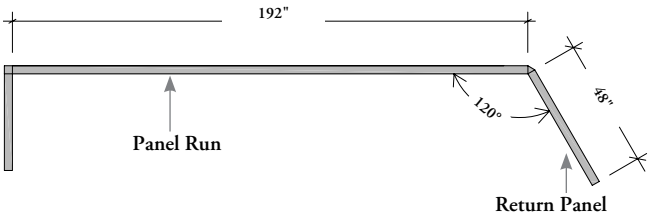

Frame and metal top trim are available in Foundation and Mica colors

planning with conventional/universal panel frames

The following should be considered when selecting Conventional and Universal Panels.

in-line planning (without worksurface for support)

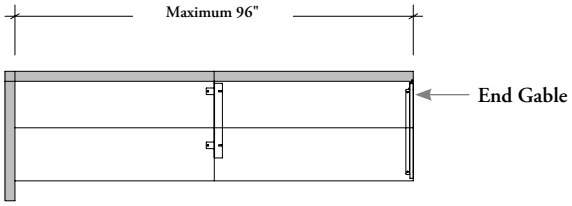

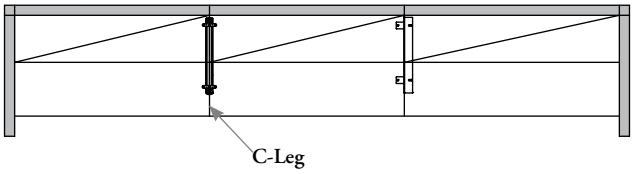

- The maximum panel run that can be achieved before a return panel is required is 192"
- Return panels must be a minimum of 30" wide and be the same height as the run being supported

For 120˚ planning the minimum width of return panel required is 48"

in-line planning (with worksurface for support)

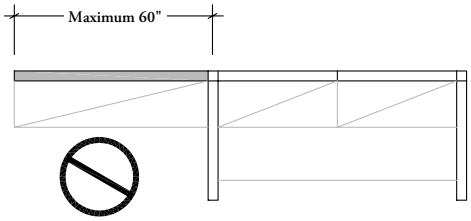

- The maximum panel run that can be achieved when worksurfaces are supporting the panels and there is no additional floor support is 96"
- An End Gable or return panel can be used

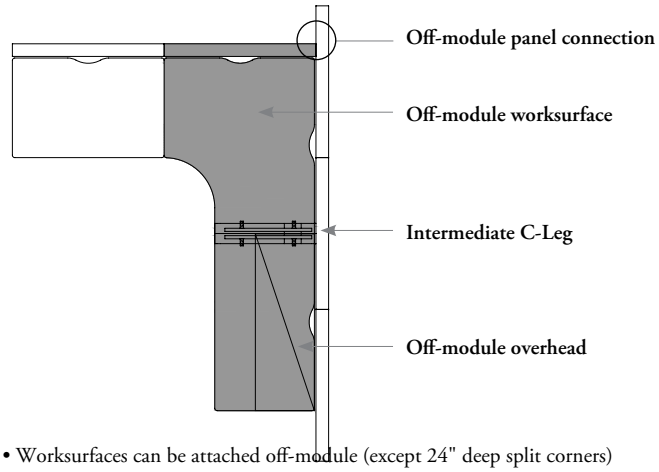

- For panel runs between 120" and 180" with worksurfaces or mounted storage cabinets mounted parallel to the panel, one of the interior floor supports must be a C-Leg (CL29)
- All worksurface runs require additional floor support every 72"

unsupported panels

- A panel run without additional support, extending beyond an end condition **cannot** be more than one panel width, or a maximum of 60" wide
- No mounted storage is allowed on the unsupported panel

off-module planning

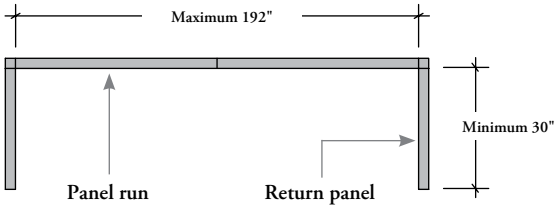

- Worksurfaces can be attached off-module (except 24" deep split corners)
- Must have segmented elements below surface to use Intermediate C-Leg
- An Intermediate C-Leg is required for mounting worksurfaces off-module
- Certain overheads can also be attached off-module. (See *Filing & Storage: Application Guide* for details)

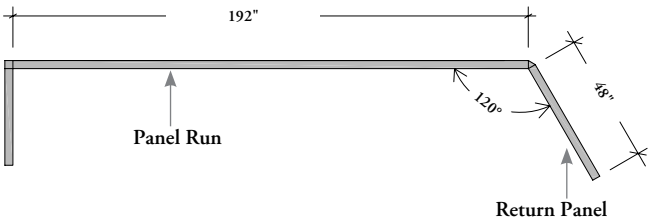

planning with elevated panel frames

The following should be considered when selecting Elevated Panels.

in-line planning (without worksurfaces)

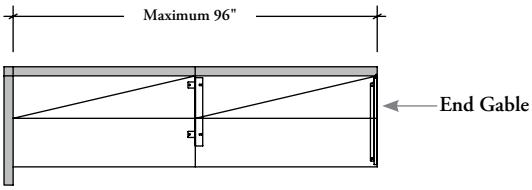

- The maximum panel run that can be achieved before a return panel is required is 192"
- Return panels must be a minimum of 30" wide and be the same height as the run being supported

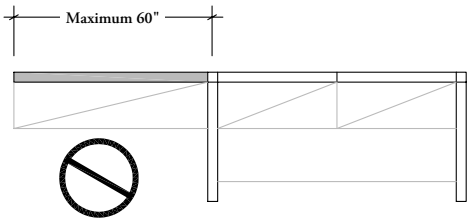

For 120° planning the minimum width of return panel required is 48"

in-line planning (with worksurface for support)

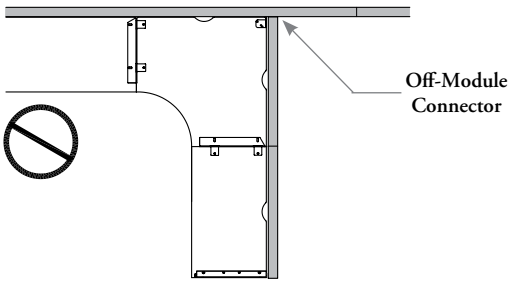

- The maximum panel run that can be achieved when worksurfaces are supporting the panels and there is no additional floor support is 96"
- An End Gable or return panel can be used

unsupported panels

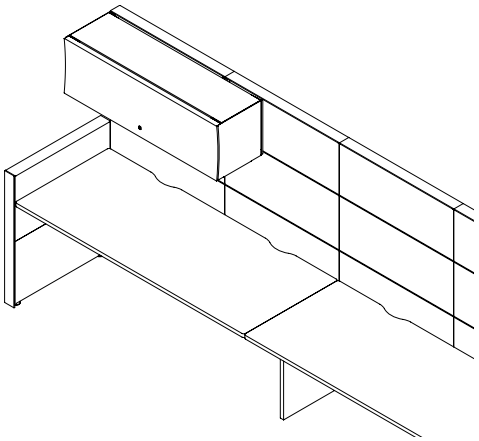

- A panel run without additional support, extending beyond an end condition **cannot** be more than one panel width, or a maximum of 60" wide
- No mounted storage is allowed on the unsupported panel

off-module planning

- Panel-to-panel connections and off-module worksurface mounting is **not** permitted with elevated panels

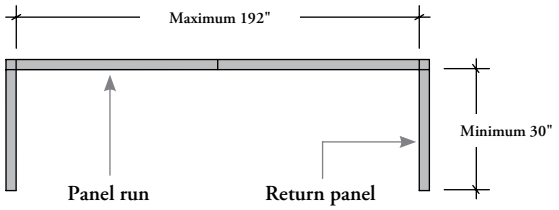

- Overheads are permitted by using the off-module overhead option

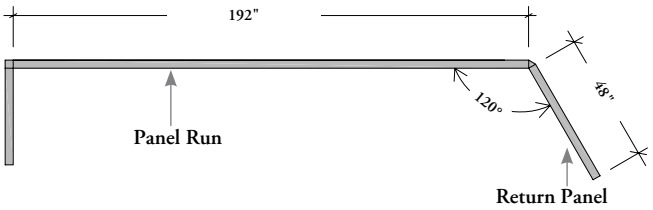

planning with floor-flush panel frames

The following should be considered when selecting Floor-Flush Panels.

length of panel runs (without worksurface for support)

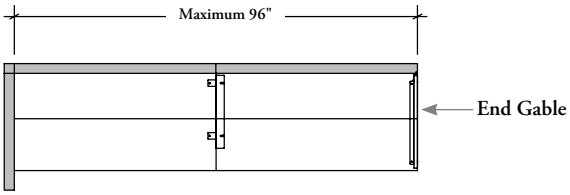

- The maximum panel run that can be achieved before a return panel is required is 192"
- Return panels must be a minimum of 30" wide and be the same height as the run being supported

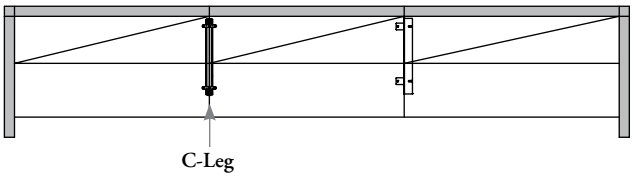

- For 120° planning the minimum width of return panel required is 48"

in-line planning (with worksurface for support)

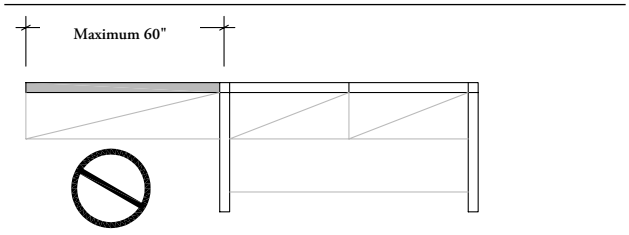

- The maximum panel run that can be achieved when worksurfaces are supporting the panels and there is no additional floor support is 96"
- An End Gable or return panel can be used

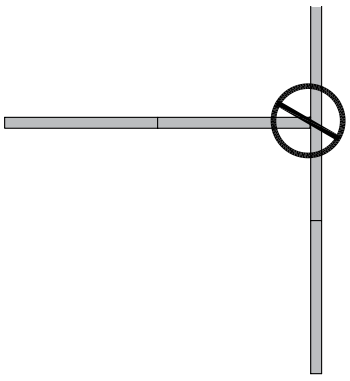

- For panel runs longer than a 120" to a maximum of 180" and worksurfaces or mounted storage cabinets mounted parallel to the panel run, one of the interior supports must be a C-Leg
- Longer panel runs than 180" require additional return panels

unsupported panels

- A panel run without additional support, extending beyond an end condition **cannot** be more than one panel width, or a maximum of 60" wide
- No mounted storage is allowed on the unsupported panel

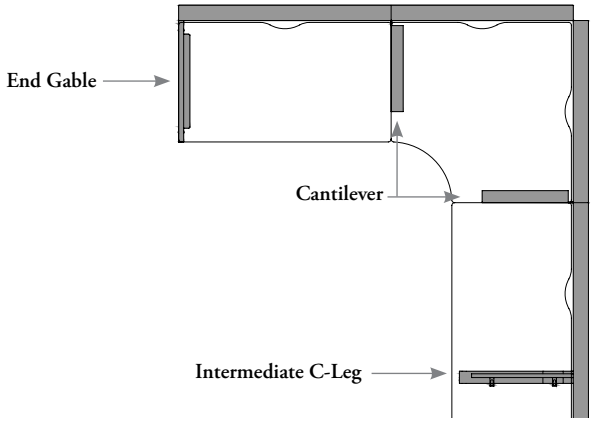

off-module planning

- Floor-Flush Panels and Elements do **not** accept off-module panel-to-panel adapters

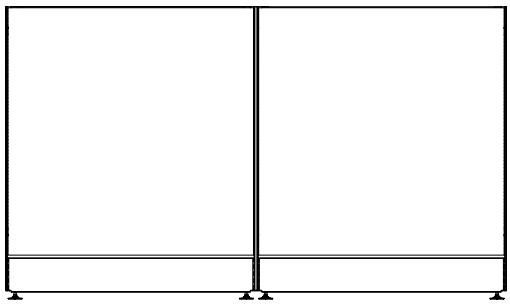

planning with floor-flush panel frames (continued)

floor-flush elements

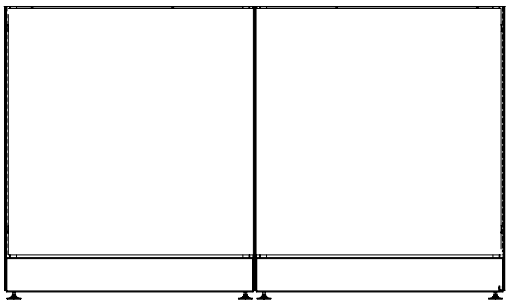

• Floor-Flush Elements standard width do **not** obstruct on- or off-module supports

planning with corridor width elements

Standard

Corridor

• When planning with corridor width elements where metal baseboards are required, it is recommended that the Floor-Flush Panel be used
• Conventional or Universal Panels will always have the slots exposed on the base
• The Floor-Flush Panel allows the option to specify a corridor width baseboard

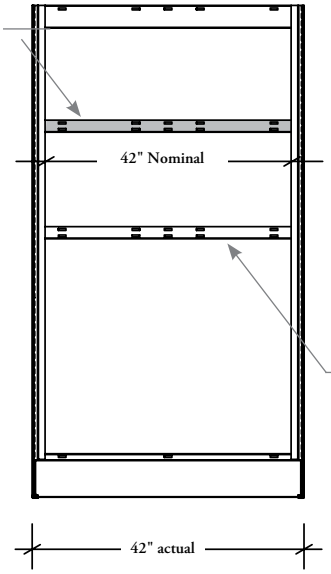

panel rail and panel add-on basics

The following should be considered when planning with Panel Add-Ons.

- The Panel-Add-On (KPO) is available in heights of 9", 15", 24" and 30", panels can reach a maximum of 81" high
- The Panel-Add-On (KPO) **cannot** be used on a 30" high panel

panel rail

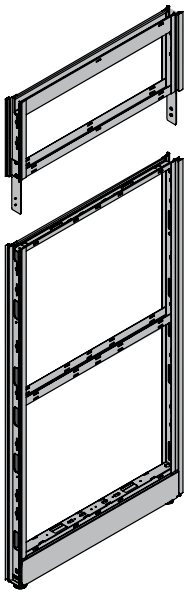

If mounted at 42" datum height a Panel Rail Mounting Kit - 42" Datum Height (KPLD42) must be specified.

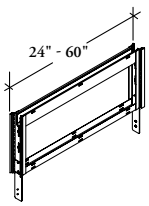

When specifying a Panel Rail, the Panel Rail width dimension code must match the width of the corresponding Panel.

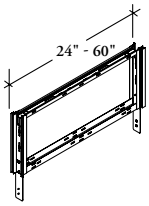

The 36" rail is fixed in all panel types.

panel add-on

With 3" Lay-In Channel

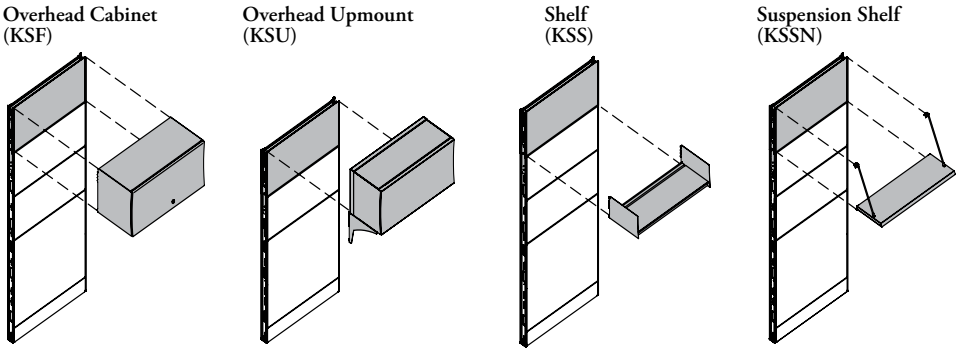

Symmetric with Cable-Way

Panel Add-On (KPO)

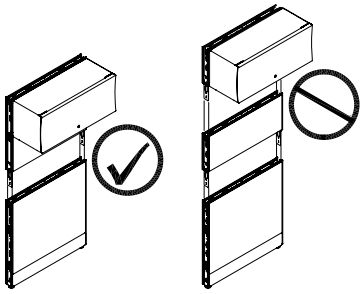

- Can be applied to the top of same width panels to increase overall height and privacy, allow light transmission or provide a vertical surface for mounted storage
- Can only be stacked to 81" high
- Only one panel add-on can be used above an existing panel if load bearing is required
- Two 15" high panel add-ons can be stacked together
- See compatibility charts to determine element options
- **Cannot** be used on 30" high panels
- **With 3" Lay-In Channel (KPOF)** has the capacity to handle 40 category 5 communication cables at a 60% fill rate
- **Symmetric with Cable-Way (KPOW)** has a 1" deep cable way that can handle up to 10 category 5 communication cables (or 6 category 5 cables at a 60% fill rate)
- Panel Add-On (KPO) can only span a single panel width

planning with panel add-ons

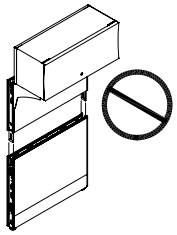

panel add-ons

Overhead Cabinets (KSF/KSU), Shelf (KSS) and Suspension Shelf (KSSN) can be applied over the Panel Add-On (KPOF) and (KPOW). See the *Mounted Storage* section for details.

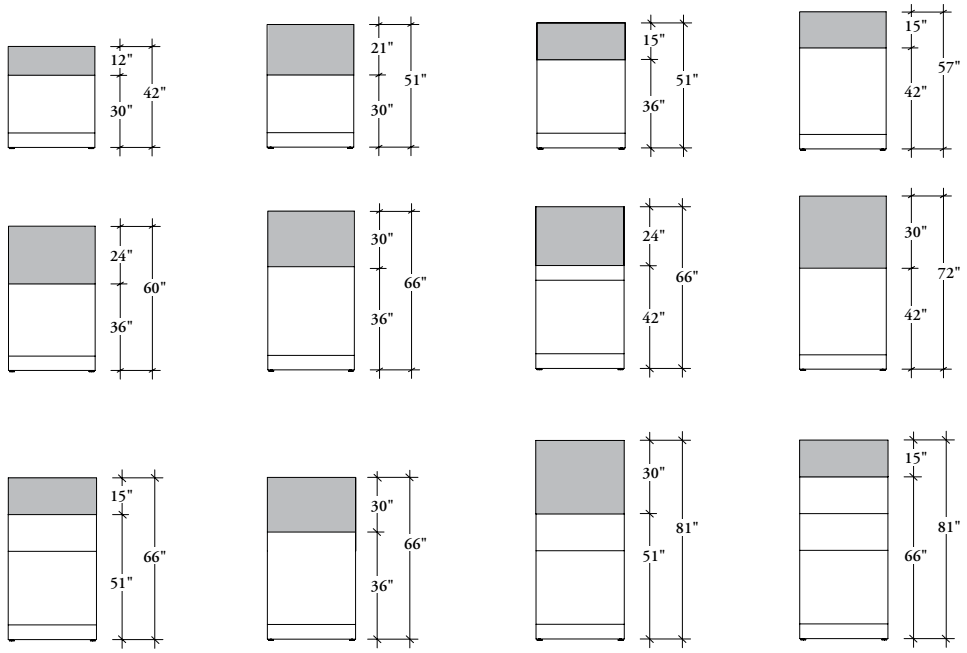

Two 15" high Panel Add-Ons can be stacked together, however only one Panel Add-On can be used above an existing panel when overhead storage is used.

Overheads or up-mounted overheads **cannot** be mounted on to 30" high panels with add-ons.

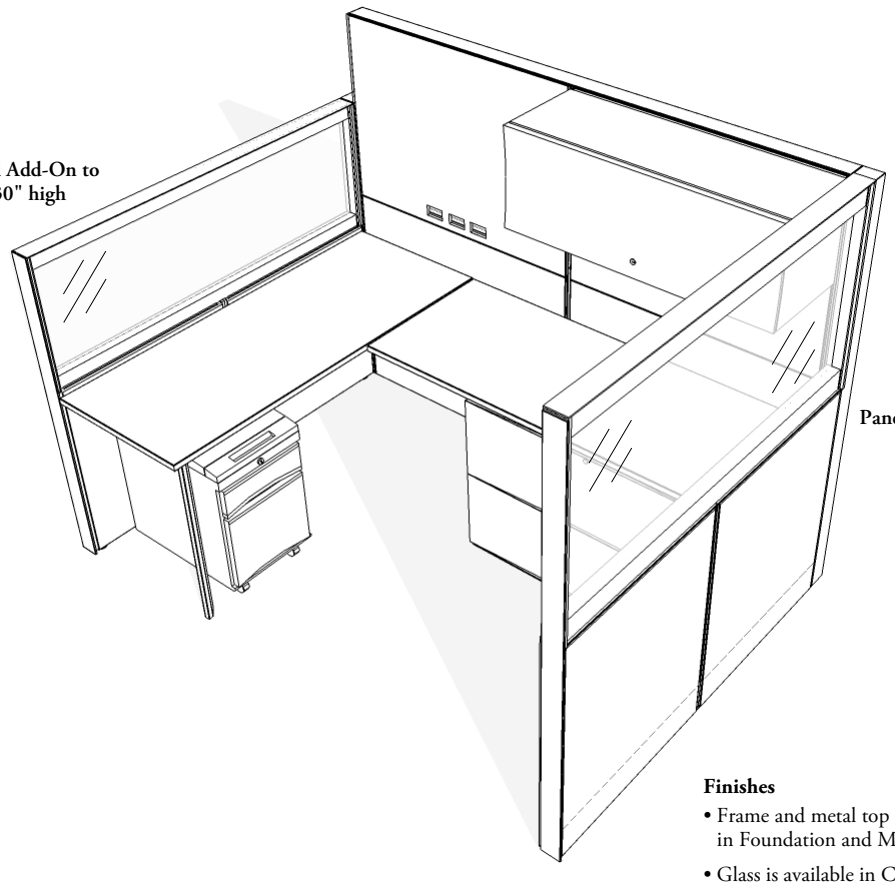

panel add-ons available heights

The following outlines the recommended heights of add-ons to achieve standard datum heights.

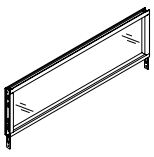

panel add-ons – glass basics

Leverage provides a variety of Glass Panel Add-On options that span more than one or two panels allowing for a more open feel to a workstation.

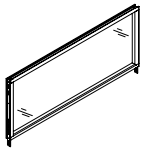

Finishes

- Frame and metal top trim are available in Foundation and Mica colors
- Glass is available in Clear and Frosted Standard Glass

Panel Add-On, Single Glass (KPOGS) or Double Glass (KPOGD)

- Spans across the top of one or two Leverage panels to provide large spans of uninterrupted glazing
- Available with single or double glazing in standard and specialty glass options
- Available in 15", 24", 30" high and 24"-96" wide
- Trims must be specified separately
- Is **not** load bearing, and **cannot** be stacked on top of other add-on windows
- Does **not** provide cable lay-in capabilities
- Does **not** affect existing cable routing in the panel that it is mounted to
- **Cannot** be used beside a Leverage door

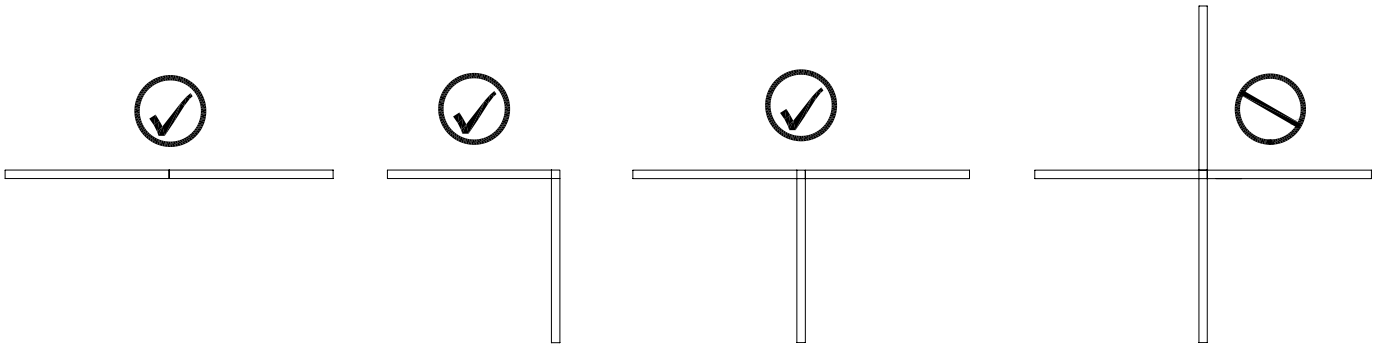

Panel Add-On to KP_30" high panel frames, Single Glass (KPOGBS) or Double Glass (KPOGD)

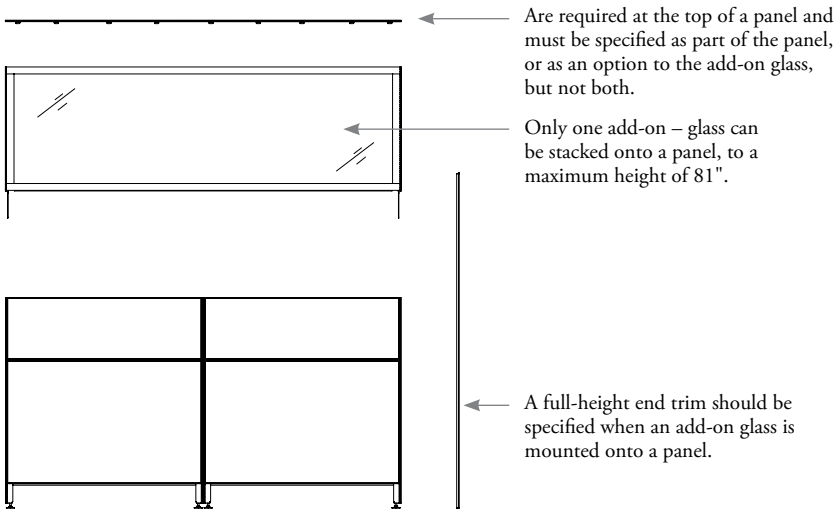

- Same as Panel Add-On, Single Glass or Double Glass, but used only on a 30" high panel frame
- Available in 12", 21", 36" high and 24"-96" wide
- Additional brackets are required for securing add-on panels to each other in straight line or at a corner condition when mounted on a 30" high panel. See the *Panel Connections & Trims* section for more details

planning with panel add-ons – glass

The following should be considered when planning with Panel Add-Ons – Glass.

Panel Add-Ons – Glass can be used in straight runs, two-way connections, three-way connections, but **not** at four-way connections.

Are required at the top of a panel and must be specified as part of the panel, or as an option to the add-on glass, but not both.

Only one add-on – glass can be stacked onto a panel, to a maximum height of 81".

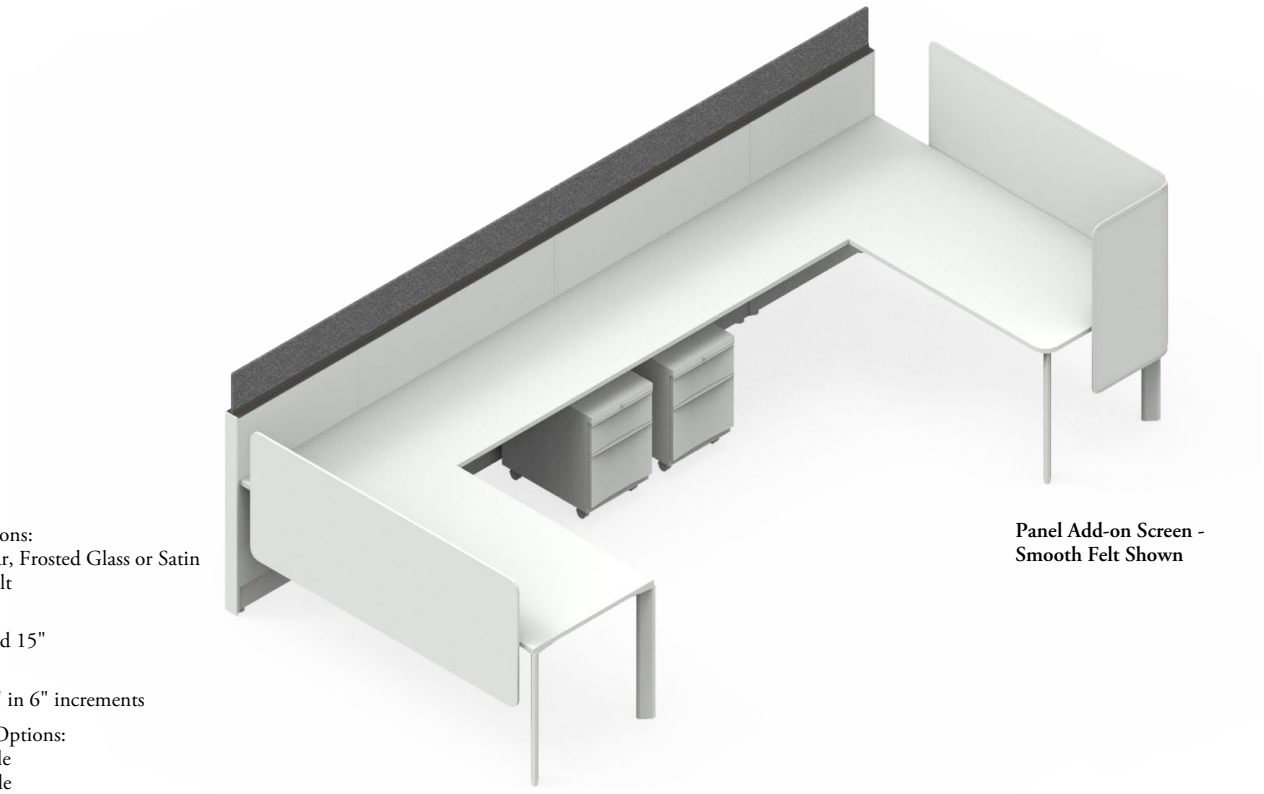

A full-height end trim should be specified when an add-on glass is mounted onto a panel.

When Panel Add-On Screen – Glass are used on a 30" high panel with a return panel, the return panel can be any height from 30" or higher however, the run **cannot** support overheads.

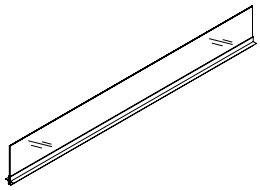

panel add-on screen basics

The Panel Wall Add-On Screen is a slim frameless add-on screen that provides casual space division to the top of a panel.

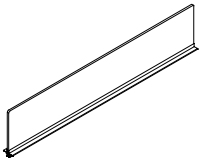

Panel Add-on Screen - Smooth Felt Shown

- Finish Options:
  - 6mm Clear, Frosted Glass or Satin
  - Smooth felt
- Heights:
  - 9", 12" and 15"
- Widths:
  - 24" to 96" in 6" increments
- Mounting Options:
  - On module
  - Off module
  - Spanning two panels
  - Cannot span a 180˚ spacer or 90˚ connection
- Compatibility Kit available
  - Used with Leverage panels ordered prior to June 28, 2011

Panel Add-On Screen – Glass (KPGA)

- Applications:
  - Both Notched (N)
  - Both Extended (B)
  - One Side Extended (E)
  - Notched and Extended (F)
  - One Side Notched (K)
  - Both Standard (S)
- Glass Finishes:
  - Clear
  - Frosted glass
  - Satin
- Support Frame Finish:
  - Foundation
  - Mica

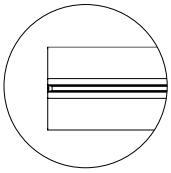

Panel Add-On Screen - Smooth Felt (KPZA)

- Applications available:
  - Both Extended (B) - Only available on Standard Square
  - One Side Extended (E)
  - Both Standard (S)
- Corner Condition:
  - Radius/Square
  - Square/Square
  - Radius/Radius
- Felt Finish:
  - River Rock
  - Pewter
  - Lunar
  - Admiral Blue
- Support Frame Finish:
  - Foundation
  - Mica
  - Accent

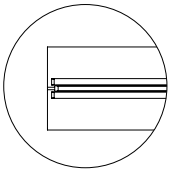

planning with panel add-on screens

The following should be considered when planning with Panel Add-On Screen – Glass and Panel Add-On Screen - Smooth Felt.

Panel Add-On Screens are available in three different end styles, Standard, Extended and Notched, to accommodate corner conditions and differences in panel heights.

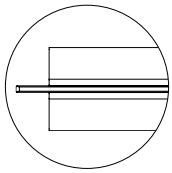

No Extension or Notch (Standard)

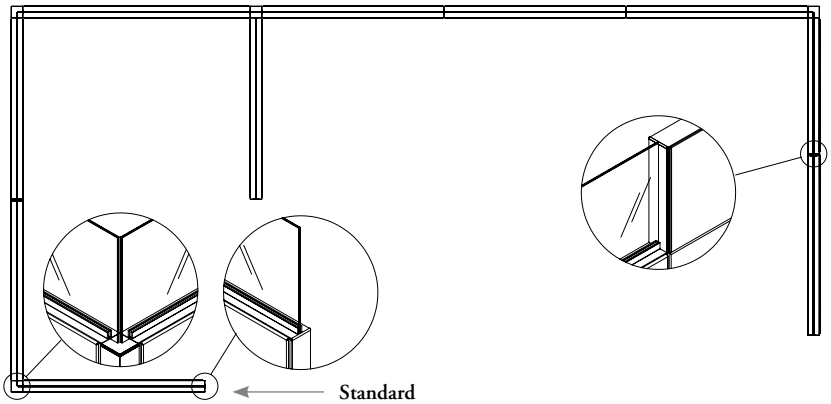

Notched

- There is no notched option for Panel Add-on Screen - Smooth Felt

Extended

Extended

- The actual screen extends past the trim so that it can overlap a 90 degree or 180 degree connector for a clean uninterrupted aesthetic
- Can be extended on one or both sides

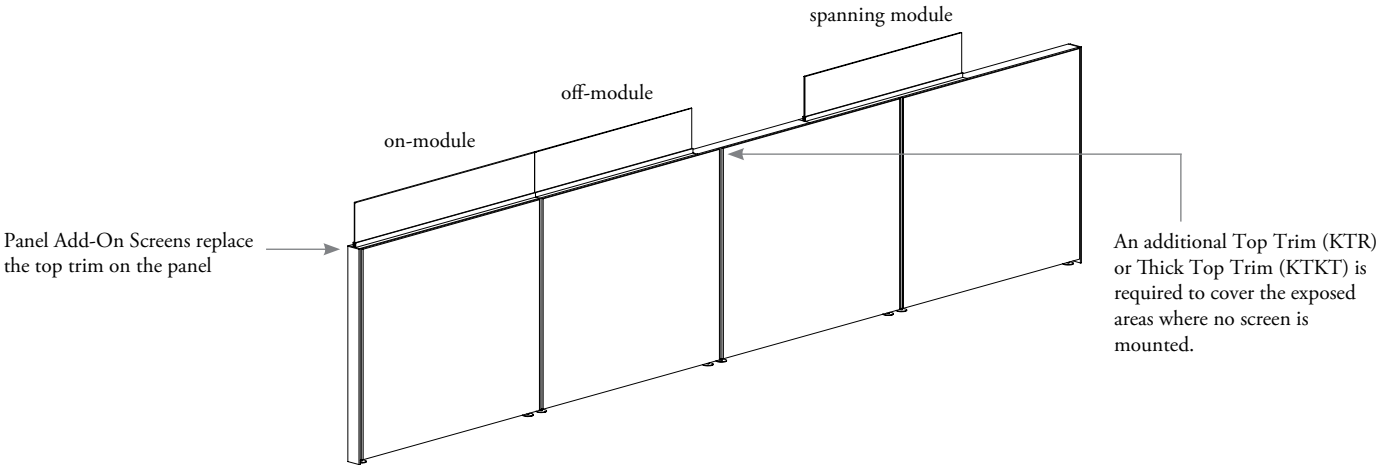

Standard

- The glass or smooth felt is the same width as the trim

Notched

- The actual screen is shorter than the trim to allow for intermediate trims in change of height conditions
- This only applies to glass, there is no notched version for smooth felt

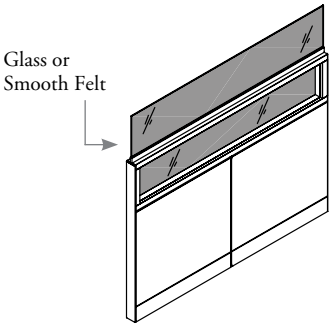

Add-on screens can be used either on-module or off-module and with standard or thick top trims.

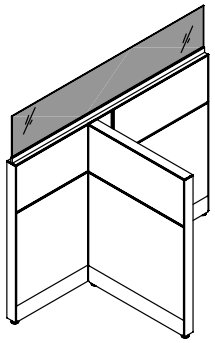

planning with panel add-on screens (continued)

Add-on screens **cannot** be used in the following applications:
- When Universal Panel Frames are used
- On panels with Privacy Screens
- Where any type of wood trim is used

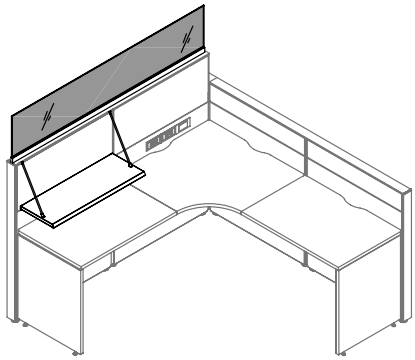

The following applications are not possible with Panel Add-on Screens - Glass or Panel Add-on Screens - Felt.

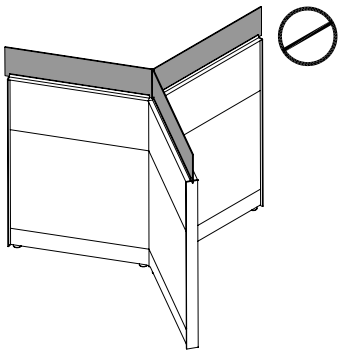

Cannot be mounted onto Panel Add-On Glass, Single Panel Add-On Glass, Double.

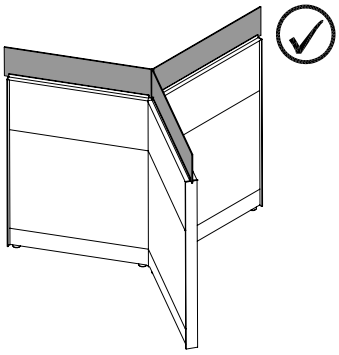

Cannot span across two panels that have a same height panel attached off-module.

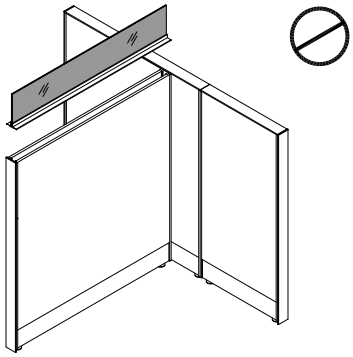

Cannot be used when a Suspension Shelf is mounted to the panel.

Extended applications cannot be used with 120˚ planning.

Standard style must be used on both ends.

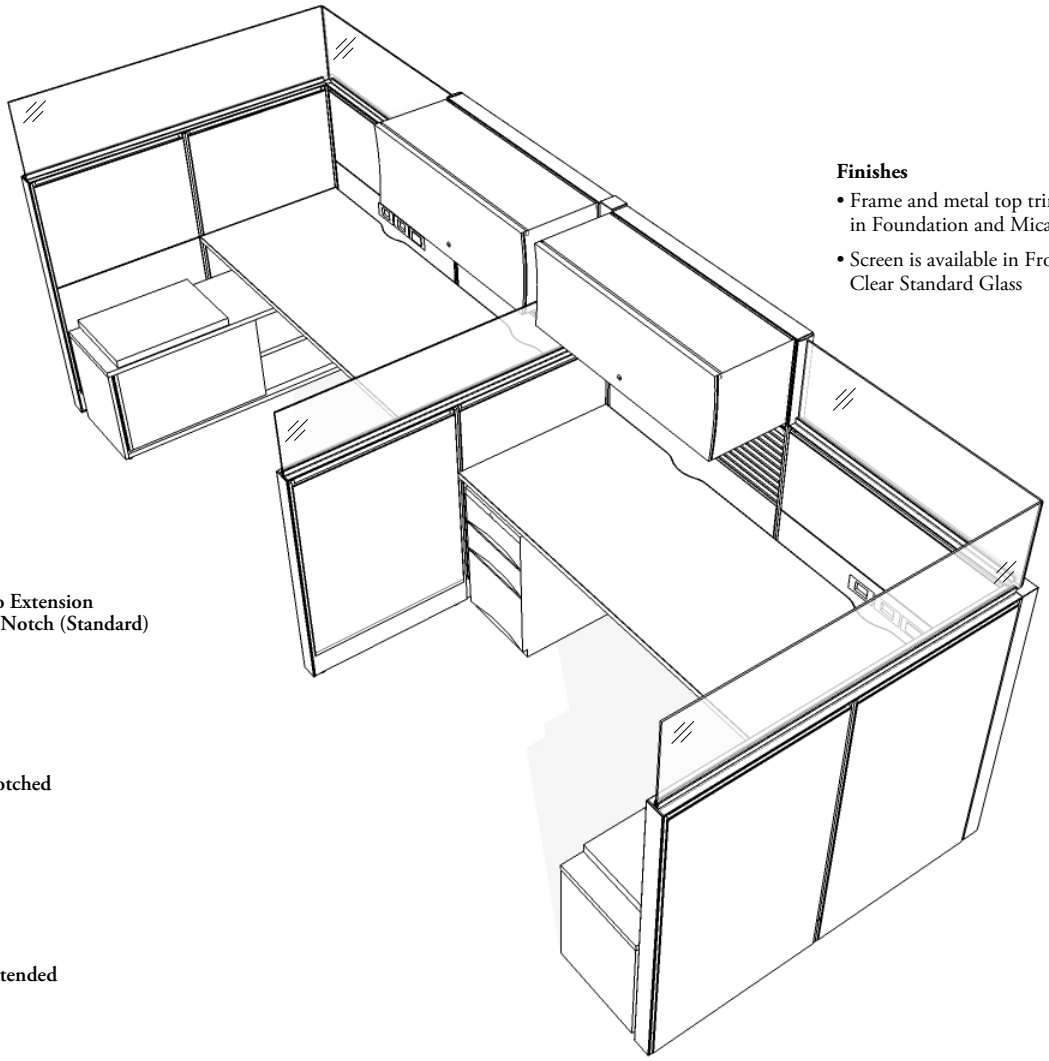

An Add-On Screen **cannot** be mounted onto the off-module panel.

panel add-on screen – glass basics

Panel Add-On Screens provide a frameless alternative to Panel Add-Ons - Glass to provide a lighter aesthetic.

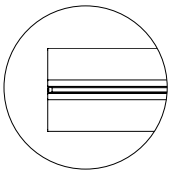

- Panel Add-On Screen – Glass is available with Standard or Thick Top Trim and can be mounted on-module, semi off-module, or span across two panels. Thick Top Trim **cannot** be mounted off-module
- **Cannot** be used on Panels frames (KPU_)

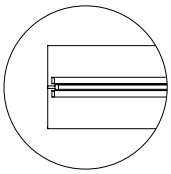

Finishes

- Frame and metal top trim are available in Foundation and Mica colors
- Screen is available in Frost, Satin and Clear Standard Glass

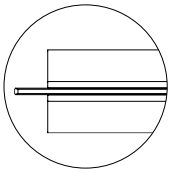

Glass options available:

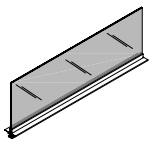

No Extension or Notch (Standard)

Notched

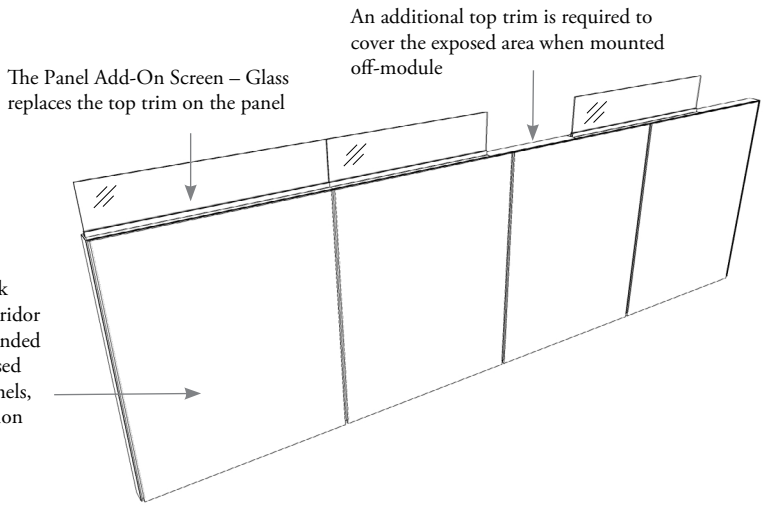

Extended

Panel Add-On Screen – Glass (KPGA)

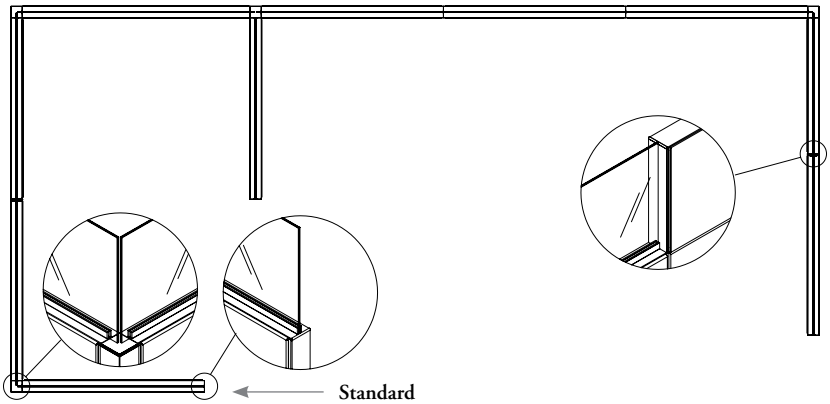

- Provides a frameless alternative to a Panel Add-On, Glass
- Available in clear or frosted 6mm glass
- Available with a Standard or Thick Trim (see the *Panel Connections & Trims* section for more details)
- Can be used on a single panel, or span across two panels
- Replaces the top trim of the panel
- Available with extended and notched options to allow for a clean fit at intermediate trims and 90˚ and 180˚ connections
- **Cannot** be mounted to panels with Lay-In Channel (frame styles U.)
- **Cannot** be used on a Panel with a Privacy Screen.
- When installed on a non-high capacity panel frame (frame style W, E, X) cables **cannot** be routed through the top of the panel
- If the Panel Add-On Screen – Glass (KPGA) is to be installed on a panel manufactured prior to June 28, 2010, and compatibility kit will be required, and is considered an option – Included (1)
- Can be mounted on -or off-module, but if the off-module is used, a top trim must be used to cover the portion of the panel **not** covered by the screen
- Thick Top Trim does not allow for off-module applications (see the *Panel Connections & Trims* section for more details)
- Most variations include Alignment Clip
- For Option B, may be required for alignment, based on application
- **Cannot** be specified in combination with any wood panel top trims, wood end trims, wood intermediate trims or wood panel corner connectors

planning with panel add-on screens – glass

When planning with the Thick Top Trim and monolithic corridor width elements, it is recommended that segmented elements be used on the opposite side of the panels, this allows for ease of installation and reconfiguration.

Panel Add-On Screen – Glass is available in three different end styles, Standard, Extended and Notched, to accommodate corner conditions and differences in panel heights.

Extended

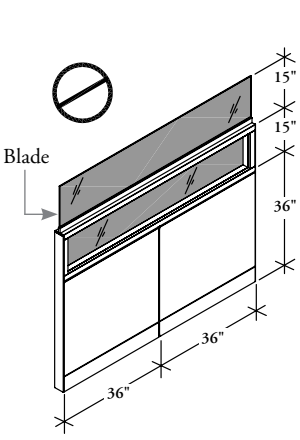

- The glass extends slightly past the trim so that the glass can meet at 90˚ and 180˚ connections
- Can be extended on one or both sides

Notched

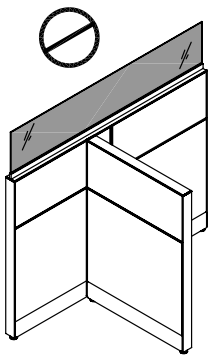

- Have slightly shorter glass than the trim to allow for intermediate trims in change of height conditions

Standard

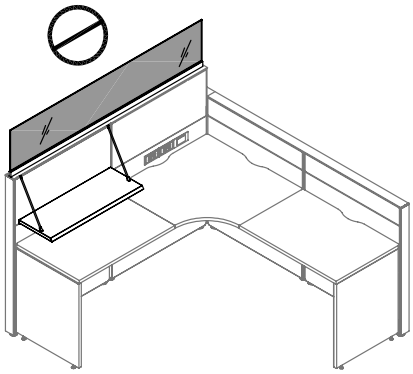

- The glass is the same width as the trim

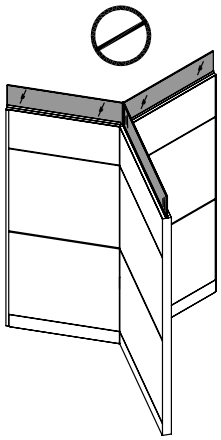

Cannot be mounted onto the panel add-on glass, single or double glass.

Cannot span over two panels that are connected off-module to a third panel of the same height.

Cannot be used when a Suspension Shelf (KSSN) is mounted to the panel.

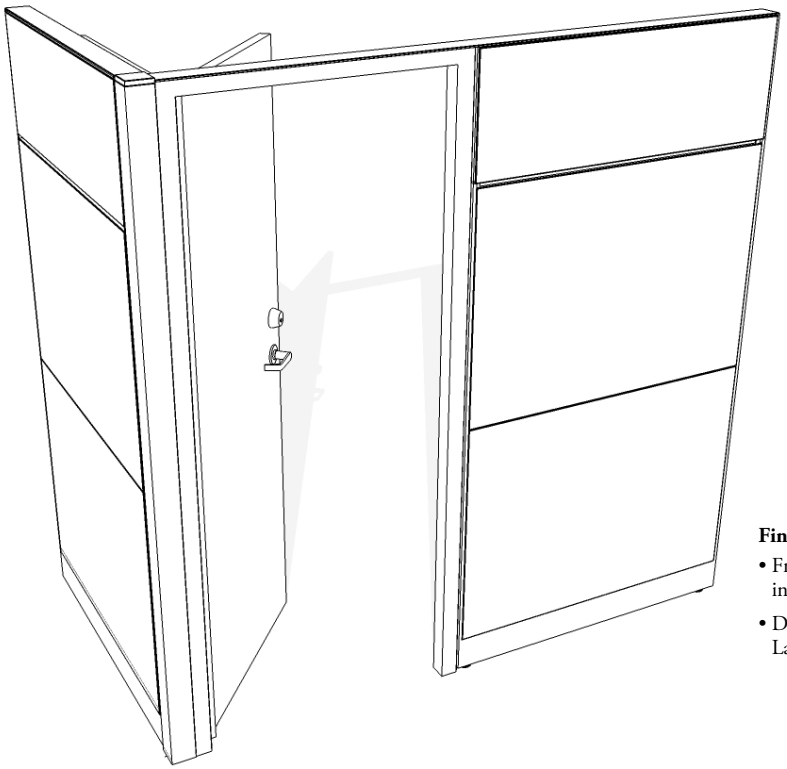

Extended applications **cannot** be used with 120˚ planning, Standard style must be used on both ends.

door panel basics

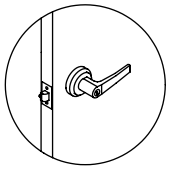

The Door Panel allows for the insertion of a door within a panel environment.

Door Dimensions (Normal)	Door Clearance (Clear Opening)
81" high x 36" wide	80" high x 32" wide (meets barrier free standards)

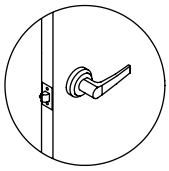

Finishes

- Frame and metal top trim are available in Foundation and Mica colors
- Door is available in Foundation Laminate and Flintwood colors

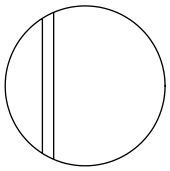

Handle Style 2 (Lever handle with lock)

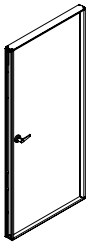

Handle Style 9 (No handle)

Handle Style 3 Lever Handle no lock

Handle Style 9 (No handle)

Door Panel (KPND)

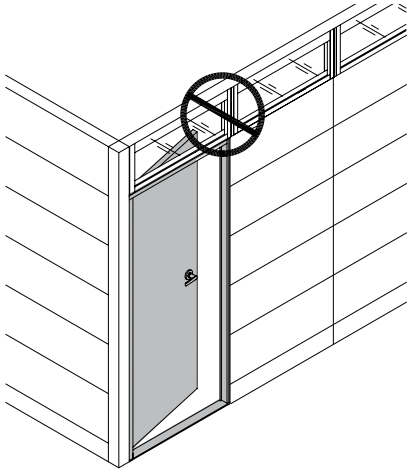

- Allows for a door application in a panel environment
- Works with Conventional, Universal, Floor-Flush and panel frame styles
- Does not allow for power pass through or power access
- Must be connected to panels of the same height
- Hinges must be connected to an 81" high connector
- The door swing is identified as left and right according to the location of the hinges. Swing orientation **cannot** be reversed in the field

Finishes

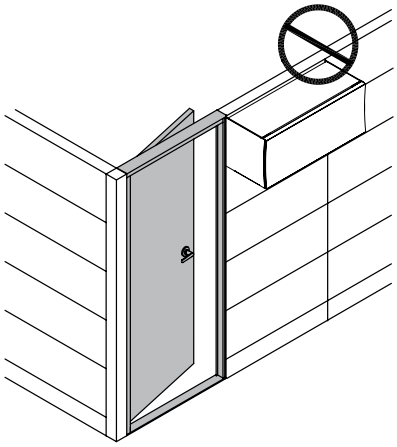

- Doors are available in Foundation, and Wood Veneer Laminates and Flintwoods stains
- Frame is available in Foundation and Mica colors
- Metal top trims are available in Foundation and Mica colors
- Flintwood top trims are available in Flintwood stains
- Handles, locks and thresholds are finished in a Brushed Chrome

planning with door panels

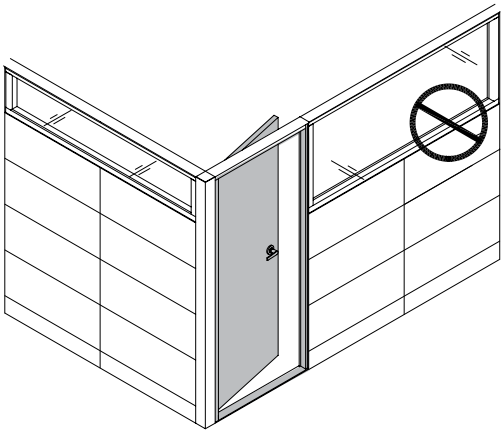

The following should be considered when planning with doors.

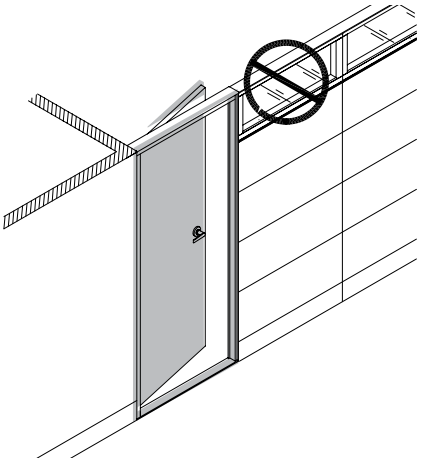

Panel Add-Ons **cannot** be stacked above the door panel.

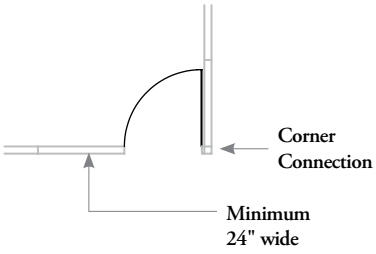

Panel-mounted storage units **cannot** be installed on Panels directly adjacent to the Door Panel.

The door panel **cannot** be used beside Panel Add-On – Single Glass or Panel Add-On – Double Glass that spans over two panel frames.

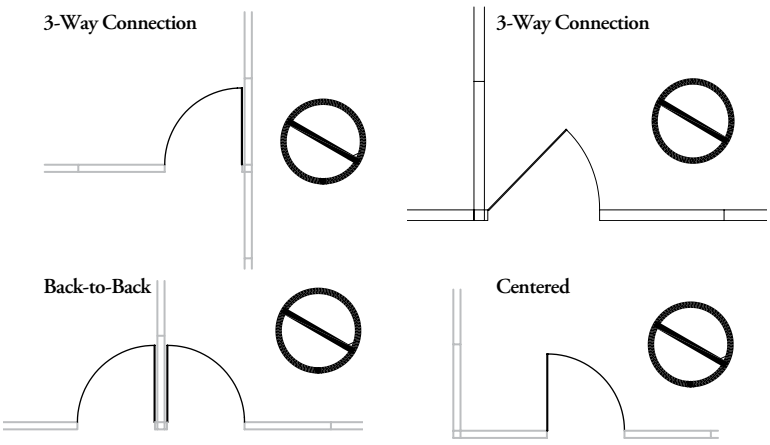

The Door Panel is not compatible with the Panel Wall Adapter (KCW) so therefore, **cannot** be used next to a wall.

The Door Panel must be located next to a corner connector and the adjacent panel must measure a minimum of 24" wide.

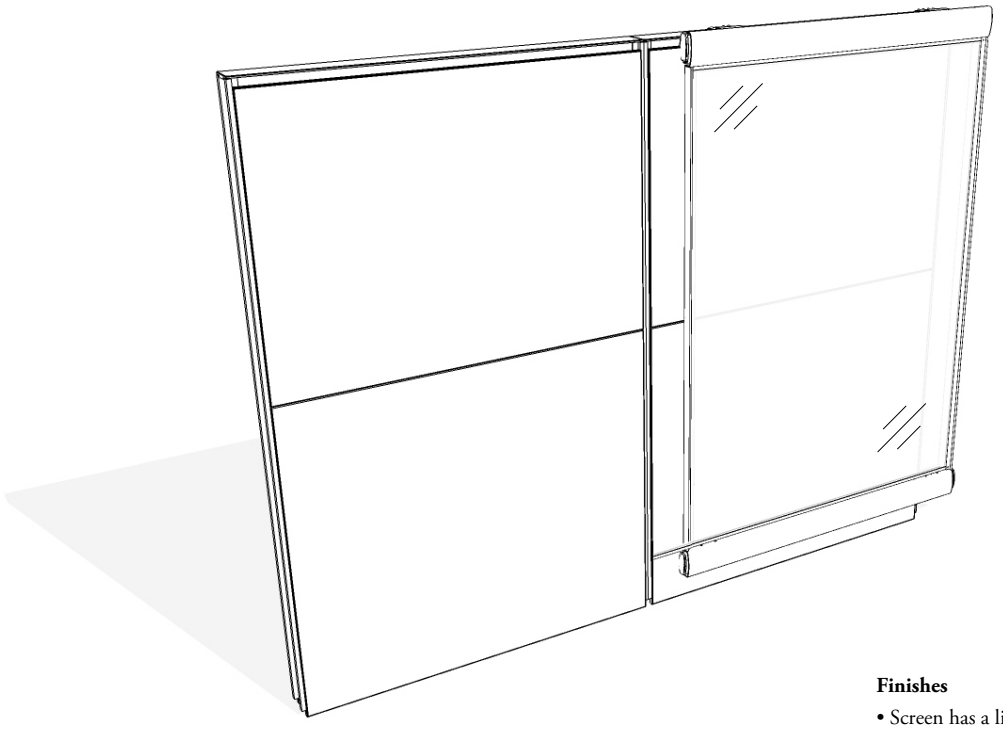

The Door Panel **cannot** be specified at the following locations:

privacy screen basics

The Privacy Screen is a sliding partition that works with Conventional, Universal and Floor-Flush.

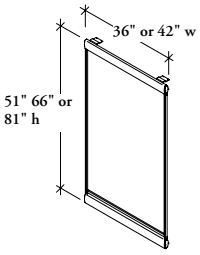

- Must be mounted on adjacent panels of same height
- May be mounted to one panel of equal or greater width or two panels of lesser width
- May be same width or wider than opening to be covered

Right Slide Shown

Finishes

- Screen has a lightweight translucent finish
- Frame is available in Foundation and Mica Colors
- Caps located at the end of the frame will match the Foundation finish color selected for the frame. If Mica frame is selected, caps will be Black

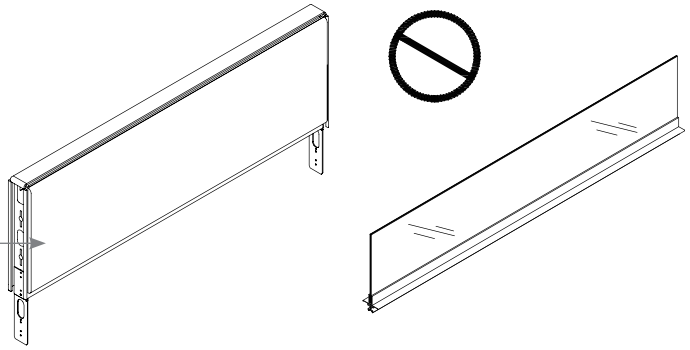

Privacy Screen (KPF)

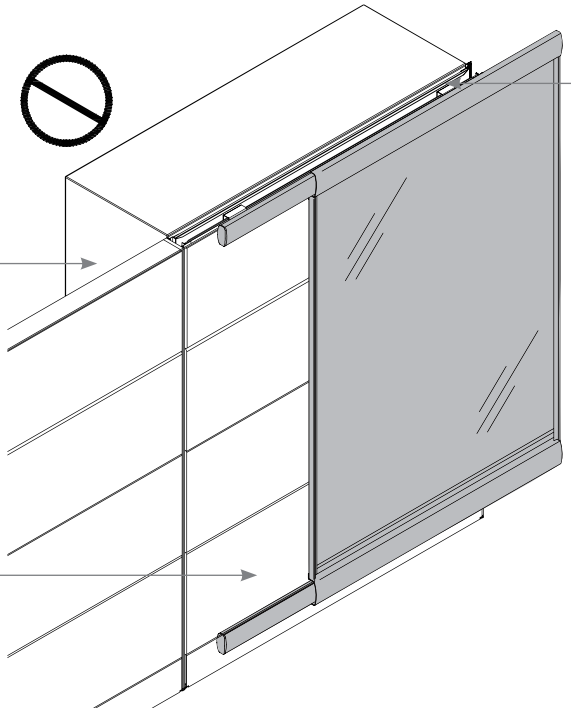

- A non load-bearing lightweight translucent panel-mounted sliding partition
- **Cannot** be used with an Elevated Panel
- Direction in which the door will slide can be changed in the field
- Comes complete with caps and mounting hardware
- **Cannot** be used with Thick Top Trim (KTKT)

planning with privacy screens

The following should be considered when planning with Privacy Screens.

Add-On Modules (KPO) and **Panel Add-On Screen – Glass (KPGA) cannot** be applied on the top of the panel to which the Privacy Screen is mounted.

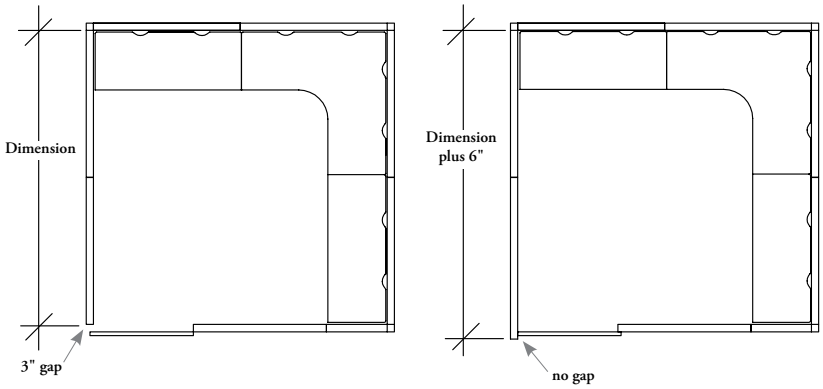

Mounting Brackets for privacy screens are 3" deep therefore, the face of the Privacy Screen sits 3" from the face of the panel to which it is attached.

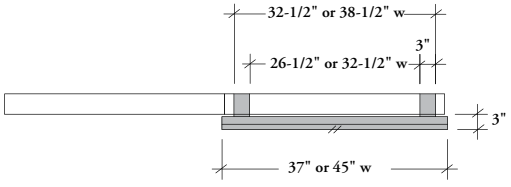

Overhead Cabinets cannot be mounted on the same panel as the Privacy Screen.

- When mounting onto a Floor-Flush Panel a Baseboard Element must be specified on the side of the panel that the Privacy Screen is attached to
- The track attaches to channel at 6" high

corner opening

For complete closure the panel run width that meets the Privacy Screen when fully closed must be 6" longer than the parallel run. This will eliminate the gap that would be created by the Privacy Screen sitting out 3" from the panel (see below).

Actual Screen Size

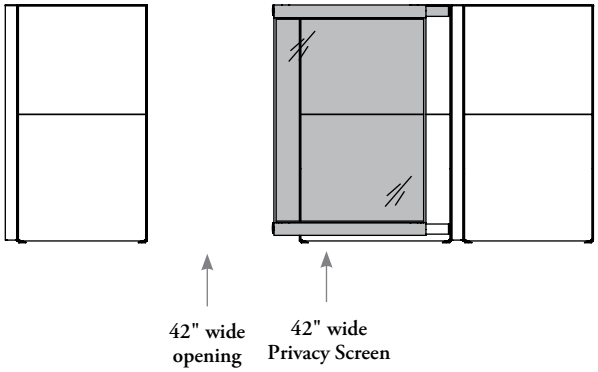

- This diagram illustrates the location of the mounting brackets
- **Cannot** mount to 30" wide panels, mounting brackets interfere with panel connections

privacy screen applications

The following demonstrates typical applications for the Privacy Screen.

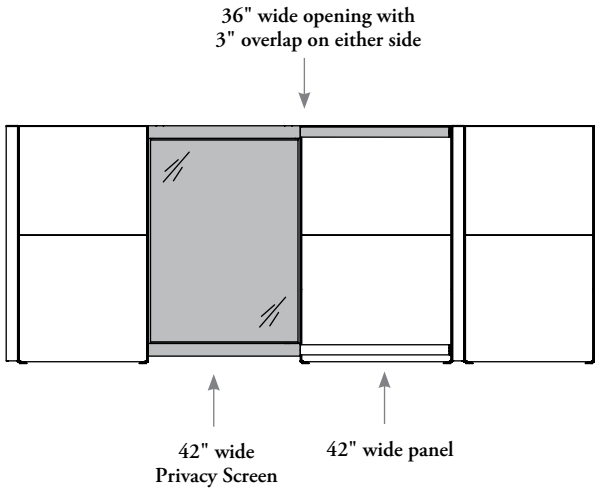

screen and opening same width

Privacy Screen is the same width as the opening or wider
(Left Slide Shown).

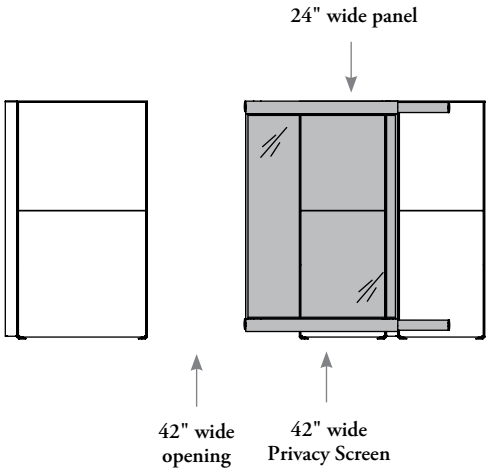

screen width 6" wider than opening

Privacy Screen slides to completely cover an opening with 3" on each side
(Left Slide Shown).

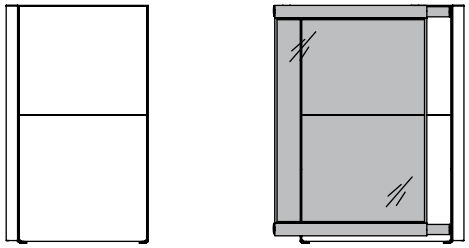

screen mounted over two panels

Privacy Screen mounted over two screens (except for 30" wide panels, where mounting brackets interfere with panel connectors)
(Left Slide Shown).

corner opening

Privacy Screen can be mounted in a corner
(Left Slide Shown).

lyft

lyft

SCREEN BASICS 58

INTEGRATING THIN PANELS WITH LEVERAGE PANELS 59

PLANNING WITH THIN PANELS INDEPENDENTLY 60

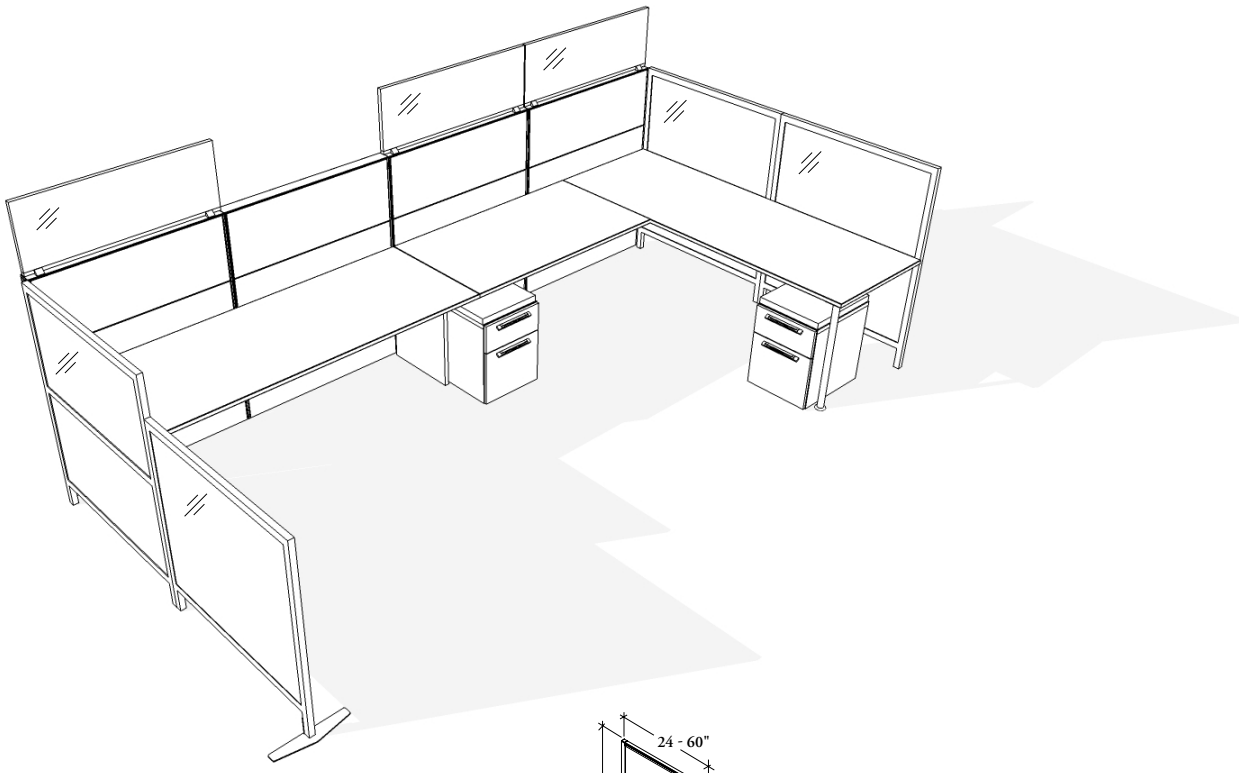

PLANNING WITH MONOLITHIC THIN PANELS. 61

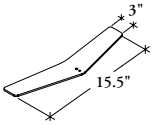

LYFT FINISHES 62

screen basics

Lyft provides a thin profile aesthetic alternative for space division using a variety of Thin Panels and Screens that can be connected to other Thin Panels or Leverage panels.

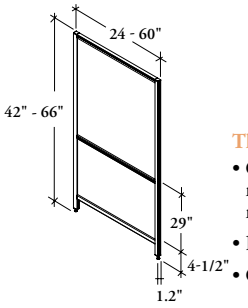

- Thin Panels (HPS) are not handed
- Thin Panels do not require top trim
- End Trims (HET), Intermediate Trims (HIT) and connecting hardware must be specified separately
- The upper rail accepts mounted storage on-module in corners (except Screenweave Floor Screen HS) and workstation signage
- The mid rail accommodates worksurface connections and supports
- Lyft Thin Panels support Lyft Shelves (HMS) and overhead cabinets up to 30" wide (see Filing and Storage for details on overhead cabinet options) provided the Lyft panel is attached to the Leverage panel. See the *Mounted Storage* section for details
- All dimensions and dimension codes are nominal

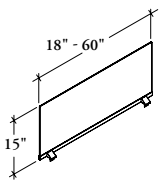

Thin Panel Stabilizer Foot (HPF)

- Provides stability to Lyft Thin Panels beyond an adjacent worksurface or Panel connection
- Can be used on all Lyft Thin Panels to provide stability for Lyft Thin Panel runs and freestanding Lyft Monolithic Thin Panel configurations

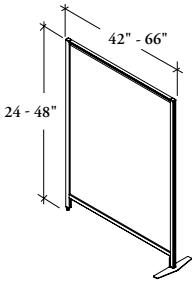

Thin Panel – Standard (HPS)

- Connects to Leverage Panels both on- and off-module or to Lyft Thin Panels and Screens on-module
- Provides privacy and worksurface support
- Comes complete with top and mid rails

Add-On Screen – Translucent (KPC)

- The Translucent Add-On Screen provides a casual alternative solution to increase Leverage Panel height and visual privacy
- **Cannot** be mounted to wood top trims and Thick Top Trim (KTKT)
- Can span more than one panel
- Actual screen width dimensions are 1" shorter than nominal

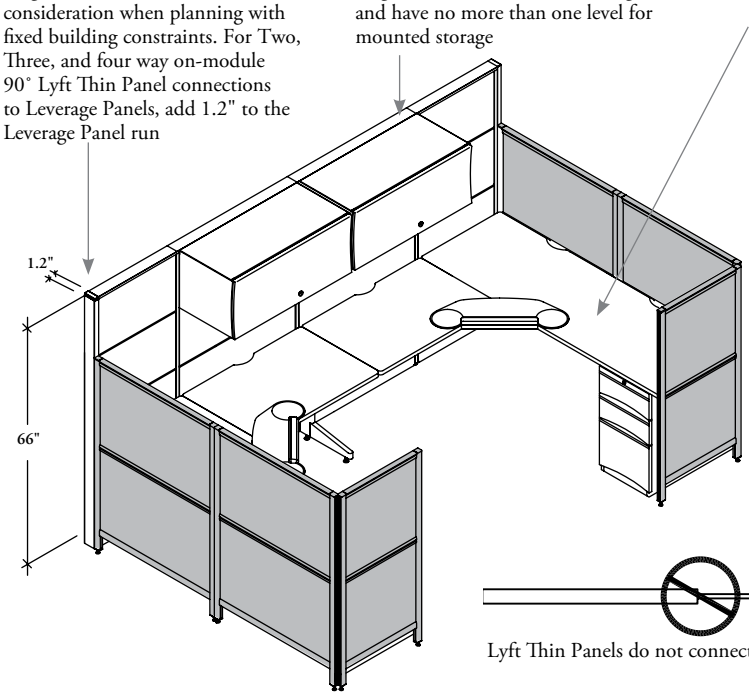

Thin Panel – Monolithic (HPM)

- Designed to provide space division and is non-structural therefore does not support worksurfaces or storage
- Are not structural, therefore do not support worksurfaces or storage
- Does not have a center rail

integrating thin panels with leverage panels

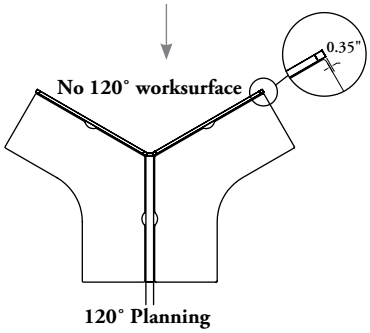

The primary application of Lyft Standard and Segmented Thin Panels with Leverage is to use Leverage Panels as a spine wall and Lyft Thin Panels connected at 90° or 120° to provide space division and worksurface support. The following rules apply when planning with Lyft Thin Panels and Leverage panels.

- Panel Creep is the incremental dimensional increase created by panel connections when planning long runs. This must be taken into consideration when planning with fixed building constraints. For Two, Three, and four way on-module 90° Lyft Thin Panel connections to Leverage Panels, add 1.2" to the Leverage Panel run
- Lyft Standard Thin Panels and Segmented Thin Panels provide stability to Leverage panels when heights are not more than 66" high and have no more than one level for mounted storage
- Where Lyft Thin Panels are being used as structural supports for Leverage Panels, Worksurface connection is required

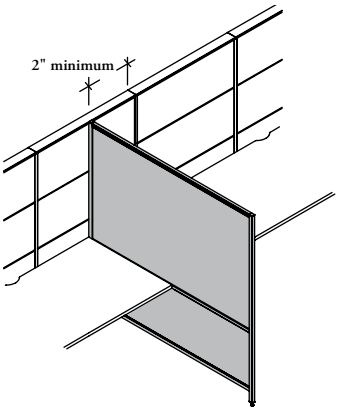

Lyft Thin Panels do not connect to leverage panels at 180°

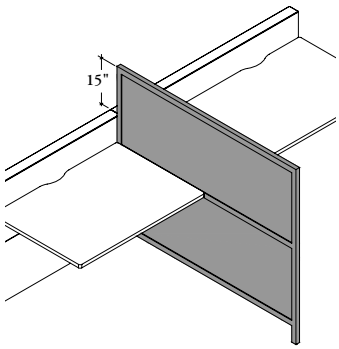

- Lyft to Leverage 120° panel connections can be established with a two-way Lyft to Leverage connection or with a three-way Lyft to Leverage connection. When a three-way connection is made, the connection must comprise of one Leverage Panel and two Lyft Thin Panels
- When connecting Lyft Thin Panels to Leverage Panels in 120° planning with worksurfaces, the Lyft Thin Panel end will extend 0.35" beyond the end of the corner worksurface. A 120° worksurface **cannot** be applied to the outside corner of an end run 120° connector/spacer

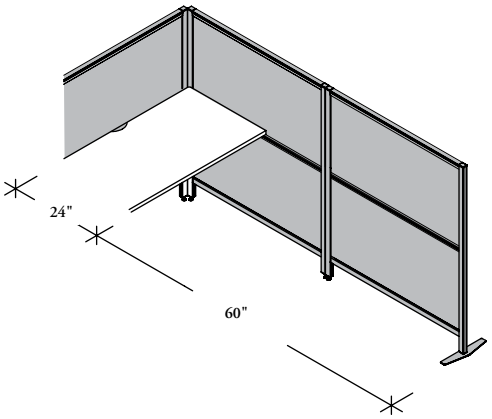

120° Planning

- For off-module connections, the Lyft Thin Panel must be the same height as the panel to which it is attached
- Off-module connections must be made at least 2" from the end of Leverage Panels
- When specifying a Floor-Flush a baseboard must be specified, as the Lyft Panel requires the panel rail at 6" high for attachment

- For on-module applications where Lyft Thin Panels are higher than Leverage Panels, the difference can be no more than 15"

- A Lyft Thin Panel Stabilizer Foot is required to provide a Lyft Thin Panel that extends 30" to 60" from a previous stabilization point (adjacent panel or worksurface connection)
- Beyond 60" a new stabilization point must be established
- It is recommended that for 66" high Thin Panels a new stabilization point be established beyond 48"

planning with thin panels independently

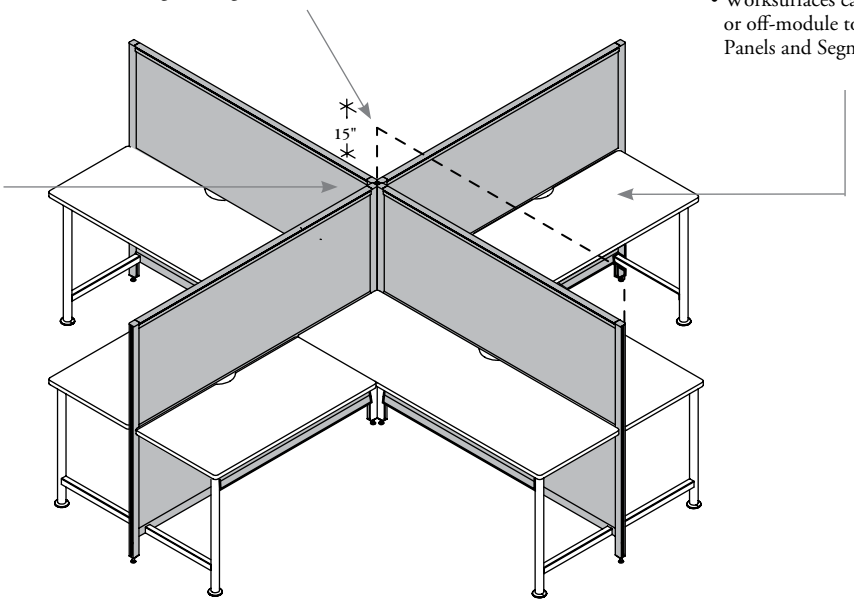

Lyft Standard and Segmented Thin Panels can be used in combination with Leverage worksurfaces to create complete workstations. The following rules apply when planning with Lyft Thin Panels on their own.

Two dimensions impact Panel creep when planning with Lyft Thin Panels on their own

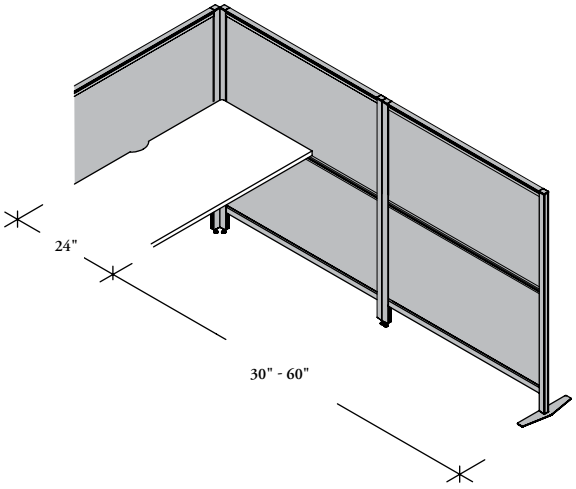

a) two, three or four-way 90˚ Lyft Thin Panel connections add 1.2" to a Lyft Thin Panel run

b) to provide universal worksurface connection and support actual Lyft Thin Panel widths are 1/8" wider than nominal widths. To account for this difference, add 1/8" for each Thin Panel used in a panel run

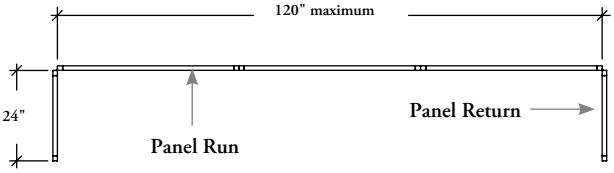

Lyft Thin Panels can be connected to each other on-module at same heights or with a 15" change of height

- Worksurfaces provide stability and structural support to Lyft Thin Panel
- Worksurfaces can be connected on- or off-module to Lyft Standard Thin Panels and Segmented Thin Panels

- A Lyft Thin Panel Stabilizer Foot (HPF) is required if the Thin Panel extends 30" to 60" from a previous stabilization point (adjacent Panel or worksurface support)
- Beyond 60" a new stabilization point is required on all Panel heights under 66"
- On 66" high Panels a stabilization point should be established every 48"

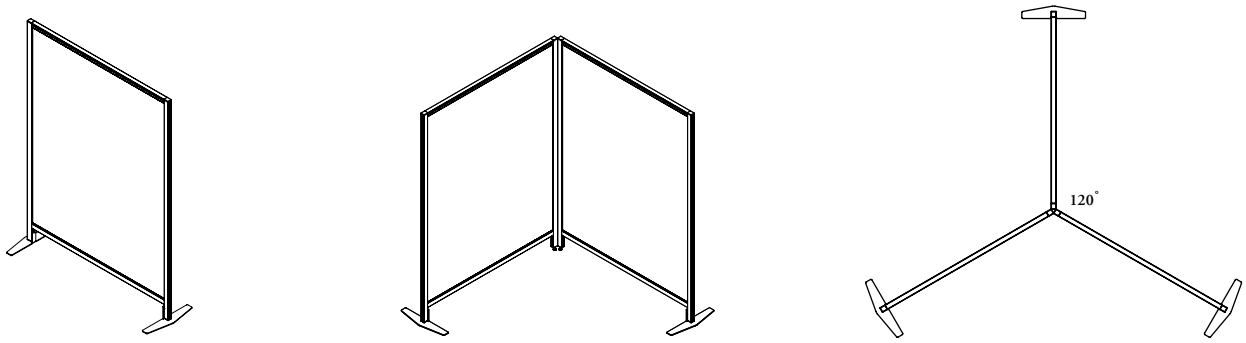

Panel runs require a minimum of 24" return panel every 120"

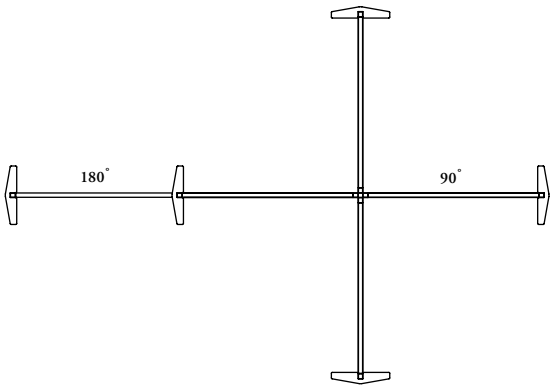

planning with monolithic thin panels

Monolithic Thin Panels are non-structural and are designed to provide space division. The following rules apply when planning with Monolithic Thin Panels (HPM).

- Monolithic Thin Panels do not connect to worksurfaces
- Monolithic Thin Panels can also connect to other panels and screens with the same on and off-module panel connection guidelines as Standard Thin Panels and Segmented Thin Panels

Monolithic Thin Panels can stand alone with two Stabilizer Feet or link to other Lyft Monolithic Thin Panels at 90˚ or 120˚ using one Stabilizer Foot per panel .

A Thin Panel span can be extended at 180˚ when a stabilizer foot is added where two Monolithic Thin Panels connect. A 180˚ span is limited to two Monolithic Thin Panels. When both panels are 66" high the span is limited to 72".

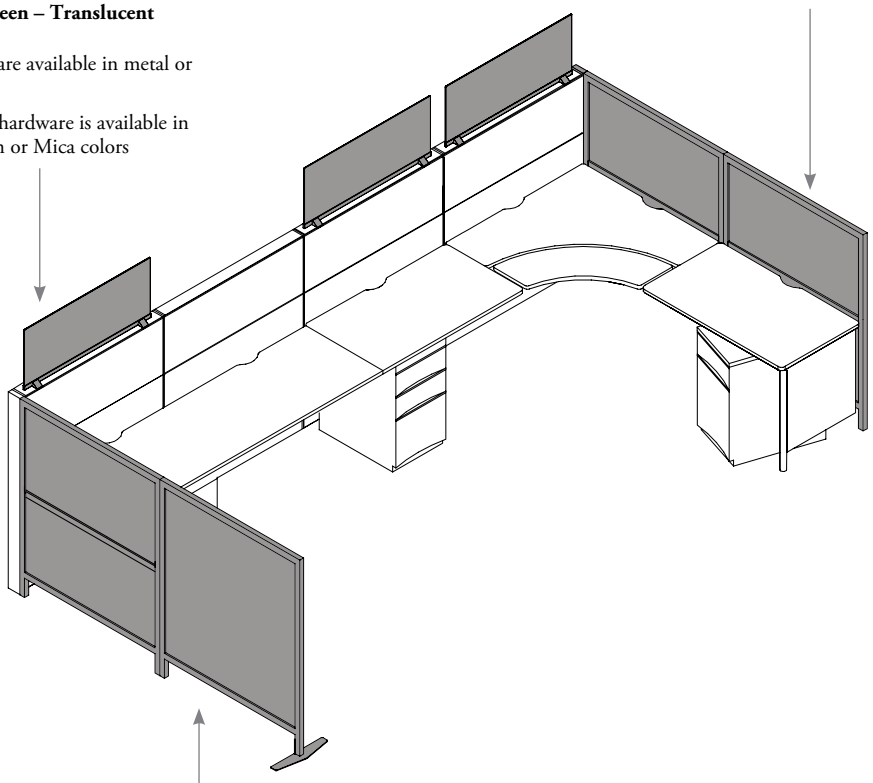

lyft finishes

The following outlines the various finish options that are available on Lyft Thin Panels and Floor Screens.

- Top segment finish can be different than the bottom segment
- Segment finishes will be the same on both sides of the panel
- Translucent finishes include Frosted Acrylic and two Ribbed Translucent options
- All frames are available in Foundation and Mica colors
- Stabilizer Foot is available in Foundation and Mica colors and can be specified differently from the frame

Thin Panel – Standard (HPS)
- Top Segment is available in Fabric, Translucent and Whiteboard
- Bottom Segment is available in Fabric and Translucent

Add-On Screen – Translucent (KPC)
- Top trims are available in metal or wood
- Mounting hardware is available in Foundation or Mica colors

Thin Panel – Monolithic (HPM)
Translucent panel finish in Ribbed Clear or Ribbed Textured

panel connections & trims overview

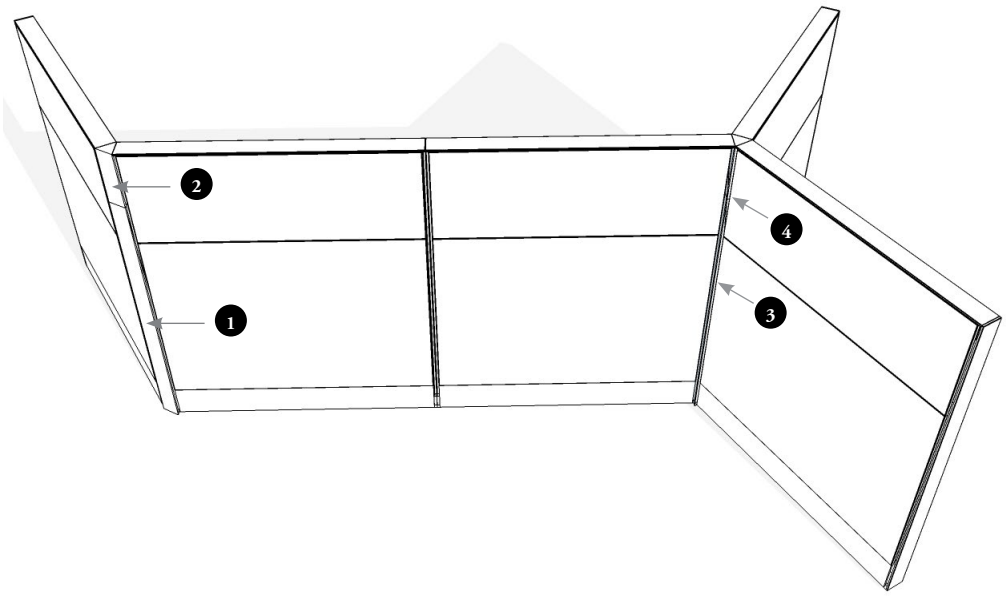

Panel connectors and trims are used to connect panels and to finish corners and ends in 90˚, 120˚, and 180˚ configurations. The following outlines the available options.

Metal and Flintwood finishes **cannot** be combined

1. Three-Way Intermediate Connector
2. Panel Wall Adapter
3. Top Trim or Thick Top Trim
4. Two-Way Intermediate Connector 180˚
5. Four-Way Connector or Four-Way Intermediate Connector
6. Panel End Trim
7. Intermediate Panel End Trim
8. Three-Way Connector
9. Continuous Top Trim or Continuous Thick Top Trim
10. Two-Way Intermediate Connector 90˚
11. Two-Way Connector 90˚
12. Panel-To-Panel Adapter
13. Two-Way Connector 180˚

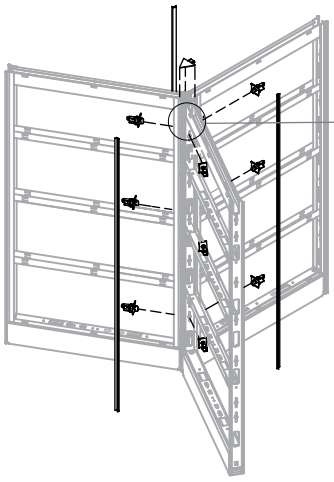

panel connections & trims overview (continued)

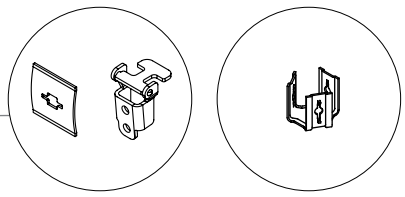

1. Two-Way Connector 120˚
2. Two-Way Intermediate Connector 120˚
3. Three-Way Connector 120˚
4. Three-Way Intermediate Connector 120˚

Finishes

- Metal trims and adapters are available in Foundation and Mica colors
- Flintwood trims are available in a variety of Flintwood stains
- Metal and Flintwood finishes **cannot** be combined

90˚ application

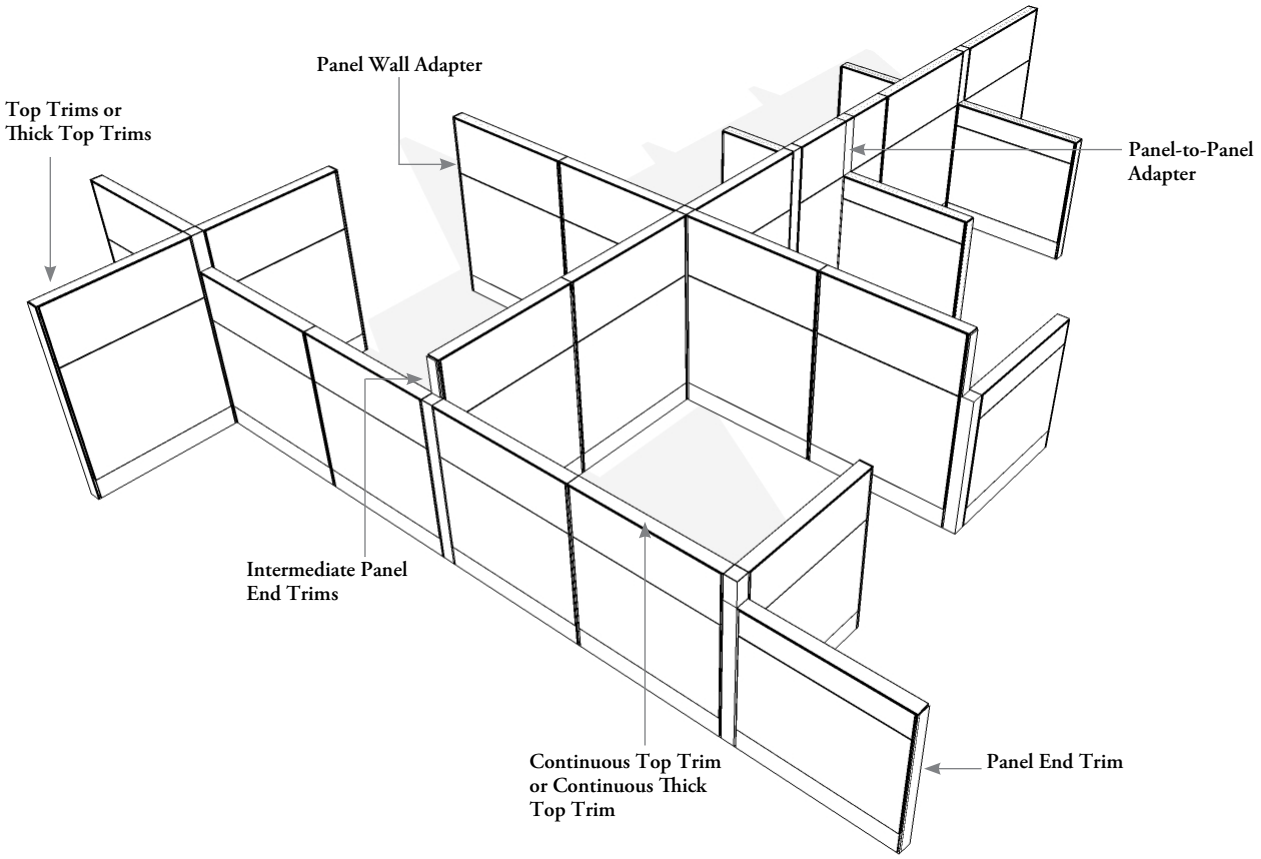

120˚ application (shown)

Panels are joined with posi-locks and are included with the panel.

panel connectors 90° – trim basics

Leverage trims finish the ends and tops of panels. The following outlines the features of each end trim.

- End Trims and Intermediate Trims must be ordered separately, they are not included in a panel
- End Trims and Intermediate Trims are not interchangeable, even though they share some common sizes

Panel Wall Adapter (KCW)

- Connects a panel to a fixed wall or column
- Must be equal in height to the adjoining panel

Top Trim (KTR) or Thick Top Trims (KTKT)

- Finishing top treatment that spans the width of a panel or add-on
- Are available in standard thickness which exposes the gap between the top element and top trim and the thick top trim which conceals the gap
- Can be installed on any same width panel or add-on

Panel-to-Panel Adapter (KPP)

- Provides the ability to create an off-module 90° connection
- Power **cannot** pass through the Panel-to-Panel adapter into the attached panel
- **Cannot** be used to connect to Floor Flush Panels
- **Cannot** be used to connect to a panel with a Thick Top Trim

Panel End Trims (KTE)

- Extends the full height of a panel to provide a finished covering for the end of the panel
- Can be installed on any same-height panel or panel with add-on

Intermediate Panel End Trim (KTI)

- Provides a finished covering to exposed portions of the panel or connector in change of height applications

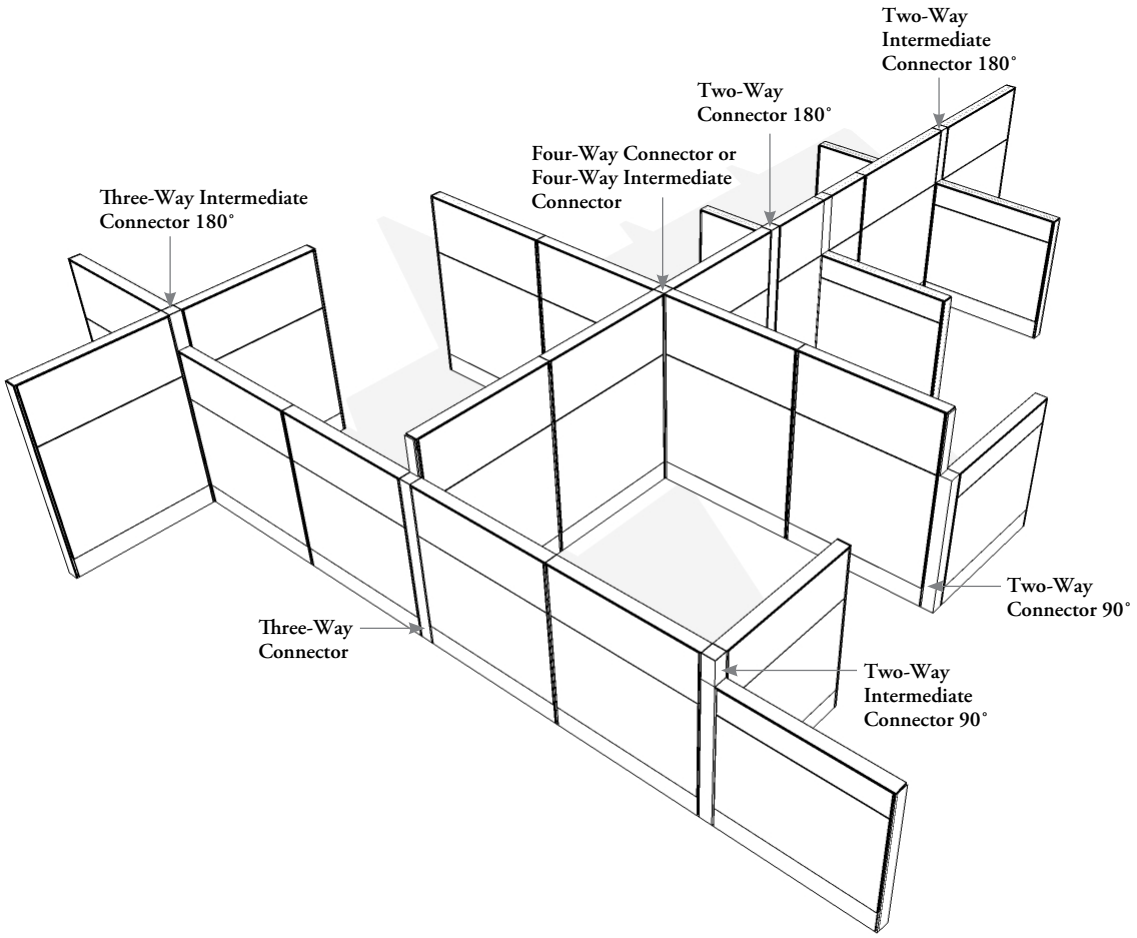

Continuous Top Trim (KTRC) or Continuous Thick Top Trim (KTKC)

- Finishing top treatment which spans the width of two panels to provide a continuous clean aesthetic
- Can be installed on any two panels equaling the width of the continuous top trim – **cannot** span more than 2 panels
- Available in widths from 66" - 90" width in 6" increments

panel connectors 90° & 180° – connector basics

Leverage connectors finish 90° and 180° connections. The following outlines the features of each connectors.

• All connectors are available with a slim or wide gasket

Three-Way Intermediate Connector 180° (KCI_00)

• Creates and covers an intermediate-height connection between four panels that are connected at 90° in a change of height condition

Four-Way Connector (KCC_4)

• Creates and covers a full height connection between four panels joined at 90° where all panels are the same

Four-Way Intermediate Connector (KCI_00)

• Creates and covers an intermediate-height connection between four panels that are joined at 90° in a change of height condition

Two-Way Connector 180° (KCC_00)

• Creates and covers a full-height 3" spacer between two panels that are jointed at 180°

Two-Way Intermediate Connector 180° (KCI_00)

• Creates and covers the intermediate height between three panels that are connected at a 90° in a change of height condition

Three-Way Connector (KCC_3)

• Creates and covers a full-height connection between three panels that are joined at a 180° where two panels are side-by-side, and the third panel meets at a 90°

Two-Way Intermediate Connector 90° (KCIN_90)

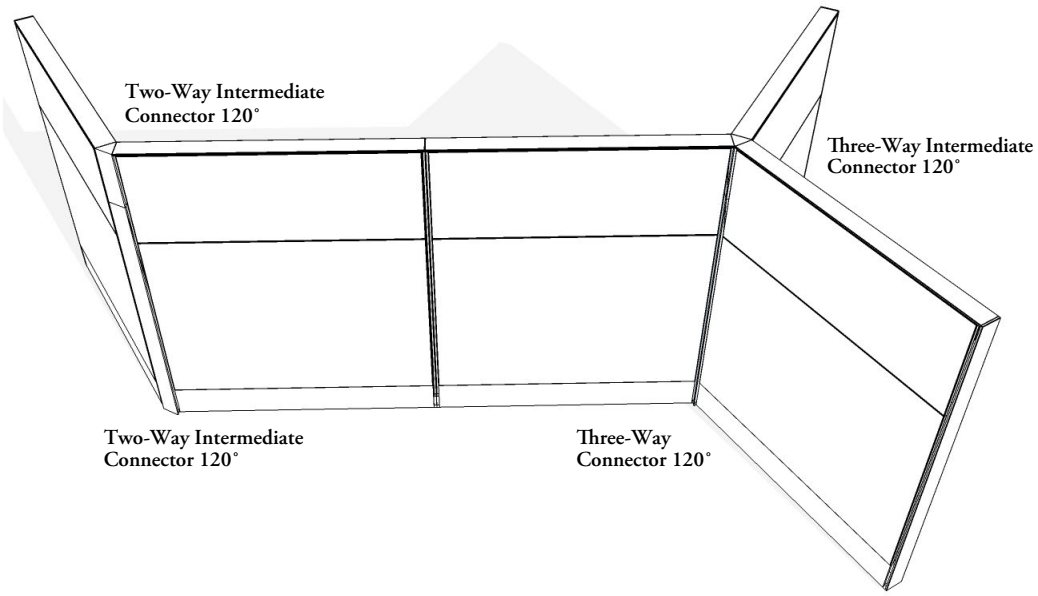

• Creates and covers an intermediate-height connection between three panels at 90° in a change of height condition

Two-Way Connector 90° (KCCN_90)

• Creates and covers a full-height connection between two panels that join at a 90°

panel connectors 120° – connector basics

Leverage connectors finish the corners of panels connected at 120°.

Two-Way Connector 120° (KCC2_60)
Creates and covers a full-height connection between two panels that are joined at 120° (includes top cap)

Three-Way Connector 120° (KCC3_60)
Creates and covers a full-height connection between three panels that are joined at 120° (includes top cap)

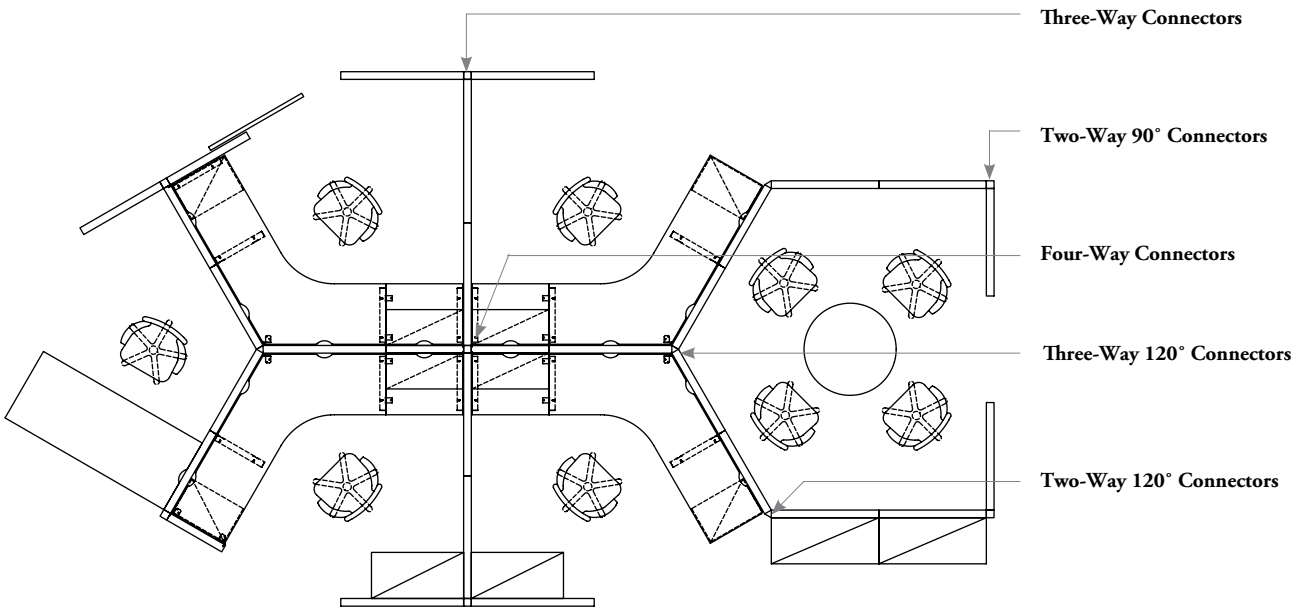

Two-Way Intermediate Connector 120° (KCI2_60)
Creates and covers an intermediate-height connection between two panels that are joined at 120° (does not include top cap, uses top cap from the KCC2_60 two-way connector)

Three-Way Intermediate Connector 120° (KCI3_60)
Creates and covers an intermediate connection between three panels that are joined at 120° (does not include top cap, uses top cap from the KCC3_60 three-way connector)

planning with 120° connectors

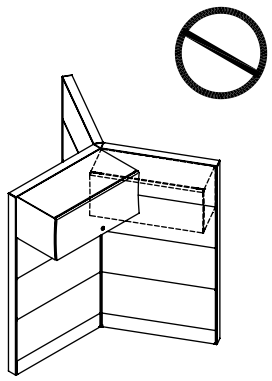

The following should be taken into consideration with 120° planning.

combining 90° and 120° planning

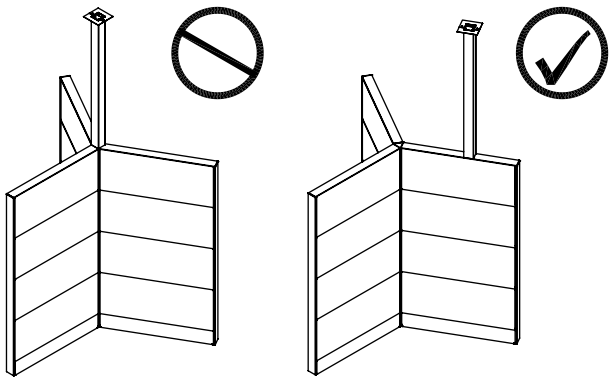

120° planning can be combined with 90° planning to create a unique workstation characteristic and aesthetic.

overheads

- Overhead storage **cannot** be mounted side-by-side where two panels meet at 120°

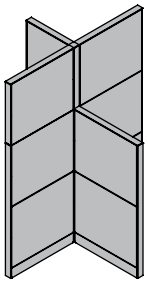

power poles

- The Off-Module Power Pole (ECPQ_2) must be specified when planning with 120° panel connections because they **cannot** be mounted in the corners
- The Off-Module Power Pole (ECPQ_2) **cannot** be used with Thick Top Trim (KTKT)
- See the listing in the *Lighting, Electrics & Communications* section

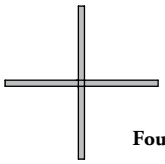

panel connections simplified

To identify connector requirements, the following steps should be followed.

step 1:

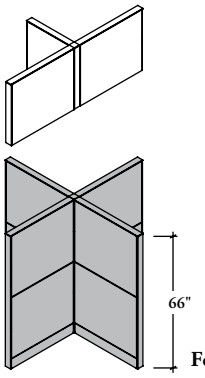

- Identify the type of material required (metal or wood). The same type of material must be specified for all connections and trims

Four-Way Connector (KCC_4) (shown)

step 2:

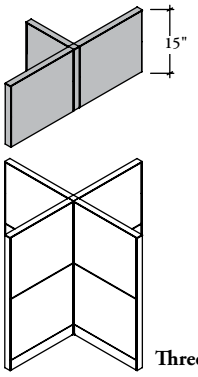

- Identify the foot print of the configuration, specifically it will be a two-way 90˚ (KCCN_90), two-way 180˚ (KCC_00), three-way (KCC_3) or four-way (KCC_4)

Four-Way Connector (KCC664)

step 3:

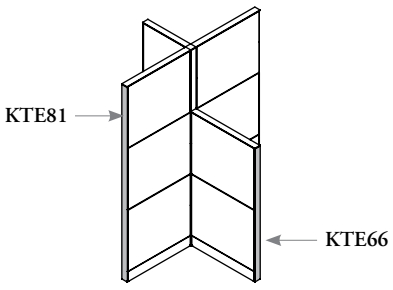

- Identify the height of the lowest section

Three-Way Intermediate Connector (KCI_3)

step 4:

- Identify the foot print and height of the additional section either (KCI_90, (KCI_00, KCI_3 or KCI_4)

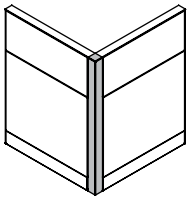

Step 5:

- Specify the panel end trims

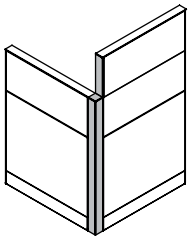

determining proper panel connectors

The following examples are a guide used in determining the proper connectors needed in specific installations.

KCC_3 and KTI

KCC_3 and KTI

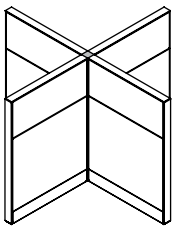

KCC_3 and KCIN_90

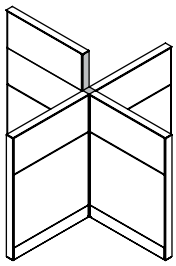

KCC_3 and KCI_00

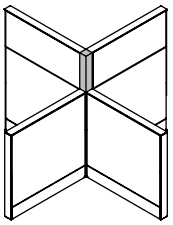

four-way connectors

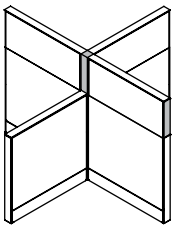

KCC_4

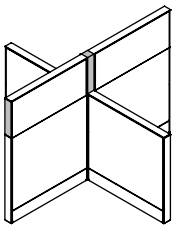

KCC_4 and KTI

KCC_4 and KCIN_90

KCC_4 and KCI_3

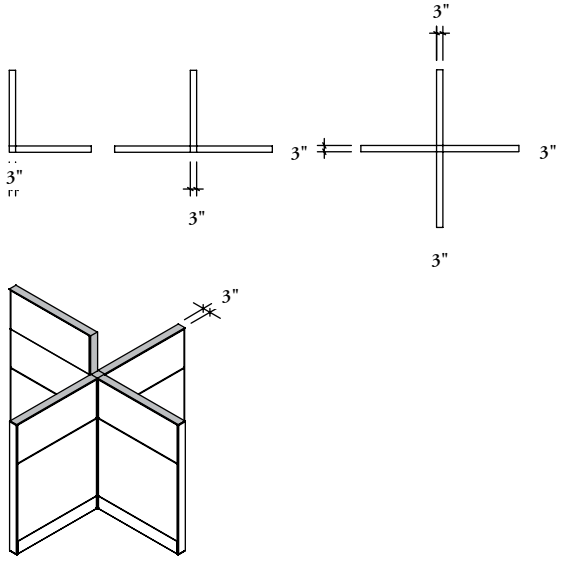

KCC_4 and KCI_00

planning with connectors & trims

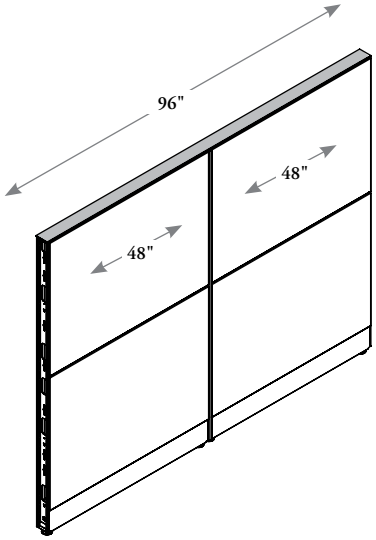

The following should be considered when planning with Leverage connectors and trims.

panel creep

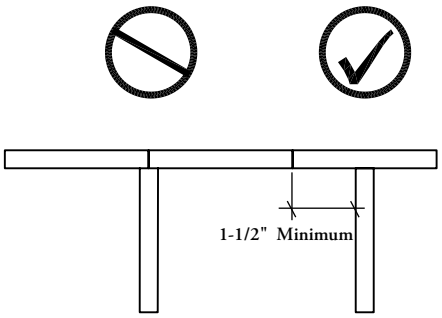

- When planning with Leverage, the thickness of panels and connectors must be taken into consideration
- All panels are 3" thick, and all corner connectors add 3" to the overall footprint
- There is no creep at 180˚ connections, so add no extra length to panel runs

continuous top trim and continuous thick top trim

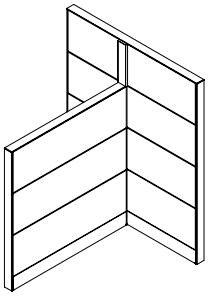

- Spans two panels only for a combined length from 66" - 96"
- Panels can be equal or different widths
- The Standard and Thick Top Trim (KTR, KTKT) **cannot** span two panels. (example: a 60" wide top trim **cannot** span two 30" wide panels)

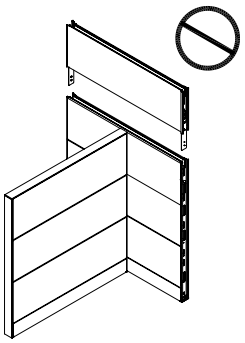

off-module connectors

- Off-module panel-to-panel connections **cannot** be made at the junction of two in-line panel connections. The connection must be a minimum of 1-1/2" from the junction
- Off-module panels are structural and load bearing
- Power and communication **cannot** travel between two panels connected with a panel adapter
- The off-module connector **cannot** mount to a Floor Flush panel, however the panel being used off-module can be Floor Flush and must have a baseboard element
- **Cannot** use the Thick Top Trim (KTKT) in off-module applications

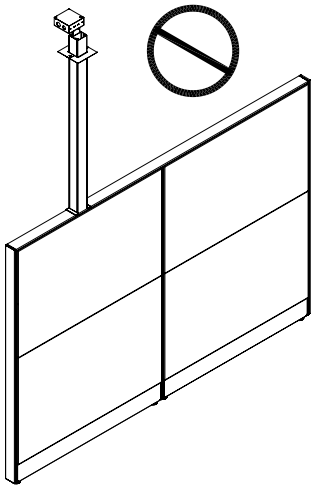

All Leverage panels up to 66" high can be attached off-module to another panel of the same height or 15" taller.

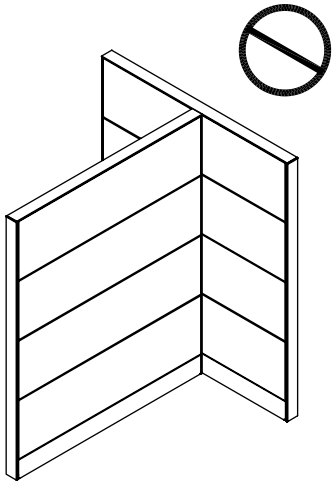

An Add-On Module **cannot** be added to a panel with a panel Adapter attached to it.

planning with connectors and trims (continued)

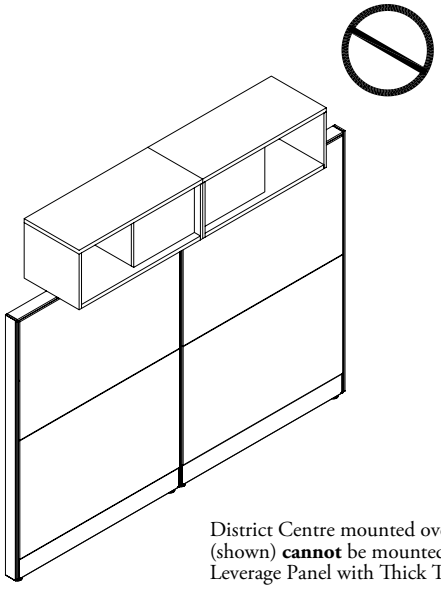

thick top trim

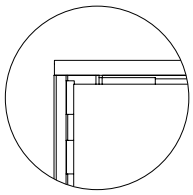

A Power Pole (ECPQ) **cannot** be used with Thick Top Trim (KTKT) due to on-site installation restrictions.

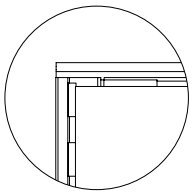

Thick Top Trim eliminates the gap between the top trim and element, thereby preventing the panel connectors to attach through to the frame.

District Centre mounted overhead (shown) **cannot** be mounted on Leverage Panel with Thick Top Trim

Thick Trim

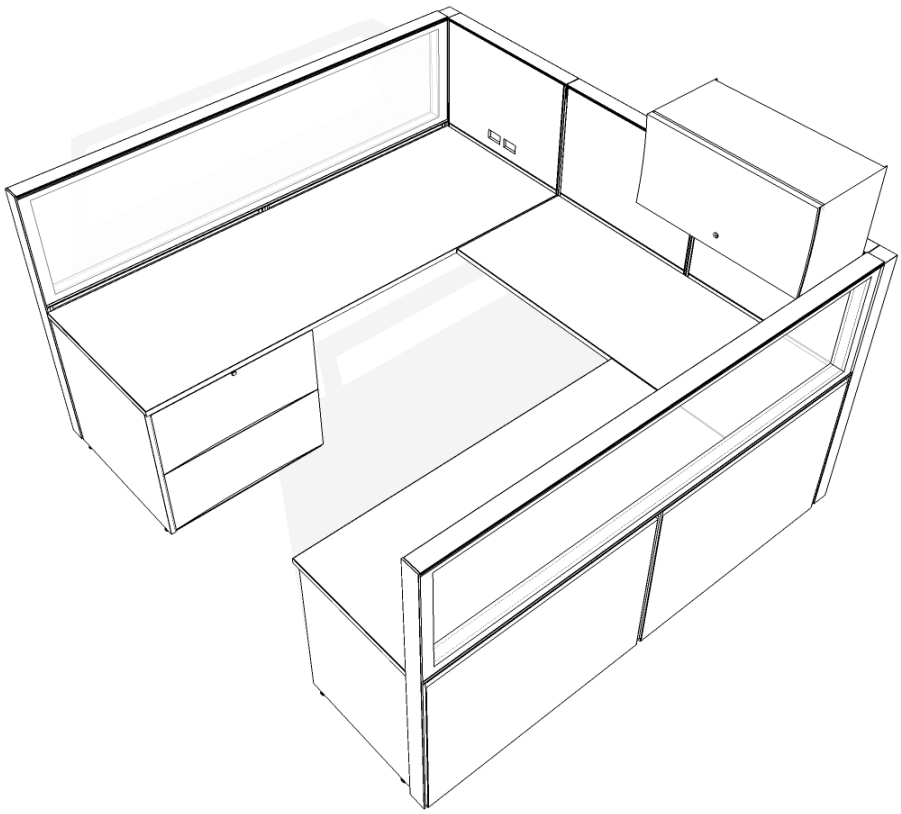

Standard Trim

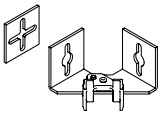

Any storage unit or accessory that requires a gap between the top trim and top element **cannot** be used with the Thick Top Trim (examples: signage, coat hooks, or hanging whiteboards). District Centermount Storage **cannot** be used with Leverage Panels.

mounting brackets for glass panel add-ons on 30" high panels basics

When mounting glass add-ons to 30" high panels, additional brackets are required at the connection between panels for stability. The following outlines the various brackets available.

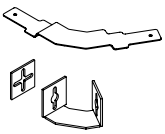

Two-Way Bracket for 30" high Panel 90˚

Two-Way Bracket for 30" High Panels 90˚ (KPJ90)

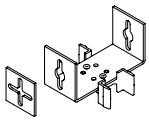

Used when stacking onto a 30" high panel at a two-way 90˚ connection

also available

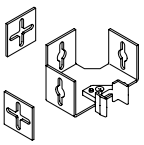

Two-Way Bracket for 30" High Panels 120˚ (KPJ602)

Used when stacking onto a 30" high panel at a two-way 120˚ connection.

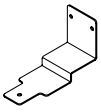

Two-Way Bracket for 30" High Panels 180˚ (KPJ00)

Used when stacking onto a 30" high panel at a two-way 180˚ connection.

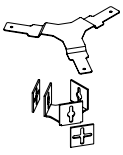

Three-Way Bracket for 30" High Panels 90˚ (KPJ3)

Used when stacking onto a 30" high panel at a three-way 90˚ connection.

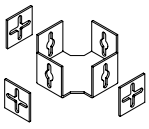

Bracket to Align Glass Panel Add-Ons, Change of Height (KPOGJ2)

Used to align two glass panel add-ons in change of height conditions.

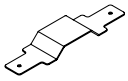

Three-Way Bracket for 30" High Panels 120˚ (KPJ603)

Used when stacking onto a 30" high panel at a three-way 120˚ connection.

Four-Way Bracket for 30" High Panels 90˚ (KPJ4)

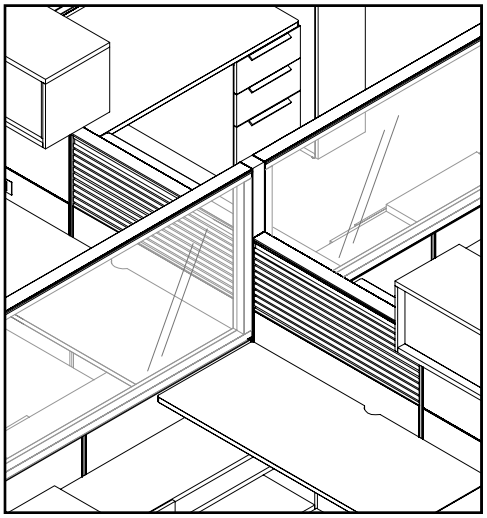

Used when stacking onto a 30" high panel at a four-way 90˚ connection.

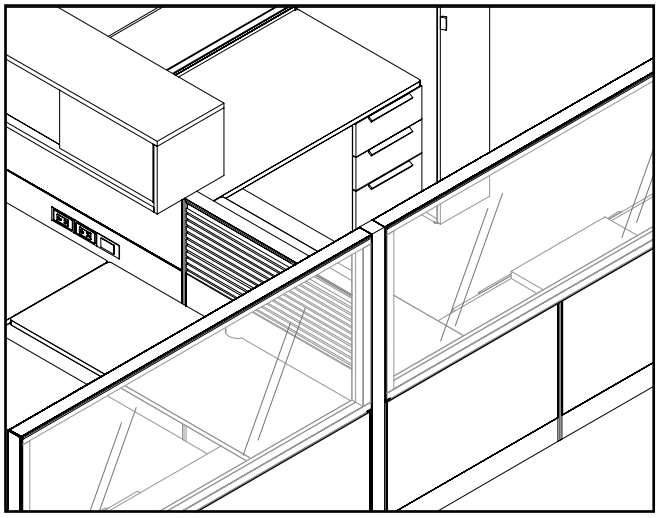

Bracket to Align Glass Panel Add-Ons, Same Height (KPOGJ1)

Used to align two glass panel add-ons in same height conditions.

planning with brackets for glass panel add-ons on 30" high panels

Four-Way Connector

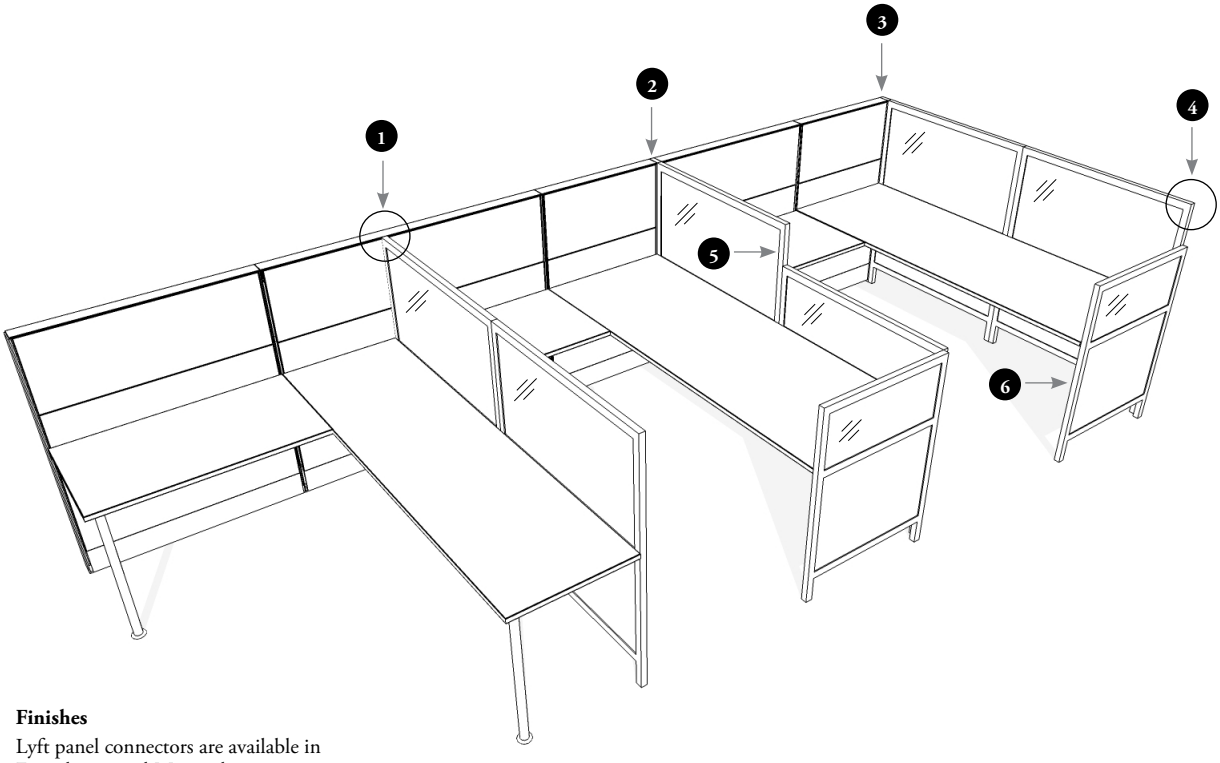

Three-Way Connector

- Careful attention must be given to applications where the glass add-ons are higher than the adjacent panels
- Although intermediate connectors can be used to fill the gaps, installation is difficult because the panels connect from the outside and the glass from the inside
- Trims may not be able to connect in all locations

lyft panels & connections overview

Lyft connectors are used to connect Lyft Thin Panels and Screens to Leverage Panels at 90˚ and 120˚ and maintain worksurface to panel alignment

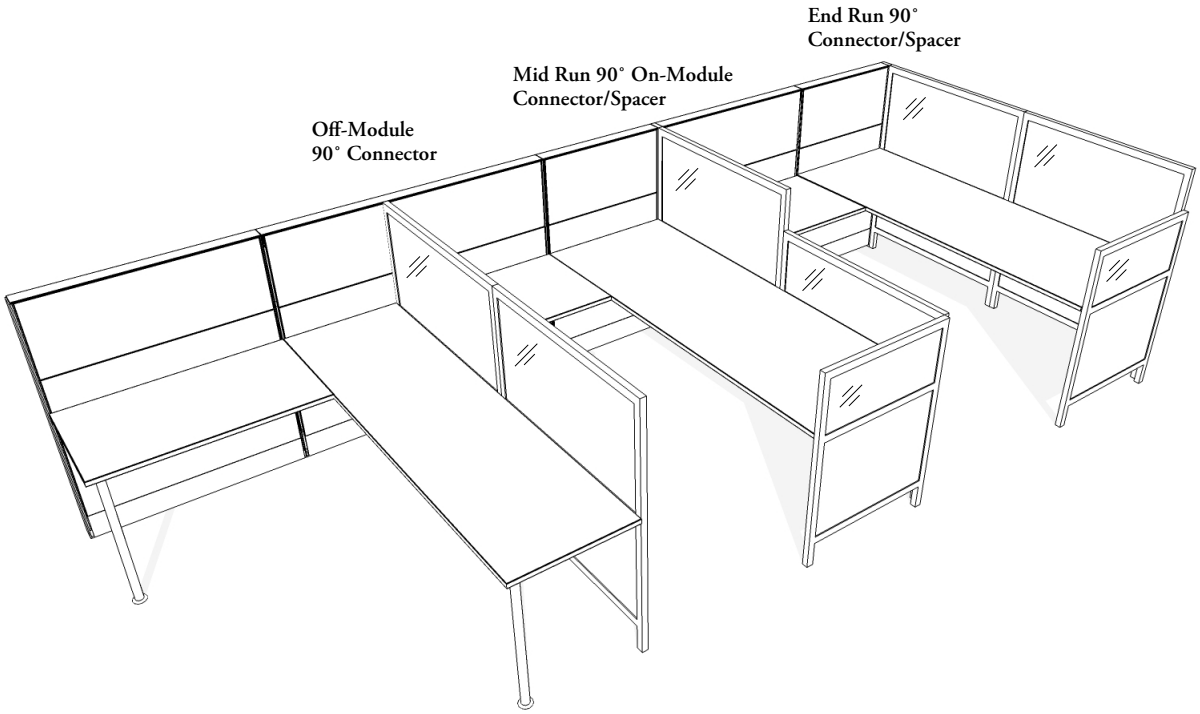

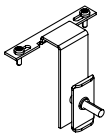

Finishes
Lyft panel connectors are available in Foundation and Mica colors

1. Off-Module 90˚ Connector
2. Mid Run 90˚ On-Module Connector/Spacer
3. End Run 90˚ Connector/Spacer
4. Thin Panel Connector 90˚
5. Thin Panel Intermediate Trim
6. Thin Panel End Trim

lyft end run, mid & off-module 90° connector basics

Lyft connectors are used to connect Lyft Thin Panels to Leverage Panels. The following outlines which connectors are required when connecting Lyft panels or screens to Leverage panels.

Off-Module 90° Connector (HCUL)

- Connects a Lyft Thin Panel off-module at 90° to a Leverage Panel
- The Lyft Thin Panel and Leverage panel must be the same height
- Connections can occur at any point up to 2" from the Leverage Panel end
- Not compatible with Floor-Flush Panels
- Thick Top Trim (KTKT) and Continuous Thick Top Trim (KTKC) **cannot** be used with Lyft Panels

Mid Run 90° On-Module Connector/Spacer (HCML)

- Creates a full-height 90° mid run connection at the junction between the following:
- A Lyft Thin Panel and two Leverage Panels aligned at 180° (three-way connection)
- Two Lyft Panels aligned at 180° and two leverage panels aligned at 180° (four-way connection)
- Adds 1.2" to a Leverage Panel run
- The Spacer height matches the height of the lowest Leverage Panel at the connection

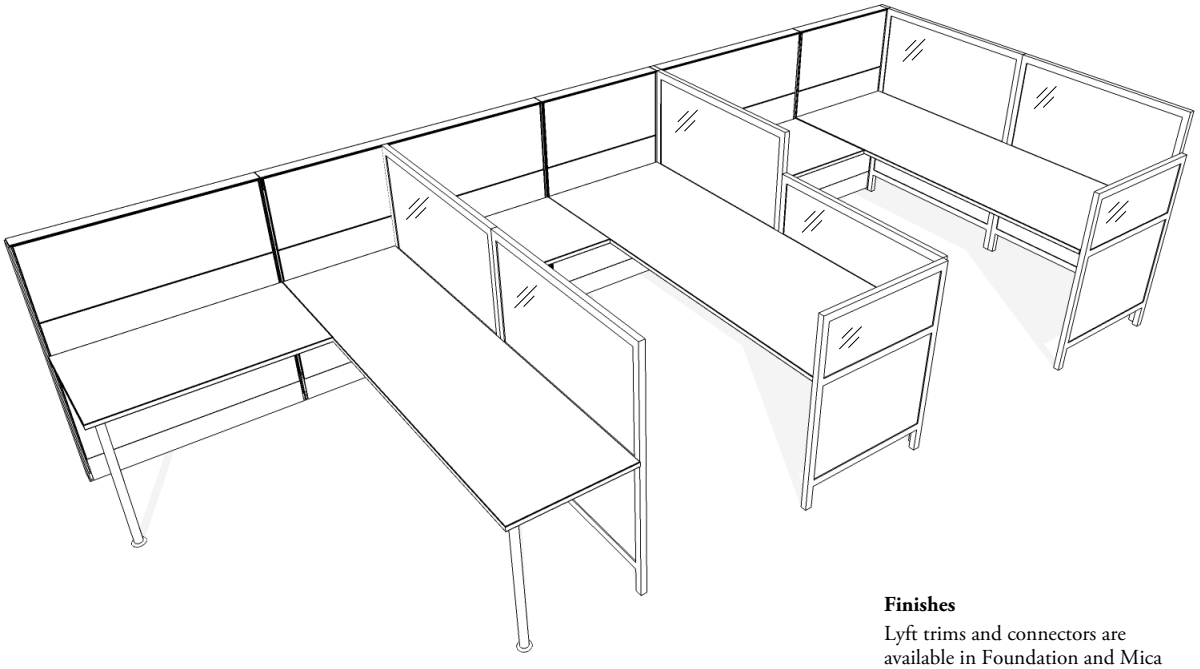

End Run 90° Connector/Spacer (HCEL)

- Creates a finished full-height 90° end run connection between a Lyft Panel and a Leverage Panel (two-way connection) or two Lyft Panels and a Leverage Panel (three-way connection)
- Can only be used at the end of a panel run and replaces the Leverage Panel End Trim

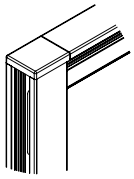

lyft trims & connections basics

Lyft offers a number of connectors and trims that finish ends and corners, or connect Lyft to Leverage.

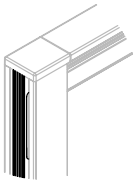

Finishes

Lyft trims and connectors are available in Foundation and Mica colors

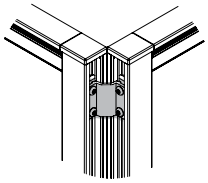

Thin Panel Intermediate Trim (HIT)

- Finishes exposed portions of Lyft Thin Panels where a full end trim is not required

Thin Panel End Trim (HET)

- Finishes the full panel end height at all exposed corner and end run locations or Lyft to Lyft thin panel connectors

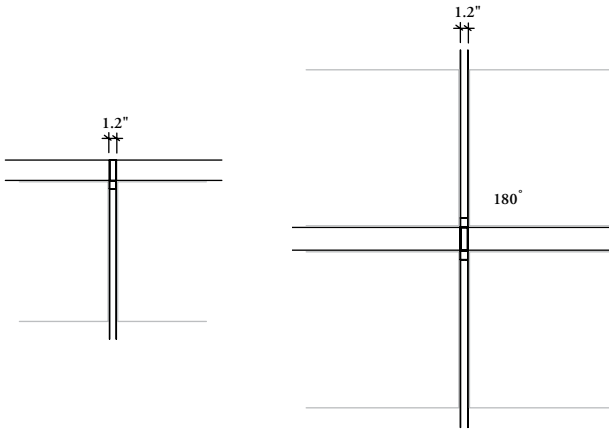

Thin Panel Connector 90° – Two-Way (HCH9)

- Creates a full-height 90° connection between two Lyft Thin Panels
- Thin Panel End Trims (HET) are required to finish the panel ends

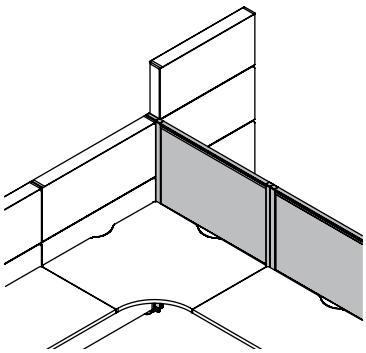

connecting lyft thin panels to leverage panels

A number of connectors are available for connecting Lyft Thin Panels to Leverage Panels.

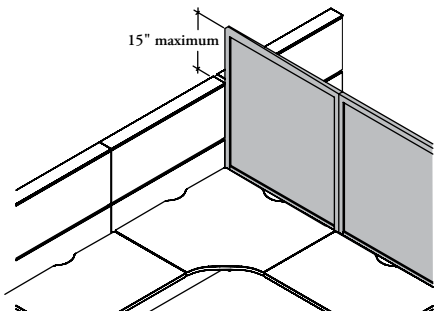

mid run 90° on-module connector/spacer

- The connector adds 1.2" to a panel run

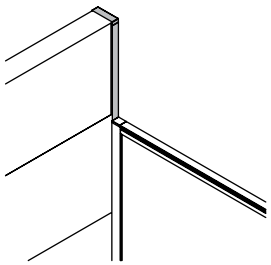

- When the Lyft Thin Panel is being used to support a Leverage Panel, a worksurface is required at the corner where the Thin Panel and the Leverage Panel meet. This connection can occur without a worksurface if the Lyft Thin Panel is stabilized with a Stabilizer Foot and the Leverage panels are properly supported in other locations
- Specify spacer height to match the height of the lowest Leverage Panel at the connection point

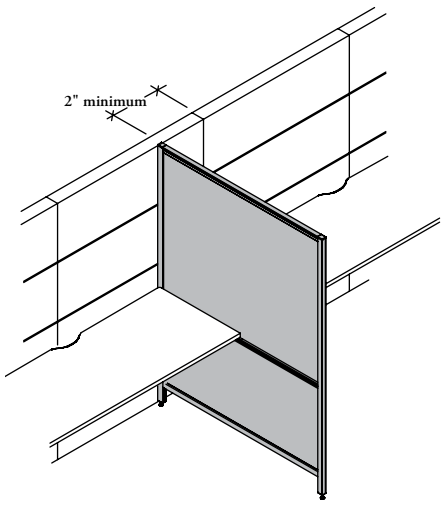

- Lyft Thin Panels can be no more than 15" higher than the Leverage Panel to which it is attached
- Thin Panel Intermediate Trims (HIT) must be specified separately when Lyft Thin Panel height exceeds Leverage Panel height

end run 90° connector/spacer

- End run height matches the height of Leverage Panel

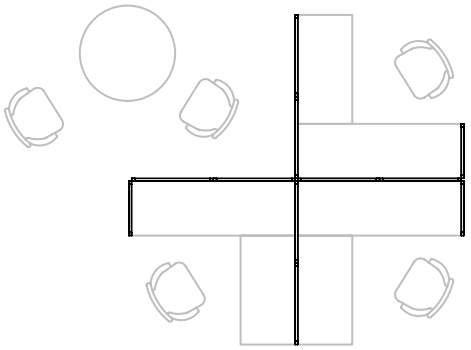

off-module 90° connector

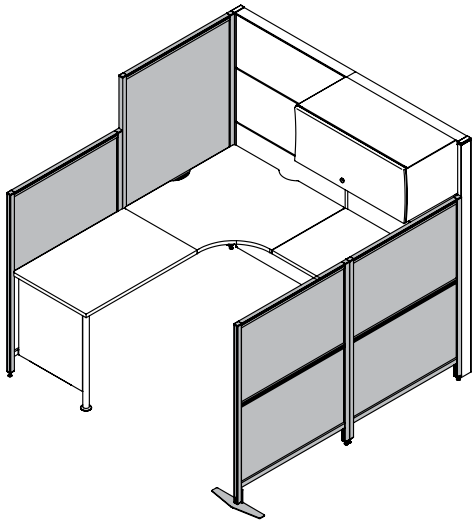

- Lyft Thin Panels mounted off-module must match the height of the Leverage Panel height
- Off module connections can occur at any point along the Leverage panel up to 2" from the Leverage Panel end.
- **Cannot** be used with Floor-Flush Panels
- The end run height matches the height of Leverage Panel

connecting thin panels to other thin panels

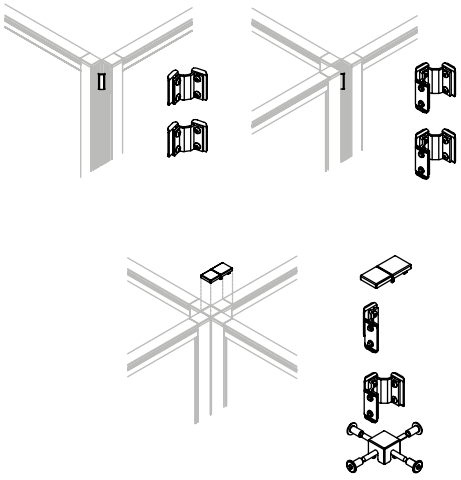

The following rules apply when connecting Thin Panels to other Thin Panels.

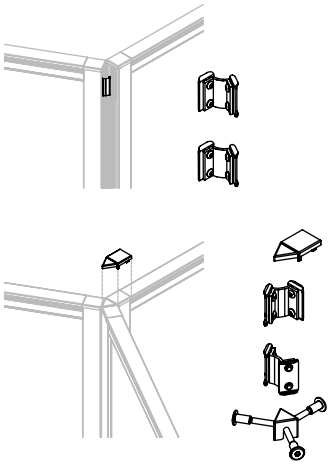

- On-module connections only, can be made when connecting Lyft Thin Panels to other Lyft Thin Panels
- Can be specified for Two-Way, Three-Way and Four-Way 90˚ or Two-Way or Three-Way 120˚ On-Module Connections between Lyft Thin Panels

Lyft Thin Panels can be connected with a change of height up to 15"

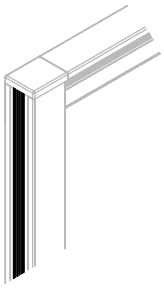

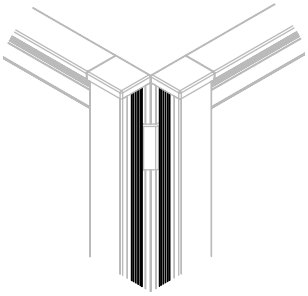

- For Four-Way 90˚ Connections, a Four-Way Top Cap (included with a Four-Way 90˚ Thin Panel Connector) replaces the Top Cap of the lower most Lyft Thin Panel
- For Three-Way 120˚ Connections, a Three-Way Top Cap (included with a Three-Way 120˚ Thin Panel Connector replaces the Top Cap of the lower most Lyft Thin Panel
- If a Two-Way or Three-Way 90˚ or a Two-Way 120˚ Thin Panel Connector is specified, Lyft Thin Panel End Trims (HET) (two or three) are required (specified separately)
- If a Four-Way 90˚ or a Three-Way 120˚ Panel Connector is specified, Lyft Thin Panel Intermediate Trims (HIT) are required for change of height panel connections (specified separately)
- Thin Panel 180˚ connections are included with Lyft Thin Panels – 90˚ and 120˚ are specified separately. Thin Panel Trims (End or Intermediate) are required for Two-Way 90˚ Connections, Three-Way 90˚ Connections, Four-Way 90˚ Connections with a change of height, Two-Way 120˚ Connections, and Three-way 120˚ Connections with a change of height
- Freestanding application opportunities using Monolithic Thin Panels only include space division for common work/meeting areas, open areas, and individual workstations

planning with thin panel end trims

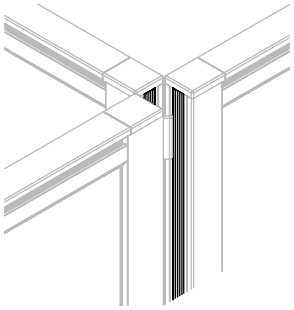

The following rules apply when planning with End Trims.

One Trim

Two Trims

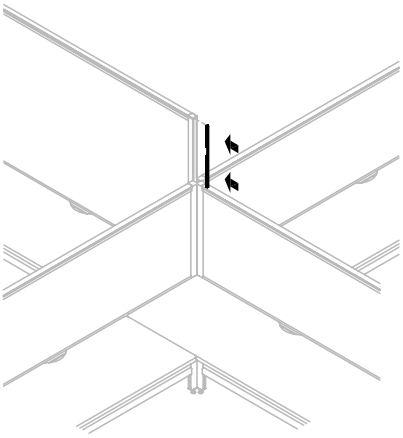

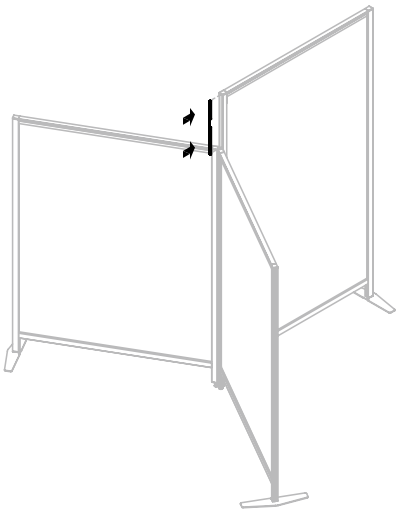

Three Trims

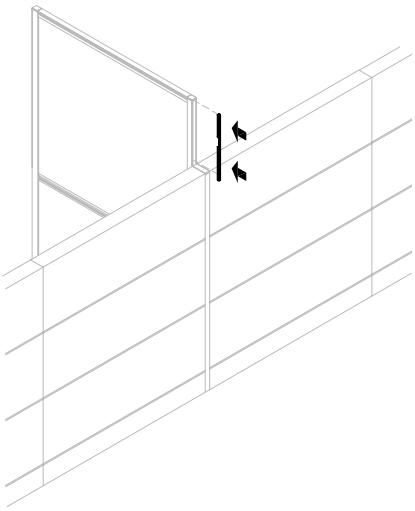

- When connecting a Lyft Screenweave Floor Screen (HS) to a Lyft Thin Panel, Thin Panel End Trim is applied to the full-height of the Lyft Thin Panel at the connection
- Thin Panel End Trim is notched at all potential locations for connections

planning with thin panel intermediate trims

The following rules apply when planning with Intermediate Trims.

- Thin Panel Intermediate Trim is applied to Lyft Thin Panels in three configurations:
  1) Four-Way 90˚ Lyft Thin Panel Connections with a change of panel height
  2) Three-Way 120˚ Lyft Thin Panel Connections with a change of panel height
  3) Lyft to Leverage panels on-module connections where Lyft Thin Panels are higher than Leverage panels
- Thin Panel Intermediate Trim is notched at all potential locations for connections

ELEMENT/PANEL ADD-ON COMPATIBILITY CHART 115

elements overview

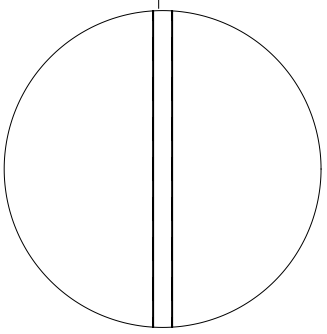

Leverage elements are available in Standard or Corridor widths and in a variety of finishes, to provide maximum flexibility and aesthetics.

- Corridor width elements are wider and cover the vertical slots of the panel frame when using the thin gasket or with the wide gasket (reversed), for a cleaner aesthetic. However no components can be mounted to the frame

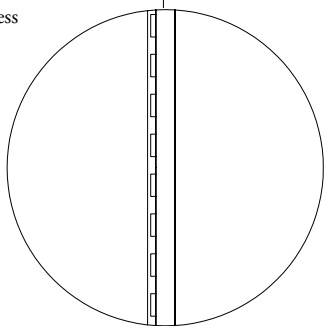

Standard Width elements (shown with thin gasket) are used when access to the vertical slots of the panel is needed for support components

Corridor Width elements (shown with thin gasket) are wider and cover the vertical slots of the panel when access to the slots are not required

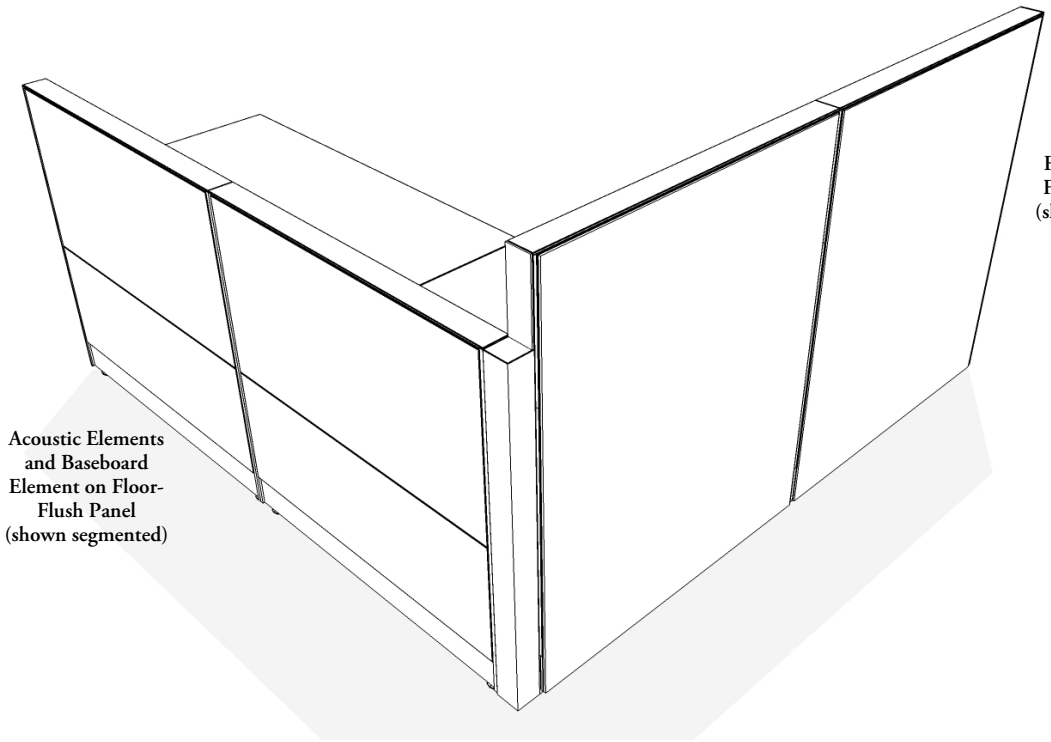

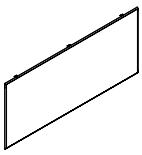

Both **Standard Width** and **Corridor Width** elements (shown with thin gasket) can be used when access to the vertical slots is needed for support components on one side and slots covered on the other side of the panel

acoustic element basics

Acoustic elements are available for all panel types and provide full acoustic properties and tackability to a panel. Standard and Corridor width options are available on standard, floor-flush and monolithic elements.

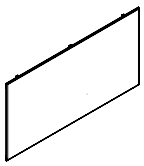

Are tackable with the exception of the 6" element

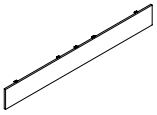

Acoustic Element (KES)

- Used on all levels of panels including the lowest level of a Floor-Flush Panel. When used with a Floor-Flush Panel and additional baseboard is required and must be ordered separately
- Available in 6", 9", 12", 15", 21", 24", 30", 36", 45" heights to match segmentation options on panels and in widths from 24" to 60"
- 36" and 45" monolithic heights are only available up to 48" wide
- Can be upholstered in materials available from *Teknion's Fabric & Finishes Program Guide*

Acoustic Element – Floor-Flush (KESF)

- Used in the lowest level of the Floor-Flush Panel only and extend to the floor, covering the base of the panel frame
- Available in 20", 29", 35", 41" heights and in widths from 24" to 48"

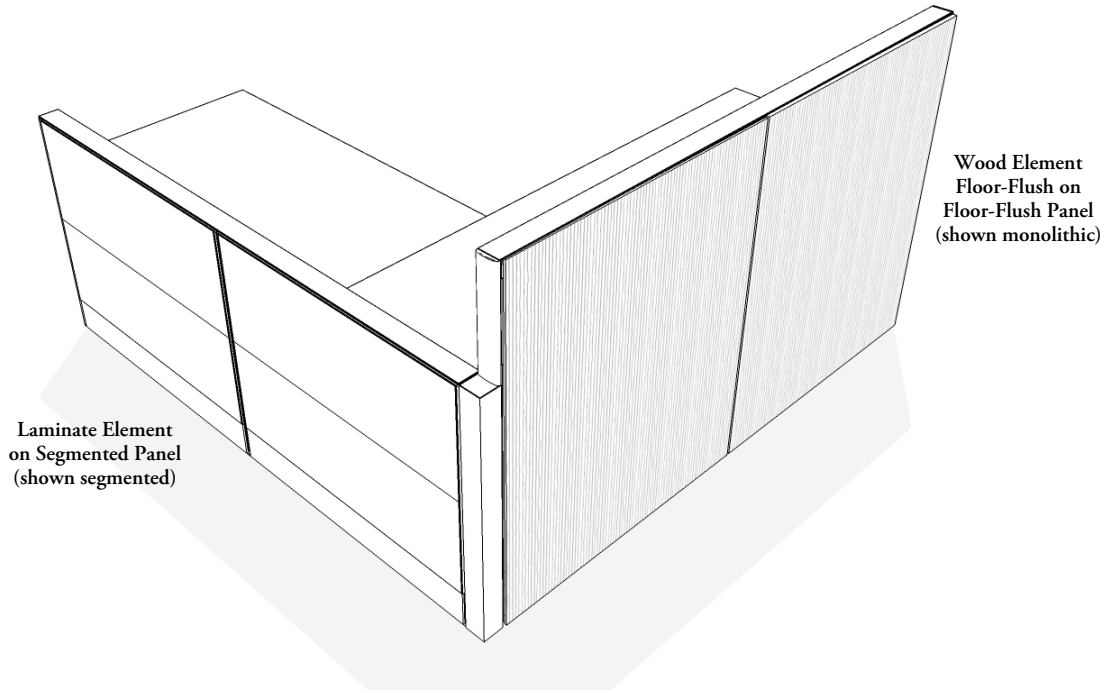

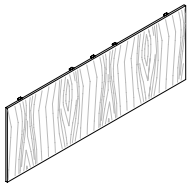

Baseboard Element (KEB)

- Used to cover the 6" base on the Floor-Flush when a Floor-Flush element **is not** being used
- Available in fabric, laminate, metal and wood finishes

wood & laminate element basics

Wood and Laminate elements are available for all panel types and provide a hard surface finish to a panel. Standard and Corridor width options are available on standard, floor-flush and monolithic elements.

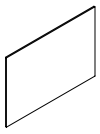

Wood Element (KEWD)

- Used on all levels of panels including the lowest level of a Floor-Flush Panel. When used with a Floor-Flush Panel and additional baseboard is required and must be ordered separately
- Available in 6", 9", 12", 15", 21", 24", 30", 36", 45" heights to match segmentation options on panels and in widths from 24" to 48"
- Available in Flintwood finishes
- Grain direction on wood elements run vertically

Wood Element Floor-Flush (KEWF)

- Used in the lowest level of the Floor-Flush Panel, covering the base of the panel frame
- Available in 20" ,29" ,35", 41", 50" heights and in widths from 24" to 48"
- Available in Flintwood finishes
- Grain direction on wood elements run vertically

Laminate Element (KEA)

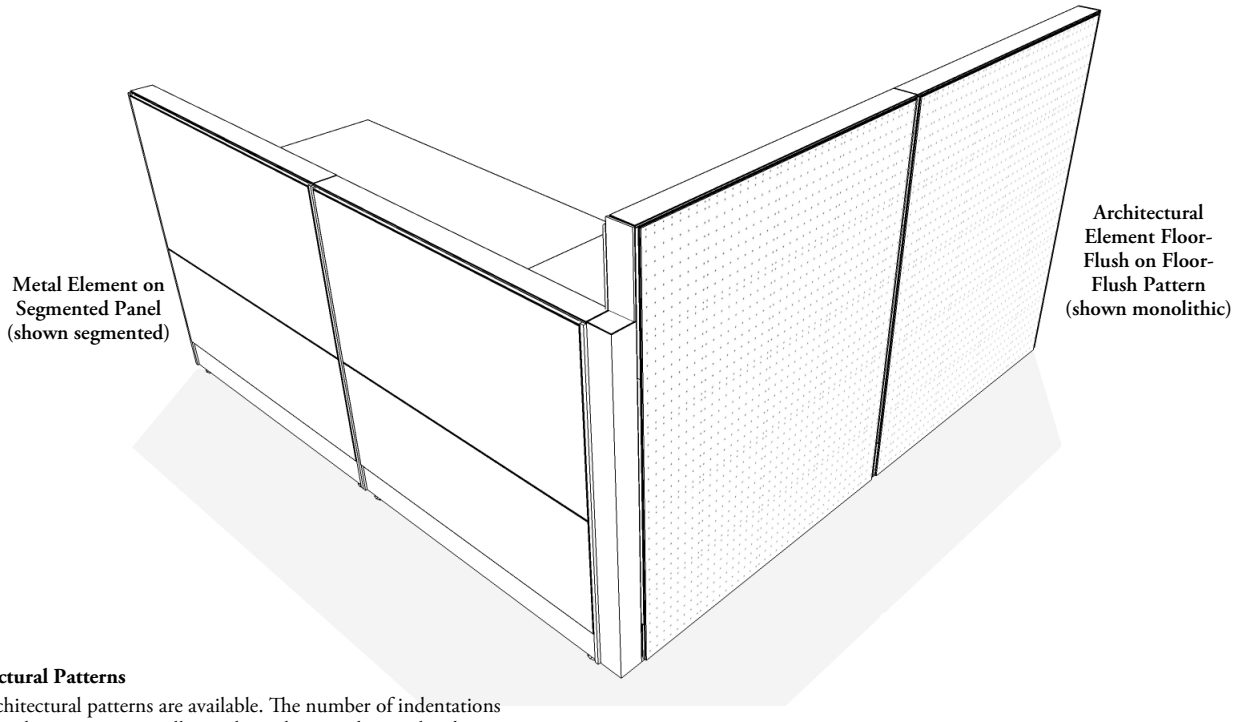

- Used on all levels of panels including the lowest level of a Floor-Flush Panel. When used with a Floor-Flush Panel and additional baseboard is required and must be ordered separately
- Available in 6", 9", 12", 15", 21", 24", 30", 36", 45", and 60" heights and widths from 24" to 48"
- Available in Element Source Laminate

Laminate Element Floor-Flush (KEAF)

- Used in the lowest level of the Floor-Flush Panel, covering the base of the panel frame
- Available in 20", 29", 35", 41" and 50" heights and widths from 24" to 48"
- Available in Element Source Laminate

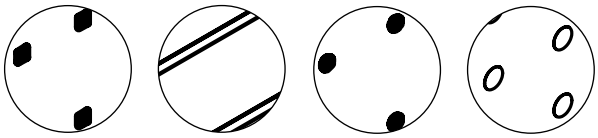

metal element basics

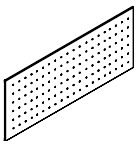

Metal elements are available for all panel types and with architectural patterns provide a para-magnetic alternative to fabric elements. Standard and Corridor width options are available on standard, floor-flush and monolithic elements.

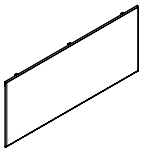

Architectural Patterns

Four architectural patterns are available. The number of indentations used to make up a pattern will vary depending on element height

Architectural Element (KER)

- Provides an embossed surface in various patterns and are used on all levels of panels including the lowest level of a Floor-Flush Panel. When used with a Floor-Flush Panel and additional baseboard is required and must be ordered separately
- Available in 6", 12", 15", 21", 24", 30", 36", and 45" heights and widths from 24" to 60"
- Available in Foundation, Mica and Accent

Metal Element Floor-Flush (KEMF)

- Used in the lowest level of the Floor-Flush Panel, covering the base of the panel frame
- Available in 20", 29", 35" , 41" and 50" heights and 24" to 60" widths
- Available in Foundation, Mica and Accent

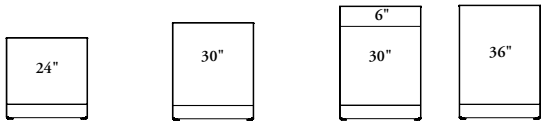

Metal Element (KEM)

- Used on all levels of panels including the lowest level of a Floor-Flush Panel. When used with a Floor-Flush Panel and additional baseboard is required and must be ordered separately
- Available in 6", 9", 12", 15", 21", 24", 30", 36", and 45" heights and widths from 24" to 60"
- Available in Foundation, Mica and Accent

power/communication element basics

Power and Communication elements are available for all panel types and provide face-mounted access to power and communication outlets and are available in Corridor and Standard width. They are available in fabric, metal, wood and laminate finishes.

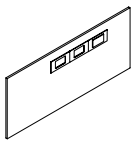

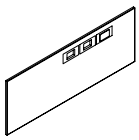

Acoustic Power/ Communication Element (KEC)

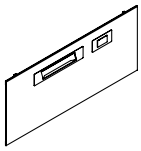

Metal Power/ Communication Element (KEMD)

Laminate Element Power/Communication (KEAP)

Metal Power/ Communication Element-Floor-Flush (KEMDF)

International Power/ Communications Element (VKEC)

- Similar to Acoustic Power/ Communication Element (KEC), but for International applications
- Used with (VED) outlet boxes which are available in 2 power or 4 power configurations
- Can be upholstered in materials available from *Teknion's Fabric & Finishes Program Guide*
- International Power/ Communications Element (VKEC) is sized to standard industry faceplates and is not sized for the Voice & Data Box (VVD)

Power/Communication Elements

Provides face-mounted access to power and communications outlets available Standard and Corridor Width

Heights:

Standard Heights:

9", 12", 15", 21", 24", 30" and 36"h to match segmentation options on panels

Floor Flush Heights:

20", 29", 35", 41" and 51"h. all allow the fascia to cover the base of a Floor-Flush Panel

24" and 30"h. elements are shipped with the cut outs at the top of the element but can be rotated on site to allow for base access to power on 30"h. panels, the electrical cut out at the top of the element allows for access from below a worksurface

Widths:

All panel types except Floor Flush

24" to 60"w.

Floor Flush

24" to 48"w.

Cut Out Locations:

1 -Power Only
2 -Power and Communication
3- Communication Only
4 - CALA Power and Communication 2 Outlets
5 - CALA Power and Communication 4 Outlets

Finishes:

Acoustic Fabrics

-Materials available from *Teknion's Fabric & Finish Program Guide*

Metal

Foundation
Mica

Flintwood

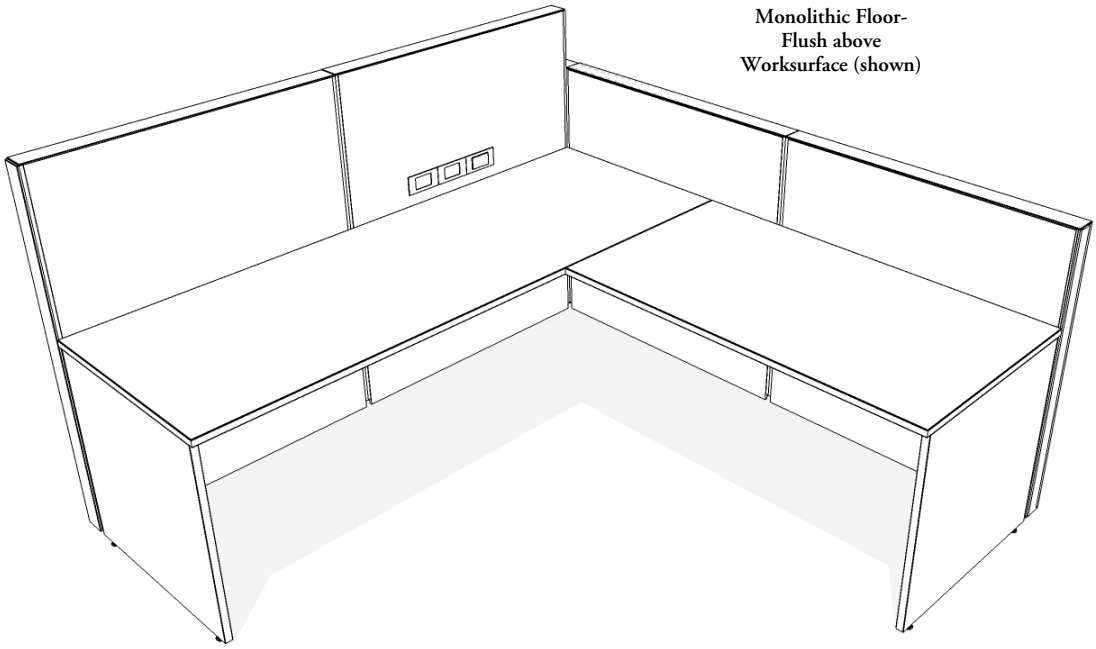

Flintwood Stains

Laminate

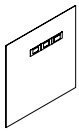

Source Laminate

monolithic power/communication element basics

Monolithic Power and Communication elements are available for all panel types and provide face-mounted access to power and communication outlets on a monolithic element and are available in Corridor and Standard width, floor-flush and monolithic. They are available in fabric, metal and wood finishes.

Monolithic Floor-Flush above Worksurface (shown)

Monolithic Acoustic Power/ Communication Element (KEUS)

Monolithic Power/Communication Elements

Provide face-mounted access to power and communications outlets on a monolithic element available standard and corridor width monolithic elements **cannot** be rotated on a panel

Cut Out Locations:

Top
Above worksurface
Below worksurface
Base (not available on Elevated Panels)

Heights:

36" and 45"h.

Widths:

24" to 48"w.

Cut Out Locations

1 -Power Only
2 -Power and Communication
3- Communication Only
4 - CALA Power and Communication 2 Outlets
5 - CALA Power and Communication 4 Outlets

Finishes:

Acoustic Fabrics materials available from *Teknion's Fabric & Finish Program Guide*

Metal

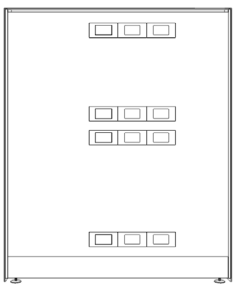

Foundation
Mica

Flintwood

Flintwood Stains

Laminate

Source Laminate

Power Cut Outs are available in four locations:

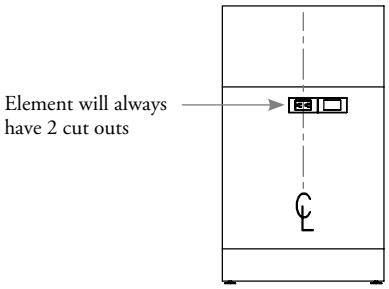

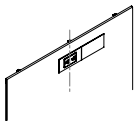

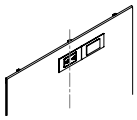

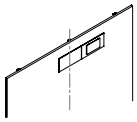

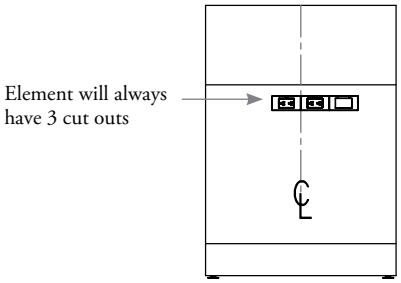

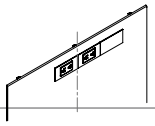

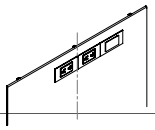

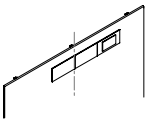

- **Top** (available on Floor-Flush panels and on a 36" monolithic element)
- **Above worksurface** (available on all panel types)
- **Under worksurface** (available on all panel types with a 30" rail)
- **Base** (available on all panel types excluding elevated)

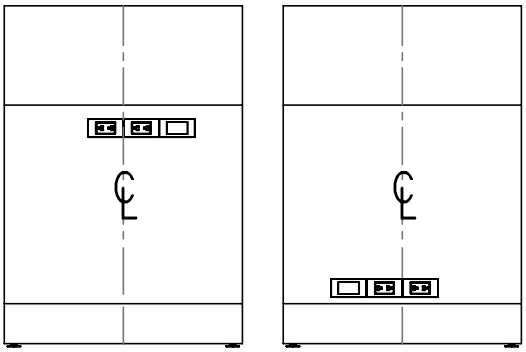

planning with power/communication element widths

The following should be considered when planning with Power/Communication element widths

- The location of the power or communication cut out is always centered on the element, and the bezel with cover plate is always to the right

standard elements

panel width	options	location
Panel width of 24" or 30" 	**Power only:** 1 power bezel 1 communication bezel with a cap	 Power bezel is centered Communication on right
	Power/Communication: 1 power bezel 1 communication bezel with a cover plate	 Power bezel is centered Communication on right
	Communication only: 1 communication bezel 1 communication bezel with cover plate, 1 cut out with a cap	 Communication bezel plate is centered Communication on right
Panel width of 36" and more 	**Power only:** 2 power bezels 1 cut out with a cap	 Power bezels are centered Communication on right
	Power/Communication: 2 power bezels 1 communication bezel	 Power bezels are centered Communication on right
	Communication only: 1 communication bezel with cover plates 2 cut outs with a cap	 Power cover plates are centered Communication on right

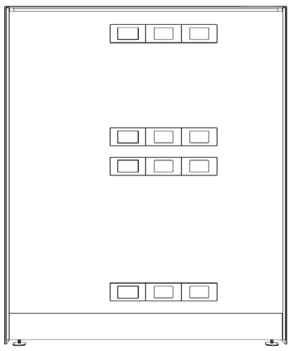

Elements up to 30"h. can be rotated, providing the versatility to have the power on the top or bottom of an element.
-The communication cut out will be on the left when the element is rotated
-Careful attention is required when selecting patterned fabrics as they will appear differently when rotated

planning with power/communication element width (continued)

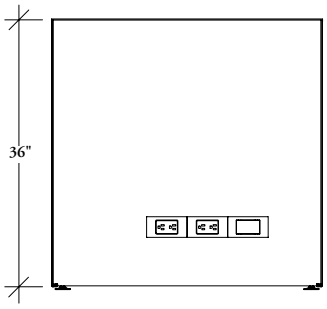

monolithic elements

On monolithic elements, power and communication cut outs are available in four locations

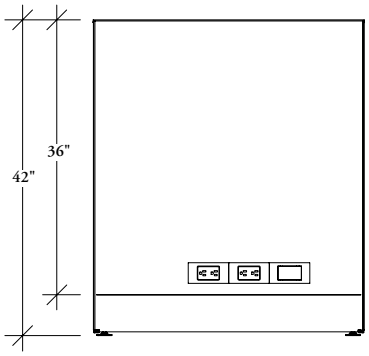

- **Top** (available on Floor-Flush panels and on a 36" monolithic element)
- **Above worksurface** (available on all panel types)
- **Under worksurface** (available on all panel types with a 30" rail)
- **Base** (available on all panel types excluding elevated)

Although Power and Communications Elements may share similar heights, they have different functions. Careful attention is required when selecting the correct element.

- 35" high Metal Power/Communication Element - Floor Flush (KEMDF) used on 36" high Floor-Flush Panel

- 36" high Metal Power/Communication Element (KEMD) used on a 42" high Conventional Panel
- Offers the ability to rotate the element so the power can be at the top or bottom
- Can be located on a different level of the panel of desired (from 30" - 66")

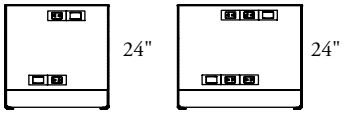

planning with power/communication elements – conventional

The following pages outline the available locations for power/communication elements.

- Power Communication Elements can be used on Leverage Conventional and Universal Panels. The following outlines all of the possible locations that they can be used. (cut outs **cannot** be in two locations on the same element)

accessory & whiteboard basics

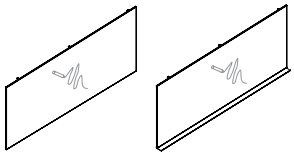

Accessory and Whiteboard elements are available for all panel types and provide functionality to Leverage Panels. They are available in Corridor and Standard width.

Accessory Element (KEL)

- Used on above worksurface levels of panels
- Designed to support Accessory Personal Organizers (PAX and FX) and technology support, available from Complements: *Teknion's Ergonomics & Accessories Program*
- Frame is available in Foundation, Accent and Mica colors
- MAST Monitor Arm is not to be installed on the Accessory Element, see Complements: *Teknion's Ergonomics & Accessories Program*

Whiteboard Element (KEWN)

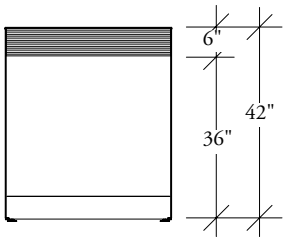

- Used on above worksurface levels of panels
- Serves as an erasable message board
- Available in heights of 12", 15", 21", 24", 30" or 36"
- 24" high element is to be used with the Panel Add-On (KPO)
- A tray can be specified and will be the same width as the element
- Tray finish available in Foundation and Mica finishes

planning with accessory & whiteboard elements

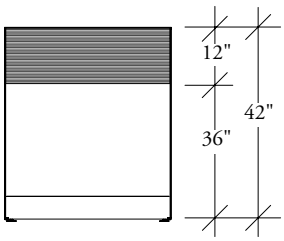

The following should be considered when planning with Whiteboards.

accessory rails

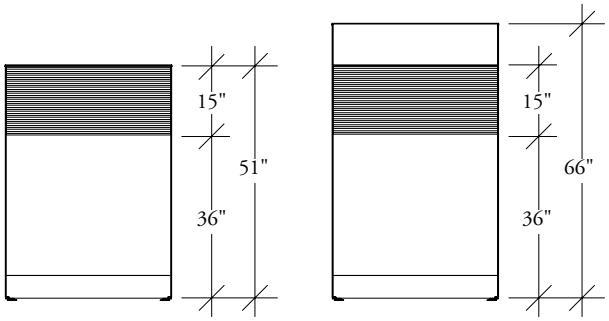

Available in heights of 6", 12" and 15".

The 6" height accessory rail can only be used from 36" to 42" on a 42" high panel.

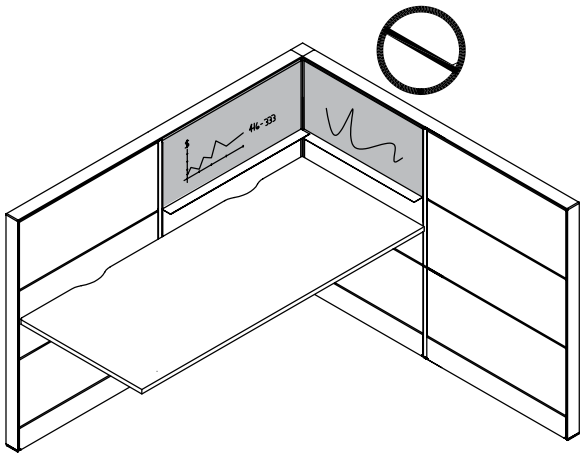

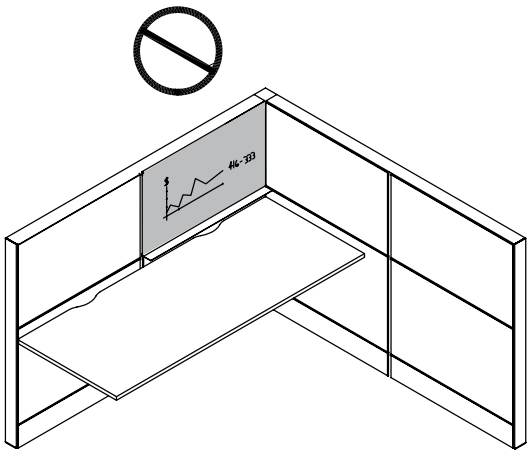

The 12" height from 30" to 42" in a 42" high panel with a 30" datum.

The 15" high in a 51" or 66" high from above the 36" datum line.

whiteboards

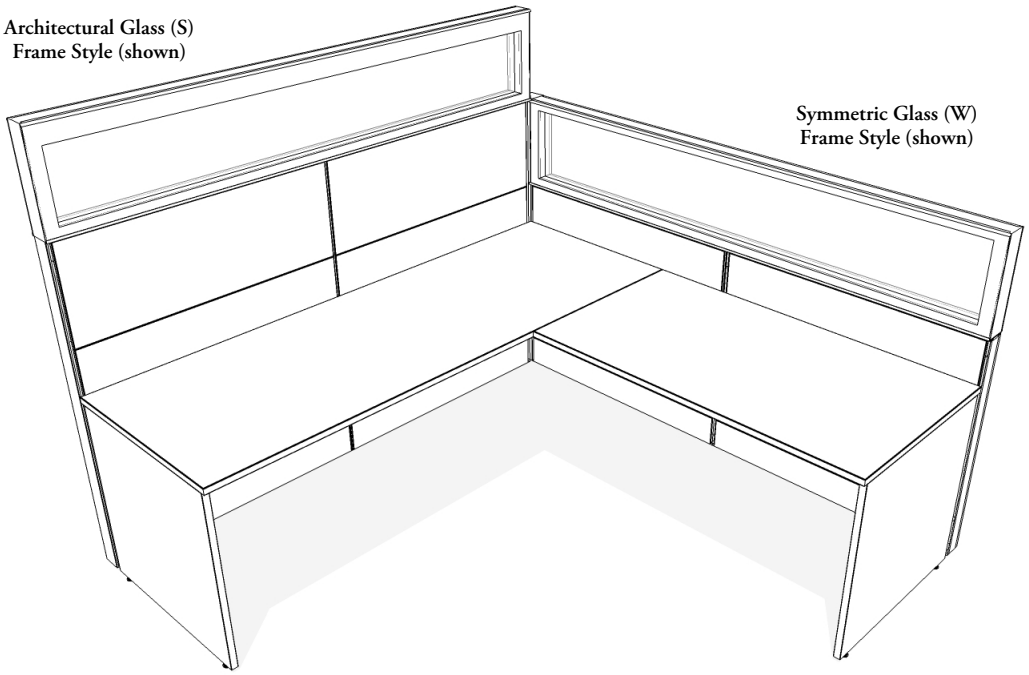

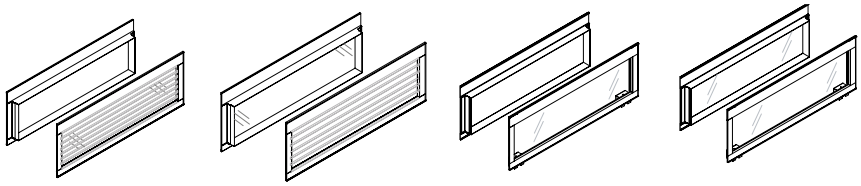

- When the tray option is specified, two whiteboards **cannot** be planned side-by-side in a 90˚ corner configuration as the tray is the full width of the element and will cause an obstruction
- A side-by-side application is possible when no tray is present

- When planning with the 30" high datum lines, caution must be used when specifying the Whiteboard Element with Tray – the tray may obstruct access to the worksurface scallop

glass element basics

Glass Elements are available for all panel types and provide the opportunity to bring light into a workstation. They are available in Corridor and Standard width with architectural patterns.

KEG KEGD KET KETD

Architectural Glass Element (KEG), Double Architectural Glass Element (KEGD), Glass Element (KET), Double Glass Element (KETD)

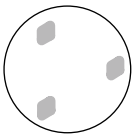

- Available in single or double tempered glass with various levels of visual access
- Symmetric Glass Frame style (W) has a symmetric top and bottom frame and no cable lay in capability. The Glass Frame style (S) has a lay-in cable trough at the top of the element
- Glass (S) can be applied on the top level of the Universal Panel frame style (KPE), allowing for a higher wire capacity at the top of the panel
- Symmetric (W) can be applied on the top level of the Conventional Panel frame style (KPW) Floor-Flush Panel frame style, Elevated panel frame style (KPE) and any other level for all other panel frame styles, providing a larger glass area than the Glass Element frame style (S)
- 24" high Architectural Glass or Symmetric Element can be applied only to 24" high Panel Add-Ons and not in a 24" opening in a panel frame
- Glass Elements are available in Clear or Frost

Architectural Patterns

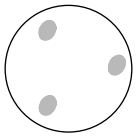

Number of dots or lines used to make up a pattern will vary depending on element height

Louvered

worksurface overview

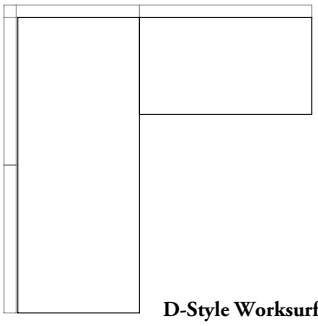

Leverage offers a variety of panel-mounted and semi-suspended worksurfaces for 90° and 120° applications. They are offered in Standard, D-Style and D-Style with scallops.

- Worksurfaces may **not** span more than 60" without support
- Reinforcements Channels and Supports are ordered separately unless otherwise specified
- Grommets are available for routing power to below the worksurface

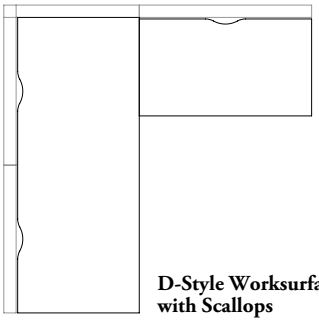

Standard Worksurface

- Standard worksurfaces have a slightly rounded corner profile and have scallops on the back edge of the worksurface to facilitate wire management. The number of scallops depend on the size and shape of the surface

D-Style Worksurface

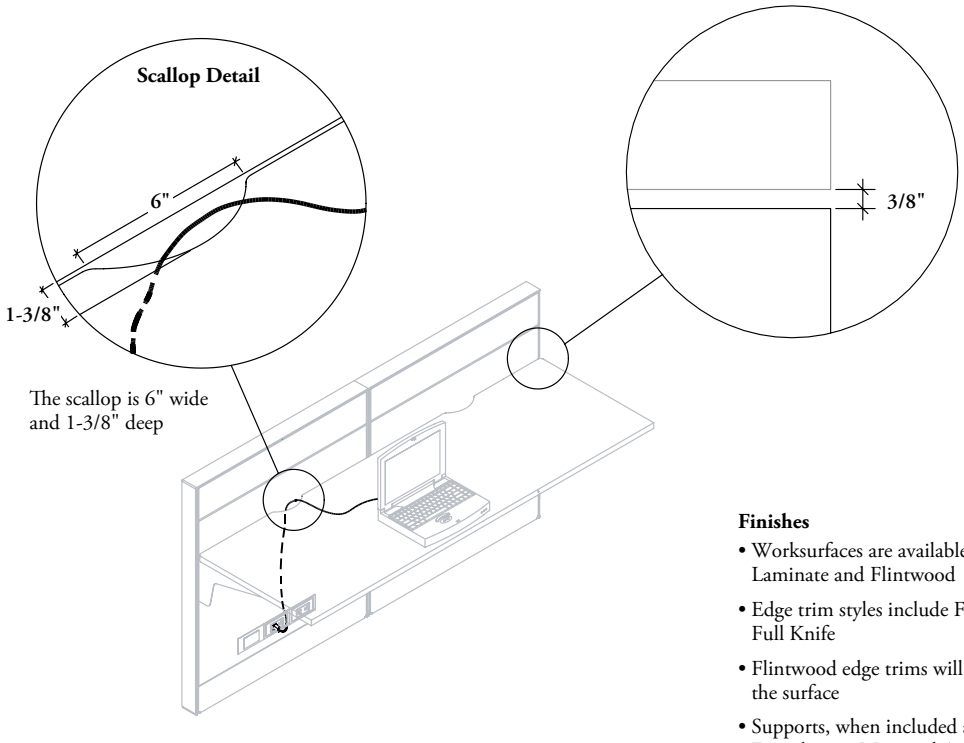

- D-style worksurfaces have square and radius corners
- D-style surfaces are available in depths and widths to match District storage

D-Style Worksurface with Scallops

- D-style worksurfaces with scallops have square corners and scallops on the back edge of the worksurface to facilitate wire management. The number of scallops depend on the size and shape of the surface
- D-style surfaces are available in depths and widths to match District storage

All panel mounted worksurfaces have a 3/8" gap between the back edge of the worksurface and the panel to facilitate wire management.

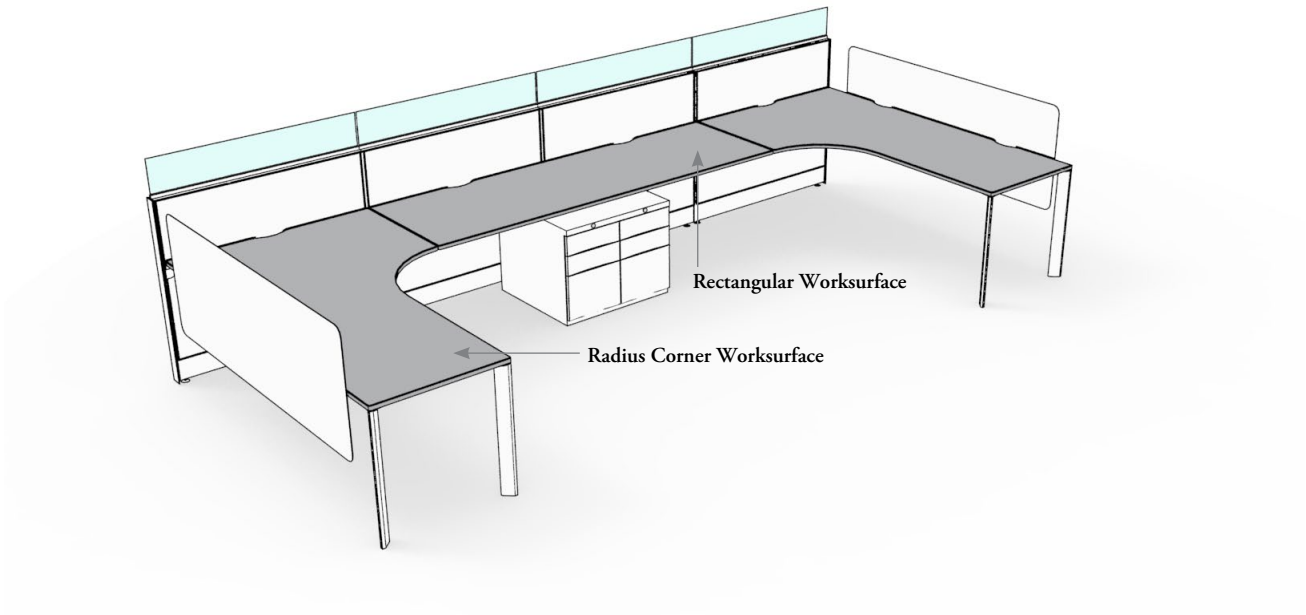

Finishes

- Worksurfaces are available in Foundation Laminate and Flintwood
- Edge trim styles include Flat, Flintwood Flat and Full Knife
- Flintwood edge trims will be finished to match the surface
- Supports, when included are available in Foundation, Mica and Accent colors

worksurface basics

The following outlines the worksurface options for Leverage Standard worksurfaces.

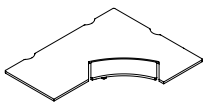

corner worksurfaces

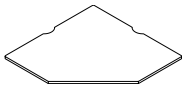

- **Corner Worksurfaces** are available for 90˚ and 120˚ applications
- Available with and without keyboard trays, in standard and extended sizes
- Used primarily as a dedicated corner for computer monitors and keyboards

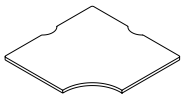

Radius Corner Worksurface (KWRR)

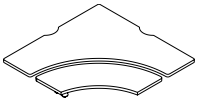

Radius Corner Worksurface with Return and Keyboard Support (KWRK)

Standard Corner Worksurface (KWPS)

Curved Corner Worksurface (KWSC)

Split Radius Corner Worksurface (KWCX)

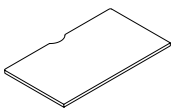

Standard Pentagon Worksurface (KWPG)

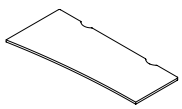

Extended Pentagon Worksurface (KWPE)

straight worksurfaces

- **Straight Worksurfaces** include Rectangular and Transition Worksurfaces
- Panel-mounted and provide a primary or secondary surface
- Can be used on- or off-module when suspended from a panel

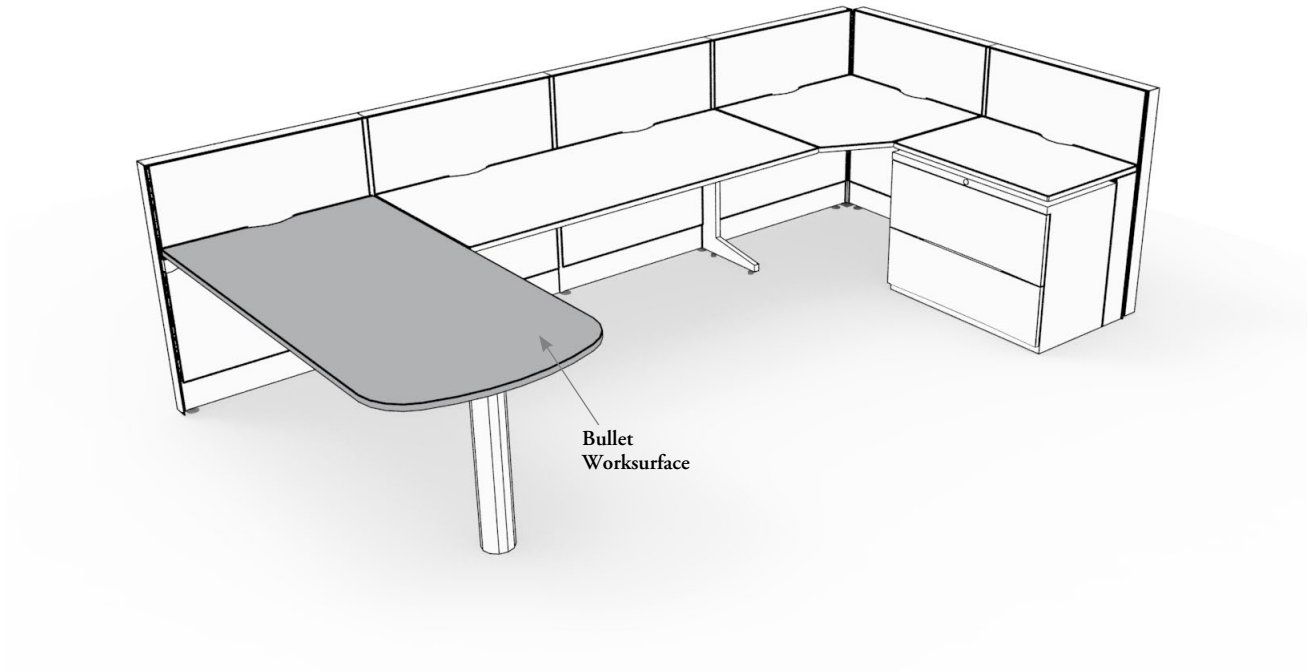

Rectangular Worksurface (KWS)

Concave Worksurface (KWCC)

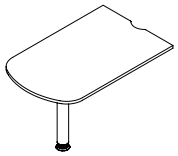

worksurface basics (continued)

The following outlines the worksurface options for Leverage worksurfaces.

bullet worksurfaces

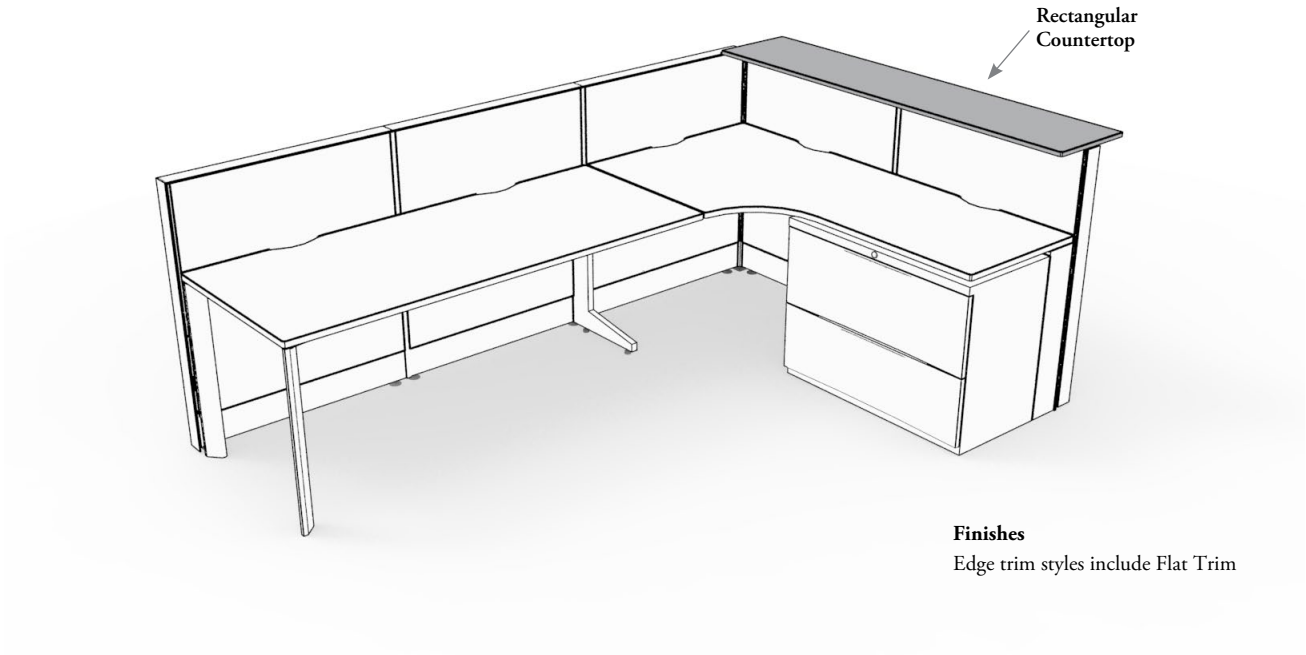

- **Bullet Worksurfaces** provide a large semi-supported meeting area for both single and shared workstation configurations
- Provide panel stability when used to replace return Panels
- Must be suspended from a panel, and may not be used as panel-mounted worksurfaces or combined with Leverage supports to create freestanding desks

Bullet Worksurface
(KWBT)

worksurface basics (continued)

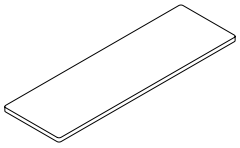

The following outlines the worksurface options for Leverage worksurfaces.

Finishes
Edge trim styles include Flat Trim

countertops

- **Countertops** are rectangular and mount on top of a Panel to provide a transaction surface
- Can be used alone or together with other countertops
- Widths wider than 36" can span two panels
- Can only be mounted on module
- May be used to wrap a corner but the lengths need to be adjusted for this application
- Countertops **cannot** be mounted over wood top trims
- Countertops **cannot** be used with corridor width elements

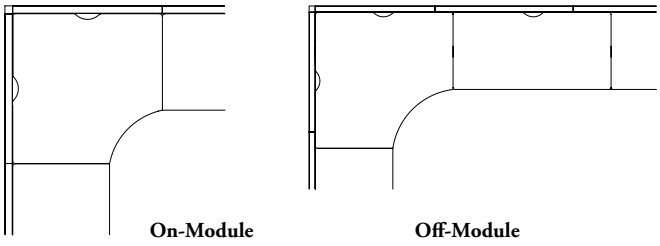

Rectangular Countertop
(KWCS)

- **Source Laminate Worksurfaces cannot** be used in conjunction with standard panel-mounted or in freestanding applications
- All Keyboard Trays and Accessories may be used with 30" deep Source Laminate worksurfaces
- All 24" deep worksurfaces under 54" in width may be used with all Accessories and Keyboard Trays
- **Cannot** be used with Desktop Mounted Screens

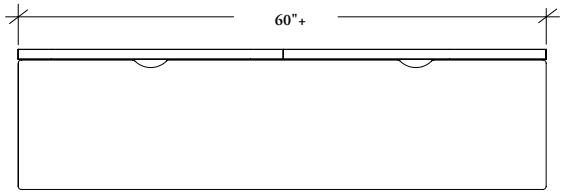

planning with panel-mounted worksurfaces

The following rules apply when planning with panel-mounted worksurfaces.

on-module and off-module mounting

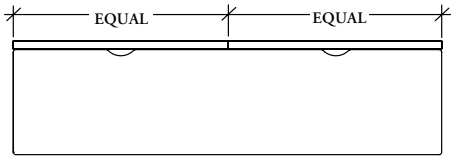

Panel-mounted worksurfaces can be used on- or off-module when suspended from a panel.

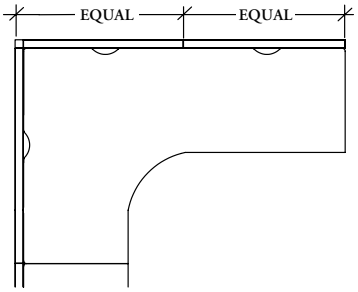

All panel-mounted worksurfaces greater than 60" in width require a minimum of two panels for support because additional supports will be required.

spanning two panels

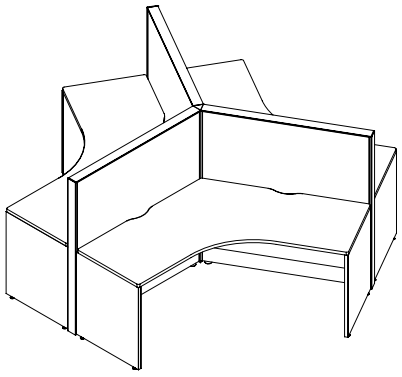

In planning scenarios where a panel-mounted worksurface is required to span two panels, the recommended width of the panel is half the width of the worksurface.

120˚ planning

120˚ worksurfaces are offered in a wide range of shapes, sizes and finishes.

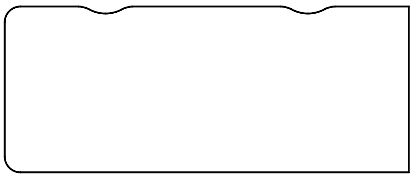

- 120˚ worksurfaces must be panel supported, on-module
- 120˚planning utilizes existing worksurface supports. Refer to specific product page for support applicability

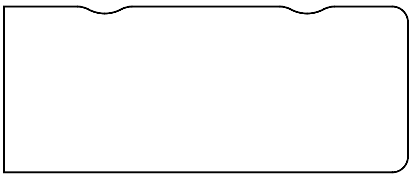

planning with panel-mounted worksurfaces (continued)

radius corner worksurfaces

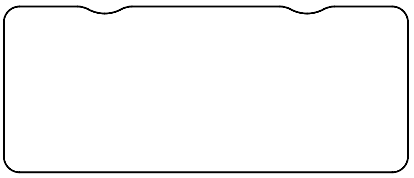

Radius Corner Worksurfaces can be planned with Infinity Curved Desk Edge Screens (GXCL).

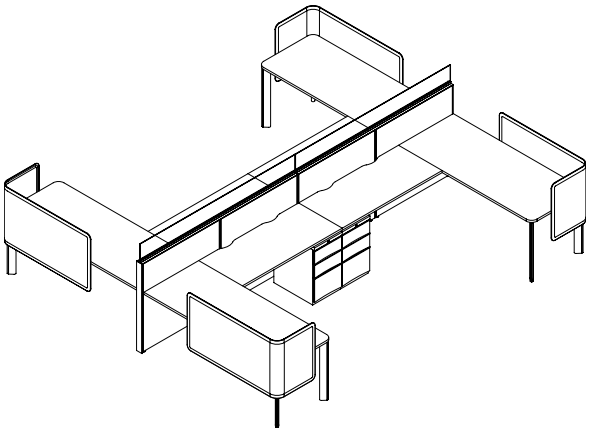

The Rectangle Perpendicular with Radius Corner Worksurface (D-Style) (KWSD) with two Round 3" Radius Left.

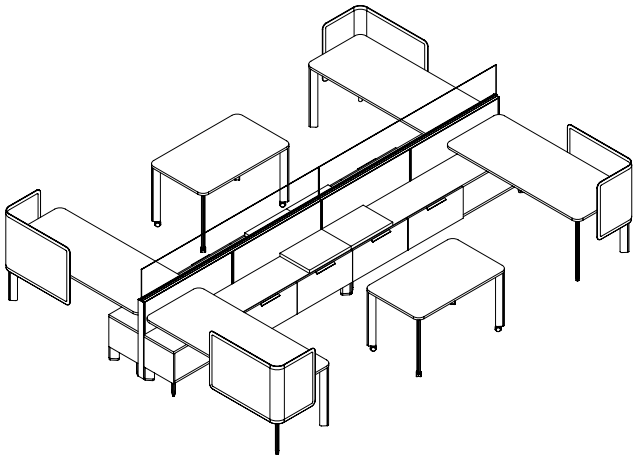

The Rectangle Perpendicular with Radius Corner Worksurface (D-Style) (KWSD) with two Round 3" Radius Right.

The Rectangle Perpendicular with Radius Corner Worksurface (D-Style) (KWSD) with four Round 3" Radius.

Planning with two Round 3" Radius Corner Worksurfaces.

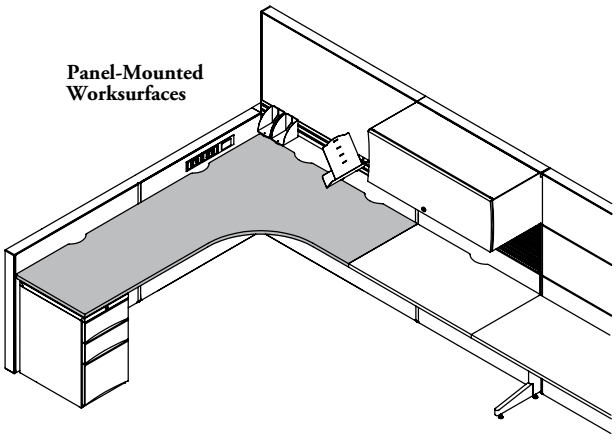

Planning with four Round 3" Radius Corner Worksurfaces

planning with panel-mounted worksurfaces (continued)

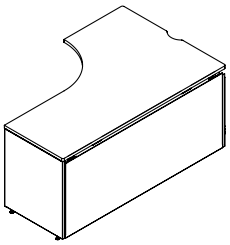

Semi-supported worksurfaces are ideal for workstations where only an electrified panel spine is required, eliminating the need for return panels.

panel mounted worksurfaces

Panel-Mounted Worksurfaces

Two support options are available for panel supporting worksurfaces, the Monoleg option and the Flush End Gable option.

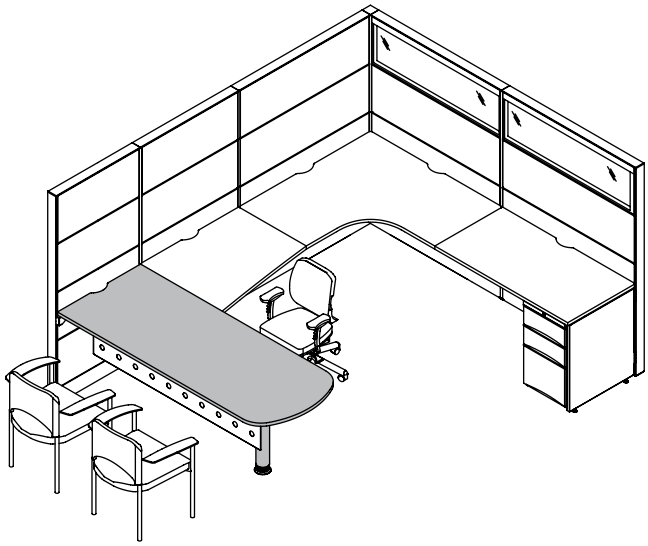

With Flush End Gable

- All Panel supporting worksurfaces with a Flush End Gable include a Full-Height Modesty Panel
- The Full-Height Modesty Panel provides visual privacy, wire management and structural stability
- The Full-Height Modesty Panel is mounted flush to the rear edge of the worksurface

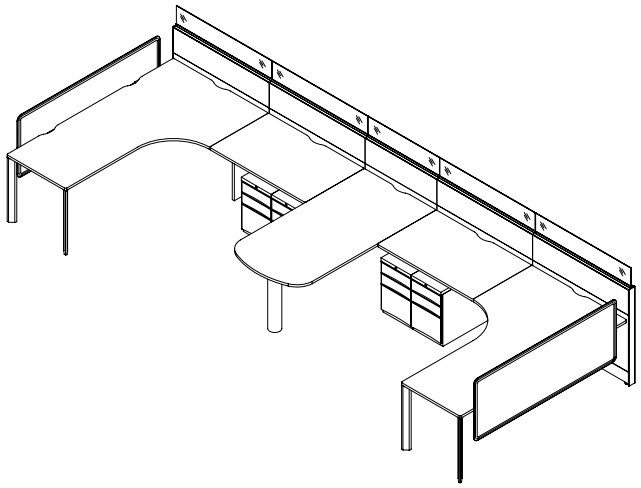

planning with bullet worksurfaces

Bullet worksurfaces provide a large semi-supported meeting area for both single and shared workstation configurations as well as Panel stability when used to replace return Panels.

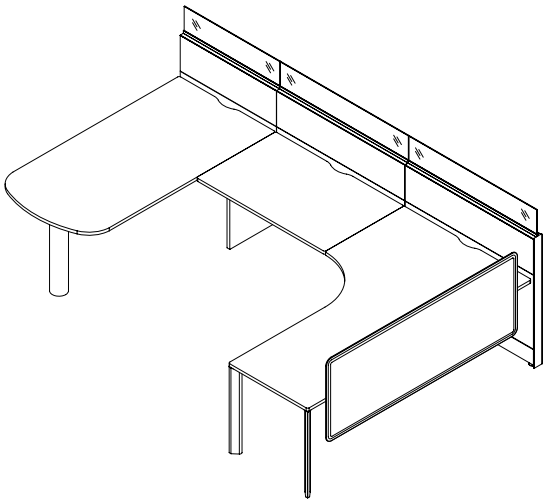

single workstation

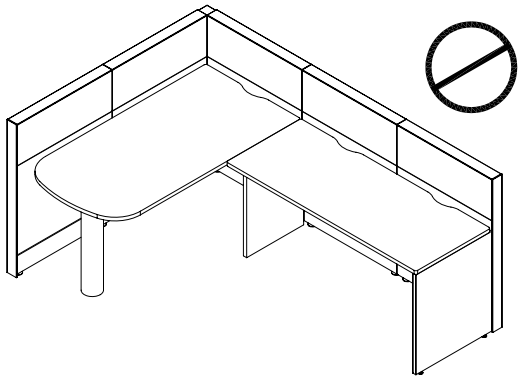

shared workstation

Guesting stations can be used in single and shared applications.

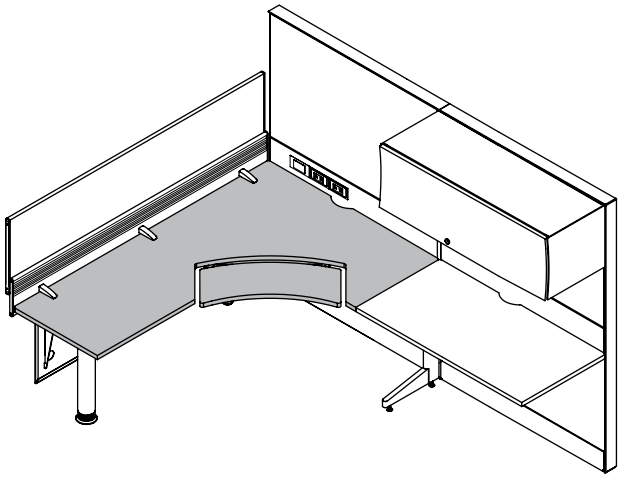

Bullet worksurfaces must be mounted perpendicular to the panel spine.

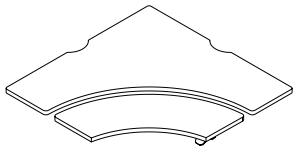

Bullet worksurfaces cannot run parallel to a panel.

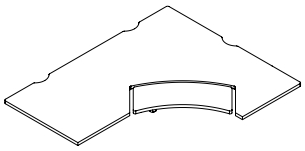

keyboard support surfaces

Leverage offers a comprehensive range of keyboard support worksurfaces.

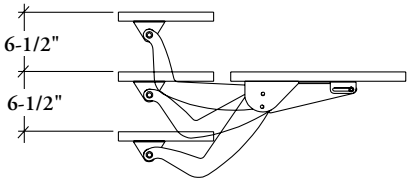

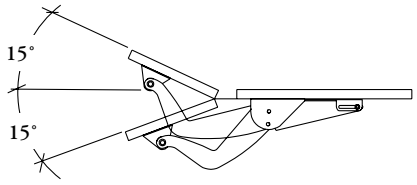

Split Radius Corner Worksurface (KWCX)

Radius Corner Worksurface with Return and Keyboard Support (KWRK)

keyboard height adjustment mechanism

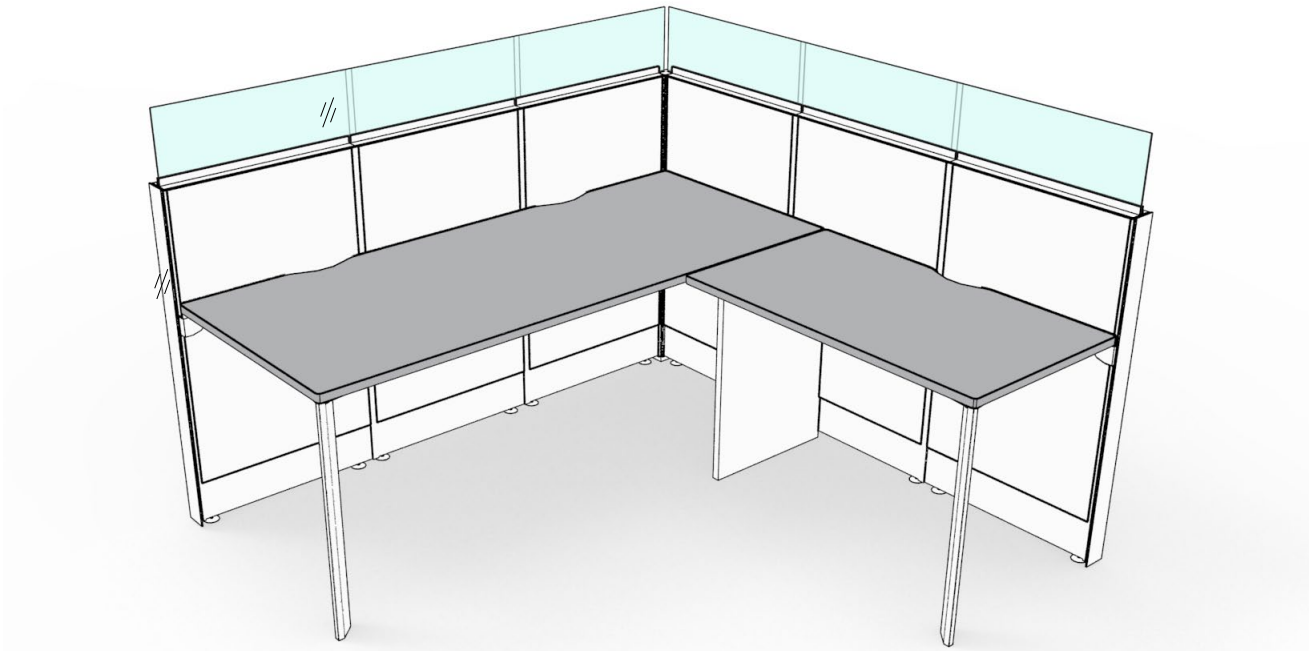

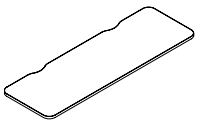

- The keyboard height adjustment range is, 13" overall (6-1/2" above the worksurface and 6-1/2" below the worksurface)
- Height adjustment is activated by a release paddle located on the right underside of the support the tilt adjustment range is +15˚ to -15˚
- It is adjusted with a tension knob located on the underside of the support

d-style worksurface basics

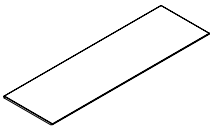

The D-Style collection of Leverage worksurfaces provide the opportunity for a more refined aesthetic. Worksurfaces have square edges, an option for scallops and shapes that address rectangular District-like planning styles.

Rectangular Worksurface (D-Style) Shown

Rectangle Perpendicular with Radius Corners Worksurface (D-Style) (KWSD)

Rectangular Worksurface (D-Style) (KWSQ)

Finishes

- Worksurfaces are available in Foundation Laminate and Flintwood
- Edge trim styles include Flat, Full Knife, Flintwood Flat and Flintwood Knife
- Flintwood edge trims will be finished to match the surface
- Grommets are finished in Storm White, Platinum and Very White

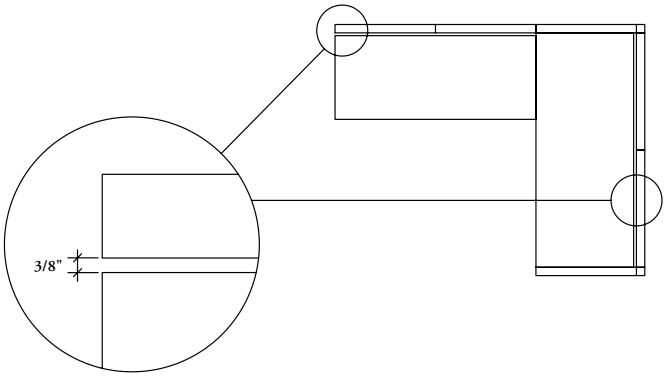

- Available in depths and widths to align with District or Leverage storage, and are rectangular or wedged shape to provide the ability to plan deep primary worksurfaces and shallow secondary surfaces
- Worksurface corners are square
- Available with or without scallops
- User edge can be flat or full knife and all other edges are square
- Shared worksurface shapes include Fan or Tapered and provide a collaborative workspace for shared workstations
- Guest worksurfaces are available for semi-suspended worksurface configurations

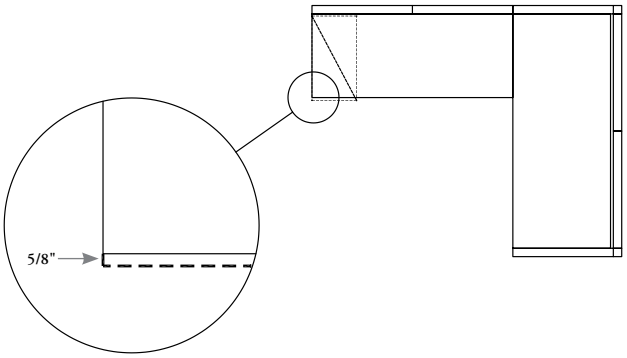

planning with d-style worksurfaces

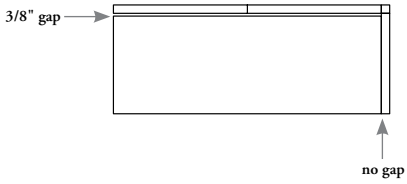

The following should be considered when planning with D-Style Leverage worksurfaces.

gapping

- Leverage worksurfaces have a 3/8" gap at the back of all worksurfaces, to allow clearance for elements, electrical cut outs etc, therefore worksurface depths have nominal dimensions. Worksurface widths also have nominal dimensions and are available in 1" increments. The actual widths are 1/8" than nominal dimension
- It is **not** recommended that the worksurface be mounted against the panel without a gap because the front edge will **not** align with storage components. District storage is sized to match Leverage worksurface depths including the gap. (see storage section)

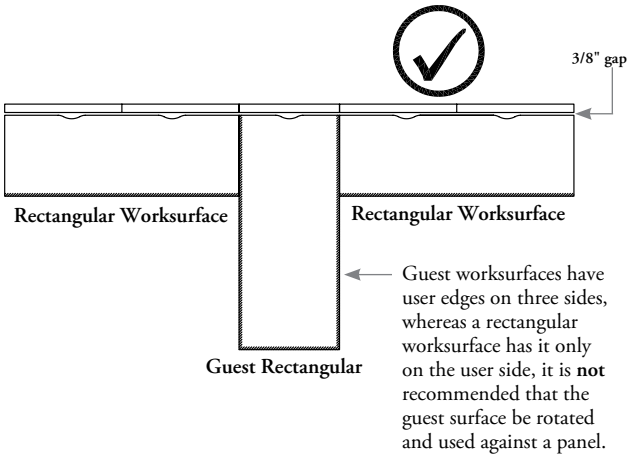

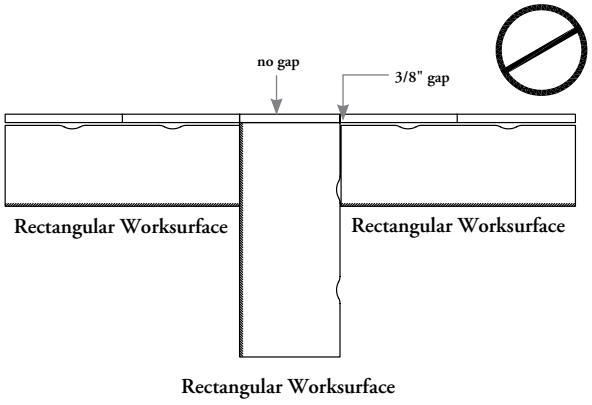

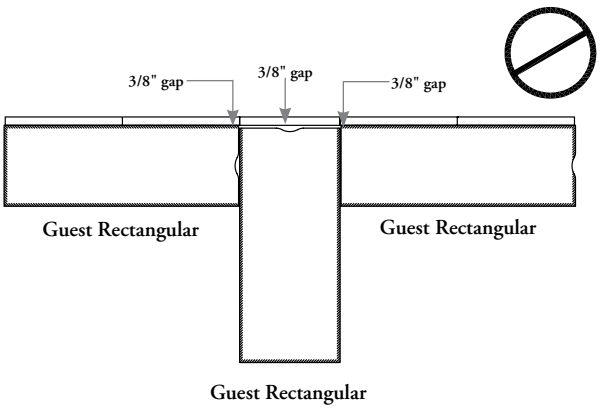

Continuous gapping **cannot** be achieved because worksurface widths are in 1" increments, and the gap at the back of the worksurface is 3/8".

Combinations of three rectangular or three guest surfaces **cannot** be used together because the gapping will be incorrect.

- When guest worksurfaces are used a continuous gap along the back can be achieved because the worksurfaces are complete with the 3/8" gap
- They are intended to be run perpendicular to the panel

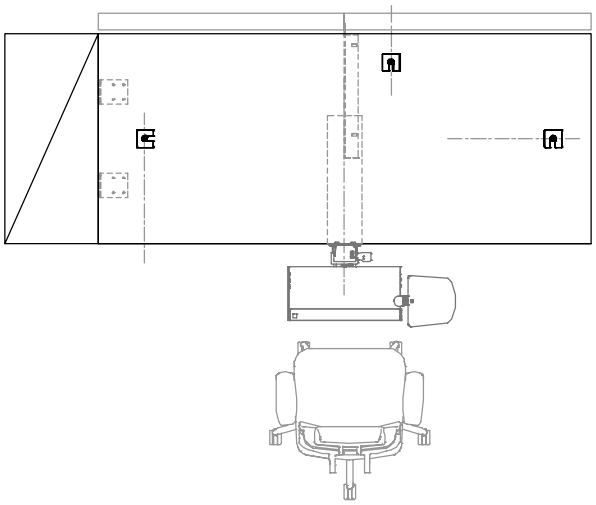

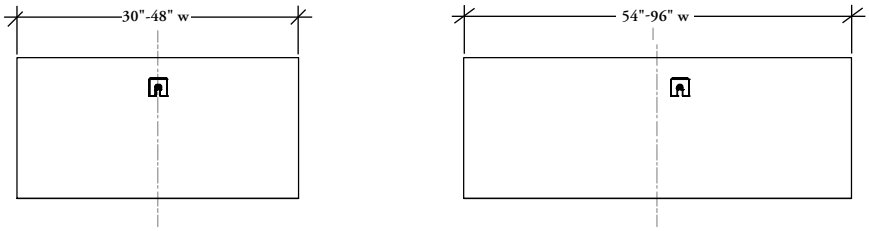

planning with d-style worksurface (continued)

grommets

• Grommets can be located at either side of a worksurface, or at the center back of a worksurface

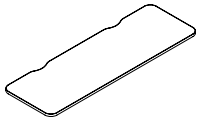

• 30" wide to 48" wide surfaces will have the center back grommet centered, because the location will **not** interfere with supports

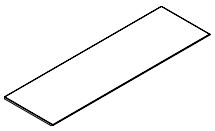

• The 54" to 96" surfaces will have the center back grommet off center, to allow for necessary supports

planning with small footprint worksurfaces

Leverage provides a limited collection of small footprint worksurfaces that optimize efficiency within small scale workstation layouts.

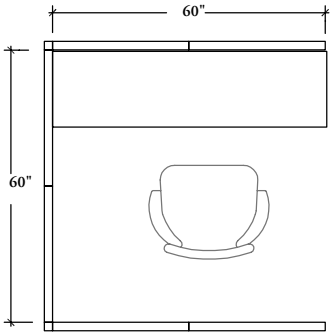

Rectangle Perpendicular with Radius Corners Worksurface (D-Style) (KWSD)

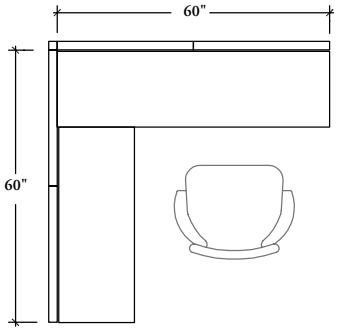

Rectangular Worksurface (D-Style) (KWSQ)

Worksurfaces are available in depths of 17" to allow for maximum planning capability in temporary or permanent address workstations.

rectangular worksurfaces

17" deep surfaces provide adequate chair space in 5' x 5' workstations

When worksurfaces are requires above a 16" deep low storage, the cabinet depths will align

supporting d-style worksurfaces

supporting guest worksurfaces

- Guest worksurfaces must be attached to the panel at one end
- The opposite end can be supported by:

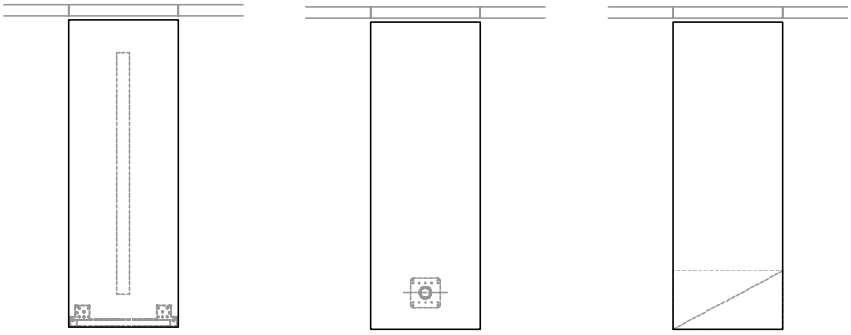

Expansion Legs

1. District Gables

Leverage Post Legs or Slim Legs

2. Monolegs
3. District Pedestals

Note: If District gables are being used, there will be a difference in depth. District gables are 23" deep (actual) and Leverage worksurfaces are 23-5/8" deep (actual).

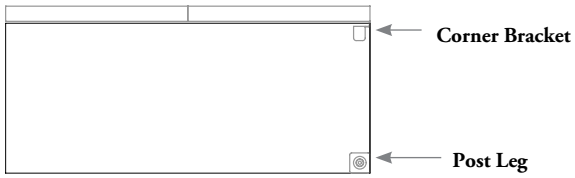

1 2 3

supporting with d-style worksurfaces (continued)

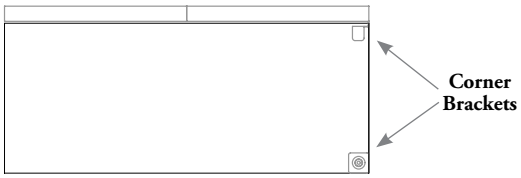

supporting panel-mounted worksurfaces

When worksurfaces are mounted facing a panel, a number of support options are available:

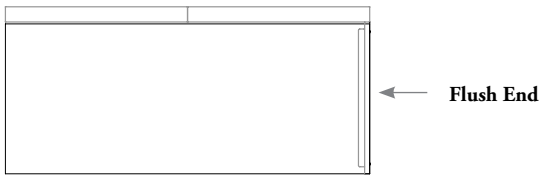

No Storage or Return Panel

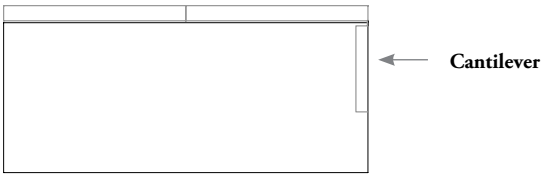

Return Panel

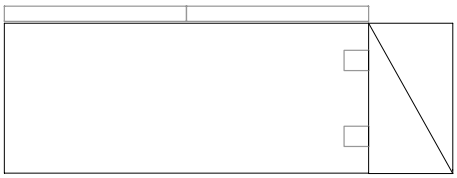

When a panel return is being used, corner brackets are used

When no storage or return panel is being used, a post leg and corner bracket, a flush end gable, or a cantilever can be used.

Storage

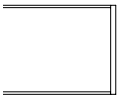

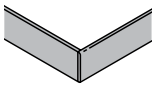

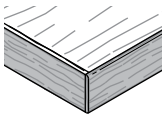

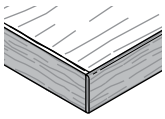

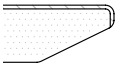

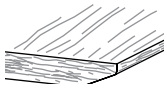

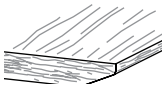

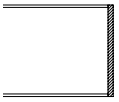

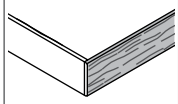

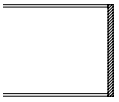

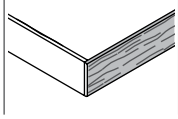

- When District storage is being used beside a worksurface, a Worksurface to Tower Bracket Kit (UWBT) is used for attaching the storage
- Other supports for attaching the storage to the tower, with surface to the panel are still required (See Supports Section)

edge trim style overview

Trim style and desk finish applications are summarized in the chart below.

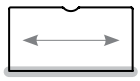

Shading indicates the user edge

	Foundation Laminate Surface	Flintwood Surface	Natural Veneer Surface	Non-User Edge	Style
Flat (8) All Edges 		n/a	n/a	Flat (8)	D
Flintwood Flat (9) All Edges 	n/a				D
Full Knife (H) User Edge 	n/a (For D style only)				D
Flat (8) All Edges 		n/a	n/a	Flat (8)	
Flintwood Flat (9) User Edge Only 	n/a		n/a	Finished in a coordinating Flintwood flat trim	
Flintwood Full Knife (H) All Edges 	n/a		n/a	Finished in a coordinating Flintwood flat trim	

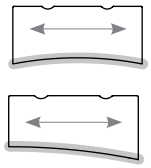

grain direction/user edge – laminate & flintwood worksurfaces

The illustrations below show the grain direction of Flintwood worksurfaces. Alternative grain directions are available on selected worksurface shapes for Flintwood only. See next page.

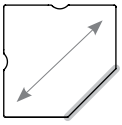

- Grain direction is an important factor when planning workstation configurations, if a different grain direction is required, contact your Teknion Customer Service Representative
- The pattern/grain direction of Laminate worksurfaces varies depending on the type of worksurface specified
- Shading indicates user edge

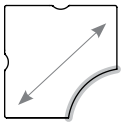

Rectangular Worksurface (KWS)

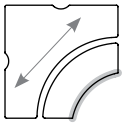

Concave Worksurface (KWCC)

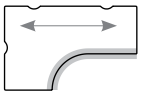

Standard Corner Worksurfaces (KWPS)

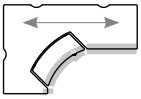

Curved Corner Worksurface (KWSC)

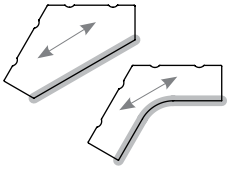

Split Radius Corner Worksurface (KWCX)

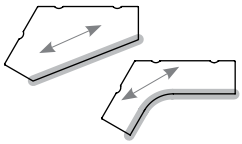

Radius Corner Worksurface with Return (KWRR)

Radius Corner Worksurface and Return (KWRK)

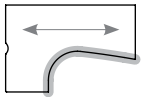

Standard Pentagon Worksurface Straight (KWPG)

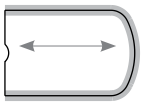

Extended Pentagon Worksurface (KWPE)

Rectangular Countertop (KWCS)

Extended Corner with Transition Return with Flush End Gable (KSEF)

Bullet Worksurface (KWBT)

grain direction /user edge – source laminate worksurfaces

The illustrations below show grain direction of Source Laminate worksurfaces.

- Grain direction is an important factor when planning workstation configurations, if a different grain direction is required, contact your Teknion Customer Service Representative
- The pattern/grain direction of Source Laminate worksurfaces varies depending on the type of worksurface specified
- Shading indicates user edge

Source Laminate Rectangular Worksurface (KUWS)

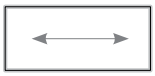

grain direction/user edge – d-style worksurfaces

The illustrations below show grain direction of d-style worksurfaces.

- Grain direction is an important factor when planning workstation configurations, if a different grain direction is required, contact your Teknion Customer Service Representative
- The pattern/grain direction of d-style worksurfaces varies depending on the type of worksurface specified
- Shading indicates user edge

Rectangle Perpendicular with Radius Corners Worksurface (D-Style) (KWSD)

TYPICALS – PANEL MOUNTED WORKSURFACE SUPPORTS 162

worksurface supports overview

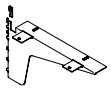

Proper support is essential when planning with Leverage panels and worksurfaces.

The following outlines the available options, and their use. When used in combination, proper support will be achieved.

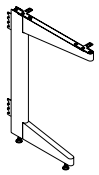

Corner Brackets

Mounts to a panel on-module in a corner or on a panel end to support a worksurface.

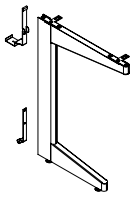

Cantilever

Mounts to a panel on-module to support a single worksurface or two shared worksurfaces.

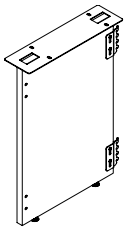

C-Leg

Mounts to a panel on-module to support worksurfaces when support is required to the floor.

Intermediate C-Leg

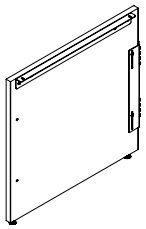

Mounts to a panel off-module to support worksurfaces when support is required to the floor.

Mid Gable

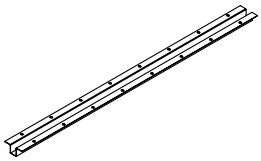

Mounts to a panel on or off-module to support worksurfaces when support is required to the floor

Provides an aesthetic alternative to a C-Leg or Intermediate C-Leg.

End Gable

Mounts to a panel at the end of a panel run to provide full closure when support is required to the floor.

Worksurface Reinforcement Channel

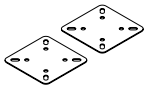

Adds rigidity to worksurfaces to reduce deflection.

Used on all worksurfaces spans over 48".

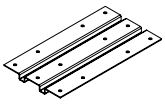

Slim Post Leg

Provides support to the floor on the user side of a worksurface.

Flush Plates

Used to align adjacent worksurfaces .

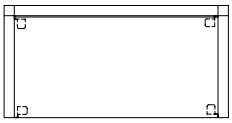

Structural Flush Plate

Used to provide and maintain structural support.

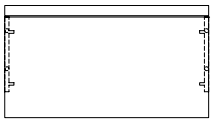

worksurface supports overview (continued)

Proper support is essential when planning with Leverage panels and worksurfaces.

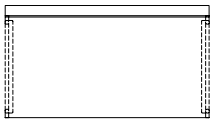

All panel mounted worksurfaces 60" wide or wider must have additional floor support on the ends, which can be achieved in several ways.

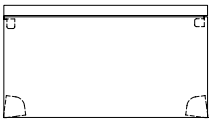

Return panels on both ends with corner brackets

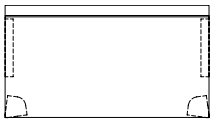

C-leg on both ends

Flush end gable on both ends

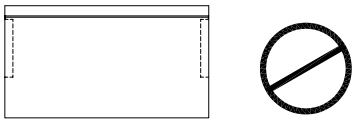

Corner brackets attaching the worksurface to the panel with Slim Post Legs at the user side

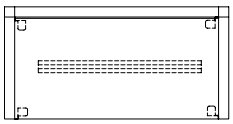

Cantilevers attaching the surface to the panel with Slim Post legs at the front side

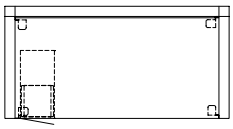

ADDITIONALLY:
Worksurfaces over 48" wide must have support to reduce deflection.

Cantilevers only on each end do not provide sufficient support.

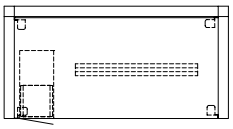

Reinforcement channels provide the support required.

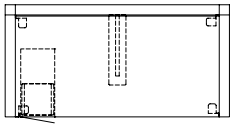

If suspended storage is used additional support is still required.

Support can be achieved in the following ways.

Adding a reinforcement channel to the remaining space below the worksurface.

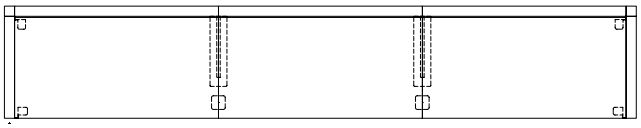

Adding an additional mid gable or cantilever.

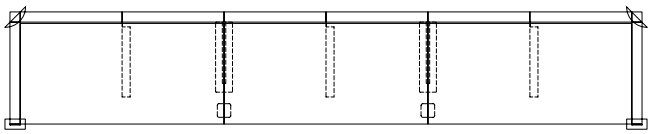

worksurface supports overview (continued)

The following typicals demonstrate common support applications.

Straight Run of Worksurfaces with Worksurfaces 60" or more

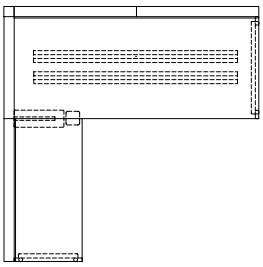

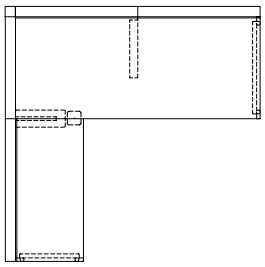

- Support to the floor is required at every 60" and can be provided by return panels, mid gables or end gables
- Reinforcement channels are required on all worksurfaces over 48" wide

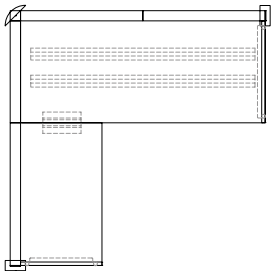

- When worksurfaces over 60"w. are mounted to two panels, a cantilever can be used in place of reinforcement channels to reduce deflection

When planning L-Shaped Workstations, similar rules apply

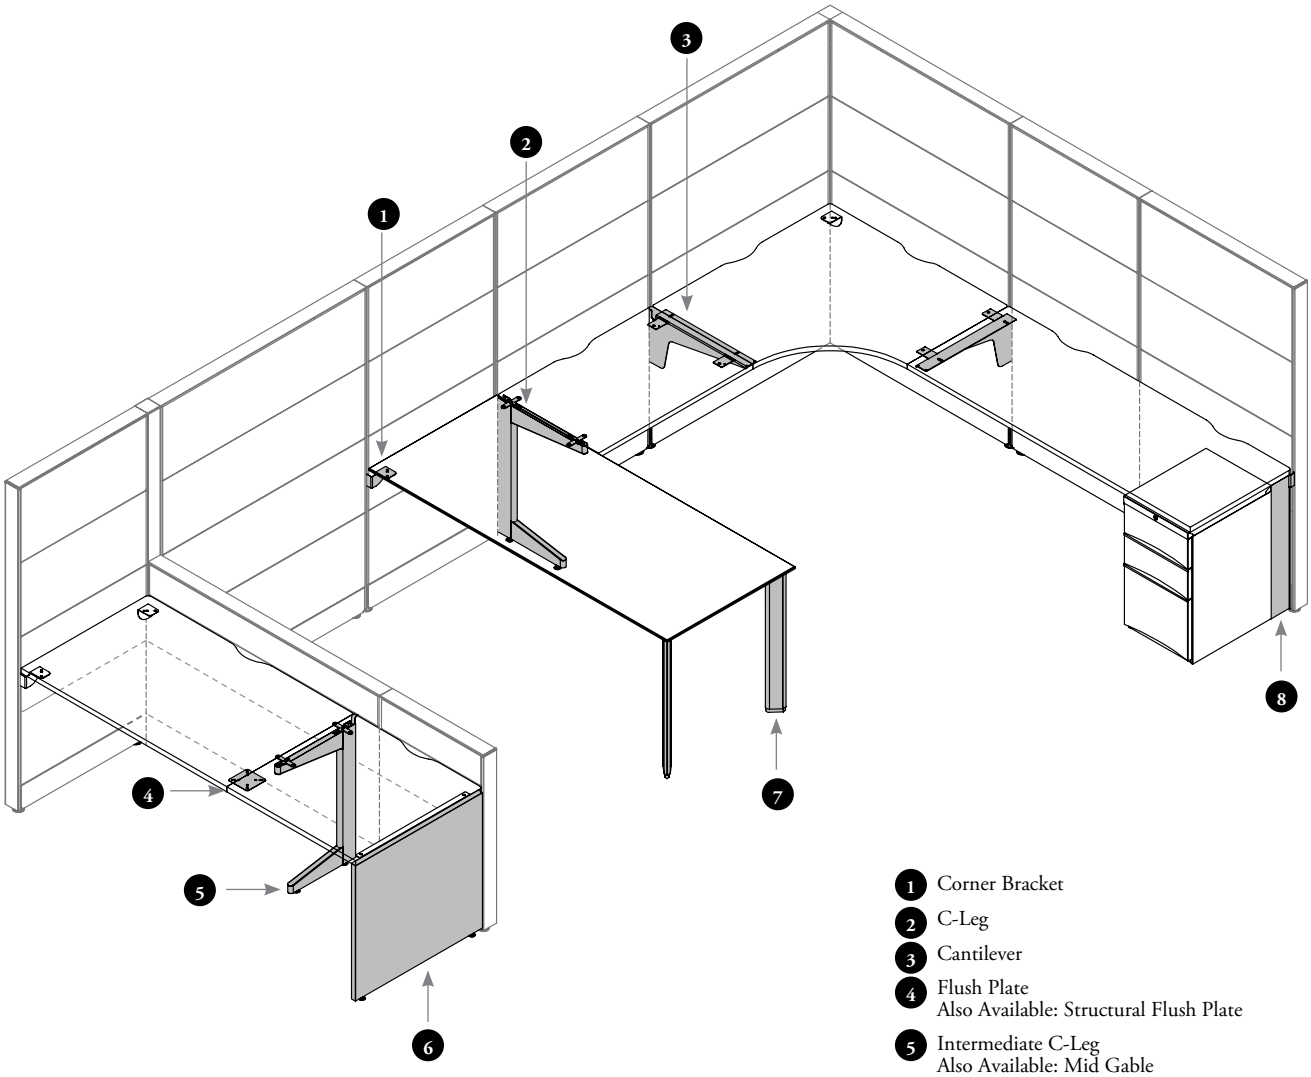

- When a return worksurface is added, and the workstation depth is 60" deep or deeper, , support can be provided in the following ways:
  - a mid gable and flush plate used with two reinforcement channels
  - a structural flush plate used with two reinforcement channels
- Support to the floor is required on both end of the primary and secondary worksurface

worksurface supports – panel mounted overview

Leverage offers various worksurface supports for mounting worksurfaces to panels.

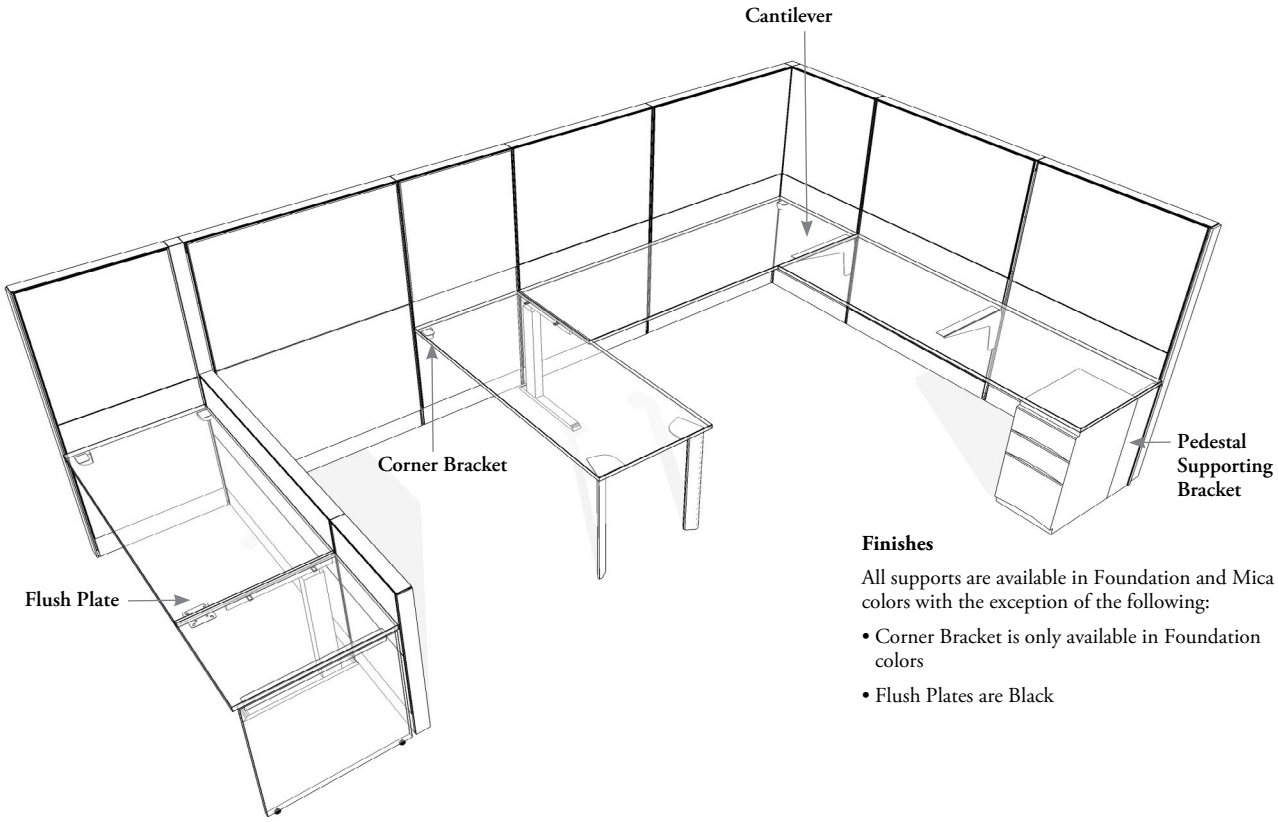

1. Corner Bracket
2. C-Leg
3. Cantilever
4. Flush Plate
   Also Available: Structural Flush Plate
5. Intermediate C-Leg
   Also Available: Mid Gable
6. Flush End Gable
7. Fixed Slim Post Leg
   Also Available: Monoleg, xm Post Leg, Height-Adjustable xm Post Leg, Height-Adjustable Slim Post Leg, Slim Post Leg with Casters, Slim Post Leg with Lockable Casters
8. Pedestal Supporting Bracket

worksurface supports – panel mounted basics

The following supports are used primarily to attach worksurfaces to panels, and do not provide floor support.

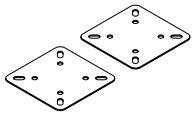

- Worksurfaces may **not** span more than 60" without additional support
- Cantilevers (CT) and C-Legs (CL29) may be used as single supports or shared between adjacent worksurfaces

Finishes

All supports are available in Foundation and Mica colors with the exception of the following:

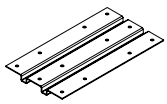

- Corner Bracket is only available in Foundation colors
- Flush Plates are Black

Flush Plate (TLFP)

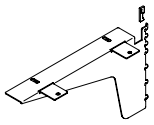

- Is designed to align adjacent worksurfaces and is used in conjunction with other worksurface supports
- Is used to align 30" deep worksurfaces at their front edge

Also Available:

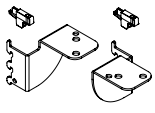

Structural Flush Plate (UNRFS)

- Used in place of a flush plate when additional support is required

Cantilever (CT)

- Is an on-module primary support which can be used to support a single worksurface or two worksurfaces in a shared situation
- Is handed and must be specified as left or right
- Available 12", 18" and 22" deep to support 17", 20", 24", 30" and 36" deep worksurfaces
- Must be used if the width of the return panel does **not** match the depth of the Worksurface

Corner Bracket (KBC)

- Is an on-module panel-mounted bracket used as a secondary support for a worksurface
- Is primarily used for end/side and corner support
- Can only be used with panels
- Must only be used as a single support, and must be used in conjunction with other primary supports

Pedestal Supporting Bracket (KSBN)

- Provides a fully enclosed pedestal support at the end of a run of Leverage panel mounted worksurfaces
- Is an on-module, metal support that provides stability
- Must only be used as a single support
- Is shipped in either a left or right handed configuration
- Is compatible with all Teknion 27" height under-worksurface storage products
- Is designed to match the depth of all standard worksurfaces

worksurface supports – panel mounted basics (continued)

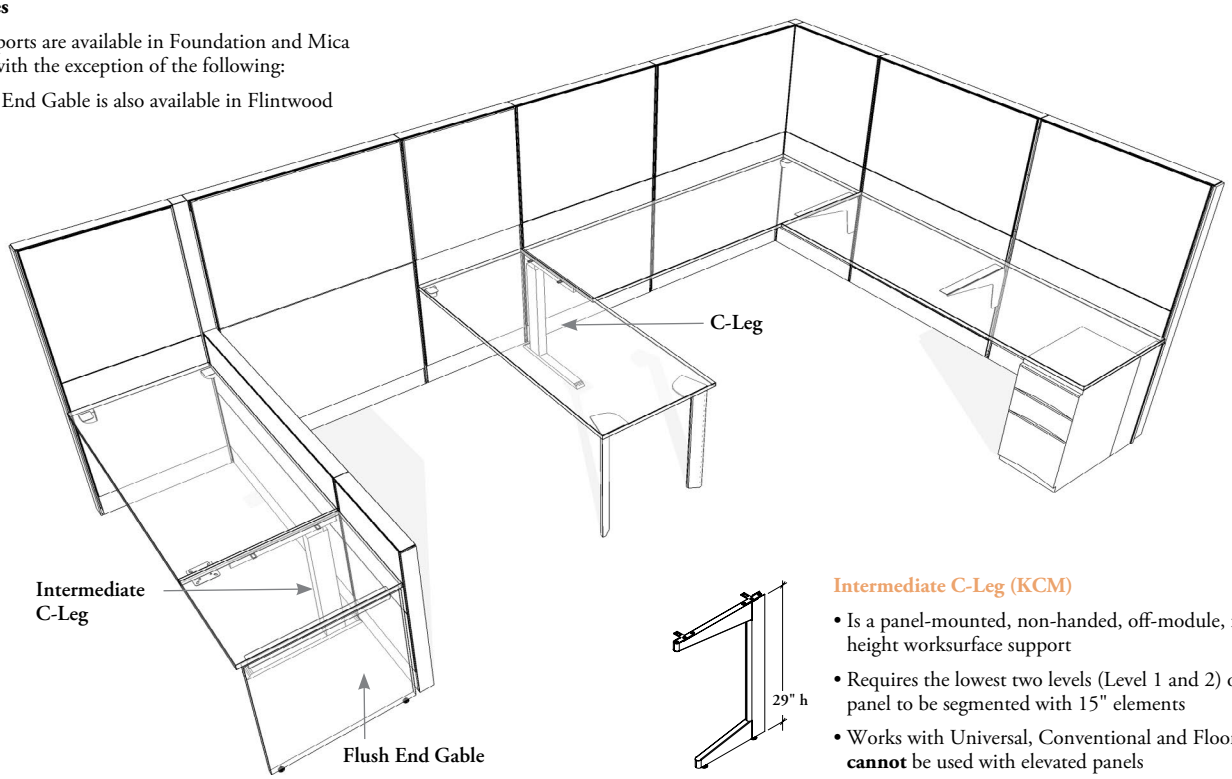

The following supports provide support for worksurfaces and stability to panel runs.

- Worksurfaces may not span more than 60" without additional support
- Cantilevers (CT) and C-Legs (CL29) may be used as single supports or shared between adjacent worksurfaces
- The Flush End Gable – Wood (KFENW), Flush End Gable – Metal (KFENM), Flush End Gable – Laminate (KFENL), Pedestal Supporting Bracket (KSB) and Corner Brackets (KBC) may only be used as single supports
- Worksurface support heights noted include the thickness of the worksurface

Finishes

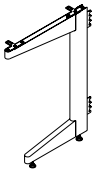

All supports are available in Foundation and Mica colors with the exception of the following:

- Flush End Gable is also available in Flintwood stains

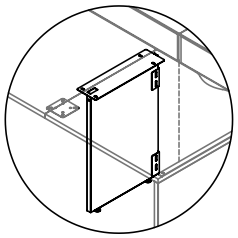

Intermediate C-Leg (KCM)

- Is a panel-mounted, non-handed, off-module, fixed height worksurface support
- Requires the lowest two levels (Level 1 and 2) of the panel to be segmented with 15" elements
- Works with Universal, Conventional and Floor-Flush **cannot** be used with elevated panels
- Is used for a single or dual support in the left, right or center positions. It can also provide additional support at the end of a worksurface/panel run
- To change the Intermediate C-Leg from left to right or vice versa, simply change the direction of the T-brackets
- Can be used for single or dual support
- Is designed with an integral safety hook that prevents dislocation from the panel
- When used on a KP_L Segmented Panel – 30" high rail, an additional panel rail must be installed at 21" high for attaching the leg to the panel

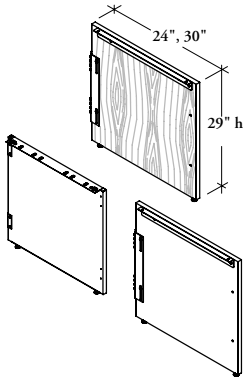

C-Leg (CL29)

- Is a panel-mounted, non-handed, on-module, fixed-height worksurface support
- Is available in one depth only (22") and can be used to support 24" and 30" deep worksurfaces
- Is pre-assembled as a left or right, however can be easily changed in the field. Left and right handed brackets are included and can be used for single or dual support in the left, right or center positions
- When used with worksurfaces of 30" deep require a Flush Plate (TLFP)
- May **not** be used at the end of a run of panels. A Flush End Gable – Wood (KFENW), Flush End Gable – Metal (KFENM), Flush End Gable – Laminate (KFENL), or return panels is required

Mid Gable (KGMFF, KGMFM, KGMFW)

- Provides an aesthetics alternative to the C-Leg (CL29) or Intermediate C-Leg (KCM)
- Available in wood, metal and laminate in depths of 12"and 18"
- Can be used on- or off-module

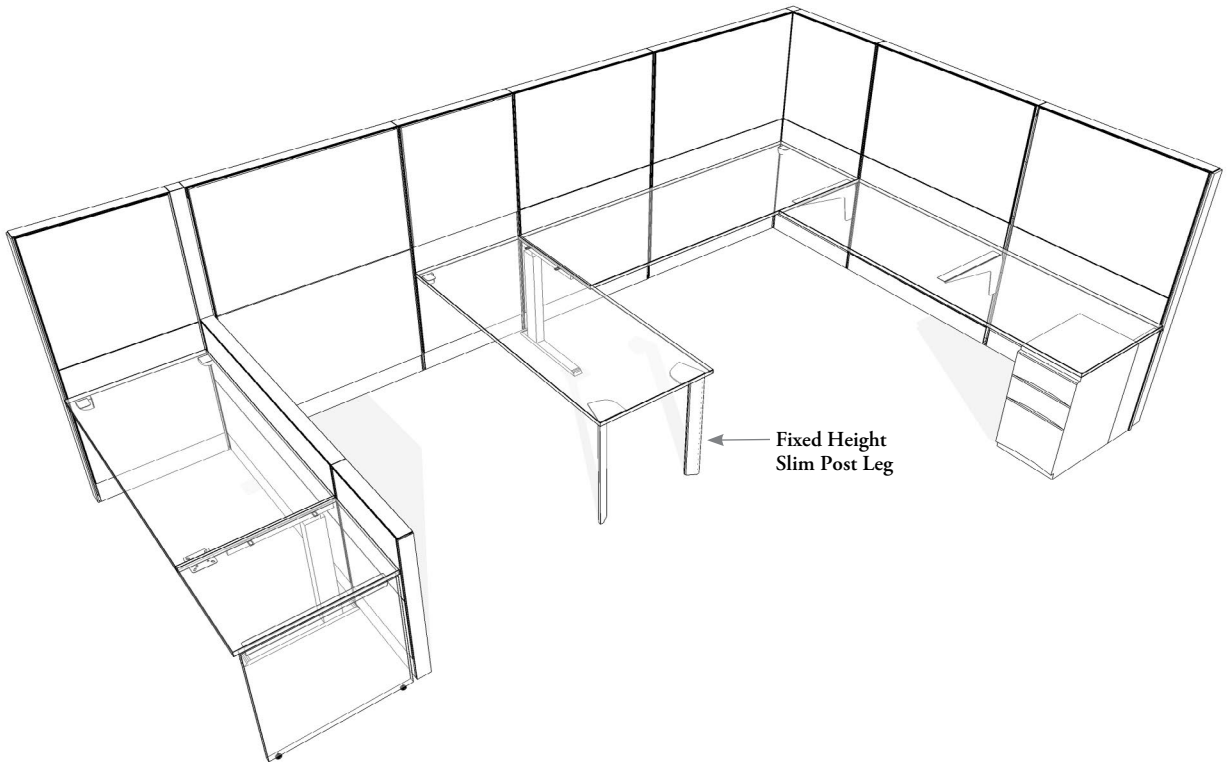

Flush End Gable – Wood (KFENW), Flush End Gable – Metal (KFENM) and Flush End Gable – Laminate (KFENL)

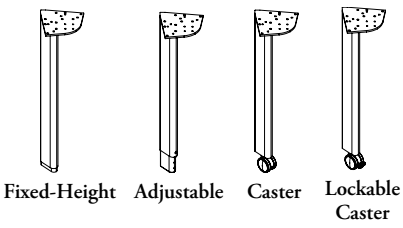

- Is a non-handed, on-module primary support, used to provide full closure at the end of a worksurface run
- Can only be used as a single support
- Is pre-assembled as a left or right, however can be easily changed in the field
- Is designed to match the depth of all standard worksurfaces, 17", 20", 24", 30", 36"
- Is designed to work with all standard worksurfaces, dimensions are nominal, the actual size is 1" shorter to accommodate the knife edge

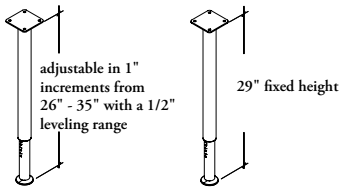

worksurface supports – panel mounted basics (continued)

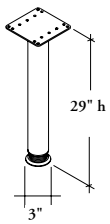

The following supports provide panel and floor support for worksurfaces and stability to panel runs.

- Cantilevers (CT) and C-Legs (CL29) may be used as single supports or shared between adjacent worksurfaces
- Worksurface support heights noted include the thickness of the worksurface

Slim Post Leg (KLP)

- Provides a more refined aesthetic alternative
- Height-adjustable range is (-3") - (+3")
- Fixed height leveling range is (-1/2") - (2-1/2")
- Fixed-height leg should **not** be used in freestanding applications

xm Post Leg (TXPL)

- Provides a non-handed support at the end of a run of worksurfaces or to join adjacent worksurfaces
- May be used to support Transit panel-mounted and wall-mounted worksurfaces
- Can be used inset to support worksurfaces with Lyft Thin Panel applications
- **Cannot** be used to create freestanding desks

Also Available:

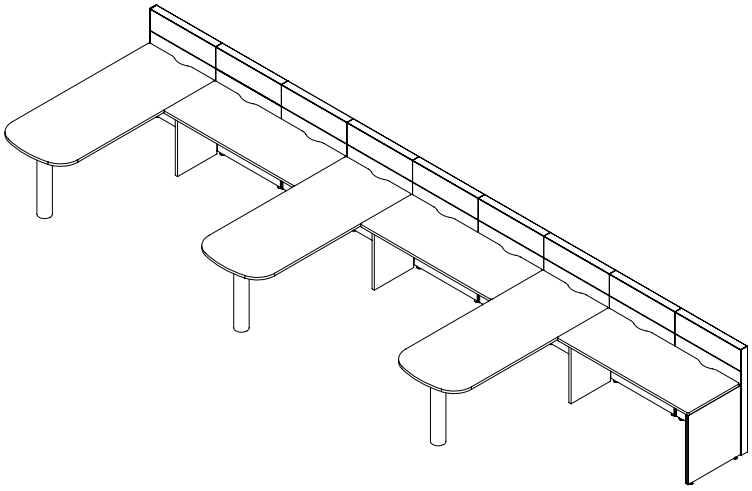

Monoleg (CZ29)

- Is a single, cylindrical leg designed to be used in conjunction with panel- mounted support
- May be used to support a Leverage semi-supported worksurface at one end only, the other end must be supported by panel-mounted worksurface supports

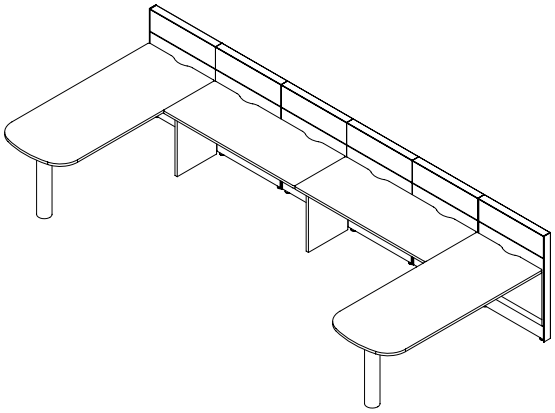

planning with supports – bullet worksurfaces

The following rules should be considered when planning with bullet worksurfaces.

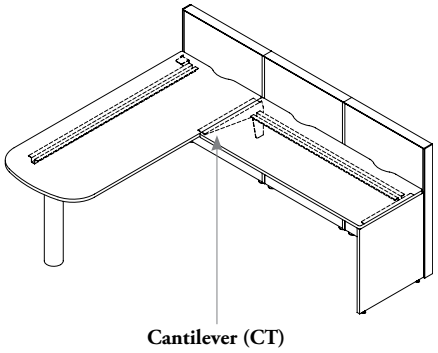

in sequence configuration

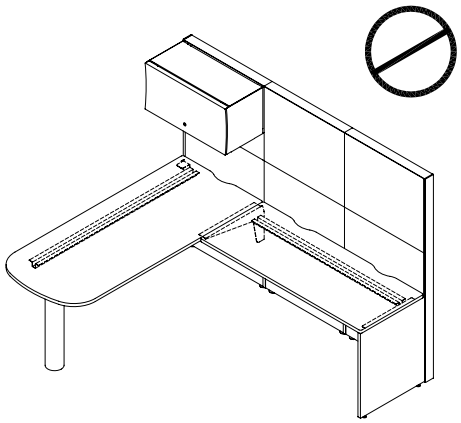

teaming configuration

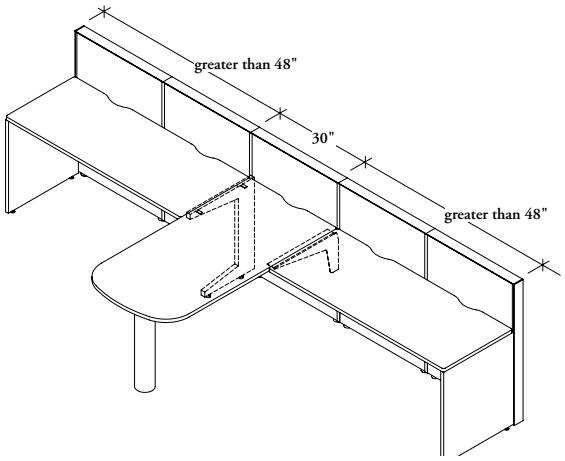

bullet and panel-mounted worksurfaces

- A Cantilever (CT) or C-Leg (CL29) may be used to join bullet worksurfaces to a panel-mounted worksurface

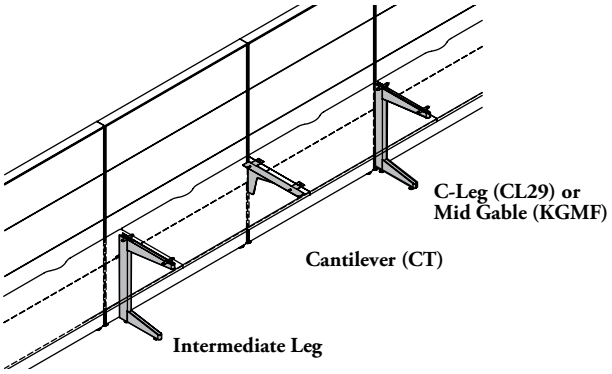

- Overhead storage may **not** be mounted above bullet worksurfaces with a Monoleg (CZ29) used at the end of a panel run

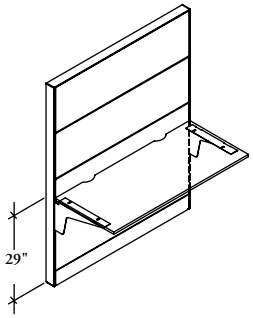

- A C-leg (CL29) is required for support for 30" deep guesting worksurfaces with adjacent worksurfaces measuring greater than 48" in width

planning with supports – panel-mounted worksurfaces

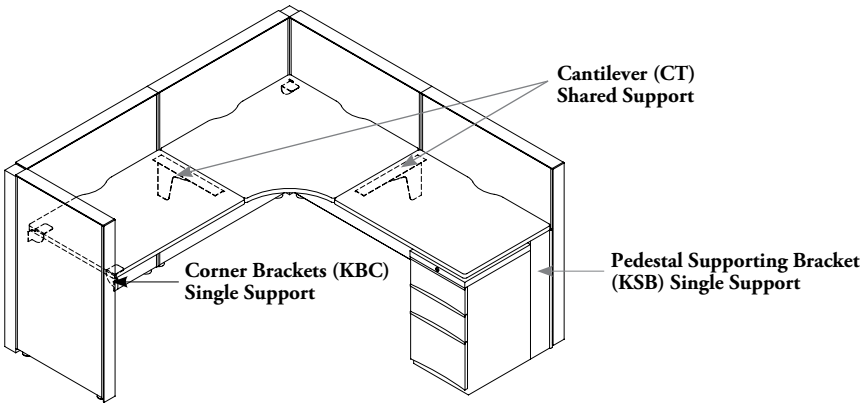

The following rules should be considered when planning panel-mounted worksurface supports.

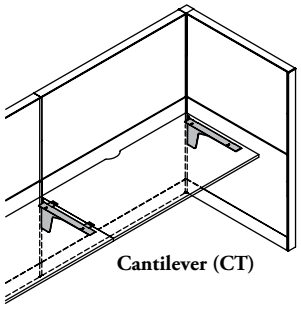

- All worksurface supports must be on-module when suspended from the panel except for the Intermediate C-Leg (KCM) and Mid Gable (KGMF)

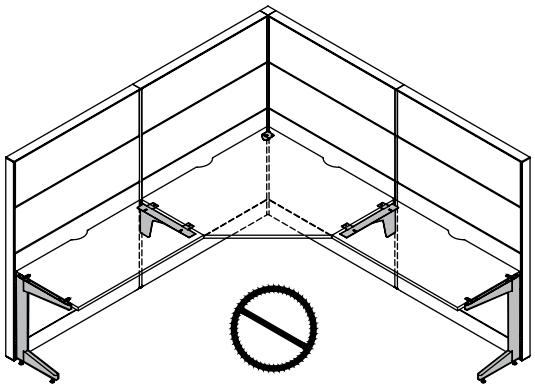

- All worksurface supports allow for the worksurface to be mounted at 29" above the finished floor. This height is considered to be the best height for seated work for a majority of people

- Cantilevers (CT) and C-Legs (CL29) may be used as single supports or shared between adjacent worksurfaces
- The Flush End Gable (KFE), Pedestal Supporting Bracket (KSB) and Corner Brackets (KBC) may only be used as single supports

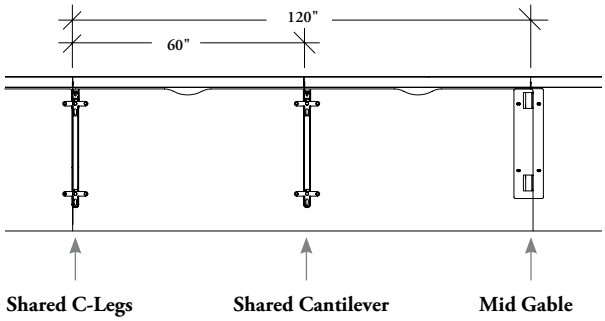

- Cantilevers (CT) must be used if the width of a return panel does **not** match the depth of the worksurface
- One support is required at the end of each worksurface

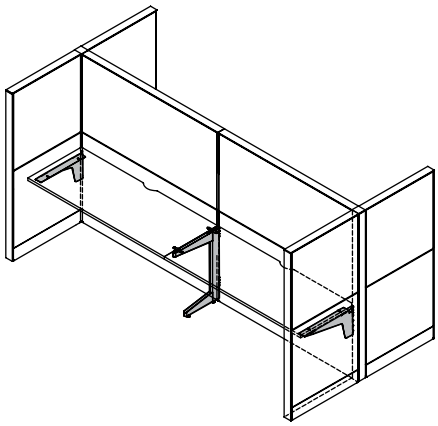

- C-legs (CL29) and Mid Gables (KGMF) are intermediate supports and may **not** be used at the end of a panel run

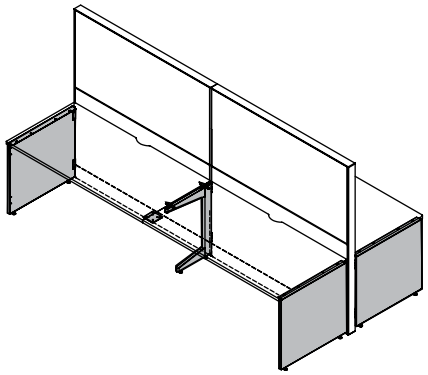

planning with supports – panel-mounted worksurfaces (continued)

The following rules should be considered when planning panel-mounted worksurface supports.

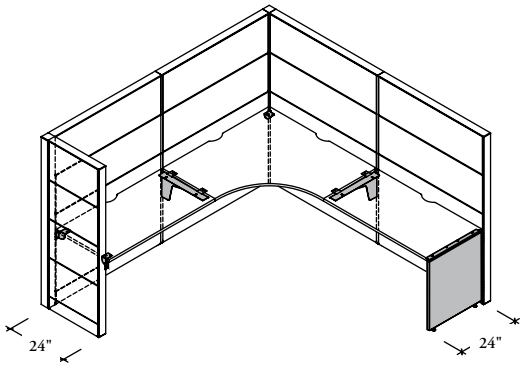

• Worksurfaces may **not** span more than 60" without additional support or more than 120" without additional floor support. All supports can be shared.

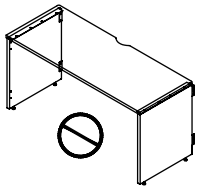

• Where worksurfaces are mounted parallel to the panel run, 30" wide return panels or 30" deep Flush End Gables (KFE) are required to ensure panel stability at the ends. 24" wide return panels or 24" deep Flush End Gables (KFEN24) **cannot** be used for end support

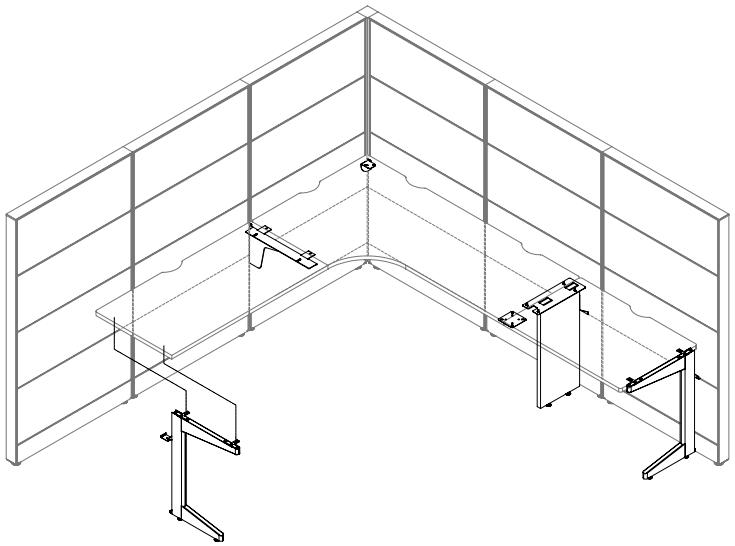

• Other configurations including L-Shaped and U-Shaped may use 24" wide return panels or 24" (Flush End Gables KFEN24) for end support

• Worksurface supports **cannot** be used to create freestanding desks

off-module planning

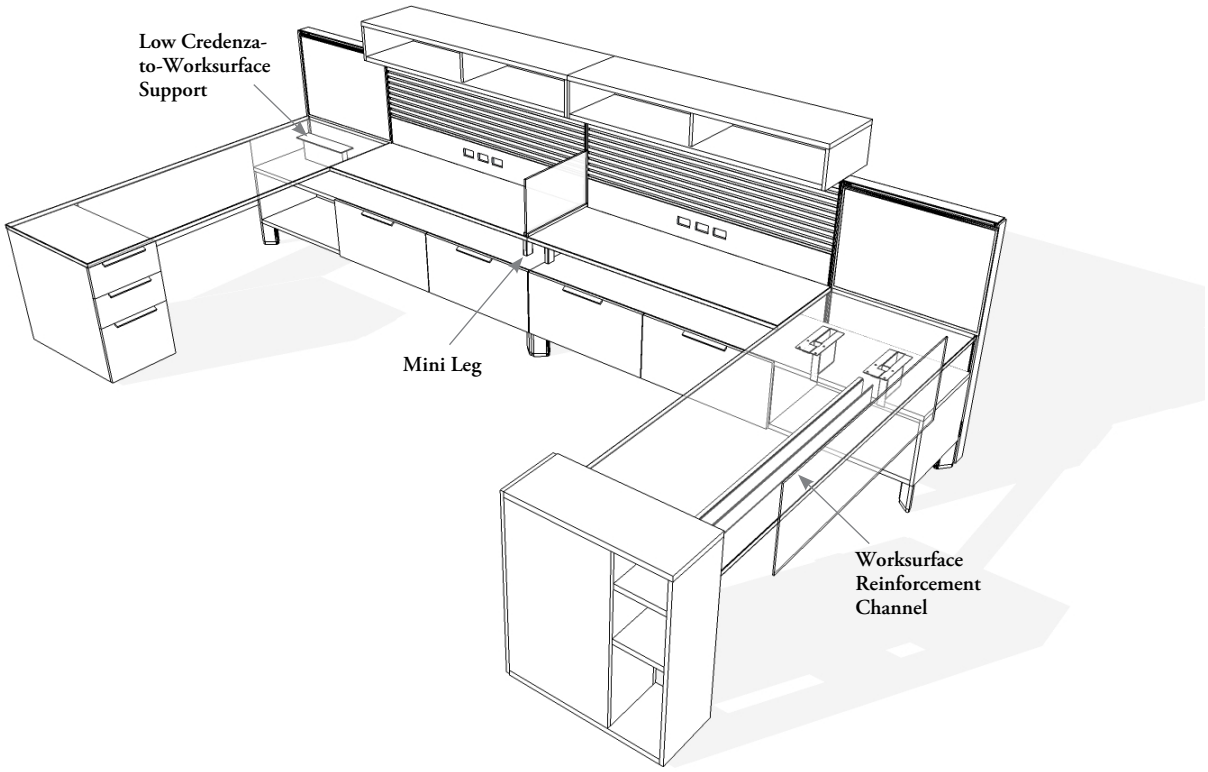

The Intermediate C-Leg (KCM) and Mid Gable (KGMF_2) allows for off-module planning.

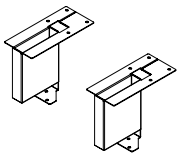

- If a Segmented Panel (KP_C) is **not** specified, an additional Panel Rail (KPL), plus two 15" elements must be ordered and field installed to support Intermediate C-Legs and End Gables
- When planning with a Segmented Panel - 30" Rail (KP_L) an additional Panel Rail (KPL) and a 9" and 15" Element must be ordered
- The leg attaches to the rail above the element

d-style worksurface, district storage support basics

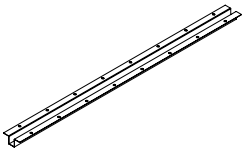

District Universal Storage used together with D-Style Leverage Worksurfaces and new accessories options offers many integrated workstation planning styles. The following outlines the supports required to connect District Storage to Leverage Worksurfaces and Panels.

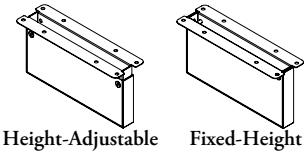

Reconfigurable Low Credenza-to-Worksurface Support (UWCPWN)

- Mounts to the underside of the surface, wraps around the top of an open compartment on low storage and attach to the underside of the open section
- Does not attach to the top of a storage unit, therefore not making it to allow for reconfigurability
- Is not height-adjustable

Worksurface Reinforcement Channel (UNRC)

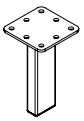

- Adds rigidity to worksurfaces to reduce deflection
- Must be used on all worksurface spans over 48"

Height-Adjustable Fixed-Height

Low Credenza to Worksurface Support (UNCPWN)

- Available in an option of Fixed-Height (F) or Height-Adjustable (H)
- Mounts to the underside of a worksurface and to the top of a low credenza to provide support to the worksurface
- Height-adjustable offers leveling range of 3"

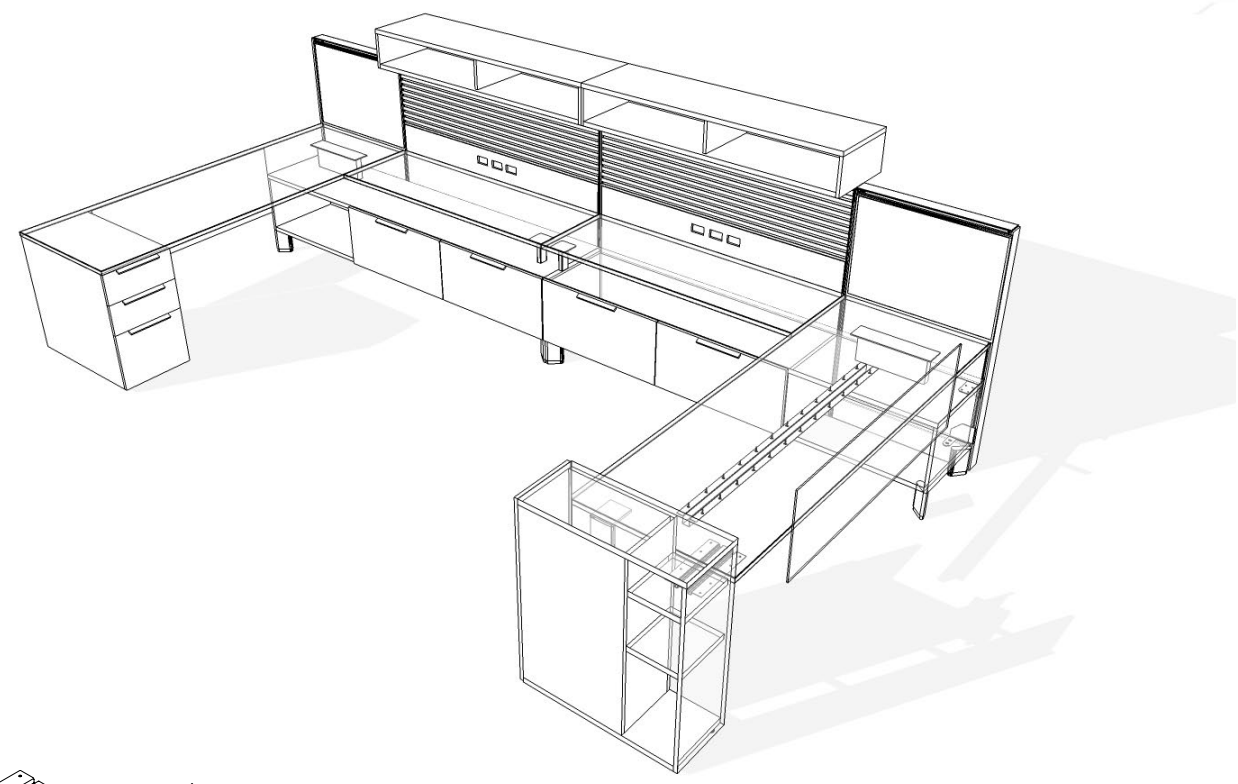

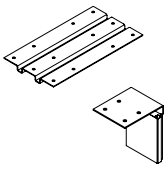

Mini Leg (UNCLN)

- Used in place of the Low Credenza Worksurface Support (UNCPWN) when panel support and height-adjustability is **not** required because it does **not** attach the storage, it simply rests on it
- **Cannot** be used in freestanding desking applications
- Must be used in combination with Corner Bracket (KBC) and Storage to Panel Bracket (KUSPB), it provides support to panels

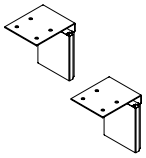

d-style worksurface, district storage support basics (continued)

District Universal Storage used together with D-Style Leverage Worksurfaces and new accessories options offers many integrated workstation planning styles. The following outlines the supports required to connect District Storage to Leverage Worksurfaces and Panels.

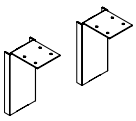

1 Bracket/1 Flush Plate

2 Brackets

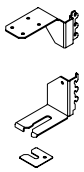

Worksurface to Tower Bracket Kit (UWBT)

- Used to attach worksurfaces to storage components
- Two options are available:
  - Two Brackets (BB) which is used with storage with no cubbies. The brackets attach to the underside of the worksurface and the side of the storage
  - One Bracket, One Flush Plate (BF), which is used with storage with cubbies. The bracket attaches to the underside of the worksurface and the side of the storage, and the flush plate attaches the worksurfaces and a shelf in the cubby section of the storage

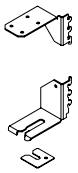

Height-Adjustable Worksurface-to-Tower Support (UWBTH)

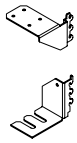

- **Cannot** be used on a Tower with Cubby Back (UKSC and UTDC)

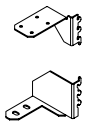

Standard Perpendicular Front, Right

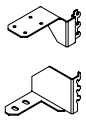

Standard Parallel Right

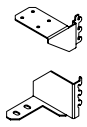

Standard Perpendicular Back, Right

Elevated Parallel Right

Elevated Perpendicular Front, Right

Elevated Perpendicular Back, Right

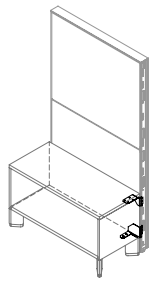

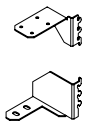

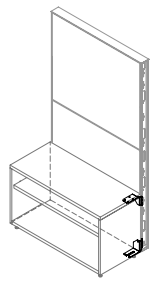

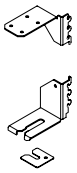

Storage-to-Panel Bracket (KUSPB)

- Attaches to the back, front or side of a storage component and mounts into the vertical channel of a Leverage panel, to provide support to a panel wall
- Options are available for parallel and perpendicular mounting at either the front or back of the cabinet, and for elevated and standard credenza heights.
- Must be specified left or right handed

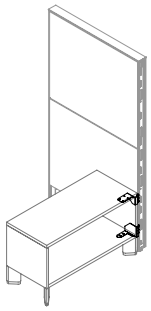

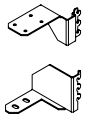

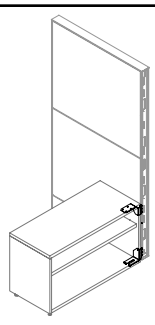

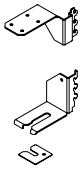

planning with storage-to-panel brackets for district storage integration

All District storage units attach to Leverage panels with either parallel, perpendicular front or perpendicular back brackets. The following outlines each option.

parallel mounting

		• 3/8" offset (no gap) Elevated Storage (right shown)	• Used on storage with a closed back that fits flush or parallel to a panel wall • Bracket will attach to the storage unit through the slot located on the back of the unit • Available with 3/8" offset only (no gap) • Available for elevated and standard storage heights • Bracket fits into the vertical slots of the Leverage panel • Handedness is determined by the side of the panel when facing it onto which the storage is mounted • Parallel mounting is used on the following storage units: UBKE, UBKS, UFLE, UFLS, UKC, UKD, UTCE, UTCS, UTW, UKSD, UPFD, UPSE, UPSS, UTDD, UTDK, UTLE, UTLS, UKQ all credenza
		• 3/8" offset (no gap) Standard Storage	

perpendicular mounting, front

		• 3/8" offset (no gap) Elevated Storage	• Used when bracket is being attached to the inside of an open cubby space (**not** through a slot in the back). This mounting option is appropriate for units that have: - open section (open credenzas, bookcases, etc), - cubby back (single lockers, pedestals) and - door in the mounting location (dual lockers etc) • Available with 3/8" offset only (no gap) • Available for elevated and standard storage heights • Bracket fits into the vertical slots of the Leverage panel • Handedness is determined by the side of the panel when facing it onto which the storage is mounted • Perpendicular mounting, front is used on the following units: UBKE, UBKS, UHHE, UHHS, UHME, UMMS, UHDE, UHOS, UKD, UFSC, ULME, ULHS, ULOE, UTLS, UTDC, UTLE, UPFC, UTCE, UTCS, UTW, UKQ
		• 3/8" offset (no gap) Standard Storage	

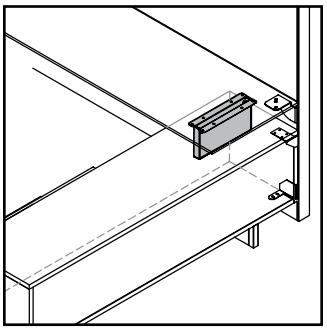

planning with storage-to-panel brackets for district storage integration (continued)

perpendicular mounting, back

		• 3/8" offset (no gap) Elevated Storage	• Used on storage that sits perpendicular to the panel but attachment is through the back of the storage unit through the slots • Available with 3/8" offset only (no gap) • Available for flush and elevated configurations • Bracket fits into the vertical slots of the Leverage panel • Handedness is determined by the side of the panel when facing it onto which the storage is mounted • Perpendicular mounting, back is used on the following storage units: UBKE, UBKS, UFLE, UFLS, UKD, UPSE, UPSS, UTCE, UTCS, UKQ, UTLE, UTLS all credenza
		• 3/8" offset (no gap) Standard Storage	

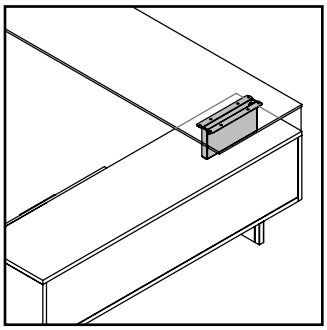

planning with low credenza-to-worksurface supports

Low Credenza-to-Worksurface Supports (UNCPWN)

panel-mounted

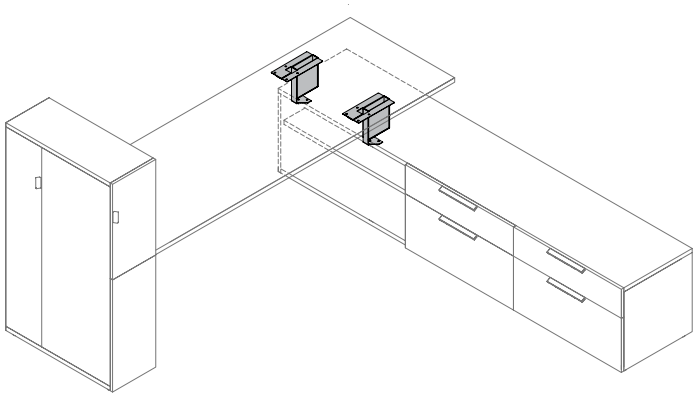

- Can be used in panel-mounted applications to support the front of the worksurface
- Attaches the bottom of a worksurface to the top of a low credenza
- Does **not** add rigidity to the panel on its own; worksurface and storage supports must be specified at the 6", at 29" to give adequate support

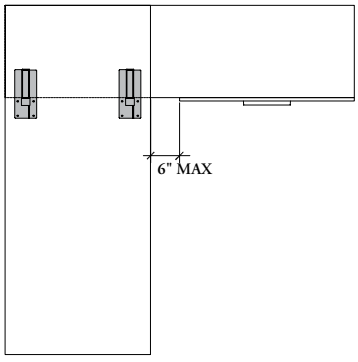

freestanding

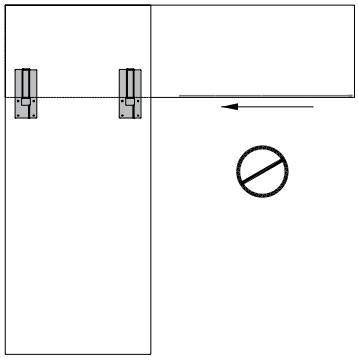

- Can be used in freestanding applications to attach the bottom of a worksurface to the top of a low credenza
- Is available in a height-adjustable option

Reconfigurable Low Credenza-To-Worksurface Support (UWCPWN)

- The brackets are mounted towards the edges of the worksurface
- The open section of the storage below **cannot** be more than 6" wider than the surface to which it is attached to provide adequate support

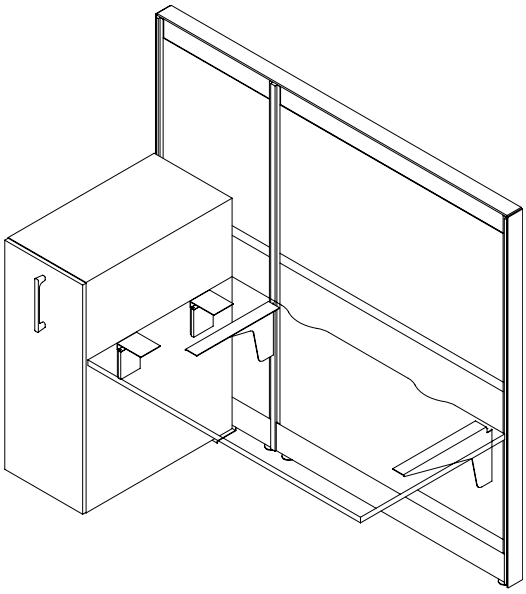

- The sliding door credenza **cannot** be used with the reconfigurable low credenza-to-worksurface support because the track obstructs mounting

planning with leverage side filer support kit

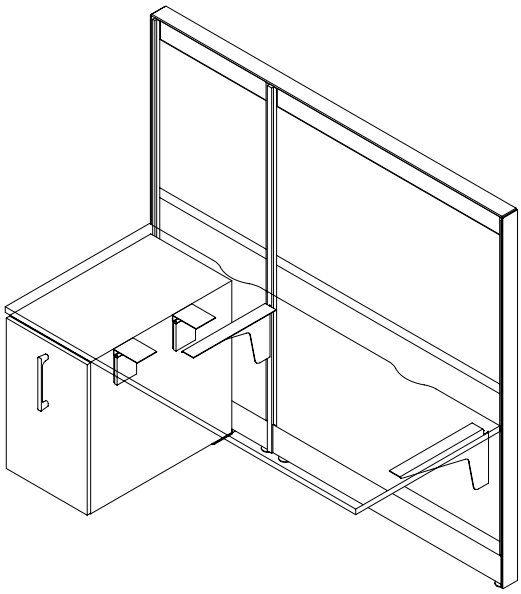

The following rules should be considered when specifying a Leverage Side Filer Support Kit.

- Support kit adds extra stability and should be specified when using a Side Filer or Mini Side Filer
- D-Style worksurfaces must be specified when planning with Side Filer and Mini Side Filer
- Cantilevers must be specified and are ordered separately

the side filer

- 24" wide Leverage panel must be specified to accommodate a cantilever
- There will be a 3/8" gap between the Side Filer and the panel

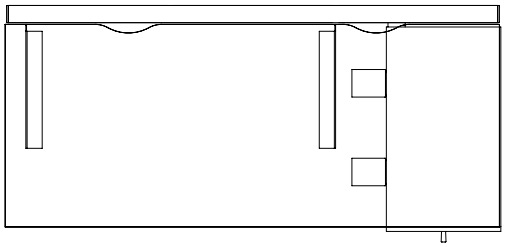

the mini side filer

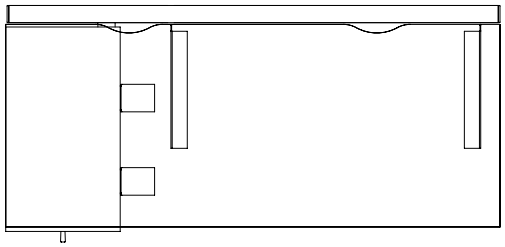

- 24" wide Leverage panel must be specified to accommodate a cantilever
- There will be a 3/8" gap between the Mini Side Filer and the panel

handedness

Support Kits for Side Filer and Mini Side Filer are handed left and right.

Right hand orientation

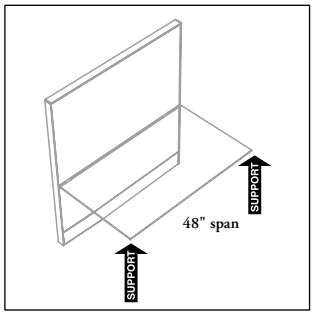

Left hand orientation

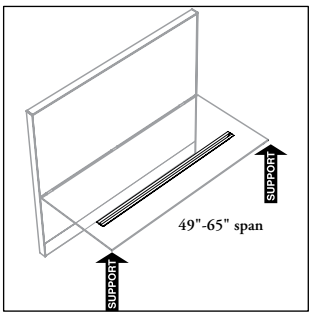

planning with worksurface supports – horizontal

reinforcement channel requirements

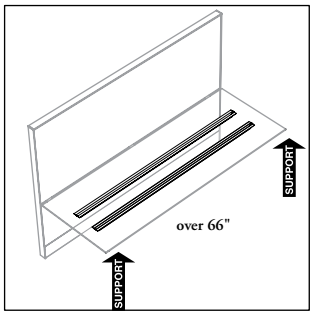

- When a worksurface has an unsupported span of a 48" or more reinforcement channels are required
- The unsupported span is the distance between two supports or storage units

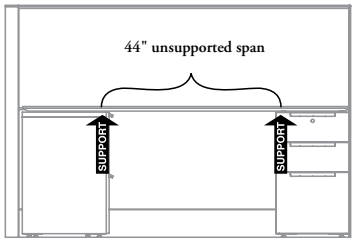

For unsupported spans 48" or less, no reinforcement channels are required for all depths of worksurfaces.

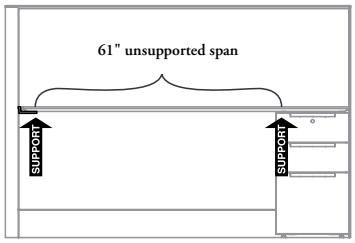

For unsupported spans from 49" to 65", one reinforcement channel only is required for all depths of worksurfaces.

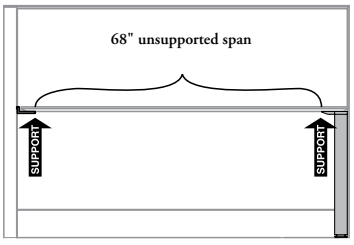

For unsupported spans 66" on worksurfaces 30" or 36" deep two reinforcement channels are required.

- Example: a 78" wide worksurface supported by a pedestal and a 19" deep credenza has an unsupported span of 44"
- No reinforcement channel is required because the unsupported span is less than 48"

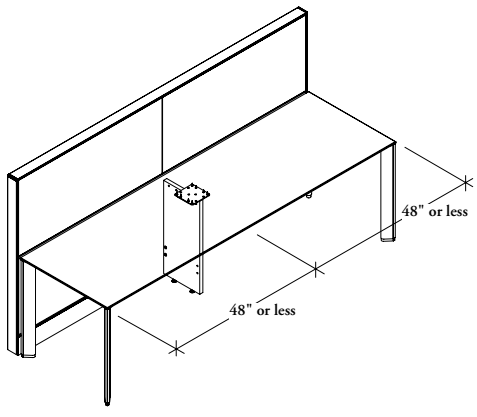

- Example: a 78" wide worksurface supported by a pedestal and panel brackets has a unsupported span of 61"
- One reinforcement channel is required

- Example: a 78" wide worksurface supported by a gable and panel brackets has an unsupported span at 66"
- Two reinforcement channels are required if the surface is 30" or 36" deep

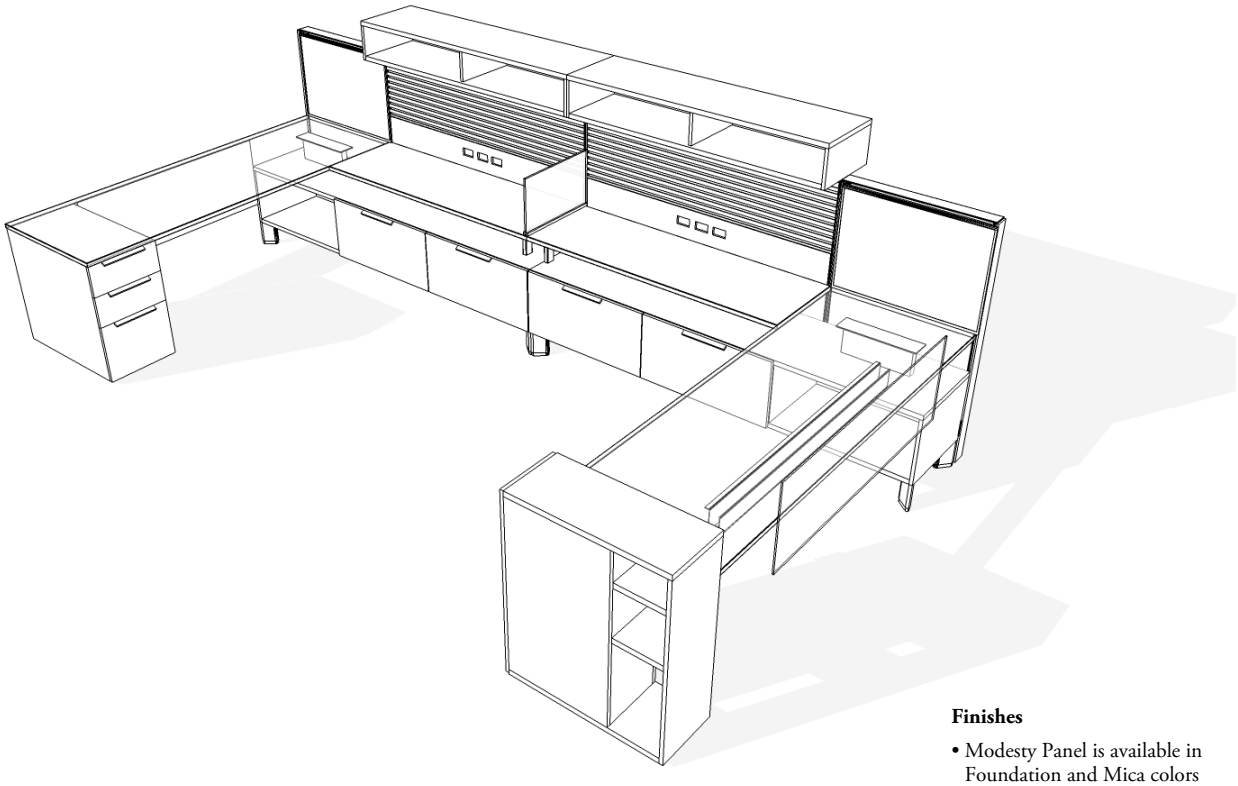

- A deduction allowance can be given for the mounting plates on supports
- Allow 6" for all supports except: for the low credenza worksurface support 10"
- The reconfigurable low credenza worksurface bracket which is either 16" or 19"

- When planning with surfaces wider than 72" that will require secondary support, consider placing the support where it will shorten the unsupported distance on each side to 48" or less
- No reinforcement channel will be required, this is important to consider when planning with keyboard trays

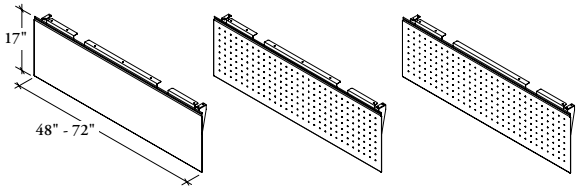

worksurface accessory basics

Leverage offers accessories that are used in conjunction with worksurfaces.

Finishes

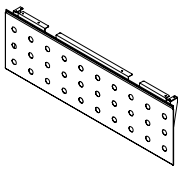

- Modesty Panel is available in Foundation and Mica colors
- Wire Tray is Black

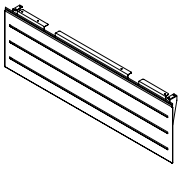

Solid

Square Solo

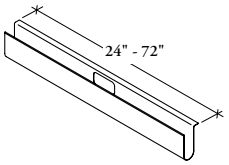

Dot Solo

Large Dot

Louvered

Modesty Panel (KWMP)

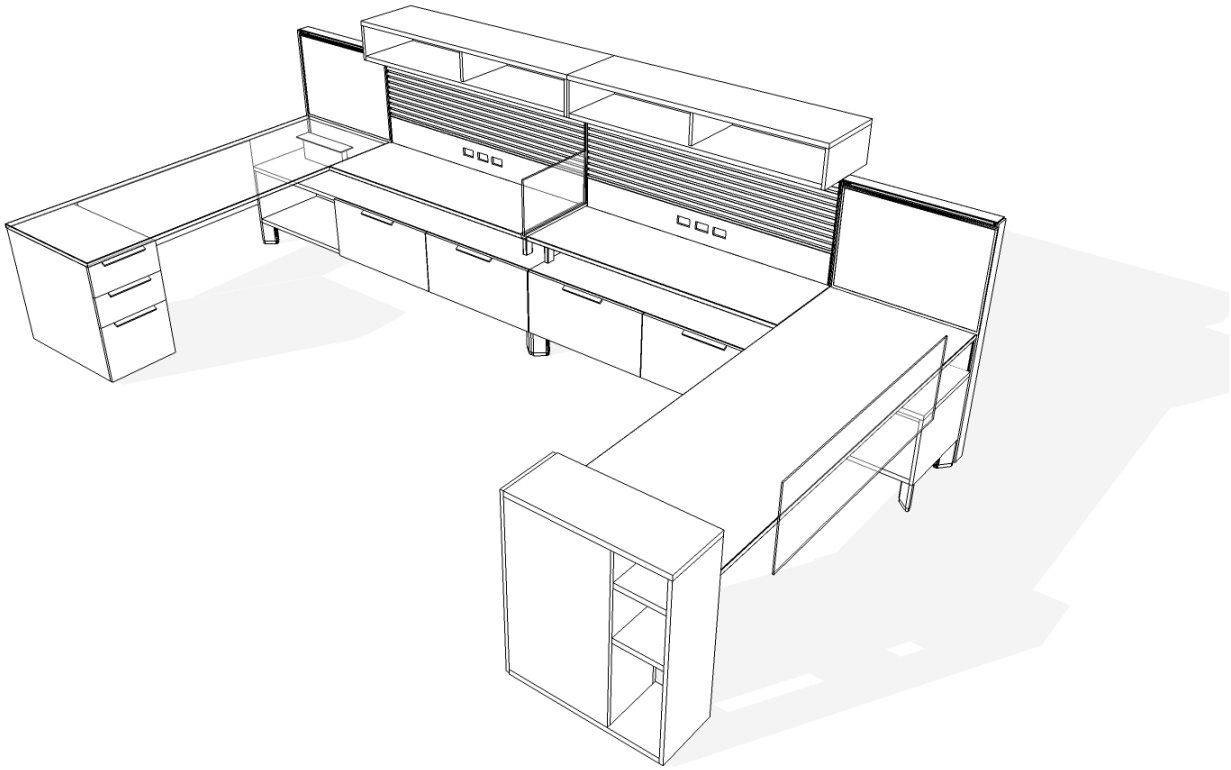

- Provides seated privacy to semi-supported worksurfaces and has an integral wire management try for easy wire flow and increased worksurface stability
- Is mounted on the underside of the worksurface between worksurface supports
- Can be mounted in any location beneath a semi-supported worksurface. If adequate visitor knee clearance is required, the modesty panel should be positioned 7-1/2" from the back of a 30" deep surface
- Is also recommended for all semi-supported worksurfaces greater than 60" in width

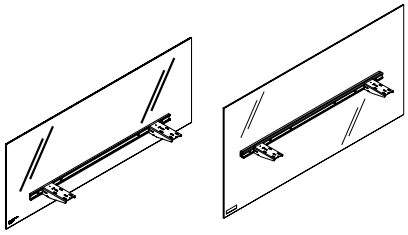

Wire Tray (KZW)

- Provides a conduit and support for wires between the panel and the back of the worksurface
- Fastens to the underside of a worksurface along the back edge, and provides a hole for pass-through
- Two trays may be mounted to adjacent edges on corner surfaces
- Actual measurement is 6" shorter to work with same sized worksurfaces
- Longer worksurfaces have two scallops and require two wire trays
- Cantilevers (CT) accommodate wire flow via a wire notch from panel to panel
- Wires can be continuously laid in to run along panels via a 3/8" gap between the worksurface and the panel and through the worksurface scallops provided
- Width of the tray must be specified in accordance with the worksurface width onto which it is mounted

worksurface accessory basics (continued)

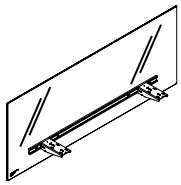

Leverage offers accessories that are used in conjunction with worksurfaces.

Desk Edge Screen – Full-Height Glass (KSFDG)

- A glass screen that mounts to a freestanding or semi-suspended worksurface
- In Freestanding applications, worksurface depth must be 30" or greater
- Is 29" high with 13" above the desk to match 42" high. datum, and 16" below the desk
- Available in 6mm Frost etched Tempered Glass

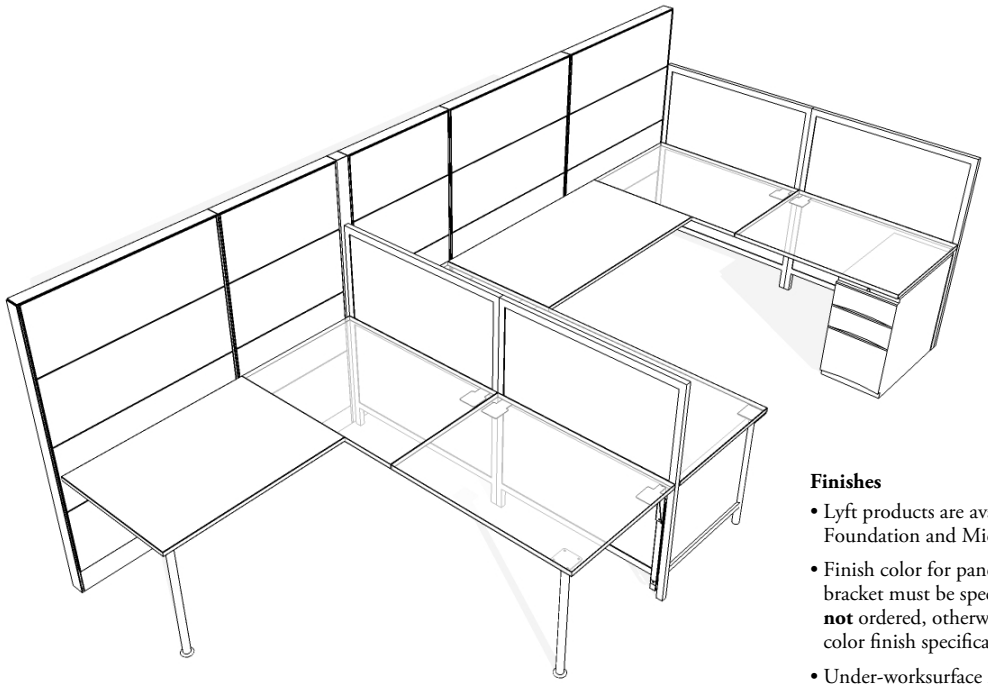

Desk Edge Screen (KSDEG)

- A glass screen that mounts to a freestanding or semi-suspended worksurface
- In Freestanding applications, worksurface depth must be 30" or greater
- Is 19" high with 13" above the desk to match 42" high. datum, and 6" below the desk
- Available in widths from 23" to 96" in 1" increments
- Available in 6mm Frost etched Tempered Glass

lyft worksurface support basics

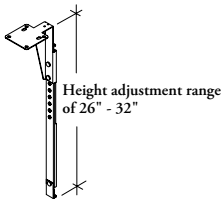

Lyft Thin Panels require specific supports for mounting to worksurfaces.

Worksurface can be mounted on- or off-module to Lyft Thin Panels.

Finishes

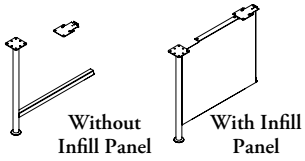

- Lyft products are available in Foundation and Mica colors
- Finish color for panel attachment bracket must be specified if infill panel is **not** ordered, otherwise bracket and infill color finish specification is the same
- Under-worksurface rails are always Black

Adjustable Height Thin Panel Mount Bracket (HWBA)

- Mounts to the mid rail and lower rail of Lyft Standard and Segmented Thin Panels, providing worksurface support
- The Bracket positions the back edge of worksurfaces to Lyft Panels with the same spacing as Leverage Panels to worksurfaces
- Can be used in a shared configuration off-module
- When supporting two adjoining worksurfaces a Flush Plate (TLFP) (ordered separately) is required to secure the front end of the two worksurfaces

End Gable (HEG)

- Connects to Lyft Thin Panels and worksurfaces to provide structural support at the end of a worksurface run
- Is non-handed and can be mounted on- or off-module to Standard Lyft Thin Panels and Segmented Lyft Thin Panels
- **Cannot** be mounted to a Leverage panel
- Is **not** to be used as a shared worksurface support
- Worksurfaces are supported at a fixed height of 29" with leveling capability
- Match End Gable depth specification to the depth of the worksurface it is applied
- An optional non-handed Infill Panel is available to enclose the under-worksurface area to the same raised height as Lyft Thin Panels

Fixed-Height Thin Panel Mount Bracket (HWB)

- Mounts to the mid rail of Lyft Standard and Segmented Thin Panels, providing worksurface support at a standard height of 29". This is the primary worksurface support component used with Lyft Thin Panel applications
- Positions the edge of worksurfaces to Lyft Thin Panels with the same spacing as Leverage Panels to worksurfaces
- A Fixed-Height Thin Panel Mount Bracket (HWB) is also required mid span for single worksurfaces that span over 60"
- For on-module worksurface applications where two worksurfaces meet, two Fixed Height or Adjustable Height Thin Panel Mount Brackets are required at the junction, one for each worksurface
- A Flush Plate (TLFP) is also required to join the worksurfaces at the front
- Where two worksurfaces meet off-module to a Lyft Thin Panel, one Fixed Height or Adjustable Height Thin Panel Mount Bracket can be shared

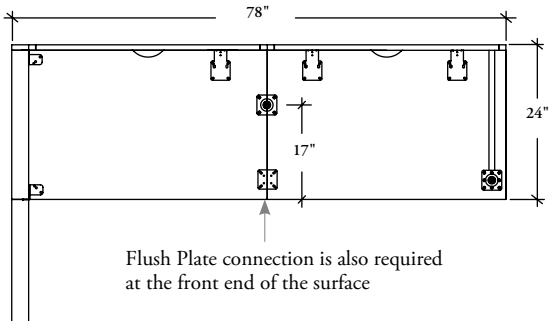

Worksurface Supporting Pedestal Kit (HWP)

- In combination with a pedestal provides structural support when mounted to worksurfaces and Lyft Thin Panels
- Can be applied to mount Teknion worksurfaces and pedestals to Lyft Thin Panels
- The kit is non-handed
- Pedestal depth must be less than the worksurface depth to which it is applied
- Is **not** to be used as a shared worksurface support. Its application is to support end of worksurface runs
- Is compatible with Lyft Standard and Segmented Thin Panels only
- An optional Filler Panel is available to fully enclose end run worksurface applications

planning with worksurface supports for lyft

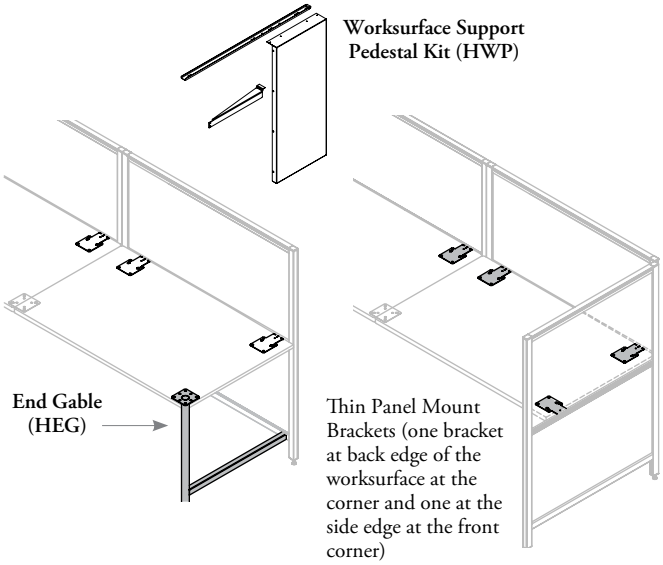

The following rules apply when planning worksurface support for Lyft Thin Panels.

Worksurface spans **cannot** extend beyond the end of a Lyft Thin Panel run.

worksurface spans

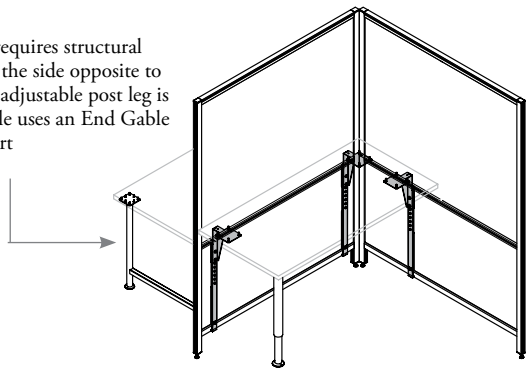

- On Lyft Thin Panel runs with one or more worksurfaces, an inset xm Post Leg (TXPL) is required to provide additional support to the following worksurface spans:
  - 24" deep worksurface span over 78"
  - 30" deep worksurface span over 60"
- xm Post Legs are inset 17" from the user edge and should be used at mid span on a single worksurface or at the junction of two worksurfaces (Flush Plate connection is also required at the front end of the surface)
- A Fixed-Height Thin Panel Mount Bracket (HWB) is also required mid span for single worksurfaces that span over 60"

supporting the end of a worksurface run

- At the end of a worksurface run, where the back edge of the worksurface is connected to a Lyft Standard or Segmented Thin Panel, one of the following support options is required at the worksurface end:
  - Lyft End Gable
  - Lyft Worksurface Supporting Pedestal Kit
  - Lyft return Panel with Fixed-Height Thin Panel Mount Brackets (one bracket at back edge of the worksurface at the corner and one at the side edge at the front corner)
  - Lyft return Panel with height-adjustable Thin Panel Mount Brackets (one bracket at back edge of the worksurface at the corner and one at the side edge at the front corner)

This application requires structural panel support on the side opposite to where the height-adjustable post leg is used. This example uses an End Gable (HEG) for support

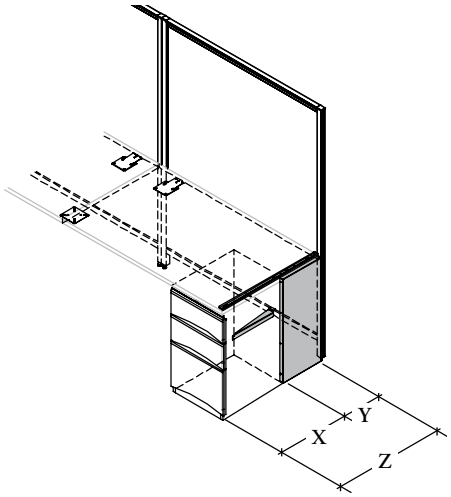

Adjustable Height Thin Panel Mount Brackets (HWBA)

- Follow the same application guidelines as Fixed-Height Thin Panel Mount Brackets (HWB) with the following exceptions:
  - The Adjustable Height Thin Panel Mount Bracket is to be used with Variable Height xm Post Legs (TXPL2). Variable Height Post Legs do **not** provide panel support
  - The Adjustable Height Thin Panel Mount Bracket **cannot** be used with Lyft End Gables (HEG) or Lyft Worksurface Supporting Pedestal Kits (HWP) at heights other than 29"
  - Mounted storage is **not** permitted on a Lyft Thin Panel run stabilized by a height-adjustable Post Leg and Adjustable Height Thin Panel Mount Brackets. See the Mounted Storage section for Lyft Thin Panel Applications

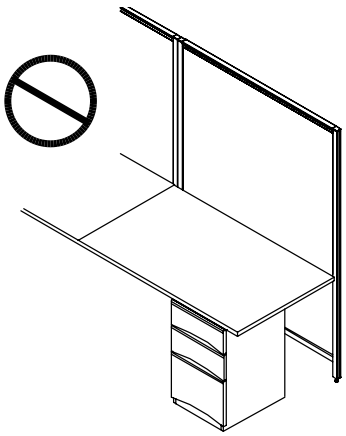

planning with worksurface supports for lyft (continued)

The following rules apply when planning worksurface support for Lyft Thin Panels.

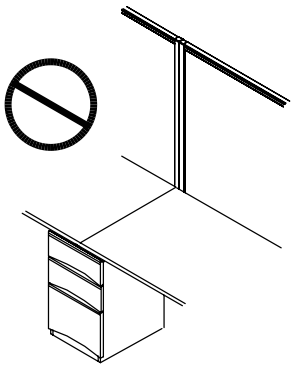

Worksurface Supporting Pedestal Kit (HWP)

X = 18"-22" For 24" Worksurface Depth
X = 18"-22"-28" For 30" Worksurface Depth
Y = Gap Range
Z = 24" or 30" Worksurface Depth

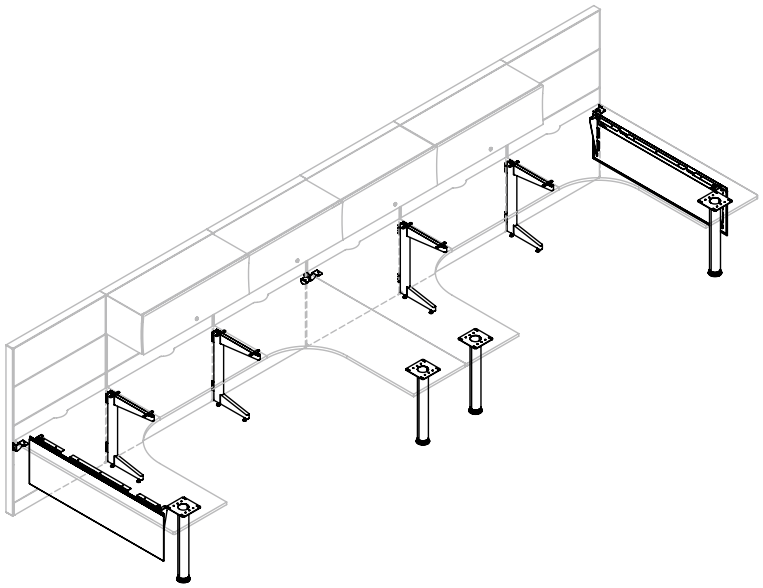

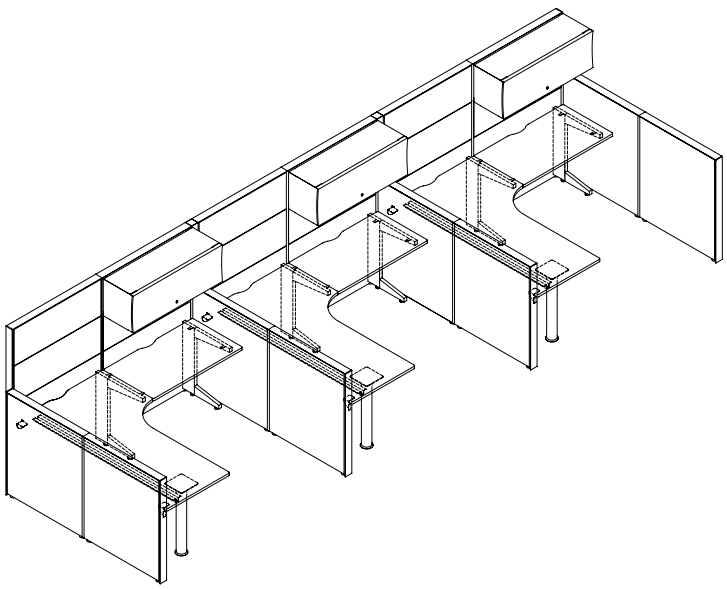

To be used only as and end of worksurface run support.

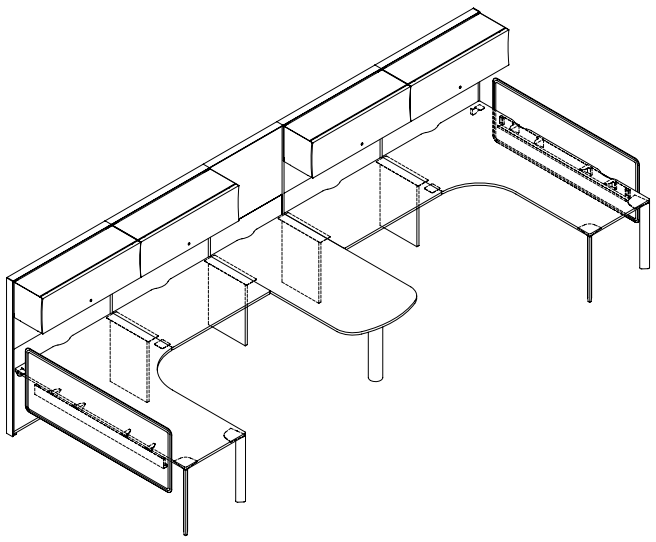

typicals – panel mounted worksurface supports

The following typicals demonstrate various panel mounted worksurface support options.

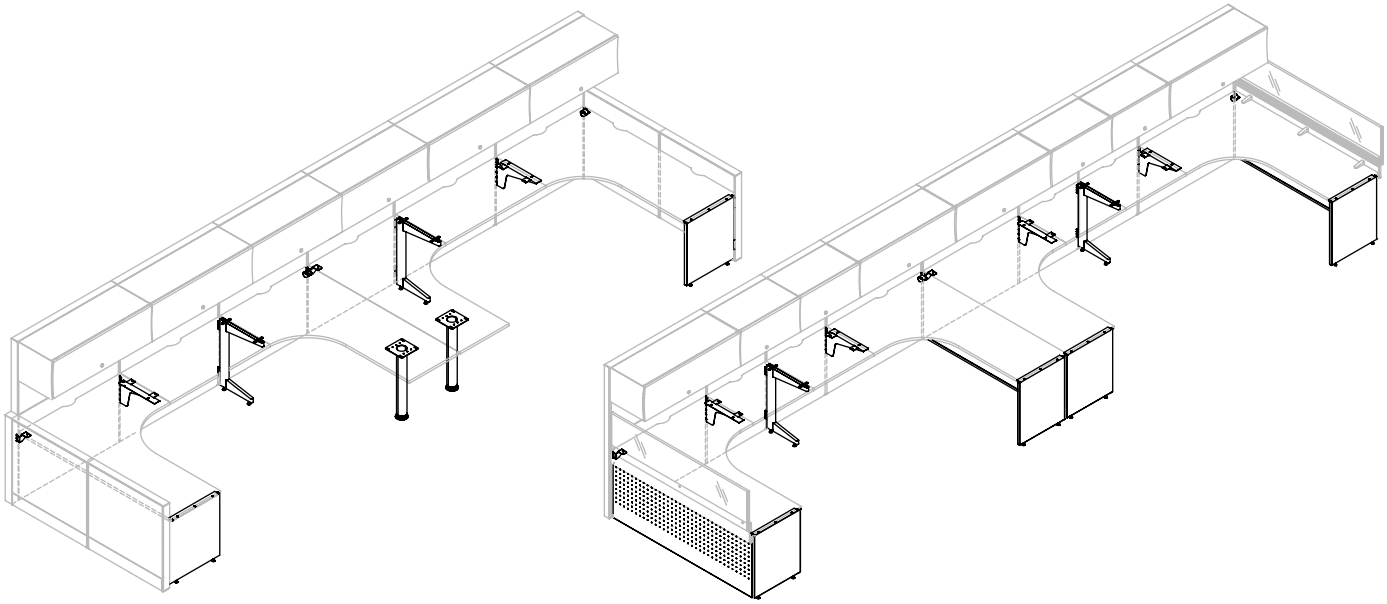

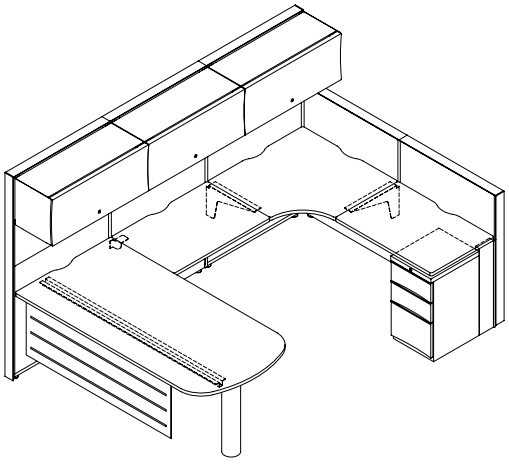

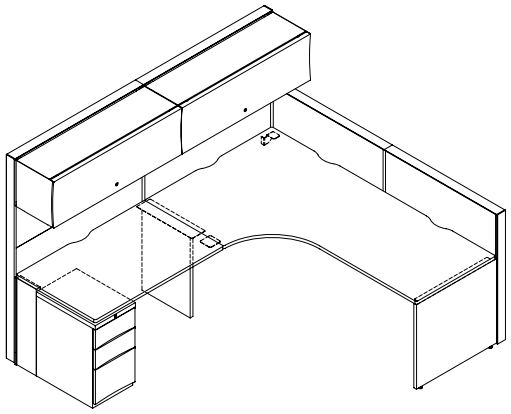

typicals – panel mounted worksurface supports (continued)

The following typicals demonstrate various panel mounted worksurface support options.

DESKTOP LATERAL SCREEN BASICS 184

PLANNING WITH DESKTOP LATERAL SCREENS 186

understanding screens

Leverage offers a variety of screens at varying heights and in multiple materials to provide casual privacy and functionality.

desk edge screens

Desk Edge Screens are available in five styles, each attaches to the worksurface edge:

- Glass
- Infinity
- Framed
- Smooth Felt
- Desk Edge Screen with Glass

Glass Desk Edge Screens

- A glass screen that provides privacy to the front of a worksurface while still allowing light into the workstation
- 42", 51" and 57" heights (depending on style)

Infinity Screen

- A lightweight thin screen with a soft curvilinear aesthetic
- Available
  - Curved Desk Edge Screen,
  - Desk Edge Screen,
  - Quilted Desk Edge Screen,
  - Side Desk Edge Screen,
  - Desk Edge Floor Screen,
  - Side Desk Edge Floor Screen
- 42", 51" and 57" heights

Framed Fabric Desk Edge Screens

- A square edge screen that is outlined with a frame
- Available
  - Desk Edge Floor Screens
  - Side Desk Edge Screens
- 42", 51" and 57" heights

Smooth Felt Desk Edge Screen

- A felt screen with curved edges and a lightweight aesthetic
- 42" and 51" heights
- Available from Complements: *Teknion's Ergonomics & Accessories* Program.

Desk Edge Screen with Glass

- A screen that is solid at the bottom and glass at the top
- 42", 51" and 57" heights with options for the glass datum heights

understanding screens (continued)

lateral screens

Lateral screens are available in three styles:
- Solid Lateral Floor Screen
- Solid Lateral Floor Screen with Return
- Desktop Lateral Screen

Solid Lateral Floor Screen

- Mounts perpendicular to a panel to provide panel support and two sides of privacy
- 42", 51" and 57" heights

Solid Lateral Floor Screen with Return

- Mounts perpendicular to a panel to provide panel support and three sides of privacy
- 42", 51" and 57" heights

Desk Edge Lateral Screens

- Attach to a worksurface to provide lateral space division
- Available in a variety of finishes
  - glass
  - writable glass
  - laminate
  - writable laminate
  - fabric
  - metal
  - smooth felt
- 42", 51" and 57" heights (depending on style)

desk edge screen basics

Desk Edge Screens can be used on panel mounted or freestanding worksurfaces to provide visual privacy.

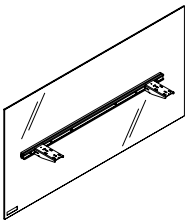

glass

Desk Edge Screen - Glass (shown)

Desk Edge Screen - Full Height Glass (shown)

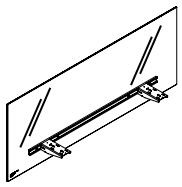

- Provide privacy to the front of a worksurface while still allowing light into the workstation
- Glass Thickness: 6mm Frost Etched Tempered Glass
- When used with freestanding surfaces, the depth must be 30" or deeper

Desk Edge Screen – Full-Height Glass (KSFDG)

- Widths: 24" to 72" in 6" increments
- Heights:
  - 13" for a 42"h datum
  - 22" for 51"h datum
  - 28" for 57"h datum
- Modesty Base Height: 16" below the worksurface

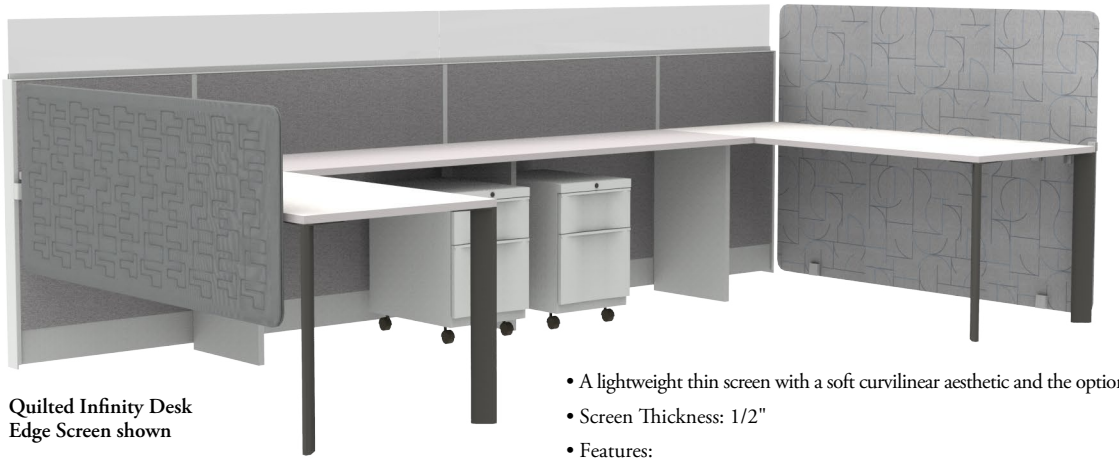

Desk Edge Screen – Full Height Glass (KSDEG)

- Widths: 24" to 96" in 6" increments
- Height:
  - 13" for a 42"h datum
- Modesty Base Height: 6" below the worksurface

desk edge screen basics (continued)

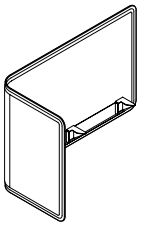

infinity

Infinity Desk Edge Floor Screen shown

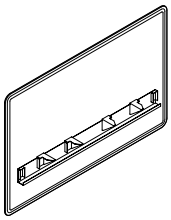

Quilted Infinity Desk Edge Screen shown

- A lightweight thin screen with a soft curvilinear aesthetic and the option for quilting
- Screen Thickness: 1/2"
- Features:
  - radiused corners
  - casual and continuous corner applications
  - non tackable
- Wire Manager is available
- Available in select panel and upholstery fabric, refer to the *Teknion Textiles Program Guide*

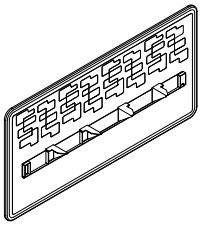

Infinity Curved Desk Edge Screen (GXCL)

- Depths: 20"
- Widths: 24" to 60" in 6" increments
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
  - 28" for a 57"h datum
- Modesty Base Heights:
  - Partial Modesty Height 23"
  - Modesty Height 15"

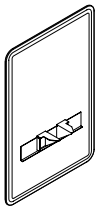

Infinity Desk Edge Screen (GXDL)

- Widths: 36" to 72" in 1" increments
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
  - 28" for a 57"h datum
- Modesty Base Heights:
  - Modesty Height 15"
  - Elevated Height 6"

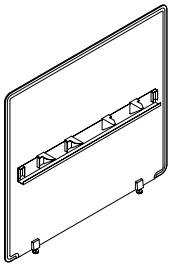

Quilted Infinity Desk Edge Screen (GQDL)

- Widths: 36" to 72" in 6" increments
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
- Modesty Base Heights:
  - Modesty Height 15"
- Two Quilted Patterns:
  - Diode
  - Pico

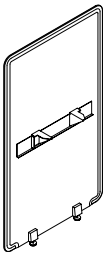

Infinity Side Desk Edge Screen (GXSL)

- Depths: 18", 24" and 30"
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
- Modesty Base Heights:
  - Modesty Height 15"
  - Elevated Height 6"

Infinity Desk Edge Floor Screen (GXFL)

- Widths: 36" to 72" in 1" increments
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
- Modesty Base Heights: Floor Height 1"

Infinity Side Desk Edge Floor Screen (GXEL)

- Depths: 24" and 30"
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
- Modesty Base Heights: Floor Height 1"

Infinity Screen Alignment Clip (GXCC)

- Used to clip Infinity screens together in in-line applications

desk edge screen basics (continued)

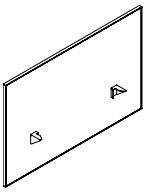

framed fabric

Framed Fabric Desk Edge Floor Screen shown

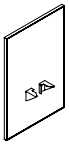

Framed Fabric Desk Edge Screen shown

- A square edged screen that is outlined with a frame
- Features:
  - square corners
  - tight fit corner applications
  - screen is 1" thick
  - tackable
- Available in select panel and upholstery fabric, refer to the *Teknion Textiles Program Guide*

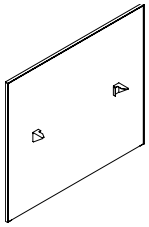

Framed Fabric Desk Edge Screen (GYDL)

- Widths: 36" - 72" wide in 1" increments
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
  - 28" for a 57"h datum
- Modesty Base Heights:
  - Modesty Height 15"
  - Elevated Height 6"

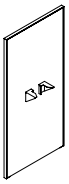

Framed Fabric Side Desk Edge Screen (GYSL)

- Depths: 18", 24", and 30"
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
  - 28" for a 57"h datum
- Modesty Base Heights:
  - Modesty Height 15"
  - Elevated Height 6"

Framed Fabric Desk Edge Floor Screen (GYFL)

- Widths: 36" - 72" wide in 1" increments
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
- Modesty Base Heights:
  - Floor Height 1"

Framed Fabric Side Desk Edge Floor Screen (GYEL)

- Depths: 18", 24", and 30"
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
- Modesty Base Heights:
  - Floor Height 1"

desk edge screen basics (continued)

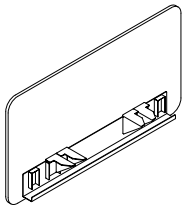

smooth felt desk edge

Smooth Felt Curved Radius Desk Edge Screen shown

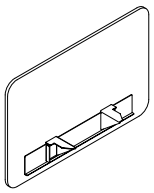

Smooth Felt Desk Edge Screen shown

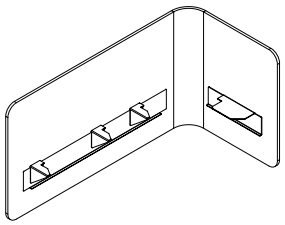

- A felt screen with curved edges and a lightweight aesthetic
- Screens are available from Complements: *Teknion's Ergonomics & Accessories* Program

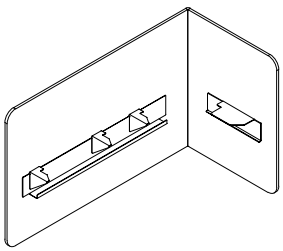

Smooth Felt Desk Edge Screen (GZDH)

Smooth Felt Side Desk Edge Screen (GZSH)

Smooth Felt Curved Radius Desk Edge Screen (GZCH)

Smooth Felt Square Corner Desk Edge Screen (GZBH)

desk edge screen basics (continued)

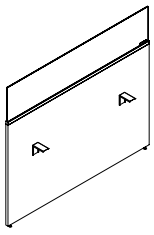

desk edge screens with glass

Desk Edge Screen with
Glass shown

Finishes:

- Screens available
  - Source Laminate
  - Flintwood
  - Natural Veneer
- Hardware available
  - Foundation
  - Mica
  - Accent
- Glass available
  - Clear
  - Frosted

Desk Edge Screen with Glass (GVGL)

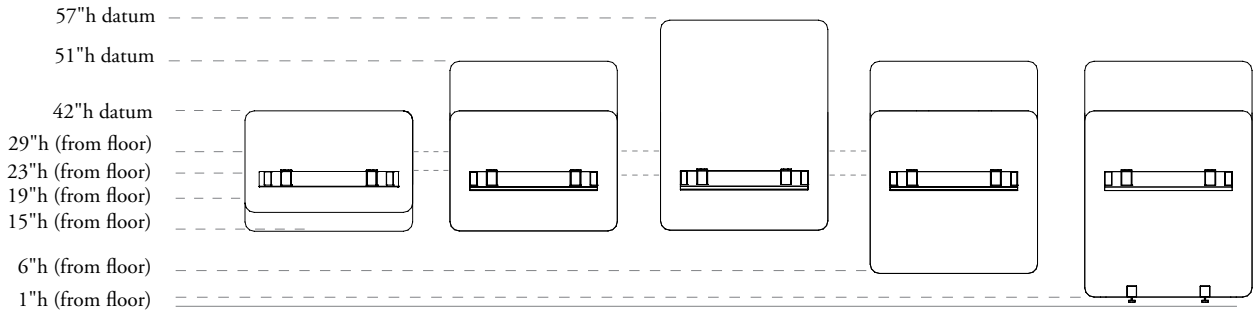

- A screen that is solid at the bottom with glass at the top
- Heights:
  - 42"h total (29" solid with 13" glass)
  - 51"h total (42" solid with 9" glass)
  - 51"h total (36". solid with 15" glass)
  - 57"h total (42". solid with 15" glass)
- Widths: 48" to 72"wide in 6" increments

planning with desk edge screens

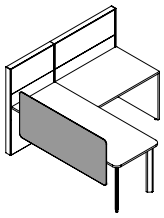

The following should be considered when planning with Desk Edge Screens.

infinity and smooth felt screens

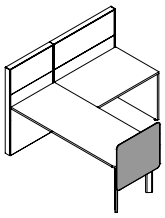

The following datum heights are available. Refer to each screens Basics Page for specific heights.

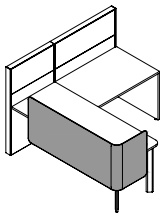

The following applications are possible.

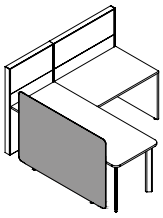

Desk Edge

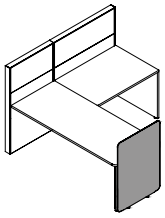

Side Desk Edge

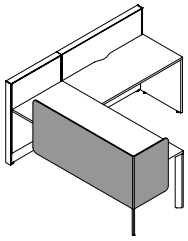

Curved Desk Edge

Desk Edge Floor

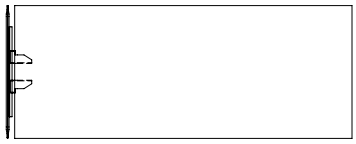

Side Desk Edge Floor

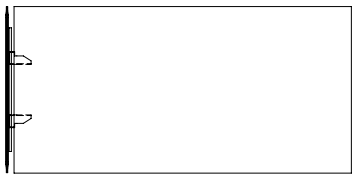

Square Desk Edge
(available on Smooth Felt Screen only)

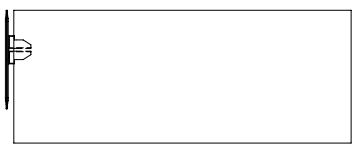

Infinity Side Desk Edge Screens and Smooth Felt Side Desk Edge Screens can be planned at both partial and full depth.

24" deep worksurface with
24" deep Infinity Side Desk Edge Screen (GXSL).

30" deep worksurface with
30" deep Infinity Side Desk Edge Screen (GXSL).

24" deep worksurface with
18" deep Infinity Side Desk Edge Screen (GXSL).

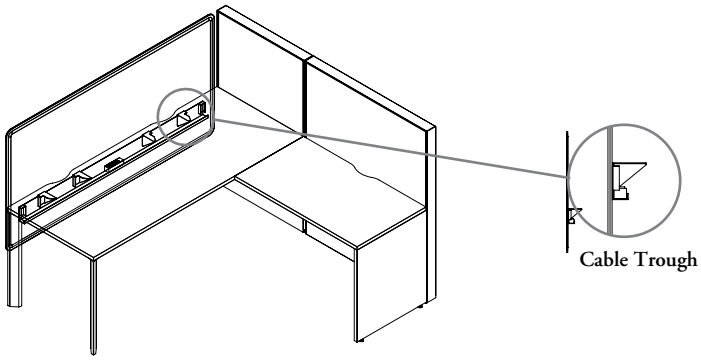

30" deep worksurface with
24" deep Infinity Side Desk Edge Screen (GXSL).

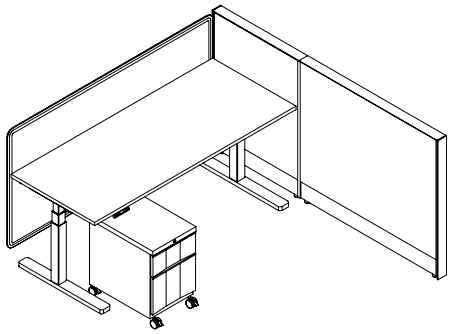

planning with desk edge screens (continued)

Infinity Desk Edge Screens and Smooth Felt Desk Edge Screens offer an optional wire manager that accompanies the bracket connection.

- The gap will always be 1/2"
- A continuous trough allows for cable management
- The trough can accommodate a Power Rod (YEPD) or Power Bar (YEPS). Available from *Complements: Teknion's Ergonomics & Accessories Program*
- When planning with integrated height adjustable tables, the wire manager should not be specified due to interference with storage below

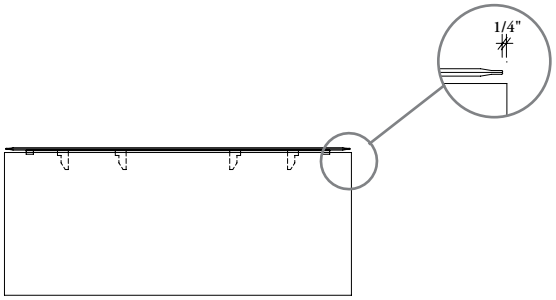

Cable Trough

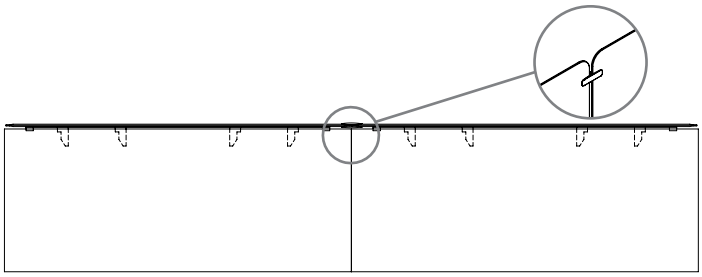

infinity screens

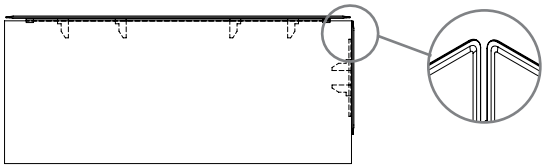

Infinity Screen widths are nominal.
- The actual width is 1/4" less on each side

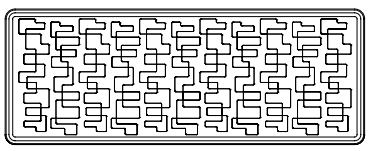

When two screens are planned side by side, there will be a 1/2" gap between the two screens.
- Screen Alignment Clips (**GXCC**) are used to align the two parallel screens

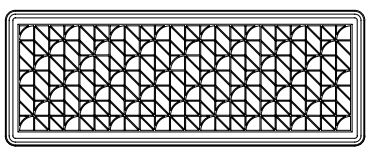

Infinity screens have no physical connection at corners.
They are a casual fit.

Two patterns are available on Quilted Infinity Desk Edge Screens.

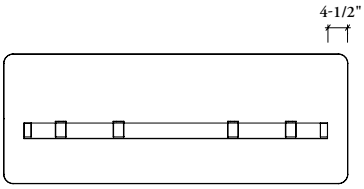

Diode

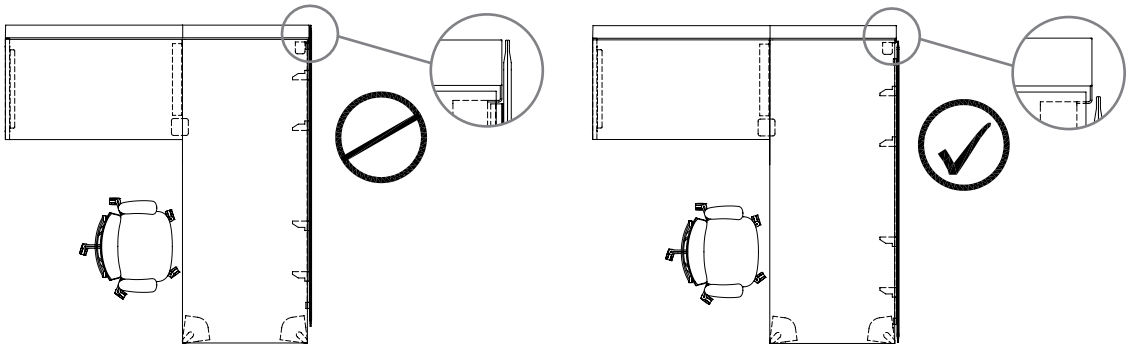

Pico

planning with desk edge screens (continued)

Infinity screen brackets are always 4 1/2" from either edge of a screen.

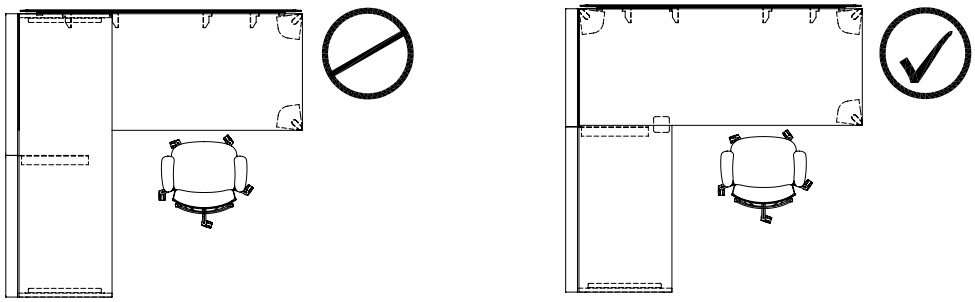

Infinity Desk Edge Screens **cannot** run past end of a panel, they must end at the panel.

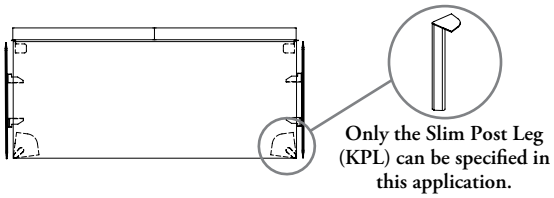

Primary worksurfaces **cannot** be planned off of a secondary worksurface when Infinity screens are used.

• The screen brackets will interfere with the mounting brackets of the worksurfaces. The primary worksurface must be fastened to the panel.

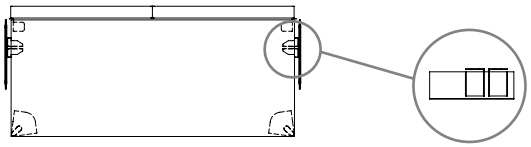

When Infinity Side Desk Edge Screens are used on a worksurface mounted parallel to a spine panel, only the Slim Post Leg can be used for support on the user side of the worksurface.

Only the Slim Post Leg (KPL) can be specified in this application.

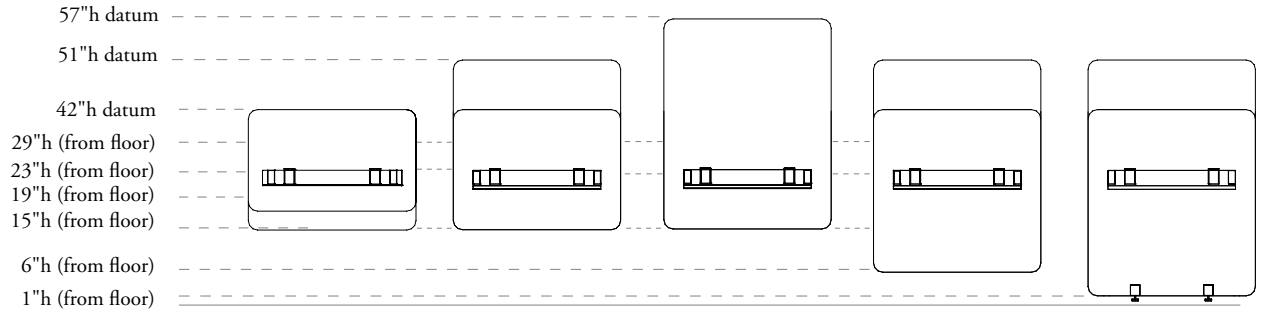

18" deep Infinity Side Desk Edge Screens (GXSL) and Infinity Side Desk Edge Floor Screens (GXEL) have re-positionable brackets, allowing these screens to be planned on either side of the worksurface.

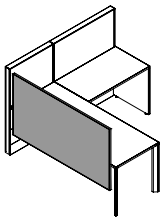

planning with desk edge screens (continued)

framed fabric screens

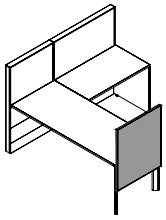

The following datum heights are available. Refer to each screens Basics Page for specific heights.

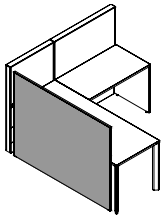

The following applications are possible.

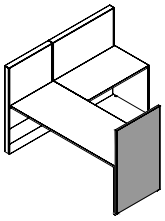

Desk Edge

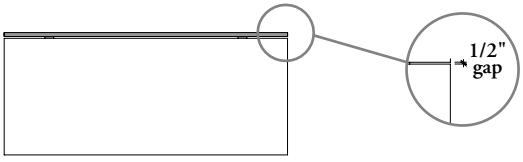

Side Desk Edge

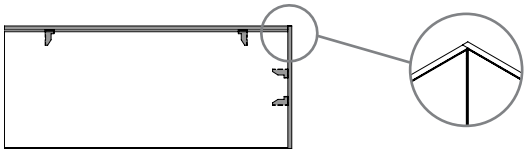

Desk Edge Floor

Side Desk Edge Floor

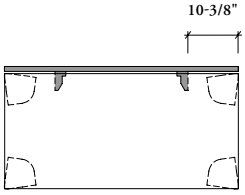

Framed Fabric Screen widths are actual so they will be same width as worksurface.

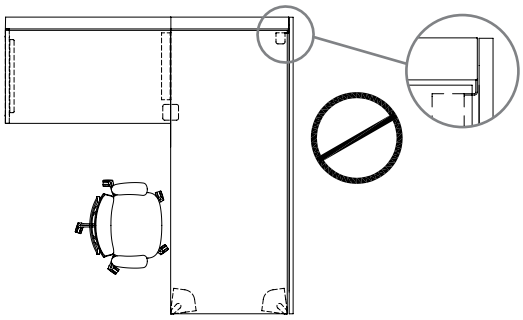

When a Framed Fabric Desk Edge Screen and Framed Fabric Side Desk Edge Screen are planned together, they are physically connect at the corner. It is not a casual connection (not collection).

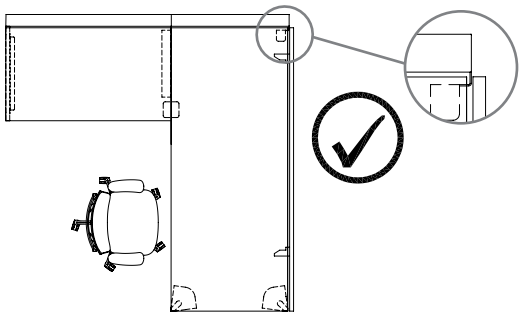

Framed Fabric Screens always have a common bracket placement of 10-3/8" from either edge.

planning with desk edge screens (continued)

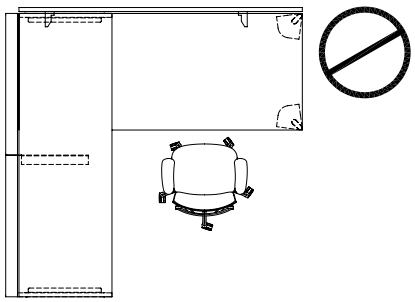

When used with perpendicular panel mounted worksurfaces the screen cannot extend past the end of the panel, it must end at the panel.

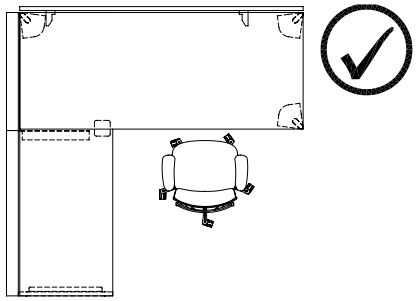

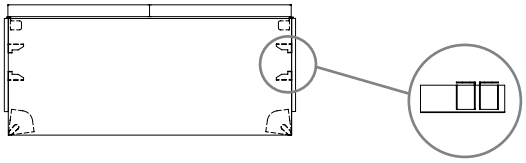

Primary worksurfaces **cannot** be planned off of a secondary worksurface when Framed Fabric screens are used.

• The screen brackets will interfere with the mounting brackets of the worksurfaces. The primary worksurface must be fastened to the panel.

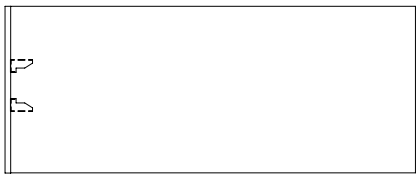

24" deep Framed Fabric Side Desk Edge Screens (GYSL) and Framed Fabric Side Desk Edge Floor Screens (GYEL) have re-positionable brackets, allowing these screens to be planned on either side of the worksurface.

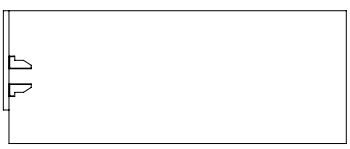

Framed Fabric Side Desk Edge Screens can be planned at both partial and full depth.

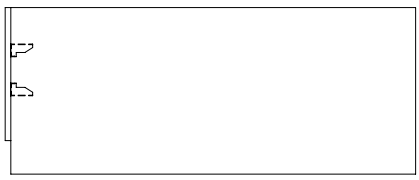

24" deep worksurface with
24" deep Framed Fabric Side Desk Edge Screen (GYSL).

30" deep worksurface with
30" deep Framed Fabric Side Desk Edge Screen (GYSL).

24" deep worksurface with
18" deep Framed Fabric Side Desk Edge Screen (GYSL).

30" deep worksurface with
24" deep Framed Fabric Side Desk Edge Screen (GYSL).

lateral floor screen overview

Leverage spine panel runs can be supported with either wing panels or with Lateral Floor Screens. Each provides a different aesthetic.

Return Panels provide the warmth of textiles, options for framed glass, and the ability to carry power to additional panels. Lateral Floor Screens provide a thinner panel and the ability to add a wood look to workstations, as well as a clean profile at the end of panel runs. Both are available in a variety of heights and widths, with and without glass, but the same level of support can be achieved with either.

The following typicals demonstrate the different aesthetic that can be achieved depending on whether panels or Lateral Floor Screens are used for support and space division.

End Mounted Double Screens are used side by side to overlap the end of the panel run for a clean aesthetic

End Mounted Shared Screens finish the end of a spine panel run and eliminate the vertical lines created by panel frames and end trims

End Mounted Single Screens overlap the end of the panel run for a clean aesthetic in single sided applications

Solid Lateral Screens with Returns provide additional privacy with either a return or shared return

lateral floor screen basics

Lateral Floor Screens mount perpendicular to a panel to provide privacy and panel support.

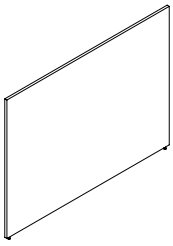

Solid Lateral Floor Screen with Glass shown

- Available solid or with glass at top
- Depths: 24", 30", 36", 42", 48", 60" and 72" (sizing are nominal, actual sizes vary by condition)
- Screen Support:
  - None
  - Foot
  - Worksurface Connection
    - lateral screens are not worksurface supporting
    - they can attach to a worksurface and have an optional foot, but worksurfaces must be properly supported as outlined in *Worksurface Supports* section
- Handedness:
  - Left
  - Right
  - Not Applicable
- The handedness is determined by the location of the screen in relation to the bracket when viewed from the users perspective
- An end trim is required at the end of the panel run
- The solid section of the screen must be the same height as the panel

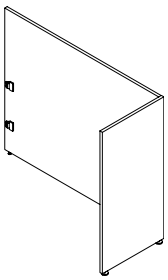

Finishes:

- Screens available
  - Source Laminate
  - Flintwood
  - Natural Veneer
- Hardware available
  - Foundation
  - Mica
  - Accent
- Glass available
  - Clear
  - Frost

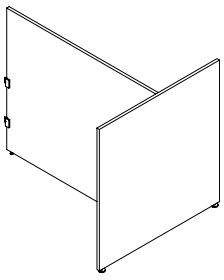

Solid Lateral Floor Screen (KSNTS)

- Heights: 42", 51" and 57"
- Bracket Attachment:
  - End Mounted Single
  - End Mounted Double
  - End Mounted Shared
  - Mid Spine

Solid Lateral Floor Screen with Return (KSNRS)

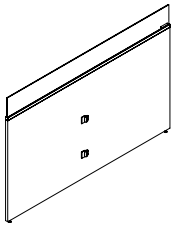

- Heights: 42", 51" and 57"
- Bracket Attachment:
  - End Mounted Single
  - End Mounted Shared
  - Mid Spine

Solid Lateral Floor Screen with Shared Return (KSNCS)

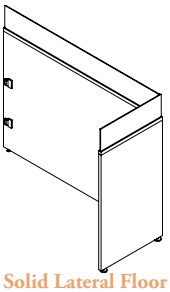

- Heights: 42", 51" and 57"
- Bracket Attachment:
  - Mid Spine

lateral floor screen basics (continued)

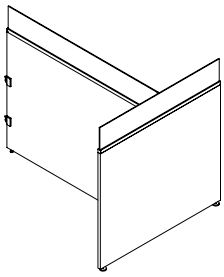

Solid Lateral Floor Screen with Glass (KSNTG)

- Heights:
  42"h (30" solid plus 12" glass)
  51"h (42" solid plus 9" glass)
  51"h (36" solid plus 15" glass)
  57"h (42" solid plus 15" glass)
- Bracket Attachment:
  - End Mounted Single
  - End Mounted Double
  - End Mounted Shared
  - Mid Spine

Solid Lateral Floor Screen with Glass with Return (KSNRG)

- Heights:
  42"h (30" solid plus 12" glass)
  51"h (42" solid plus 9" glass)
  51"h (36" solid plus 15" glass)
  57"h (42" solid plus 15" glass)
- Bracket Attachment:
  - End Mounted Single
  - End Mounted Shared
  - Mid Spine

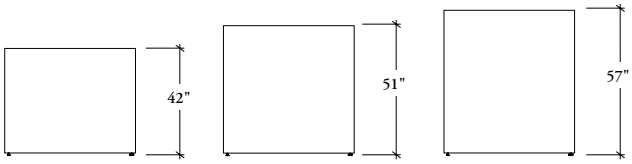

Solid Lateral Floor Screen with Glass with Shared Return (KSNCG)

- Heights:
  42"h (30" solid plus 12" glass)
  51"h (42" solid plus 9" glass)
  51"h (36" solid plus 15" glass)
  57"h (42" solid plus 15" glass)
- Bracket Attachment:
  - Mid Spine

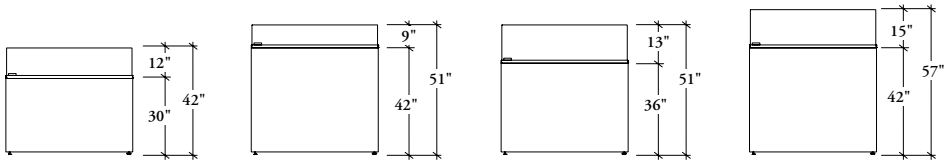

planning with lateral floor screens

Lateral Floor Screens are available in the following heights to provide various levels of privacy.

Solid

Solid with Glass

These heights provide a variety of options for workstation privacy that align with standard Leverage datum heights.

42"h. Solid
42"h. Solid with Glass
(30"h Solid + 12" Glass)

51"h. Solid
51"h. Solid with Glass
(36" Solid + 15" glass)

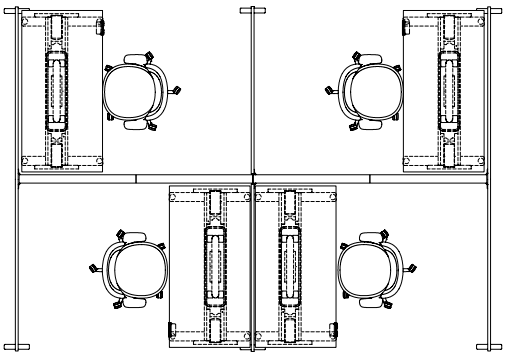

51"h. Solid
51"h Solid with Glass
(42" Solid + 9" Glass)

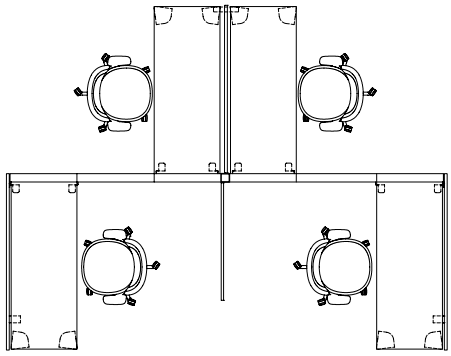

57"h. Solid
57"h. Solid with Glass
(42" Solid + 15" Glass)

Lateral Floor Screens can be used with or without a support foot.

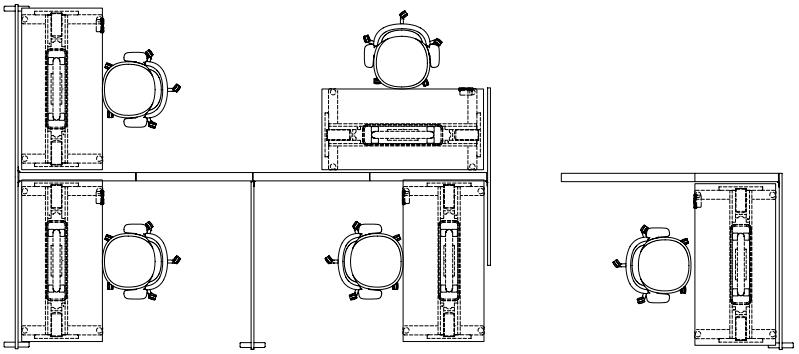

The support foot is required when
- the screen is 48" wide or wider and not attached to a worksurface

The support foot is not required when
- the screen is attached to a fixed worksurface
- the screen is 42"wide or less

planning with lateral floor screens (continued)

Screens can be used in the following locations

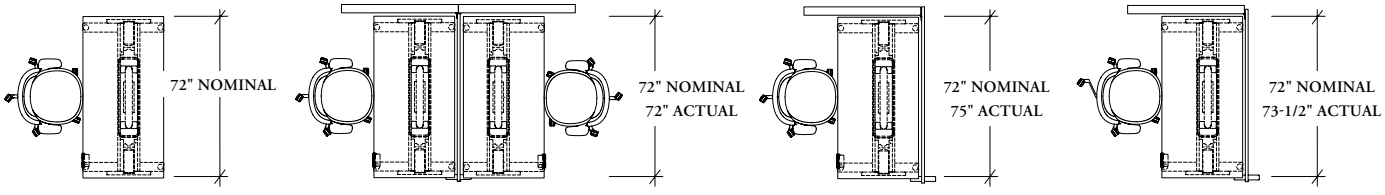

EB MS ED ES

EB – End Mounted Double
- used on the outside of a workstation
- extends half way across the end of a panel run
- an end trim is required at the end of the panel run
- the solid section of the screen must be the same height as the panel
- nominal size = actual size + 1-1/2"

ED – End Mounted Share
- shared on the outside of two workstations
- mounts centered to the end of a panel run
- an end trim is required at the end of the panel run
- the solid section of the screen must be the same height as the panel
- nominal size = actual size + 3"

ES - End Mounted Single
- used on the outside of a single workstation
- extends completely across the end of a panel run
- an end trim is required at the end of the panel run
- the solid section of the screen must be the same height as the panel
- nominal size = actual size + 3"

MS – Mid Spine
- shared between users
- mounts between two panels along a panel run
- nominal size = actual size

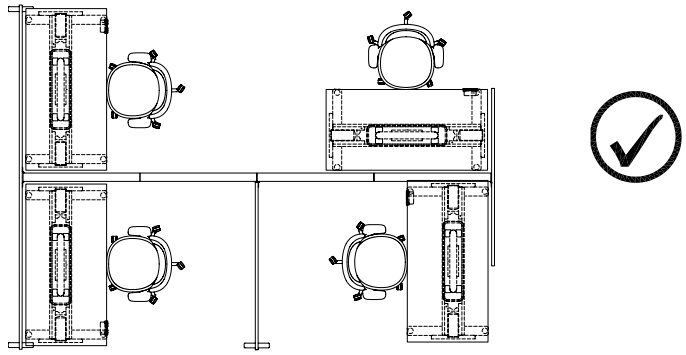

MS ES ES

Regardless of the type of Lateral Floor Screen used, the nominal dimension from the panel wall remains the same, allowing for a consistent footprint on all workstations.

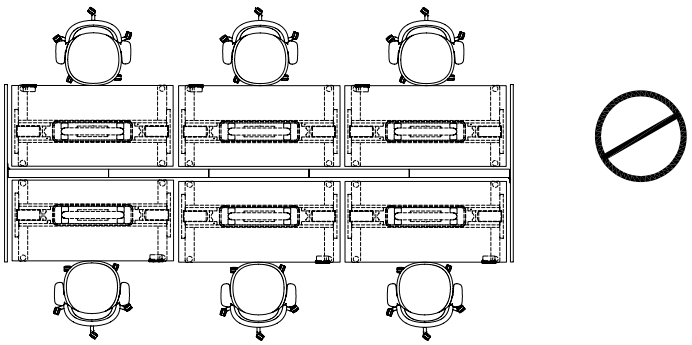

planning with lateral floor screens (continued)

Lateral Floor Screens can provide panel support in place of return panels.

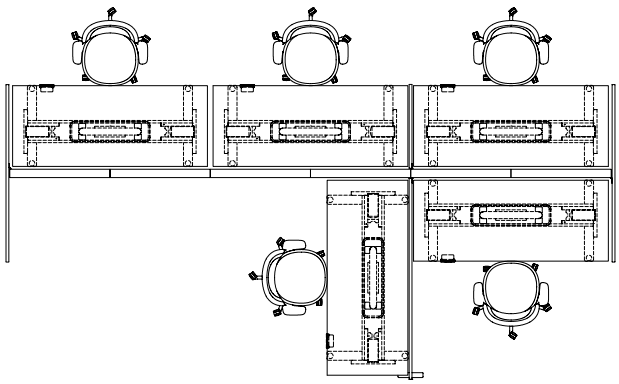

Lateral Floor Screens provide support to panels when:

- the maximum number of panel sections is four and the overall length does not exceed 192" (ex. 4 x 48"sections = 192")
- the maximum number of panels sections is three when 60"w. panels are used and the overall length does not exceed 180" (ex. 3 x 60" sections - 180")
- panel heights to do not exceed 51"h.

Lateral Floor Screens will not support a span of five or more segments, regardless of the width of each segment even if the overall length is less than 192".

This example demonstrates how additional Lateral Screens can provide the panel support required.

example: double end screens and mid run screens

- there are no unsupported runs of more than four segments and the run does not exceed 192" without an additional screen

desktop lateral screen basics

Lateral screens attach to the top of a worksurface to provide desktop lateral privacy and space division at multiple heights.

Smooth Felt Lateral Screen shown

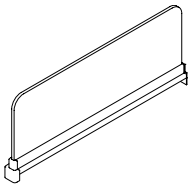

Metal Lateral Screen shown

Finishes:

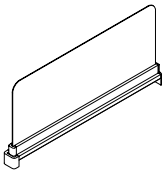

- Trims available
  - Foundation
  - Mica
  - Accent

- Depths: 24" and 30"
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
- Available finishes:
  - Foundation Colors
  - Mica Colors
  - Accent Colors

Smooth Felt Lateral Screen (GNZL)

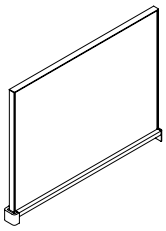

- A felt screen with a curved profile
- Available screen finishes:
  - Strata
  - Pewter
  - Lunar

Metal Lateral Screen (GNML)

- A metal screen with a curved profile

- Depths: 24" and 30"
- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
  - 28" for a 57" datum
- Trim finishes:
  - Foundation
  - Mica
  - Accent

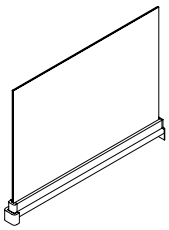

Framed Fabric Lateral Screen (GNYL)

- A framed fabric screen with a square profile
- Select Panel and Upholstery fabrics are available, refer to the *Teknion Textiles Program Guide*

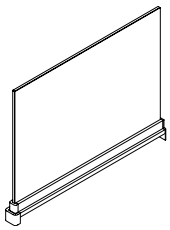

desktop lateral screen basics (continued)

- Heights:
  - 13" for a 42"h datum
  - 22" for a 51"h datum
  - 28" for a 57"h datum
- Depths: 24", 30" and 36"

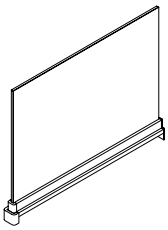

6mm Glass Lateral Screen (GNGL)

- A 6 mm glass screen with a straight profile
- Screen Finish:
  - Clear
  - Frost

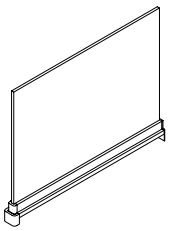

10mm Glass Lateral Screen(GNTL)

- A 10 mm glass screen with a straight profile
- Screen Finish:
  - Clear
  - Frost

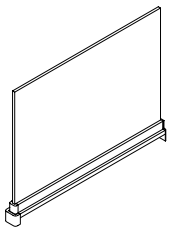

Writable Glass Lateral Screen (GNWL)

- A writable glass screen with a straight profile
- Screen Finish:
  - Specialty Glass Laminate
  - Specialty Glass Grade 7

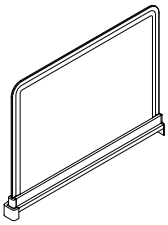

Solid Lateral Screen (GNSL)

- A solid screen with a straight profile
- Screen Finish:
  - Source Laminate
  - Natural Veneer
  - Flintwood

Writable Laminate Lateral Screen (GNLL)

- A writable laminate screen with a square profile
- Screen Finish:
  - Source Laminate
  - Natural Veneer
  - Flintwood

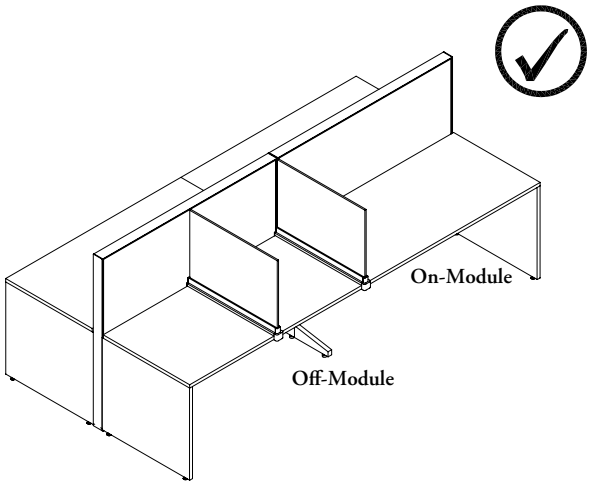

Infinity Lateral Screen (GNXL)

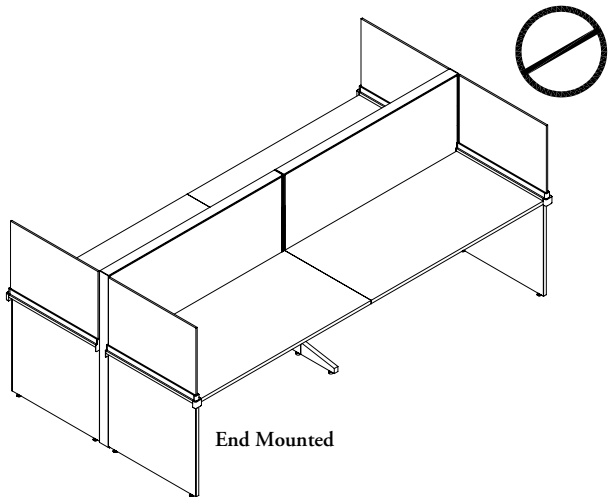

- A fabric screen with a curved profile
- Select Panel and Upholstery fabrics are available, refer to the *Teknion Textiles Program Guide*

planning with desktop lateral screens

The following should be considered when planning with Lateral Screens.

Desktop Lateral Screens can be mounted on- or off-module, anywhere along a worksurface run. They cannot be mounted on the end of a run when end gables are used.

mounted storage & accessories

mounted storage & accessories

shelves & overhead storage basics

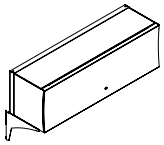

Leverage offers a variety of mounted storage options.

- Mounted storage may be installed in any location along the panel spine when used with panel-mounted worksurfaces with a flush end gable
- Cabinets are available with locks keyed alike to match other storage components or keyed randomly for a dedicated lock
- Overhead cabinets should **not** be hung over glazed elements

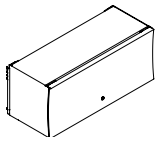

Finishes

Shelves and overhead components are available in Foundation and Mica colors

Overhead Upmount (KSU)

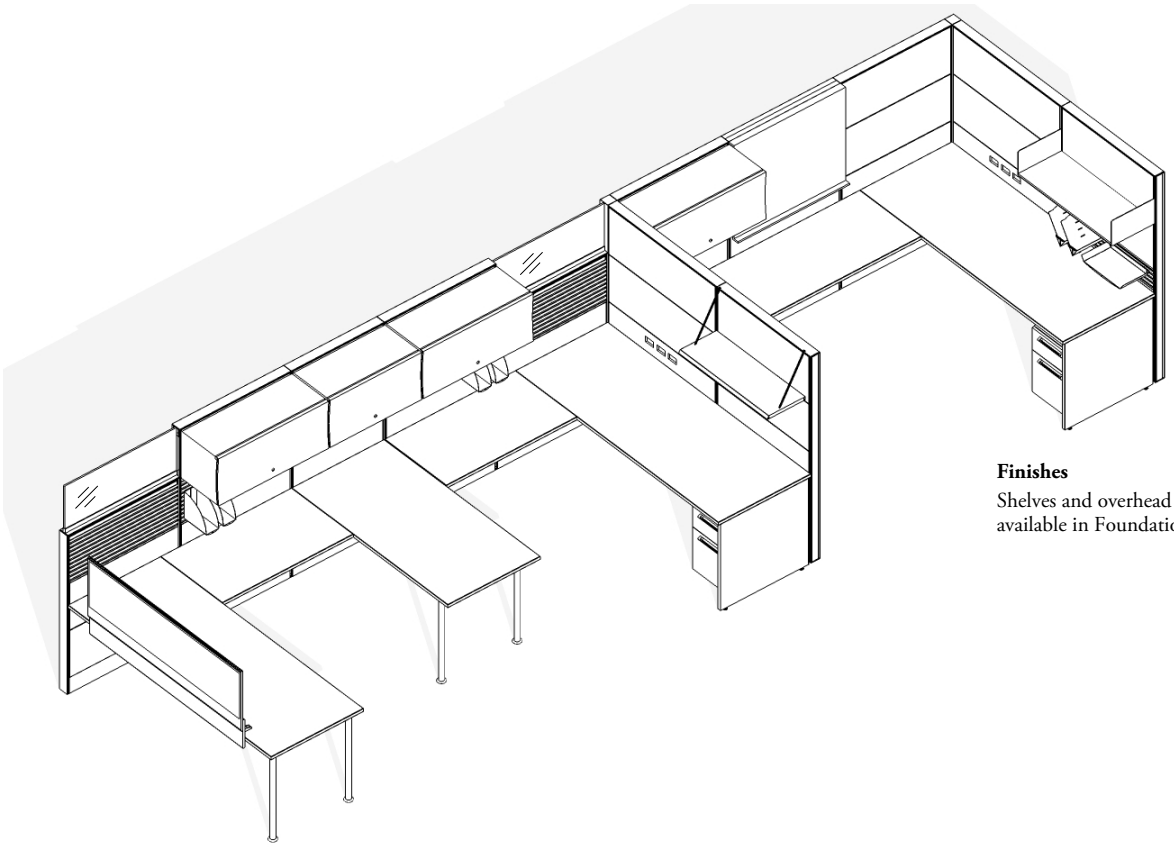

- Is a panel-mounted on-module lockable storage unit for lower height panels with an over the cabins retractable door
- Can be used in single or double sided applications with lay-in wires
- Can be used with Add-On Screens (KPC) to enhance a 51" height work environment
- On-module mounting brackets can only be applied to panels of the same size
- Door with Motion Control Mechanism will be slow closing
- Accepts Shelf Dividers (BK61)

Overhead Cabinet (KSF)

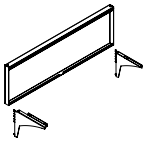

- Is a panel-mounted, on- or off-module lockable storage unit with an over the cabinet retractable door
- When mounting Overhead Cabinet (KSF) on an Panel Add-On (KPOF and KPOW) that is stacked on a panel with high capacity lay-in channel, special brackets may be required. Contact customer service for more information
- Provides storage for both imperial and metric binders
- On-module cabinet can be mounted at any height, however 51" is recommended for accessibility of storage
- Accepts Shelf Dividers (BK61)
- Door with Motion Control Mechanism will be slow closing same size

shelves & overhead storage basics (continued)

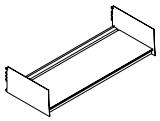

Finishes

Shelves and overhead components are available in Foundation and Mica colors

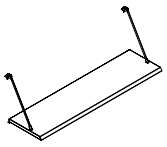

Overhead Upmount Retrofit Kit (KSR)

- Allows an existing Leverage Overhead Cabinet (KSF) to be upmounted on-module on a Leverage panel
- On-module mounting brackets can only be applied to panels of the

Shelves (KSS)

- Provide panel mounted, on-module open storage for both imperial and metric binders
- Can be mounted at any height, however 51" is recommended for accessibility of storage
- Must be applied to same-sized Leverage panels with a Lyft Shelf look
- Can be used with the Panel Add-On (KPOF) and (KPOW)
- Accepts Shelf Dividers (BK61

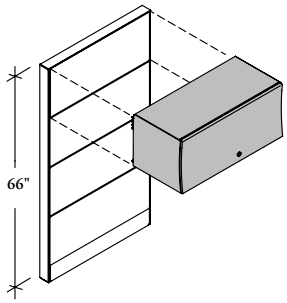

Suspension Shelf (KSSN)

- Provides panel-mounted on semi or off-module suspended storage
- Must be applied on same sized or one size larger Leverage Panel
- Light, open aesthetic
- Can be mounted from the top of the panel only
- Can be mounted on Panel Add-On (KPOF and KPOW)
- Width 24"-48" nominal size, but actual width is 2" shorter

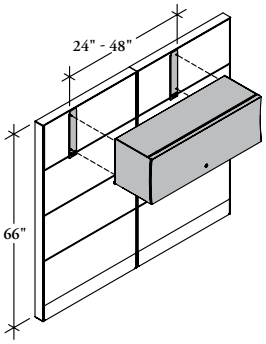

planning with overhead cabinets

The following should be considered when planning with Overhead Cabinets.

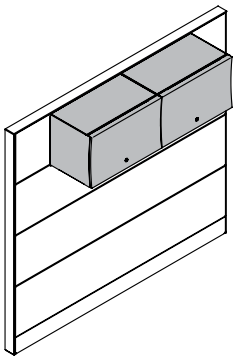

Overhead Cabinet (KSF) can be mounted to the panel on- or off-module.

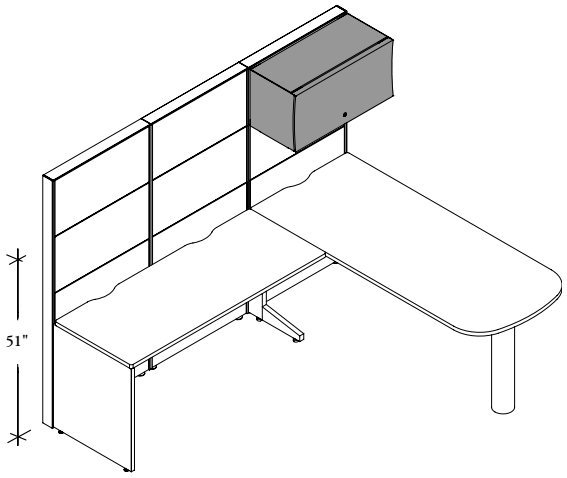

The width of the On-Module Overhead Cabinet (KSF, KSU) must be equal to the width of the panel from which it is suspended

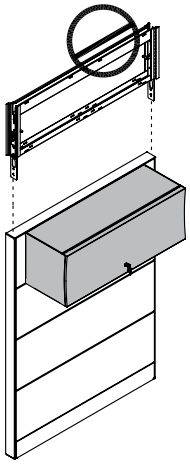

- The Off-Module cabinet requires a rail above and below the cabinet, if a Segmented Panel (KPUC) or Semi-Segmented Panel (KPUS) are **not** specified an additional Panel Rail (KPL) and two 15" elements must be ordered and field installed to support off-module mounting of overheads because they mount into the rail between the elements
- **Cannot** be mounted at a panel-to-panel connector
- Off-module mounting option is available for overhead cabinets with widths from 24" to 48"

- Two off-module cabinets **cannot** be hung on the same panel unless the combined width is less than that of the panel

- The Leverage On-Module Overhead Cabinet (KSF_1) can be mounted at any height but for accessibility of storage above the worksurface, a mounting height of 51" above finished floor is recommended

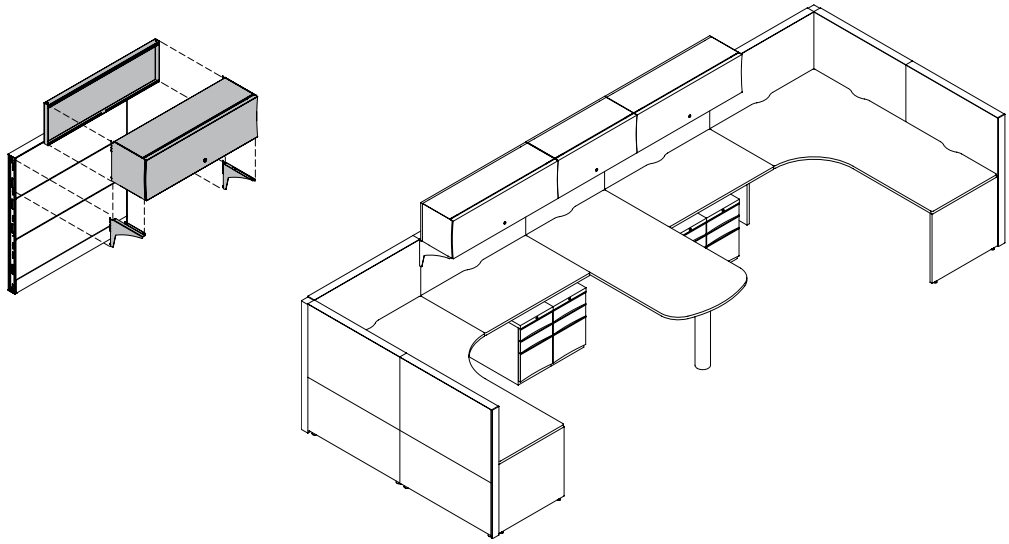

- Add-on panels **cannot** be added to panels with an off-module overhead cabinet
- When mounting an overhead on a Panel Add-On (KPOF and KPOW) that is stacked on a panel with high capacity lay-in channel, special brackets may be required. Contact your Teknion Customer Service Representative

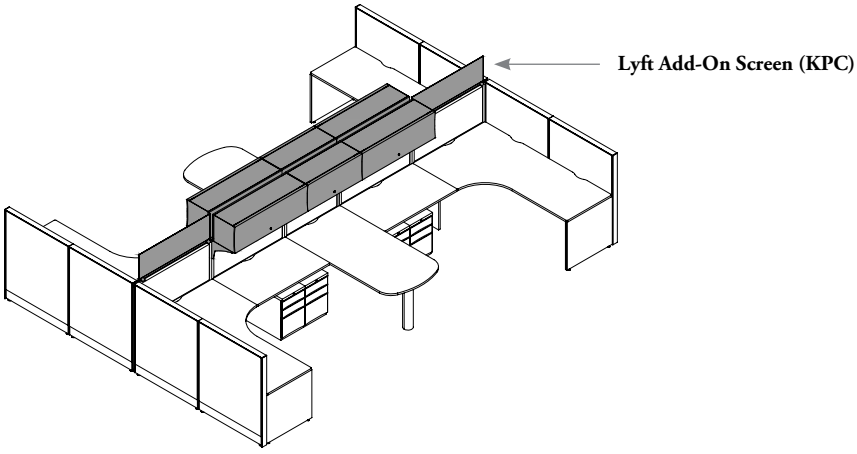

planning with overhead upmount cabinets

The following should be considered when planning with Upmount Cabinets.

In either single-or double-sided applications, Overhead Upmount Cabinets still permit lay-in wires to be accessed and pass by unobstructed.

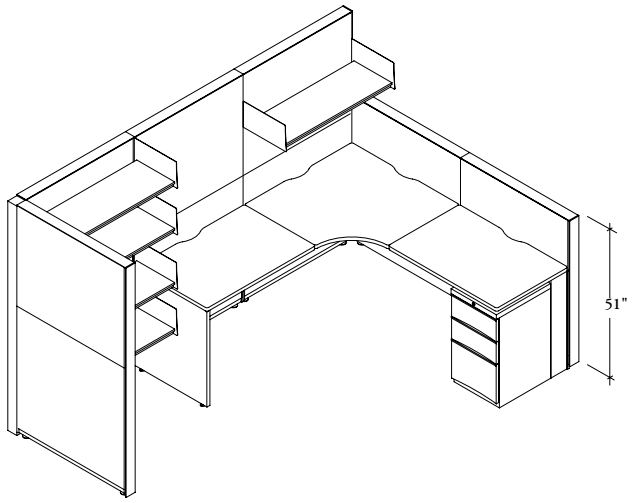

- Retrofit kits are available to convert an Overhead to an Upmount Overhead Cabinet
- Kits include two upmount brackets and a back cover

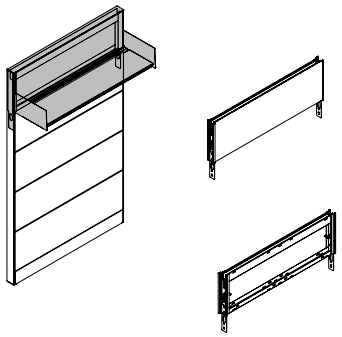

- When used with **Lyft Add-On Screens (KPC)** the functionality of a 51" height work environment can be enhanced

planning with shelves

The following should be considered when planning with Shelves (KSS).

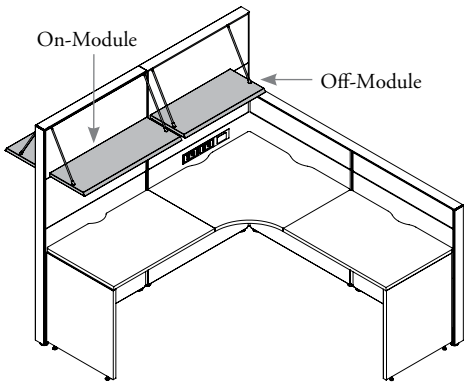

- Can be mounted at any height however, for accessibility of storage above the worksurface, a mounting height of 51" above finished floor is recommended

- The Panel Add-On (KPOF) can be used with the Shelf (KSS)
- All Leverage shelves must be mounted to the panel on-module
- The width of the shelf **must** be equal to the width of the panel from which it is suspended

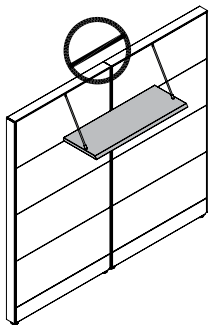

planning with suspension shelves

The following should be considered when planning with Suspension Shelves (KSSN).

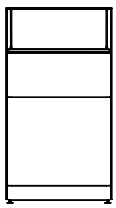

Shelves can be mounted on-module and off-module.

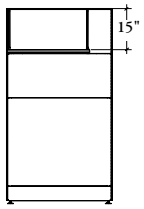

- The shelf always suspends from the panel
- The height is always 15" below the top

- The Suspension Shelf **cannot** be mounted off-module across two panels

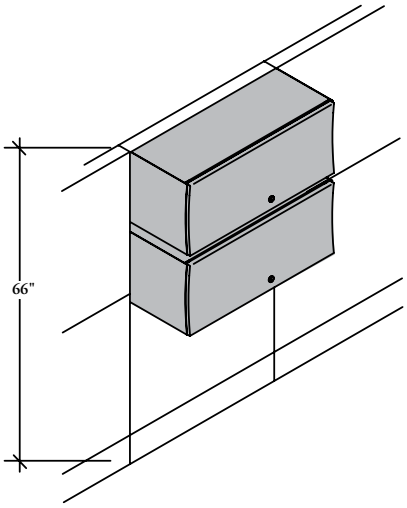

- When mounted on-module can be on 30" high element
- Only one shelf can be mounted per panel

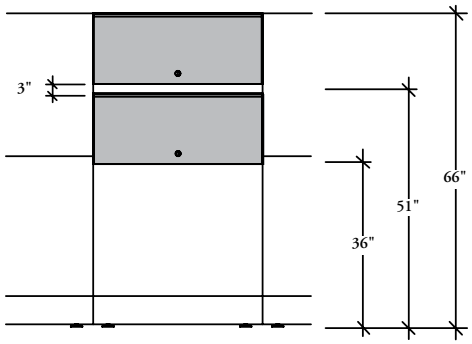

- When the shelf is mounted off-module it must be mounted into a segmented element for support in corner
- Shelves can be the same width or less than the panel that it is mounting onto

storage maximums

Leverage Panels are able to suspend a multitude of storage products for increased efficiency of the work space. The illustrations below demonstrate the functionality of Leverage mounted storage products.

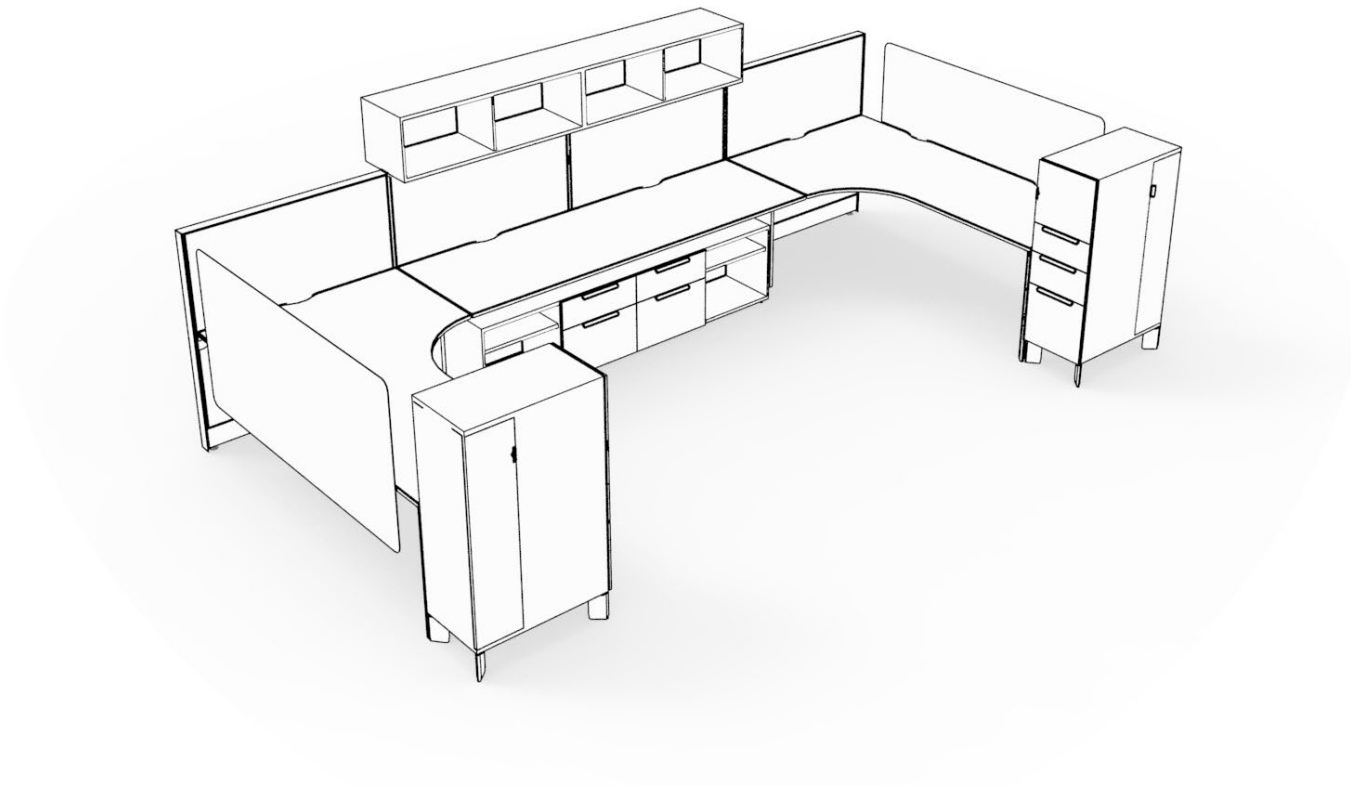

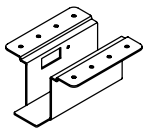

- An Overhead Cabinet (KSF) and Shelf (KSS) provide storage and can be mounted above each other
- Overhead Cabinets (KSF) are mounted to the panel to provide storage for documents including both imperial and metric binders
- The Leverage On-Module Overhead Cabinet (KSF_1) can be mounted at any height
- For accessibility of storage above the worksurface, a mounting height of 51" above finished floor is recommended

integrating district universal storage overheads

District Storage can be integrated with Leverage Panels. The following should be considered when blending the two products.

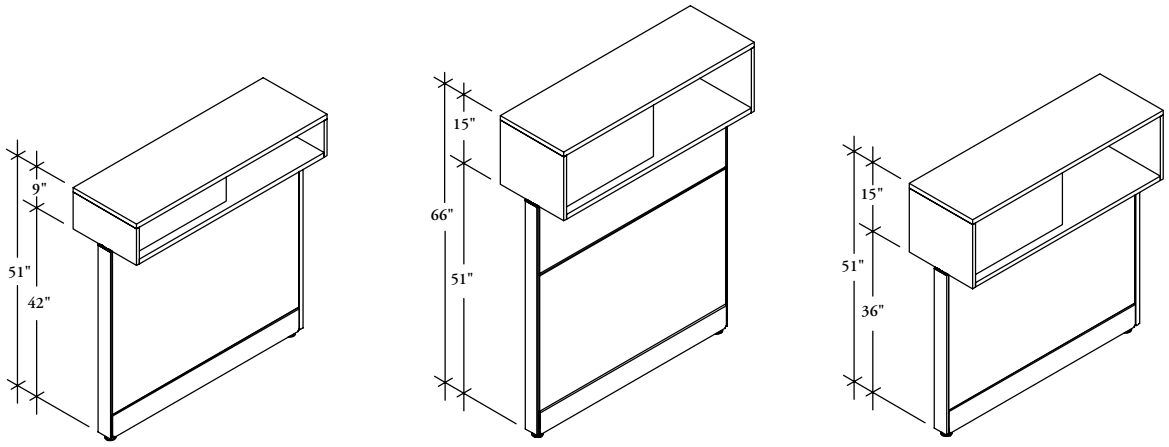

Centermount Storage Bracket (KUOHC)

- Attaches District Centermount Overhead Cabinet to Leverage Panels
- Mounts to the top trim and to the base of the centermount cabinet
- 1 Kit contains 2 brackets:

  24"-42" wide overheads = 1 kit (2 brackets)
  48"-96" wide overheads = 2 kits (2 x 2 brackets)

planning with district overhead cabinets on leverage

centermount cabinets

• Centermount cabinets are available 9" and 15" high, so that when they are mounted to Leverage Panels, they match standard Teknion datum heights

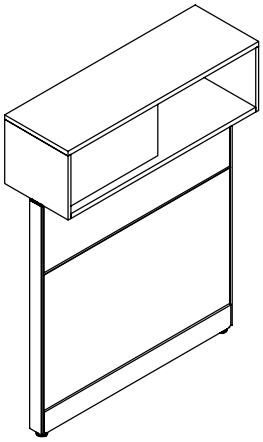

• Centermount cabinets **cannot** mount onto 30" high panels, because the mounting bracket which mounts to the top trim will **not** fit onto this height due to the construction of the panel

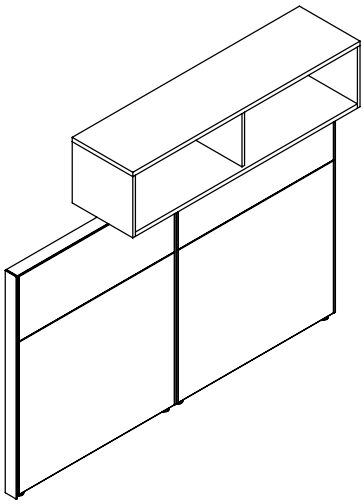

• They also **cannot** mount to 42" high panels

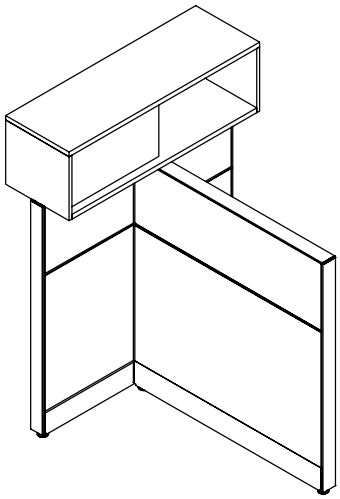

• The maximum height for a centermount cabinet is 66" high

• Cabinets **cannot** be mounted above a 66" high panel to reach a datum height of 81"

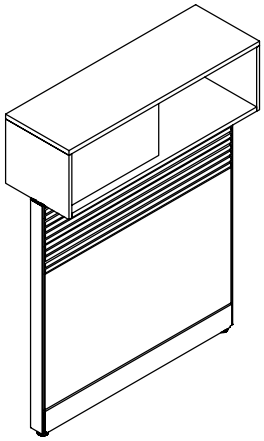

planning with district overhead cabinets on leverage (continued)

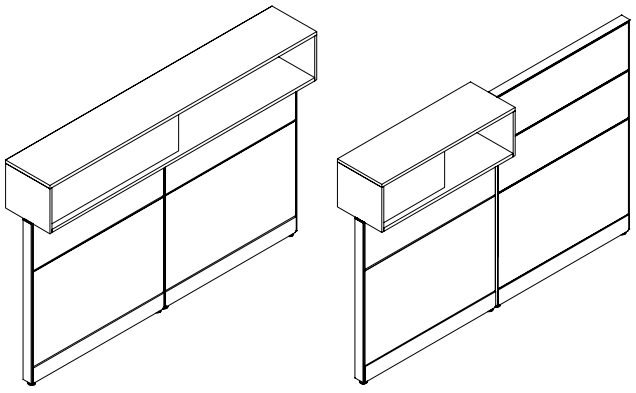

- Centermount overheads can be mounted at Two-Way, Three-Way and Four-Way Connections
- Can be mounted on- or off-module. Off-module mount is limited to Panels with Lay-in Channels. When mounted off-module one end of the Centermount overhead needs affix with one end of the panel
- 120˚ connections are **not** possible

- Centermount overheads can mount over Fabric, Metal, Wood, and Accessory Rail Elements, but **not** over Glass Elements

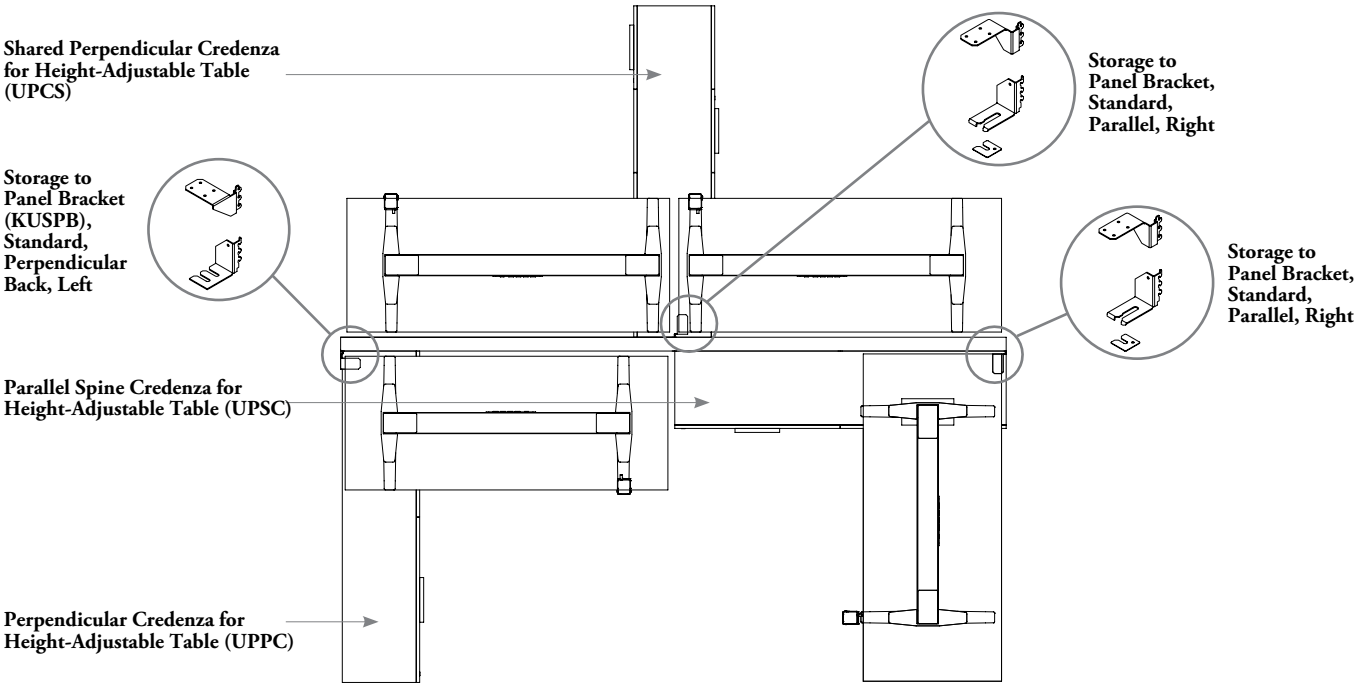

- A single centermounted overhead can span over two smaller panels and can be on a panel run with panels at different heights
- The Intermediate Trim will **not** fit, so must be left off

integrating district credenzas with height-adjustable tables

District Credenzas for Height-Adjustable Tables can be integrated with Leverage Panels. The following should be considered when blending the two products.

credenzas for height adjustable tables and storage to panel brackets

• All District Credenzas for Height Adjustable Tables attach to Leverage panels with either parallel, perpendicular front or perpendicular back brackets

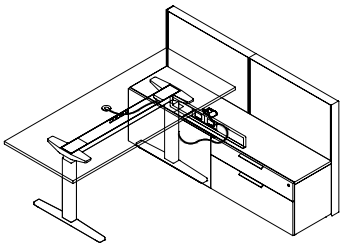

For more information, see *planning with storage-to-panel brackets for district storage integration*.

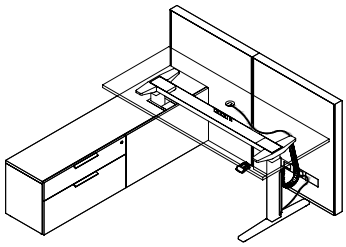

credenzas for height adjustable tables and electrics

• The following should be considered when planning electrical with District credenzas for height adjustable tables

• Parallel and perpendicular credenza planning will affect the location of a cut out for power access

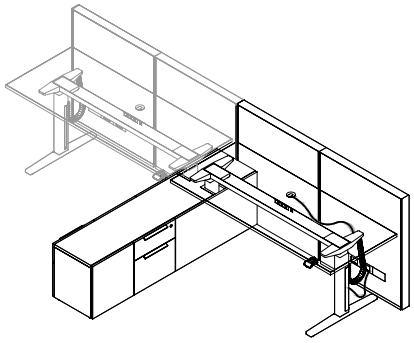

• Parallel Spine Credenzas for Height-Adjustable Tables (UPSC) are the only credenzas for height-adjustable tables that can be specified with a cut out in the back

• Perpendicular Credenzas for Height-Adjustable Tables (UPPC) do not have the option for specifying a cut out

• Wire will be routed through the grommet to Vertical Wire Carrier (YEEE) which must be specified separately

• Vertical Wire Carrier (YEEE) will mount to the leg that is not in the credenza

• Shared Perpendicular Credenzas for Height-Adjustable Tables (UPCS) do not have the option of specifying a cut out

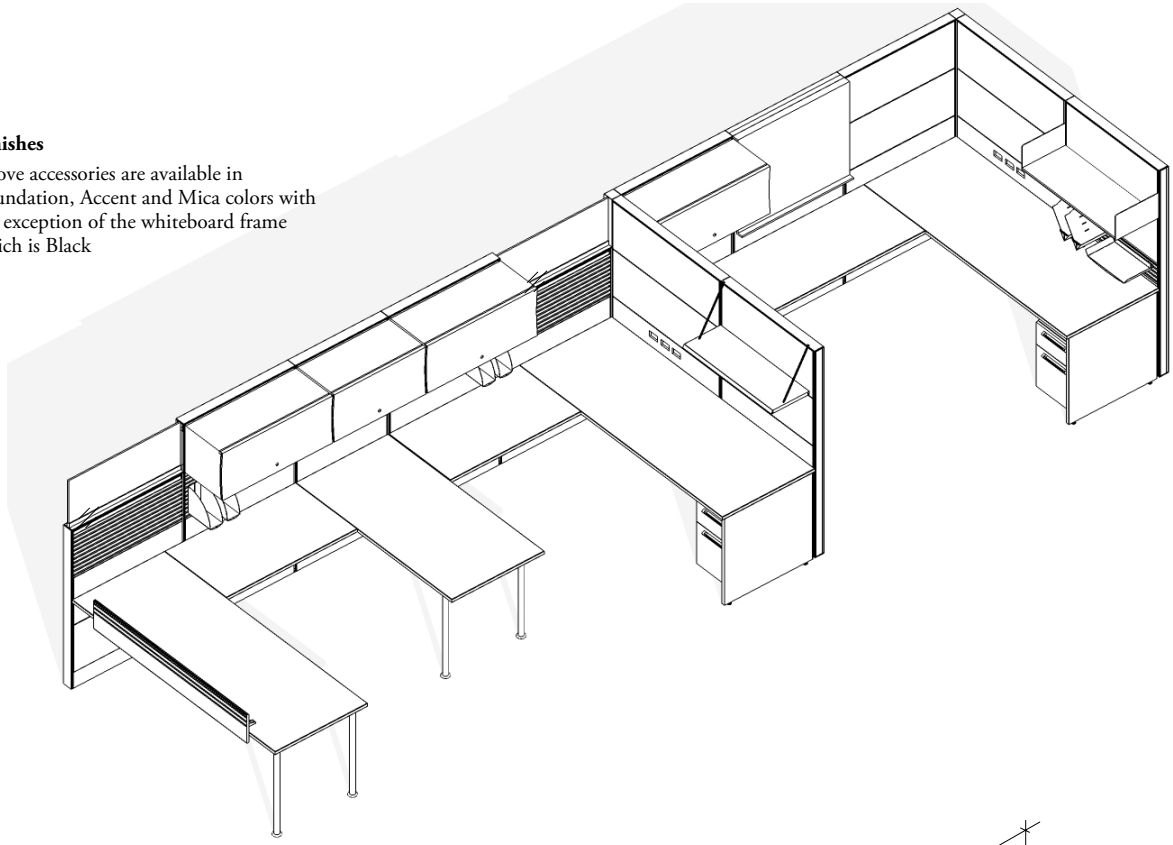

• Wires will be routed through the grommet to the Vertical Wire Carrier and then directly to the power box in the panel

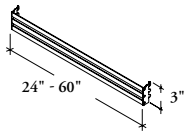

accessory & screen basics

Leverage offers a variety of accessories that can be hung on-module inside or outside a workstation to facilitate organization of the workstation.

Finishes

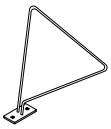

Above accessories are available in Foundation, Accent and Mica colors with the exception of the whiteboard frame which is Black

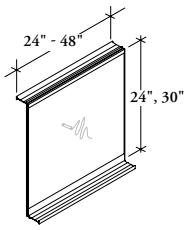

Accessory Rail (KMA)

- Supports Personal Organizers (PAX)
- Can only be attached on-module into the hingeway on a fabric covered element
- Must match the width of the panel
- Two rails are required for binder bins (PAX95). Up to three accessory rails can be attached over a single 15" or 30" high fabric element
- If the rail is supporting the Binder Bin (PAX), Vertical Organizer, Letter/A4 (PAX99) or Legal (PAX100), it should be mounted at a height sufficient to provide clearance between the Vertical Organizer (PAX99/PAX100) and the worksurface
- **Cannot** be attached at the same level when coming together in a corner situation
- Along with lighting wire, management clips **cannot** be attached in the same hingeway

Shelf Divider (BK61)

- Separates books, paper, binders and other items on the Overhead Cabinet (KSF) or Shelf (KSS)
- Slips into the rail at the back of the overhead cabinet (KSF) or shelf (KSS) and can be positioned anywhere along its length

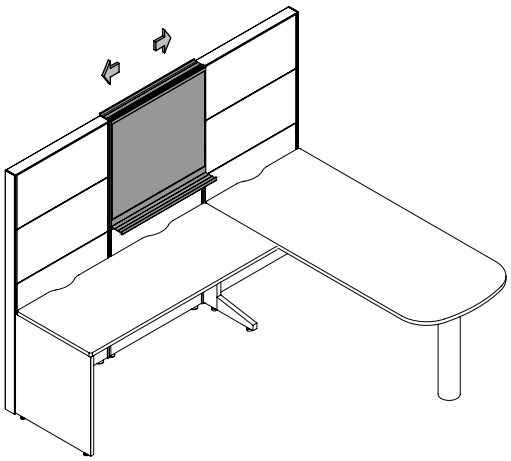

Hang-On Whiteboard (KMW)

- Is reversible erasable message board with a marker tray
- Mounts on-or off-module to the top of any panel
- **Cannot** be applied to a panel where an Overhead Cabinet (KSF) is located on the opposite side of the panel

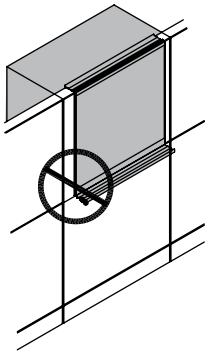

planning with hang-on whiteboard

The following should be considered when planning with the Hang-On Whiteboard (KMW).

Hang-On Whiteboard (KMW)

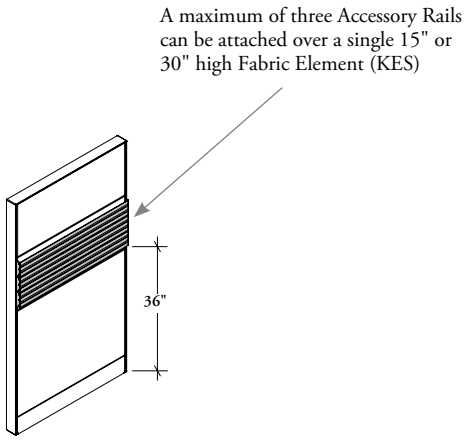

- Can be mounted on- or off-module
- Portable so allows for it to be moved around the work space

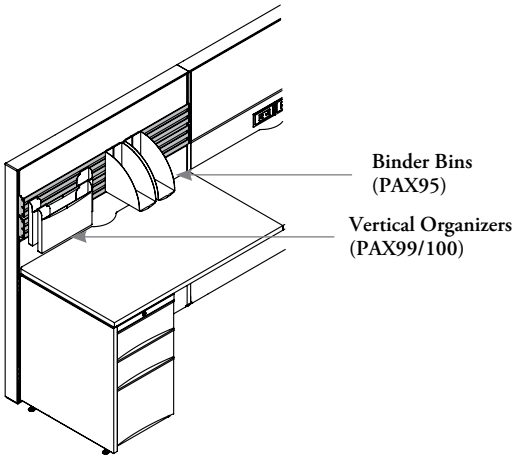

- **Cannot** be applied to a panel where an Overhead Cabinet (KSF) is located on the opposite side of the panel

planning with accessory rails

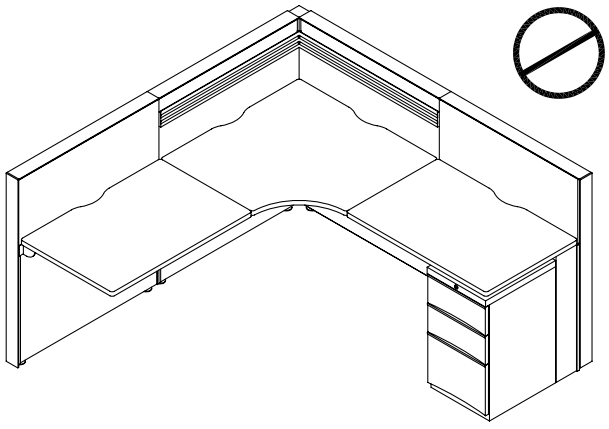

The following should be considered when planning with the Accessory Rail (KMA).

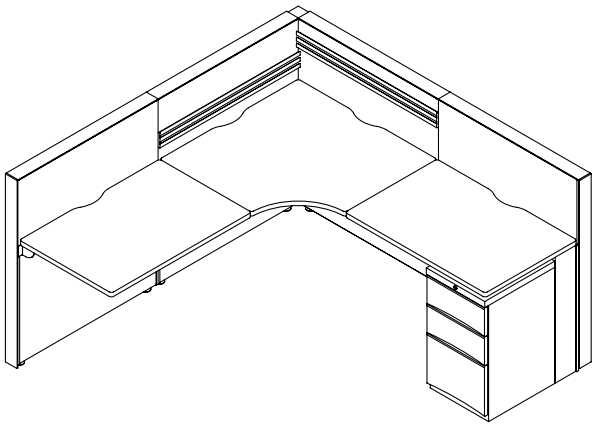

- Must be used on-module
- Width must match the width of the panel

- When the Accessory Rail supports Binder Bins (PAX95) and Vertical Organizers (PAX99/PAX100), two Accessory Rails are necessary to provide adequate support

- Accessory Rail **cannot** be used at the same level where two panels meet at a 90˚ corner, however, it can be used in a corner situation when the mounting heights are offset

freestanding storage & accessories

freestanding storage & accessories

FREESTANDING PEDESTAL BASICS 206

STRETCH PEDESTAL BASICS 208

PLANNING WITH STRETCH PEDESTALS 209

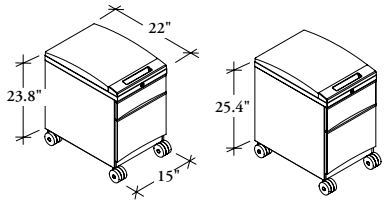

freestanding pedestal basics

The Leverage Pedestal (KDN) and Mobile Pedestals (KDSN and KDWN) provide storage below the worksurface.

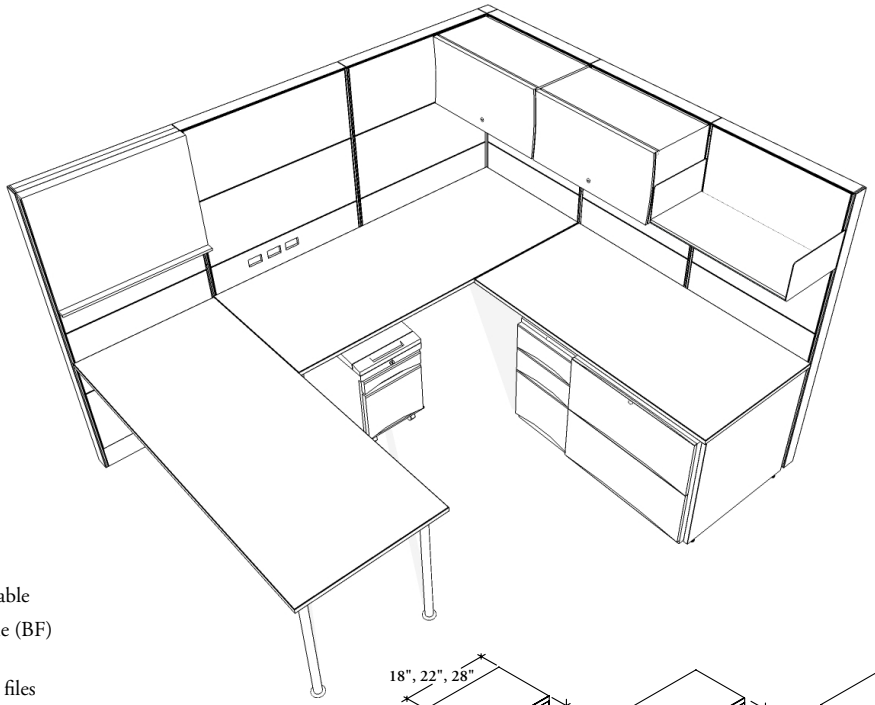

- The Pedestal (KDN) is dimensionally compatible with consistent horizontal lines
- Pedestals are made of steel construction with levelers at the base for adjustability in the field
- Pedestals are available with locks keyed alike to match other storage components or keyed randomly for a dedicated lock
- Counterweights are required for all pedestals with or without casters, with the exception of 27.2" high pedestals (BBF, LF) permanently situated under a worksurface
- Mobile Pedestals are available with two balance options
  - Four casters and a counterweight
  - Five casters with no counterweight
- All configurations of Pedestal (KDN) on casters fit under the regular 29" high worksurface, with no obstructions underneath

Finishes

- The handle on the Mobile Pedestal with Seat is Black
- Casters are Grey and Counterweights are Black
- Locks have a brushed chrome finish
- All accessories are Black

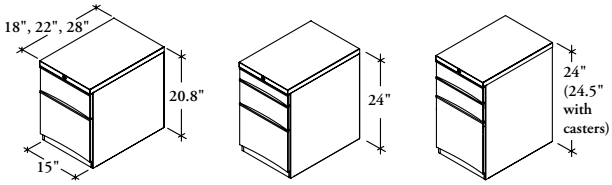

Small Box, File | Box, File

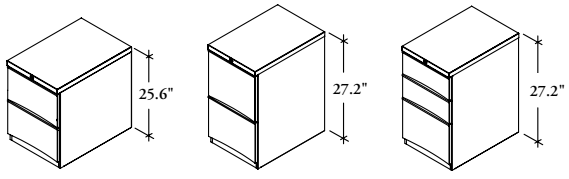

Mobile Pedestal with Seat (KDSN)

- Provides temporary casual seating within a workstation
- Fits beneath a standard height workstation or table
- Available in a Small Box, File (SF) and Box, File (BF) configurations
- Can accommodate imperial-size or A4 hanging files
- The two back casters are lockable
- Requires a yard of fabric to upholster the seat
- Drawer interiors extend the full interior depth of the pedestal except for 28" deep Box (B), Small Box (S) and Pencil Box (P). For these drawer sizes the interior drawer depth is actually 22"

Box, File | Pencil Box, File | Small Box, Small Box, File

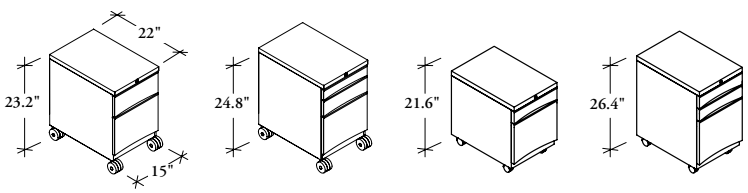

File, File | Large File, File | Box, Box, File

also available

Mobile Pedestal (KDWN)

- Drawer interiors extend the full interior depth of the pedestal except for 28" deep Box (B), Small Box (S) and Pencil Box (P). For these drawer sizes the interior drawer depth is actually 22"

Box, File | Pencil, Small Box, File | Small Box, File | Small Box, Small Box, File

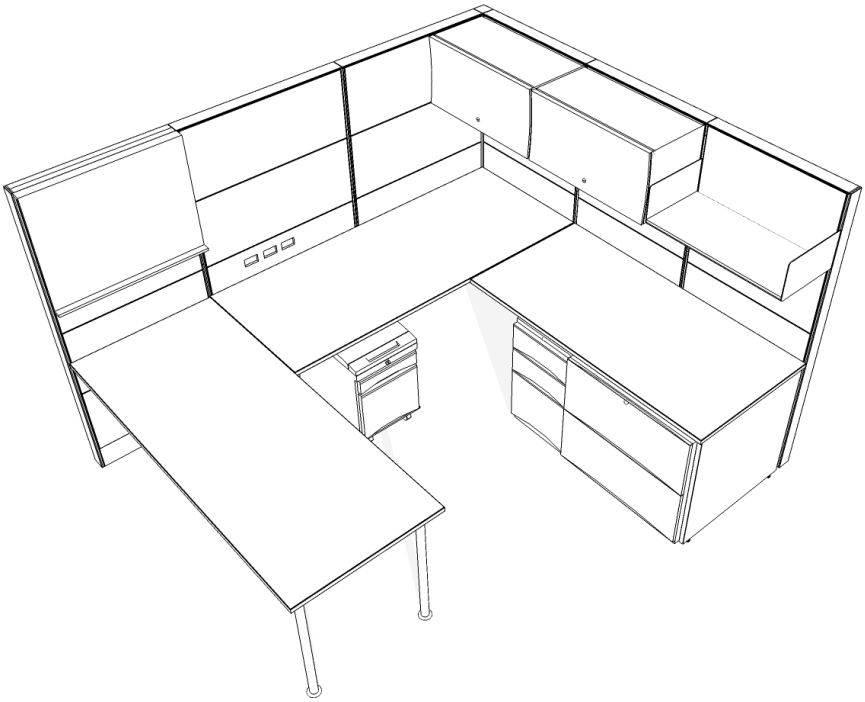

Pedestal (KDN)

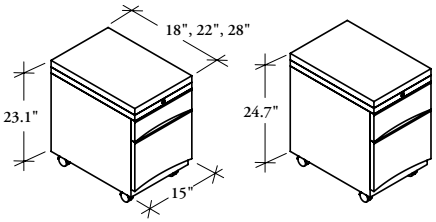

- Is available in six drawer configurations
- **Cannot** be suspended from a worksurface
- Can accommodate imperial or letter-size hanging files using conversion rails
- May be specified to support a worksurface when Box, Box, File (BBF) or Large File, File (LF) drawer configurations are chosen
- Drawer interiors extend the full interior depth of the pedestal except for 28" deep Box (B) and Pencil Box (P). For these drawer sizes the interior drawer depth is actually 22"

freestanding pedestal basics (continued)

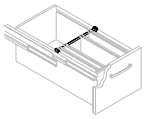

The Leverage Mobile Pedestal with Cushion (KDCN) integrates a sleek style, low profile seat cushion.

- Pedestal Accessories (DA) are included with the Pedestals for better space optimization and enhanced drawer organization
- Pedestals are made of steel construction with levelers at the base for adjustability in the field
- Pedestals are available with locks keyed alike to match other storage components or keyed randomly for a dedicated lock
- Pedestals are available with two balance options
  - Four casters and a counterweight
  - Five casters with no counterweight

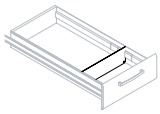

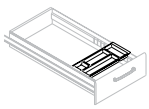

Small Box, File **Box, File**

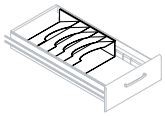

Hanging File Bar (DAB)

Drawer Dividers (DAS)

Pencil Tray (DAT)

Stationary Insert (DAK)

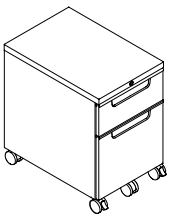

Mobile Pedestal with Cushion (KDCN)

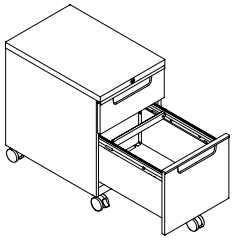

- Has a low profile flat seat cushion
- Provides temporary casual seating within a workstation
- Fits beneath a standard height workstation or table
- Available in a Small Box, File (SF), Box, File (BF), Small Box, File with Five Casters (VSF) and Box, File with Five Casters (VBF) configurations
- Can accommodate imperial-size or A4 hanging files
- The two back casters are lockable
- Requires a yard of fabric to upholster the seat

Pedestal Accessories (DA)

Are included with the pedestal and mobile pedestal as noted on the product page; additional accessories may be ordered separately as necessary

Example of five caster application.

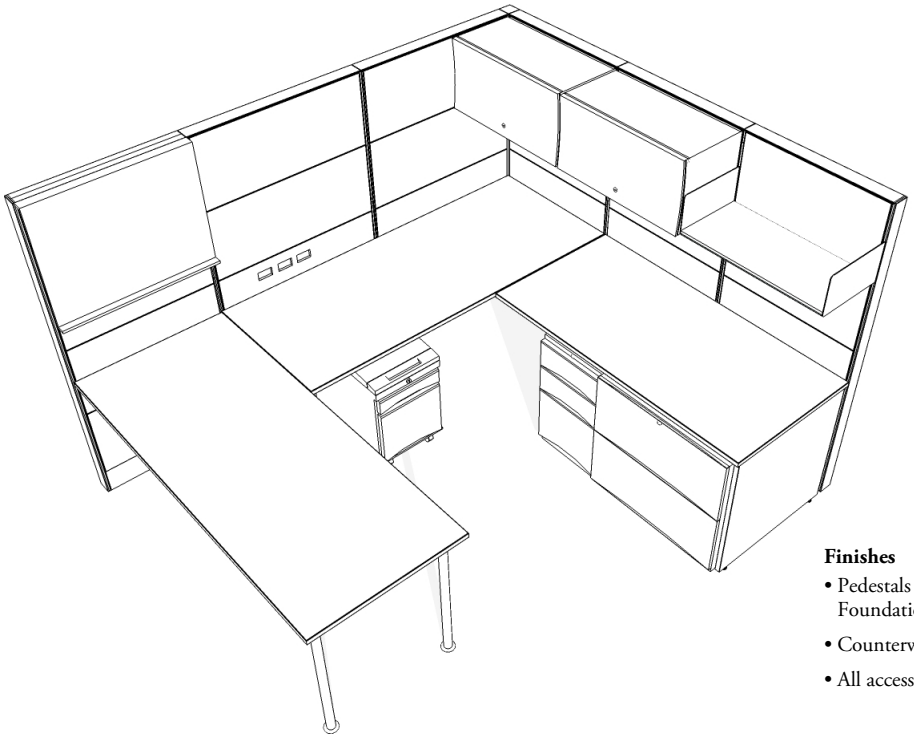

stretch pedestal basics

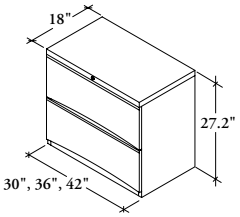

The Leverage Stretch Pedestal (KDEN) provides storage below the worksurface.

- The Stretch Pedestal is dimensionally compatible with consistent horizontal lines
- Stretch Pedestals are made of steel construction with levelers at the base for adjustability in the field
- Stretch Pedestals are available with locks keyed alike to match other storage components or keyed randomly for a dedicated lock
- Counterweights are required for all Stretch Pedestals not located under a worksurface

Finishes

- Pedestals are available in Foundation and Mica colors
- Counterweights are Black
- All accessories are Black

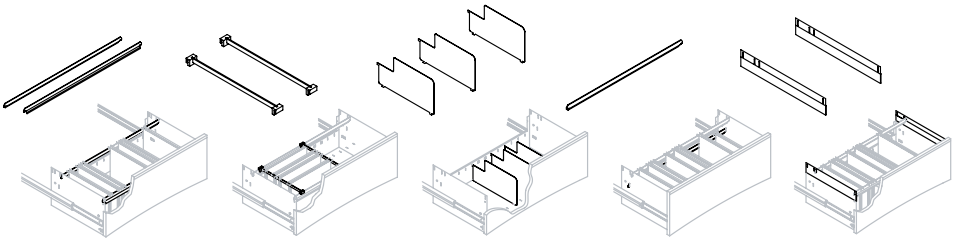

Stretch Pedestal (KDEN)

- **Cannot** be suspended from a worksurface
- Can accommodate imperial and metric size documents
- Width should be less than the dimension between worksurface supports of the worksurface it is below

Stretch Pedestal Accessories (FA)

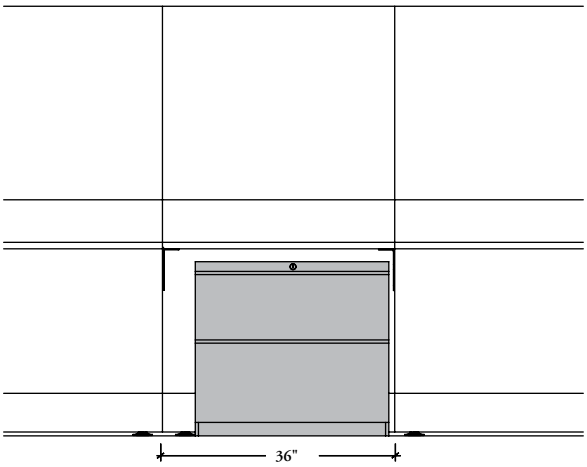

Are included with the pedestal and mobile pedestal as noted on the product page; additional accessories may be ordered separately as necessary.

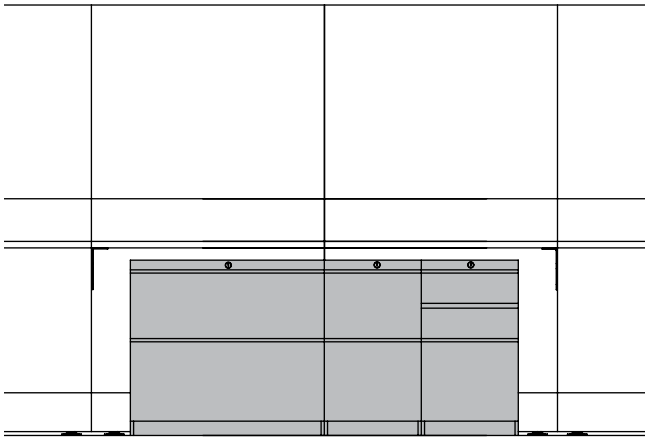

Hanging File Bars (FA01) | **Cross File Bars (FA07)** | **Divider Plates (10)** | **Legal-to-Letter Adapter (FA11)** | **EDP Adapters (FA20)**

planning with stretch pedestals

The following should be considered when planning with the Stretch Pedestal (KDEN).

- The Stretch Pedestal (KDEN) is dimensioned to fit beneath the worksurface for lateral storage
- It can be placed anywhere below the worksurface, and is not dependent on panel widths for placement
- The width of the Stretch Pedestal should be less than the dimension between worksurface supports of the worksurface it is below

- The Pedestal (KDN) and Stretch Pedestal (KDEN) are dimensionally compatible with consistent horizontal lines

electrics & communications overview

Leverage offers a non-directional wiring system that allows for maximum flexibility and simple reconfiguration.

Power must be turned off during all installations and reconfigurations

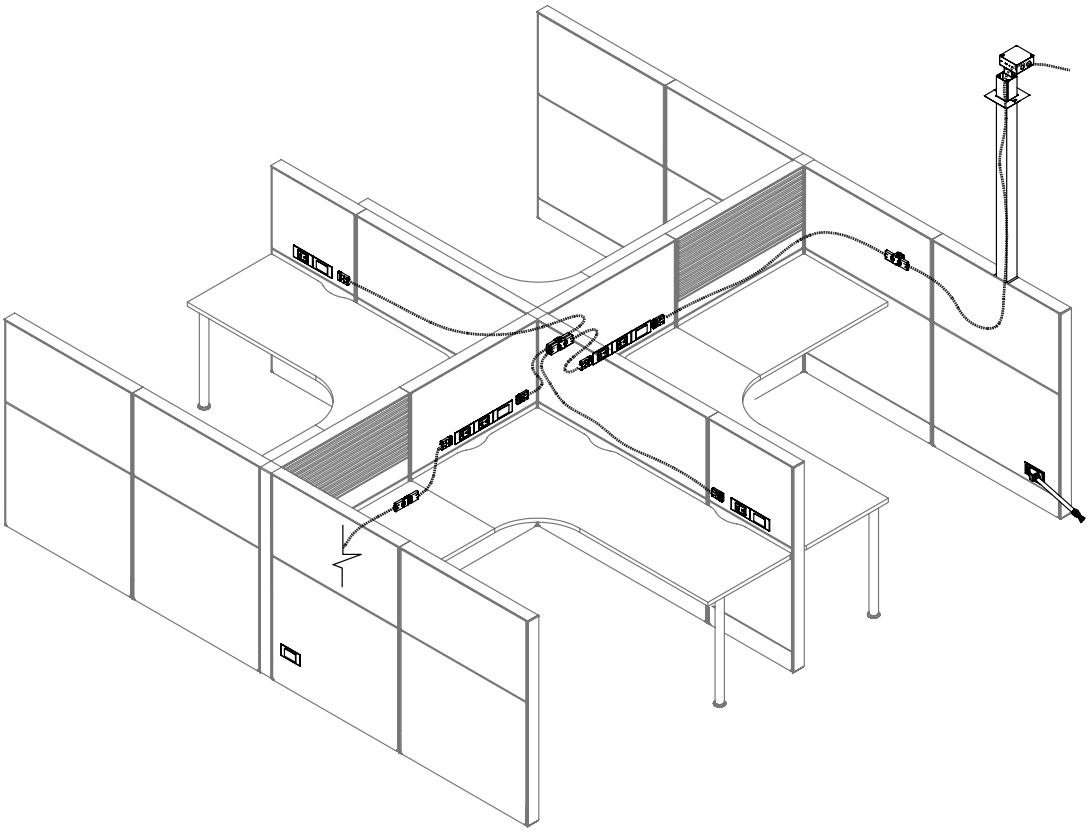

1. Power Box, Double Length (EKQPD) and Chicago Power Box Double Length, One-Sided (EKQPCHDA) or Double Length, Back-to-Back (EKQPCHDB)
2. Ceiling Feed (EKCF) and Chicago Ceiling Feed (EKCFCH)
3. Power Pole (ECPQ) and End of Run (ECPQR)
4. Base Feed (EKBF), Split Base Feed (EKBFS) and Chicago Base Feed (EKBFCH)
5. Power Box, Single Length (EKQPS)
6. Chicago Power Box, Single Length (EKQPCHSA) or Chicago Power Box, Single Length Back-to-Back (EKQPCHSB)
7. Data Extender Plate (EKDE)
8. Receptacle (EKRO) (Not required for Chicago Electrics)
9. Power Harness (EKBH)
10. Communications Base Feed (EBFQC)
11. Compatibility Power Harness (EKCMP)
12. Outlet Cover Cap (EDCC) (Not Showing)
13. Power Bezel (EKZP)
14. Communication Bezel (ERZC)
15. Distribution Block (EKDB)

power pole basics

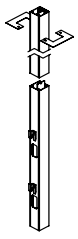

Power and communications cables enter a workstation either through a base feed or a ceiling feed. The options are detailed below.

All connections to the building power source must be executed by a qualified electrician.

Power Pole (ECPQ)

End of Run Power Pole (ECPQR)

Power Pole (ECPQ) and End of Run Power Pole (ECPQR)

- Routes power and communication cables to the top of the panel
- Includes a built in divider to separate power and communications cables
- When planning with 120˚ panel connections, the off module or end of run mounting option must be specified
- Off-module power pole should be mounted above the location of one of two holes at the top of the panel frame to facilitate the vertical run down the panel for the ceiling feed
- Available in three heights and may be cut on site to accommodate various ceiling heights
- Power Pole **cannot** be used with Thick Top Trim (KTKT)
- In a corner application, the Power Pole **cannot** be mounted to a 9" high Panel Add-On

Chicago Ceiling Feed (EKCFCH)

- Same as Ceiling Feed (EKCF), except that there is no connector on the bottom end due to Chicago Electrics wiring restrictions
- Supplied with 3 wires for a single circuit only, additional wiring must be supplied by a licensed electrician

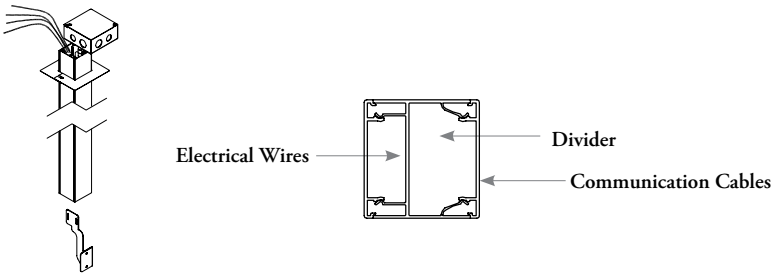

Ceiling Feed (EKCF)

- Routes power into the panel from the ceiling through the Power Pole (ECPQ)
- Includes a junction box to connect to the building power supply at the ceiling
- Connects to a power harness (EKBH)
- Length of the feed represents the length of the harness encased in flexible conduit. An additional 6" of wire outside of the flexible conduit is provided for connection to the ceiling junction box
- Available in 8T, 7T, 8K and 7K wiring options to allow for most common Teknion wiring configurations

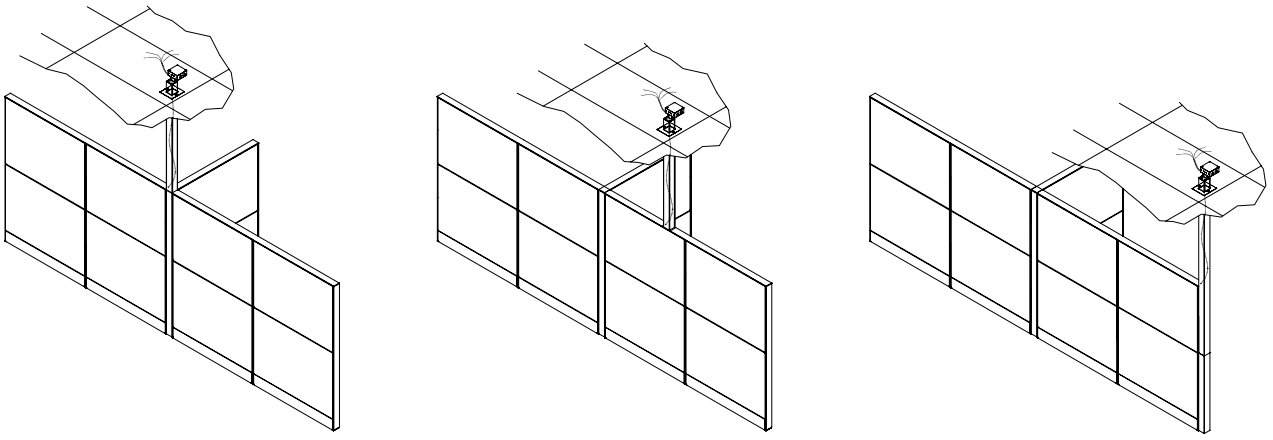

power entry from ceiling

For a workstation to provide electrical power, the building's power must be brought to the workstation cluster and then distributed. The following should be taken into consideration when planning power entry.

power pole

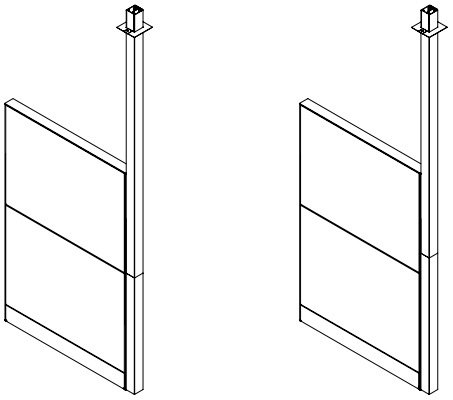

- The Power Pole is the channel through which building power is brought to a workstation cluster from the ceiling. The Power Pole can be field cut to specific heights. The Ceiling Feed (EKFQ) is the actual conduit that brings electrical power to the workstation, it is specified separately
- Both electrics and communications can be fed through the Power Pole as it provides a built-in divider for separation of electrical wires and communications cables

- The Power Pole can be attached on-module in a corner (will not work in change-of-height conditions), off-module at the location of one of the holes in the top of the panel frame, or in an end of run application

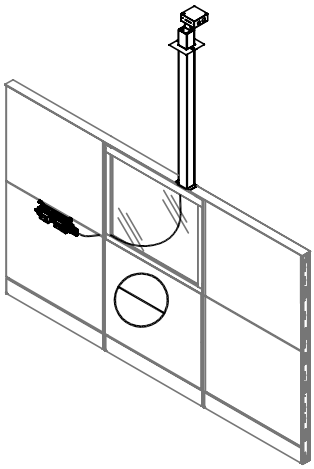

power entry from ceiling (continued)

end of run power pole

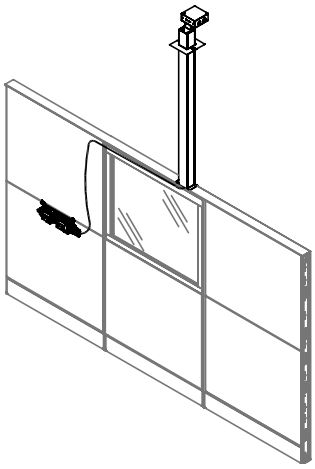

- Is typically used when no corner location is available for the Power Pole
- Available in two heights, 30" high for 30" high Panel Walls or where only below worksurface panel entry for Power Harness is required and 42" high for Panel Walls 42" or higher, entry for Power Harness can be either above or below the worksurface
- When specifying the End of Run Power Pole, the additional Power Pole height-to-ceiling must be specified

ceiling feed

The Ceiling Feed **cannot** be routed vertically through a glazed element.

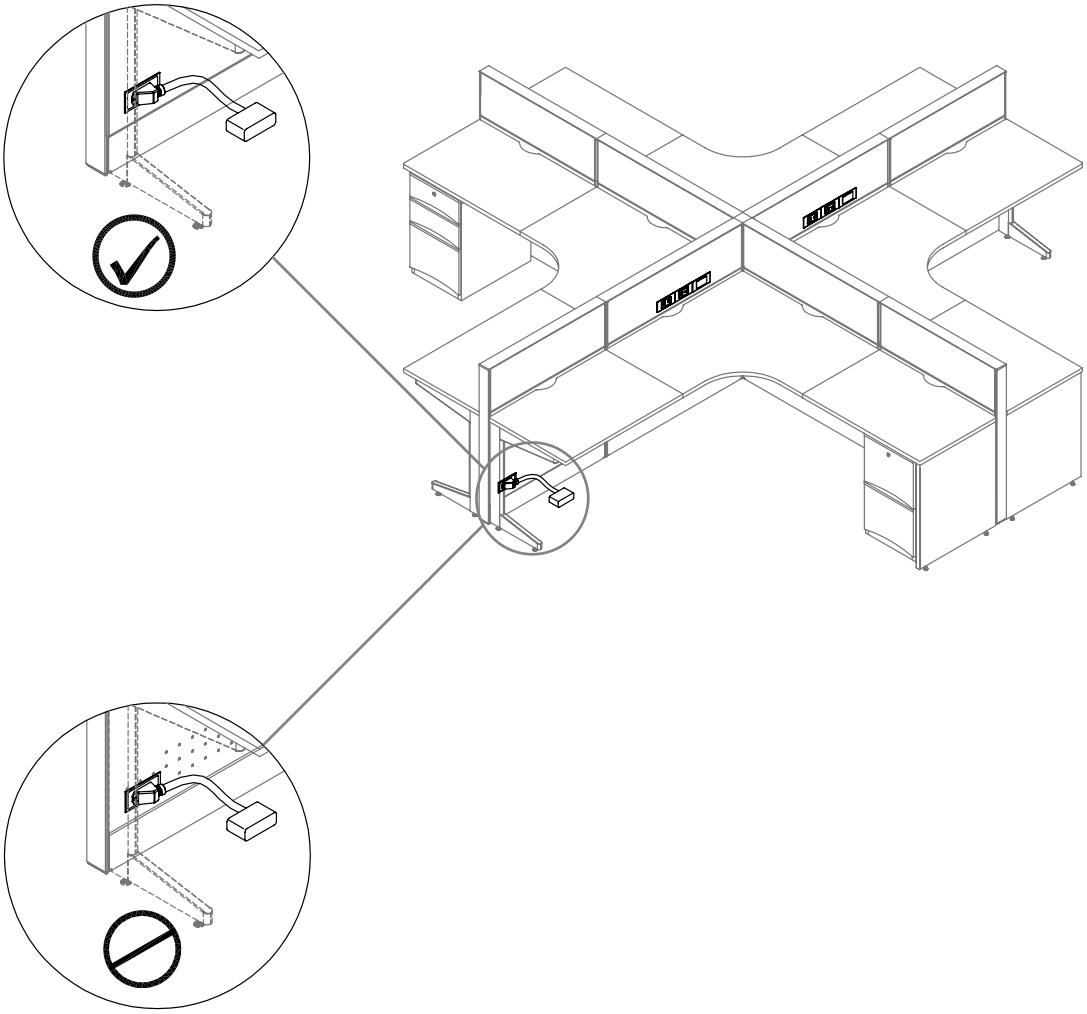

Must be routed from the ceiling feed and through the Leverage's lay-in trough, then down through the interior of the panel.

power entry from ceiling (continued)

base feed

Installation requires a hole to be cut on site at the base of the standard element and the mounting plate to be attached to the backside of the element. The base feed must be installed either left or right justified of the standard element. The base feed will be on a slight angle when mounted to elevated panels.

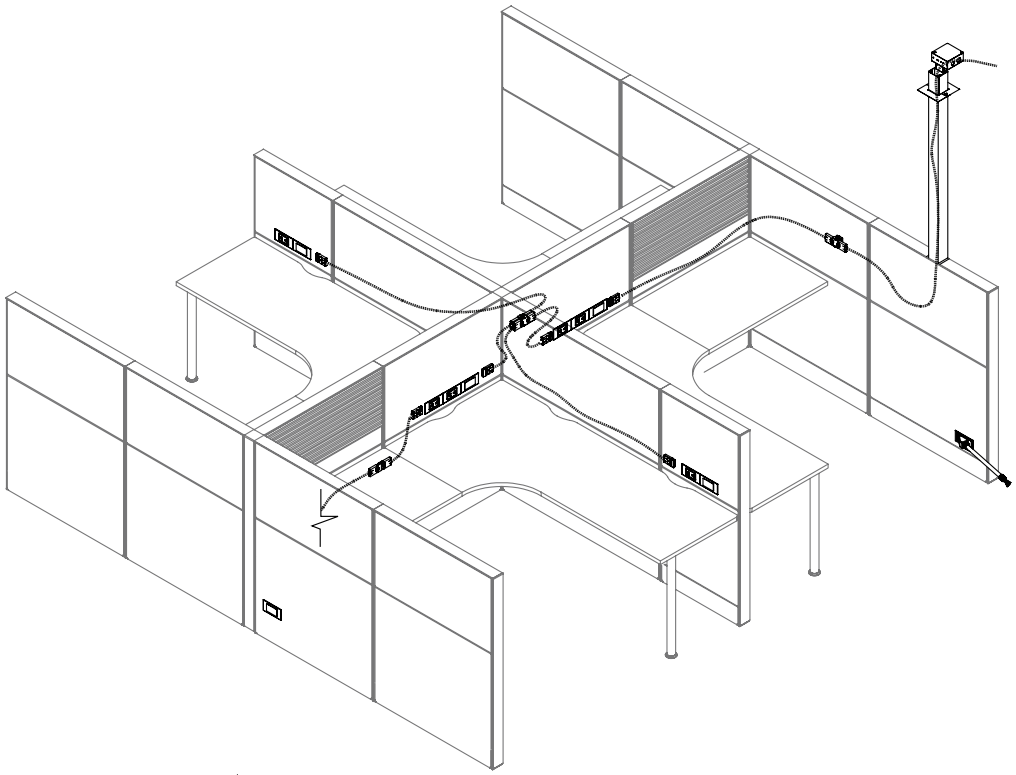

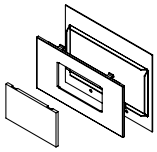

Cannot be utilized with an architectural element

base feed basics

Power and communications cables enter a workstation either through a base feed or a ceiling feed. The options are detailed below.

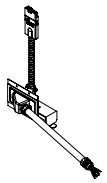

All connections to the building power source must be executed by a qualified electrician.

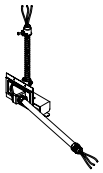

Communications Base feed (EBFQC)

- Offers a means to feed communication cables into the panels via the base
- Lowest panel element must be field cut to accept the communications base feed kit and can be mounted left or right justified
- In a 24", 30" or 36" wide panel with power/communications opening at the base level, the base feed can only be installed in one corner of the power/communication element furthest from the outlet because of space restriction

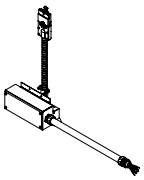

Base Feed (EKBF)

- A hard wired connection that supplies power into a panel from the building power source
- Both base feeds and harnesses can be used in the same panel
- Available in 8T, 7T, 8K and 7K wiring options to allow for most common Teknion wiring configurations

Chicago Base Feed (EKBFCH)

- Provides the conduit only for Chicago Electrics wiring restrictions that require all wiring and connections be supplied and connected by a licensed electrician
- Supplied with 3 wires for a single circuit only, additional wiring must be supplied by a licensed electrician

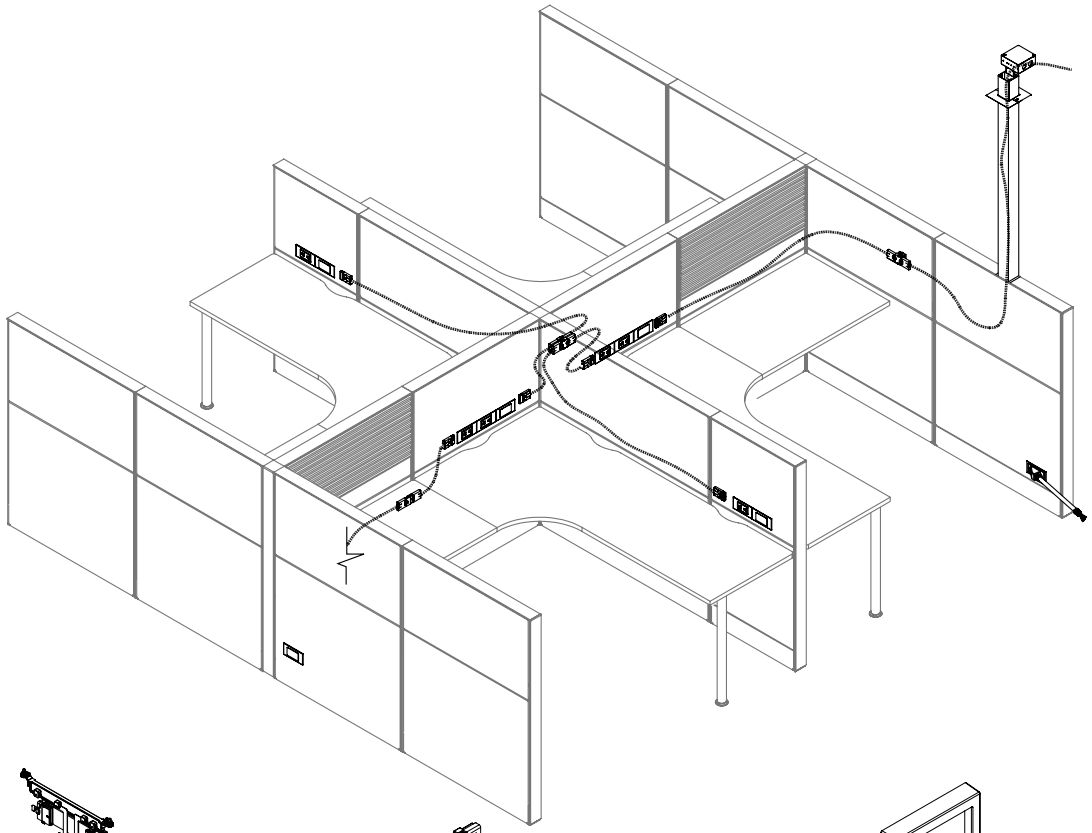

Split Base Feed (EKBFS)

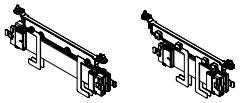

- Same as Base Feed (EKBF) except that it is hard wired to the building power supply in two places
- Accommodates hard wiring within the floor monument and in the wiring junction box. It is designed to comply with specific safety requirements in certain jurisdictions

- Lowest panel element is field cut to accept the Base Feed in either corner of the element (Fabric Element KEF or Power Communications Fabric Element KEC only) however in a 24", 30" or 36" wide panel with a Power Communications opening at the base of the panel, the Base Feed can only be installed in the corner furthest from the outlet because of space restrictions
- Base Feed connects to a compatible Power Harness (EKBH) which in turn carries power to a Power Box (EKQP) or Distribution Block (EKDB)
- Base Feeds **cannot** be installed in architectural elements

power & communications basics

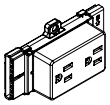

Power can be accessed at various heights within a panel through the use of Power Boxes and Receptacles.

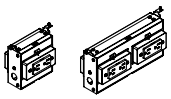

Power Box (EKQP)

- A module for mounting receptacles (specified separately)
- Clips below panel rails, or above the base rail
- Available in single (S) or double (D) lengths. For 24" and 30" wide panels, only the single length can be used. For panels 36" or wider, only a double length can be used
- Power boxes automatically come back-to-back as a standard. Receptacles must be specified separately depending on application
- A power box single length can accommodate one or two receptacles and power box double length can accommodate two or four receptacles depending on application
- When planning with a Segmented Panel_30" Rail (KP_L), and power is required above the worksurface, there are two mounting bracket options:
  - When the power box is mounted to the 36" high rail and the power and communication cut out is at the bottom of the element, specify the power box (EKQP) with the (36R) bracket
  - When the power box is mounted at any other height on the KP_L panel (or any other type of Leverage panel), specify the power box (EKQP) with the (00R) bracket
- Is complete with two connector locations on each side to attach to power harnesses
- Available in 8T or 8K wiring system, to accommodate most common Teknion wiring configuration

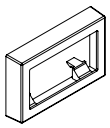

Receptacle (EKRO)

- A single duplex receptacle that slides onto the Power Box Module to provide power
- Specified individually for maximum circuit flexibility
- Styles include Standard 15 amp, T-Slot 20 amp, Controlled 15 and 20 amp
- Receptacle style D and E include a marking indicating it is connected to a control system.
- Outlet configurations consist of Circuit 1, Circuit 2, Circuit 3 (use 7T and 8T only), Circuit 5 (8T and 8K only), Circuit 6 (use 8K only), Circuit A (7T and 7K only) and Circuit B (7K only)

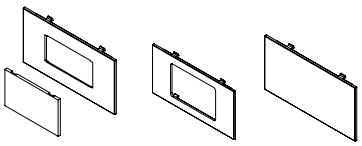

Chicago Power Box (EKQPCH)

- Same as the Power Box except for Chicago electrics applications
- Includes outlets and faceplates
- Must be specified single or double length, and one sided or two sided
- Does not include any connectors which must be supplied by a qualified electrician
- **Cannot** be mounted above desk to a segmented panel with 30" rail in the space between the 30" rail and the 36" rail

Data Extender Plate (EKDE)

The Data Extender Plate is placed over a communication opening to provide extended depth for data jacks which may be required in some applications. Consult your data cabling suppler for clearance requirements.

Communications Bezel (ERZC)

- Converts unused openings in the power/ communications element to accommodate communication outlets
- Snaps into the standard cut out opening in a power communications element

Power Bezel (EKZP)

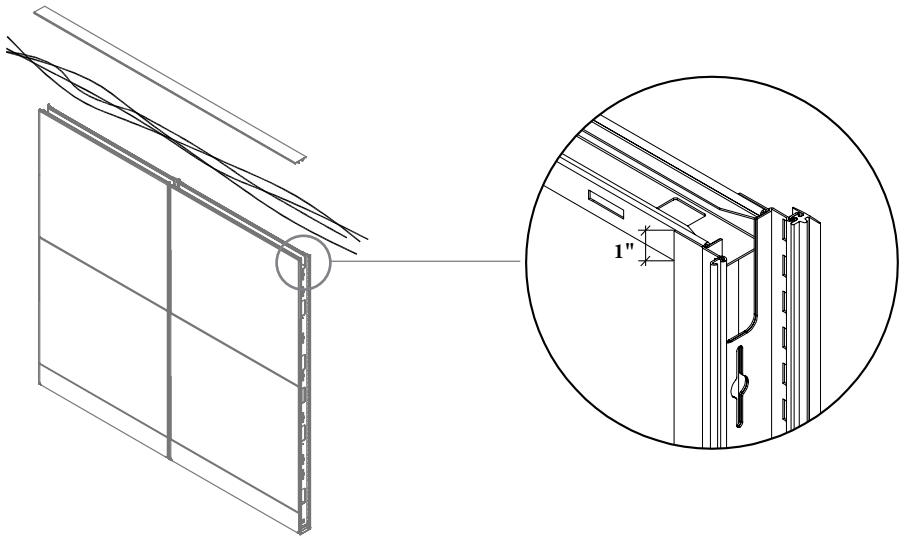

- Converts unused openings in the power communication element to accommodate power outlets
- Snaps into the standard cut out in the power communications element

Outlet Cover Cap (EDCC)

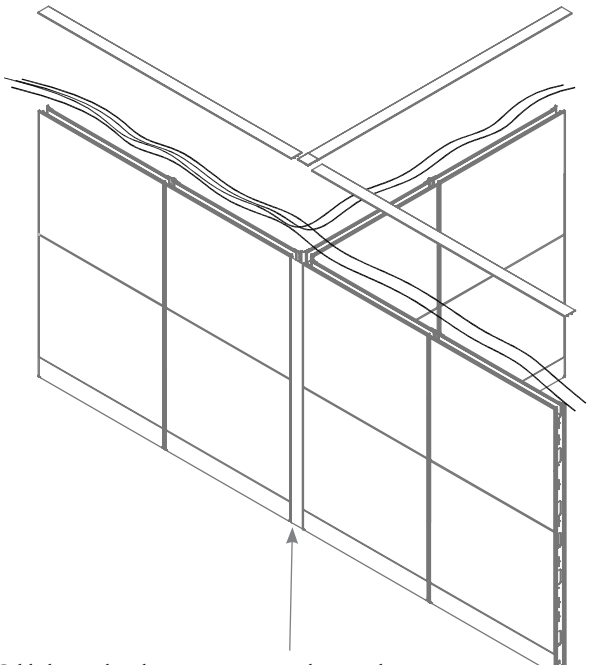

Covers any unused opening in the power communications element

planning with communications

Communication cables can be brought to a workstation cluster through the communication base feeds or a power pole.

- The Conventional panel frames are constructed with a 1" deep lay-in cable trough for distributing communication cables between panels This lay-in trough can accommodate six cat. 5 communications cables at 60% full rate

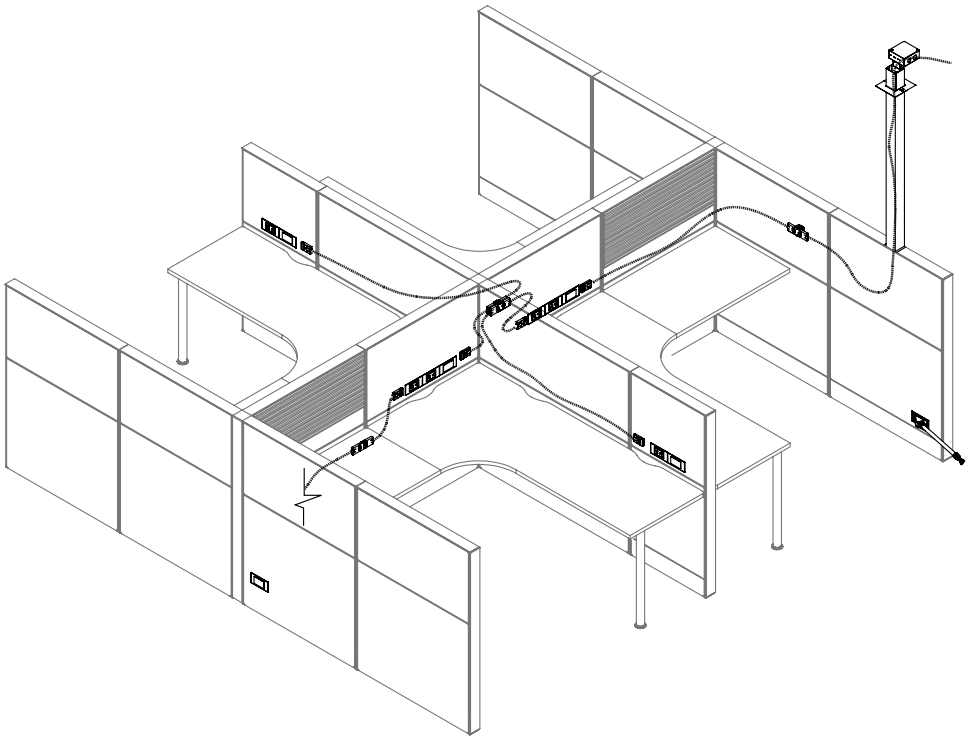

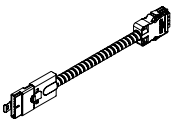

Cable lay-in distribution is maintained at panel connections

power distribution basics

Power is routed through panels with harnesses and distribution blocks. The options are outlined below.

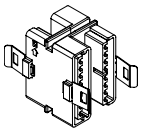

The connection to the building power supply must be executed by a qualified electrician.

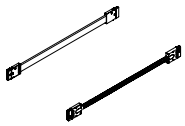

Compatibility Power Harness (EKCMP)

- Is used to connect harnesses from the old Leverage electrics to harnesses from the new Leverage electrics, allowing both systems to be used in the same configuration for 8T and 8K wiring only

Distribution Block (EKDB)

- Distributes power in 2 or 3 directions for distribution between 2 or 3 adjacent panels
- Is also used when a communications box obstructs access to one of the power box connectors

Power Harness (EKBH)

- Routes power from one power box to another and is non directional
- Also connects to Base Feeds and Distribution Boxes for routing power
- Is complete with a connector on each end
- Comes in various length options and can be used within any panel
- The 24" long harness is mesh construction, and all other sizes are metal conduit
- An 8T or 8K wiring system must be specified

wiring systems

Four wiring systems are available for Interpret 8-Wire Isolated (8T), 7-Wire Non Isolated (7T), 8-Wire Dual Isolated (8K) and 7-Wire Dual Non Isolated (7K). Most common Teknion wiring configurations are achieved with these wiring systems.

For sites where Isolated Ground is not available, Teknion offers Non-Isolated Ground options for furniture wiring. The site electrician or electrical contractor/ consultant can identify sites where Isolated Ground is not available. For those sites, specify Teknion 7T or 7K wiring systems.

	No. Regular Circuits	No. Isolated Circuits
8-Wire Isolated (8T) (3+1) Neutral (White) Circuit 1 (Black) Circuit 2 (Red) Circuit 3 (Blue) Ground (Green) Isolated Circuit 5 (Orange) Isolated Neutral (White/Orange) Isolated Ground (Green/Orange)	3	1
8-Wire Dual Isolated (8K) (2+2) Neutral (White) Circuit 1 (Black) Circuit 2 (Red) Ground (Green) Isolated Circuit 5 (Orange) Isolated Circuit 6 (Blue) Isolated Neutral (White/Orange) Isolated Ground (Green/Orange)	2	2
7-Wire Non Isolated (7T) (3+1) Neutral (White) Circuit 1 (Black) Circuit 2 (Red) Circuit 3 (Blue) Ground (Green) Neutral (White/Orange) Circuit A (Orange)	4	0
7-Wire Dual Non Isolated (7K) (2+2) Neutral (White) Circuit 1 (Black) Circuit 2 (Red) Isolated Neutral (White/Orange) Circuit A (Orange) Circuit B (Blue) Ground (Green)	4	0

wiring system/receptacles

	Wiring System			
	8T	**8K**	**7T**	**7K**
Regular Ground Receptacles	1, 2, 3	1, 2	1, 2, 3, A	1, 2, A, B
Isolated Ground Receptacles	5	5, 6	n/a	n/a

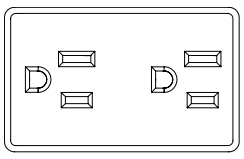

- All receptacles except Circuit 6, A, B can be used with the 8T wiring system (**cannot** accept a 2nd Isolated Circuit)
- All receptacles except Circuit 3 can be used with the 8K wiring system (**cannot** accept a 3rd Regular Circuit)
- Circuit A is compatible with 7T and 7K. Circuit B is compatible with 7K only

wiring system/related circuit

Regular Circuit 2 Receptacle	✔	✔	✔	✔
Regular Circuit 3 Receptacle	✔		✔	
Isolated Circuit 5 IG Receptacle	✔	✔		
Isolated Circuit 6 IG Receptacle		✔		
Regular Circuit A Receptacle			✔	✔
Regular Circuit B Receptacle				✔

✔ **Applicable**

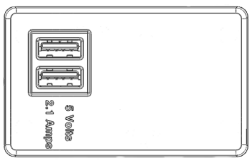

15 Amp

20 Amp

USB

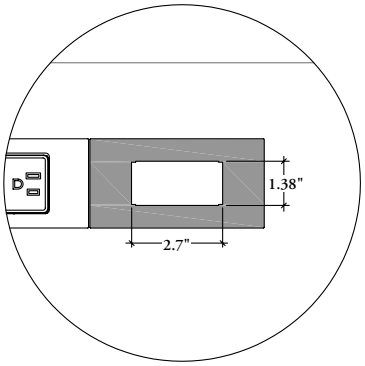

- Outlets are available 15, 20 amp or USB
- The 20 Amp is only available in Black
- USB is always on Circuit 1
- Outlets are available with marking indicating it is connected to a control system in both 15 and 20 amp options.

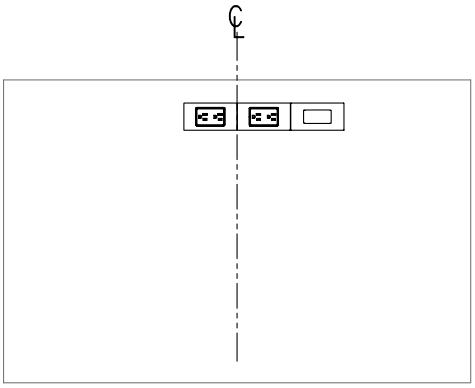

power distribution planning

The following should be taken into consideration when planning for power distribution.

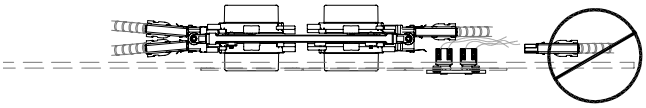

communication boxes

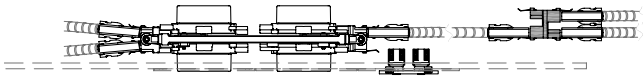

- The power communications element provides an option for a cut out that accommodates most standard communications boxes

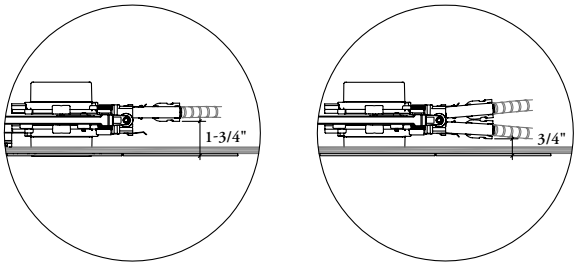

- Power cut outs are always centered on the power communications element, and the cut out for communications is always to the right of the power when the cut outs are at the top of the element
- When the element is reversed and the cut outs are at the bottom, the power will still be centered and the communication cut out will be on the left

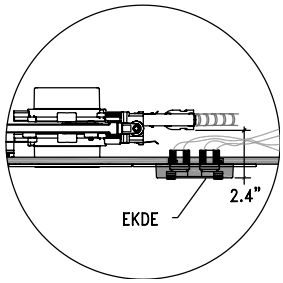

Careful attention must be paid to the depth of the communications box, as it can obstruct the ability for a harness to connect to a power box, therefore making one of the ports unusable

A distribution block can be used to reroute power when a power box port is obstructed by a communications box

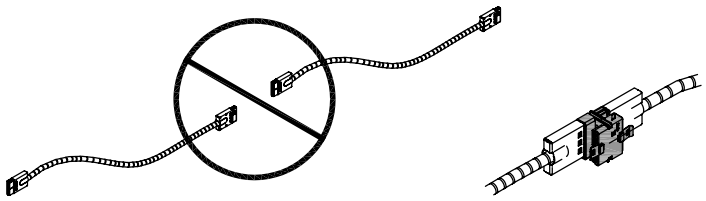

- When only one port on a power box is used, the distance remaining for mounting a communications box is 1-3/4"
- When both ports on a power box are used, the distance remaining for mounting the box is 3/4"

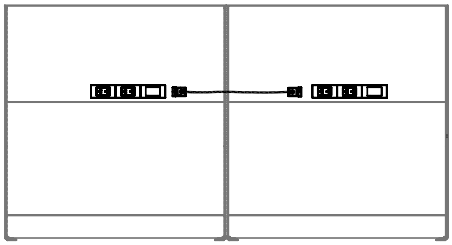

- The Data Extender Plate (EKDE) extends the available space from 1.75" to 2.4"

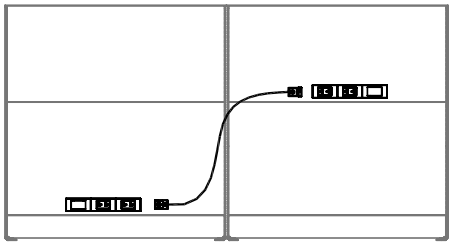

power distribution planning (continued)

harnesses

Power harnesses **cannot** be linked together, they must connect either to a distribution block or to a power box

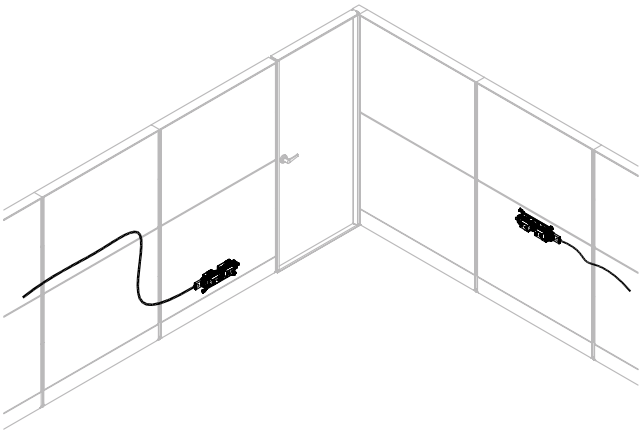

Power harnesses can pass through more than one panel, they do not need to be specified the same width as the panel. To calculate the harness length, measure the distance between the center of the panel, and allow for extra length when routing from base power to above worksurface power.

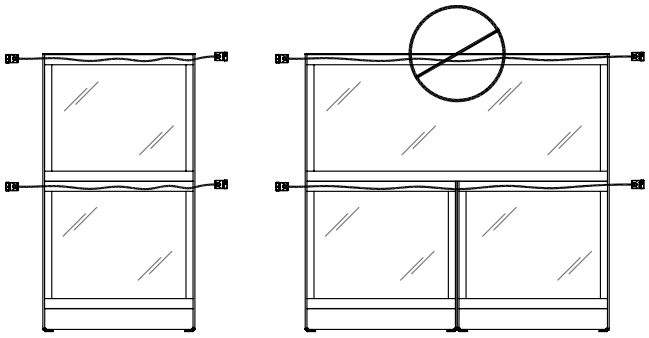

Example: If passing from a 48" wide electrified panel to another 48" wide electrified panel, a 72" wide harness is required, not two 48" wide harnesses. This length will accommodate a worksurface height to worksurface height connection, or a worksurface height to a base height connection.

planning with doors

- Door packages create an obstacle for modular electrics
- When a door is used in a workstation, the electrical run will have to be terminated and restarted after the door, or the power will have to be brought in from the opposite direction

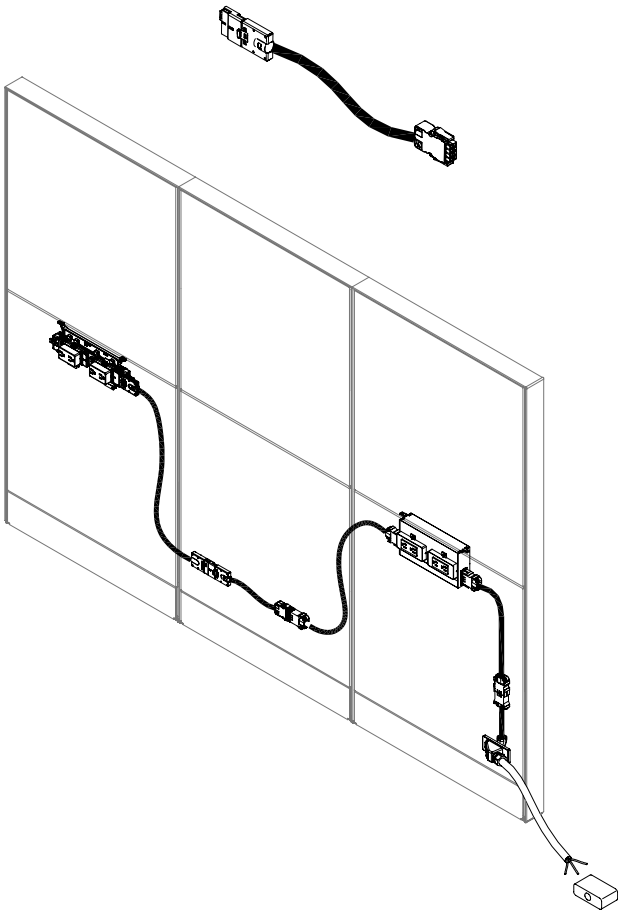

planning with glass panels

- Power harnesses and ceiling feeds **cannot** route vertically through a glass panel, they must route horizontally through either of the wire troughs
- Power **cannot** route through a Panel Add-On, Glass

power distribution planning (continued)

planning with the compatibility harness

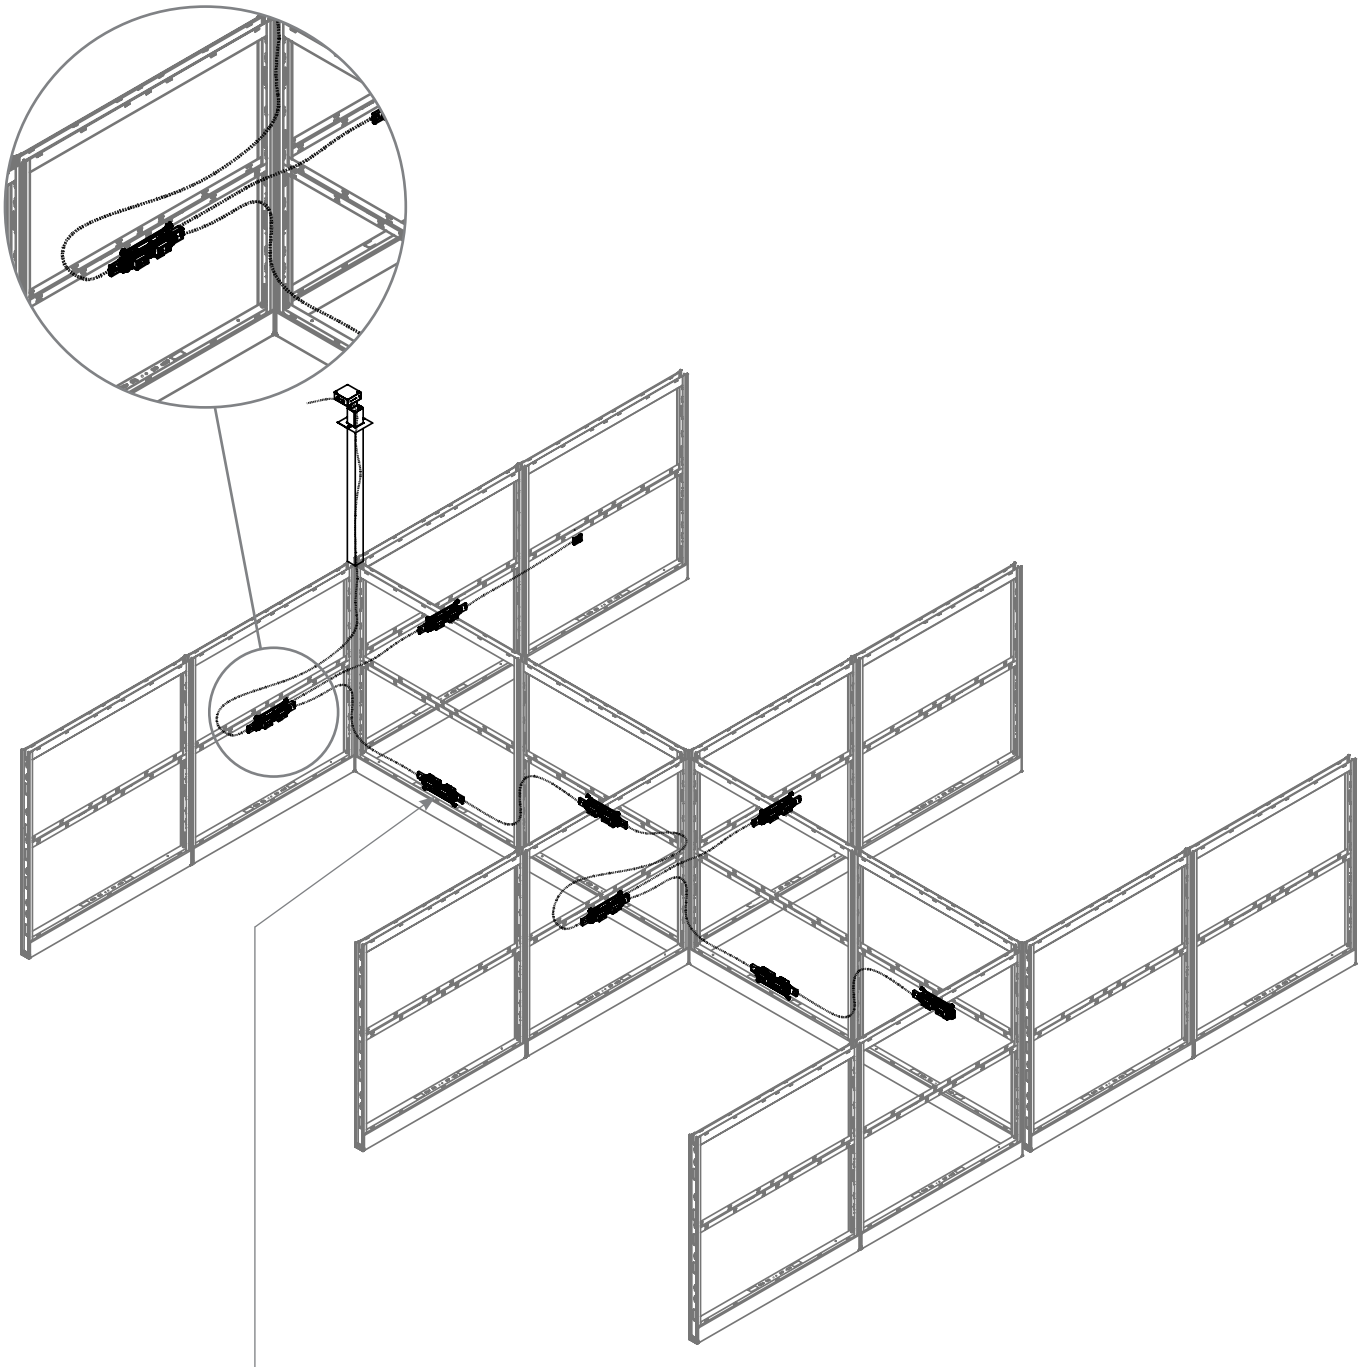

Panels with pre-May 2010 electrics are compatible with the new electrical system. The compatibility harness attaches to a regular power harnesses to connect the two electrical systems.

planning with harnesses and distribution blocks

The Leverage power system is non-directional and can be routed through panels either with Power Harnesses or Distribution Blocks. The following shows examples of different ways of routing the power.

power harnesses

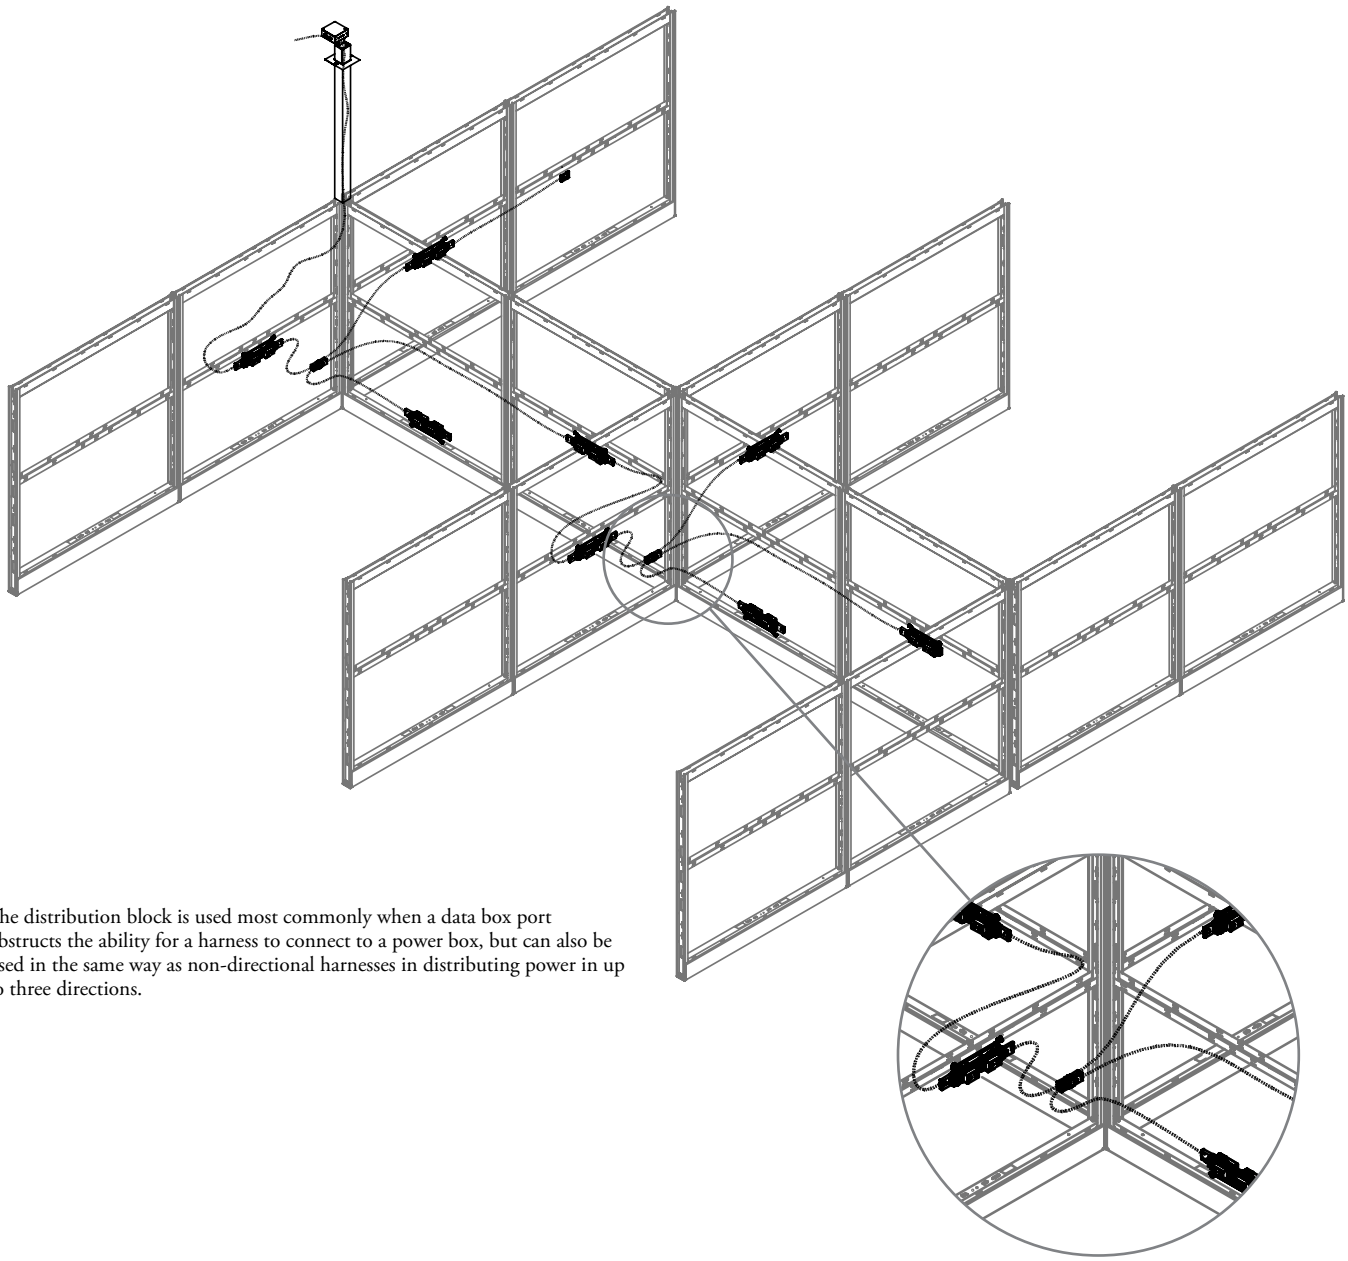

- Power boxes allow for non-directional routing, so when a data port obstructs the ability to connect a harness, the power can be routed in the opposite direction
- Up to 4 power harness can be used on a power box except when it is not obstructed by a data port

planning with harnesses and distribution blocks (continued)

The Leverage power system is non-directional and can be routed through panels either with Power Harnesses or Distribution Blocks. The following shows examples of different ways of routing the power.

distribution block

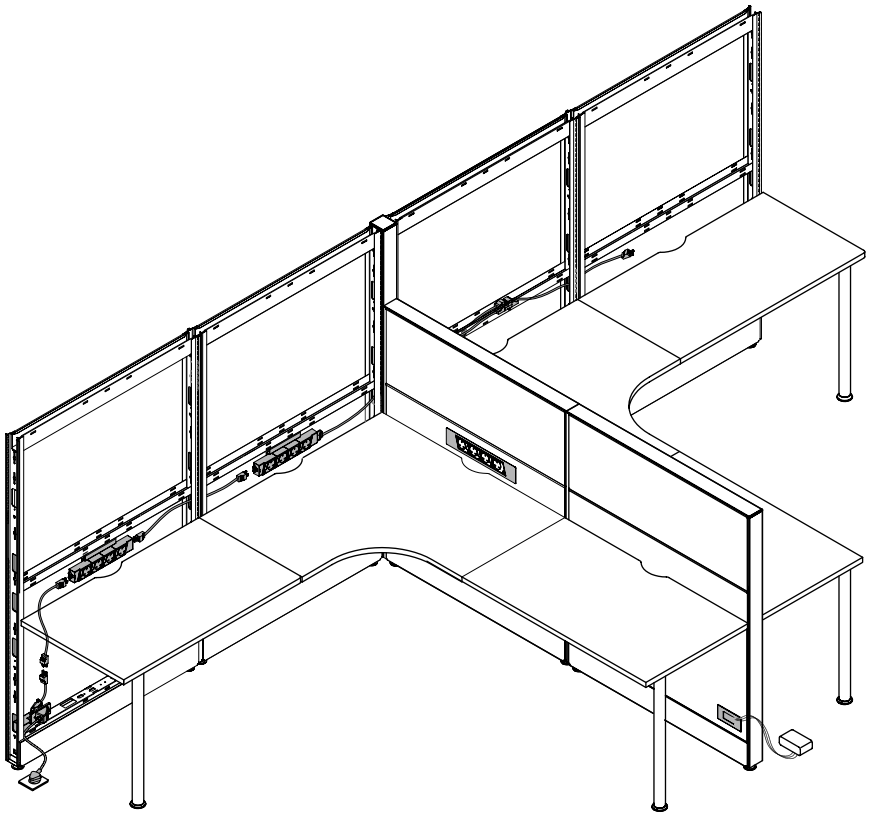

The distribution block is used most commonly when a data box port obstructs the ability for a harness to connect to a power box, but can also be used in the same way as non-directional harnesses in distributing power in up to three directions.

international electrics basics

Leverage offers specific electric for use in International applications.

All outlets are rated for a maximum of 16 amps (240 Volts). For alternative requirements, contact Customer Service for details and pricing. Local authority approval must be obtained prior to energizing outlet box.

Leverage CALA Power Infeed (VBPL)

Routes power from the floor to a Power Module in a panel

Length:
1800 mm

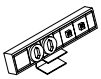

Country of Installation
R Argentina
N Brazil
L Chile

Leverage Jumper Power Harness (VBPH)

Routes power between power modules

Length:
2000 mm

CALA Power Station (VBWB)

Mounts to a worksurface to provide power

Outlet Configurations:
Double duplex
Two Power and Two Data
Four Power
Three Power and One USB

Country of Installation:
R Argentina
N Brazil
L Chile

Cord Length:
1800 mm

Finishes
Receptacle Finish:
Ebony Coordinate
Very White Coordinate

Clamp Finish:
Clear Anodized Aluminum

CALA Power Module (VBCL)

Provides access to power in CALA applications

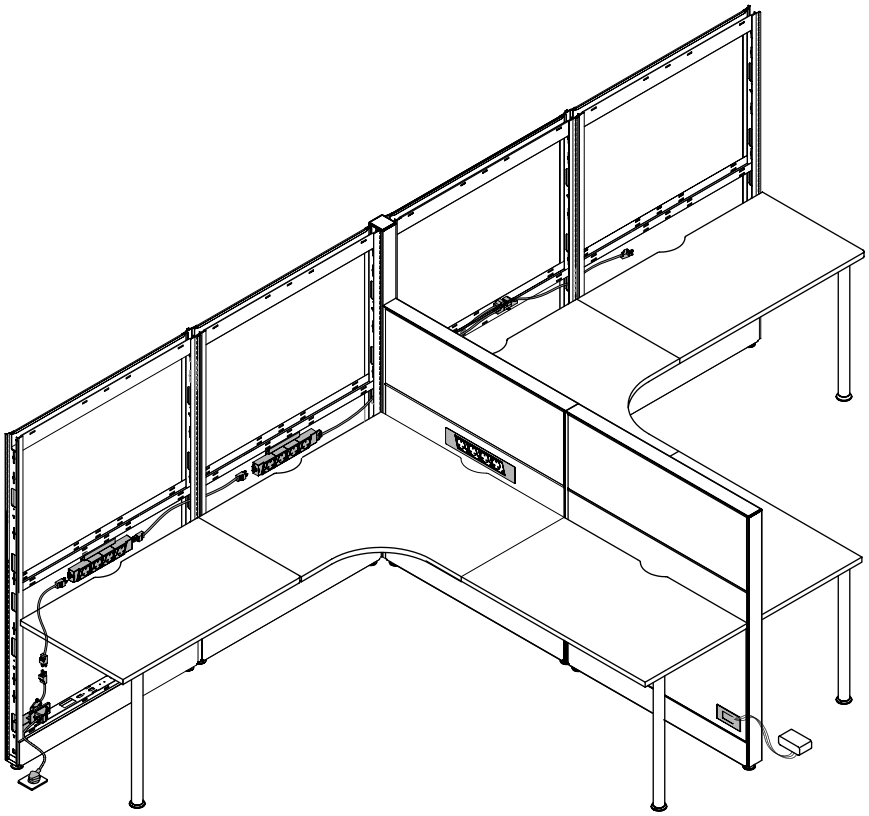

-Attached to installation bracket

Outlet Configurations:
Single Duplex
Three Data
Two Power
One Power and One USB

Double Duplex
Two Power and Three Data
Four Power
Three Power and One USB

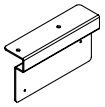

Country of Installation
R Argentina
N Brazil
L Chile

international electrics basics (continued)

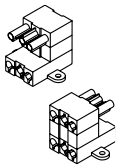

Finishes

International communications Mounting Kit (VERZC), Leverage Outlet Box Bezel (VMBB) and Panel Mount Bracket (VMBE) are available only in Black

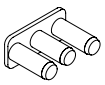

Leverage Outlet Box Panel Mount Brackets (VMBE)

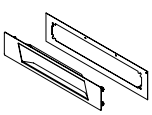

Distribution Block (VACEB)

- Redirects power distribution
- One male connector directs power in and three female connectors direct power out

Cover Cap (VACEC) is a safety cover for an unutilized female terminal on an Outlet Box (VED) or Distribution Block (VACEB)

Leverage Outlet Box Bezel (VMBB)

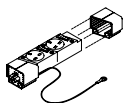

- Works with two or four outlet versions of the power logic oblique power boxes
- Mounts the Outlet Box to the panel and creates a finish bezel opening to an Acoustic Element (KES)
- Only needs to be specified when an opening is created on site to a Acoustic Element (KES) to accommodate the outlet box (VED)
- The four outlet options for the Outlet Box should not be used on elements less than 36" wide

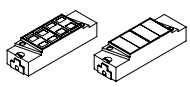

Outlet Box (VED)

- Provides plug-in access to power at worksurface or base height
- Connects to any compatible power cable and are available for a variety of countries
- All outlets have a socket angle of 15 degrees
- An earth lead is included with every outlet box. Some jurisdictions require the earth lead to be connected to a panel
- Are mounted to panel frame
- Some jurisdictions require fuse and switch options
- For application onto a Leverage Panel, mounting bracket 'E' (Panel-Mount for Leverage) must be selected

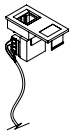

also available

Desk-Mounting Clips For Outlet Box (VACB6)

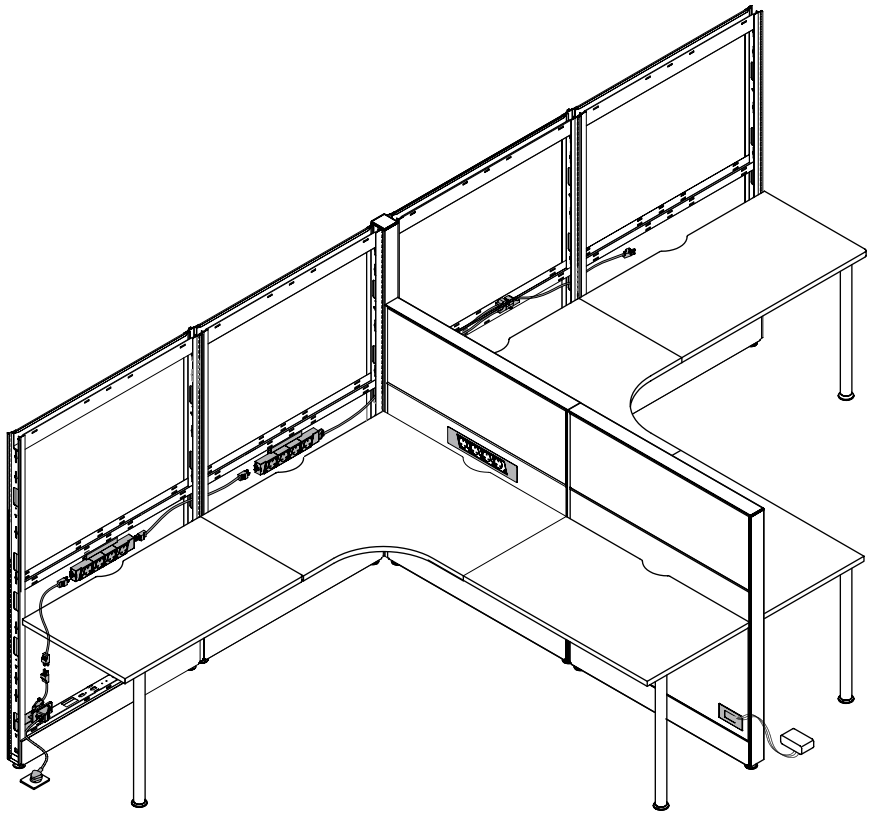

Voice and Data Box (VVD)
(requires a special element for facemount applications, contact your Teknion Customer Service Representative).

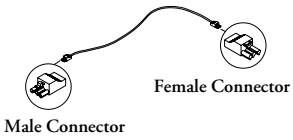

Voice and Data Outlet (VDO)

international electrics basics (continued)

Finishes

International communications Mounting Kit (VERZC), Leverage Outlet Box Bezel (VMBB) and Panel Mount Bracket (VMBE) are available only in Black

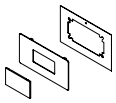

Interconnecting Power Cable (VCC)

- Routes power between Outlet Boxes and also carries power through the adjacent panel
- Can be connected to any compatible Outlet Box (VED) or Input Power Cable (VEP)
- Accepts one circuit per cable

Outlet Type	Country of Installation
	Australia
	Germany
	U.K.

Input Power Cable (VEP)

- Brings power from the building to the panel and is installed in the base opening of the panel and feeds power to the worksurface or base level
- Can be connected to any compatible Outlet Box (VED) or Interconnecting Power Cable (VCC)
- Accepts one circuit per cable
- Available in Plug or Hardwire end

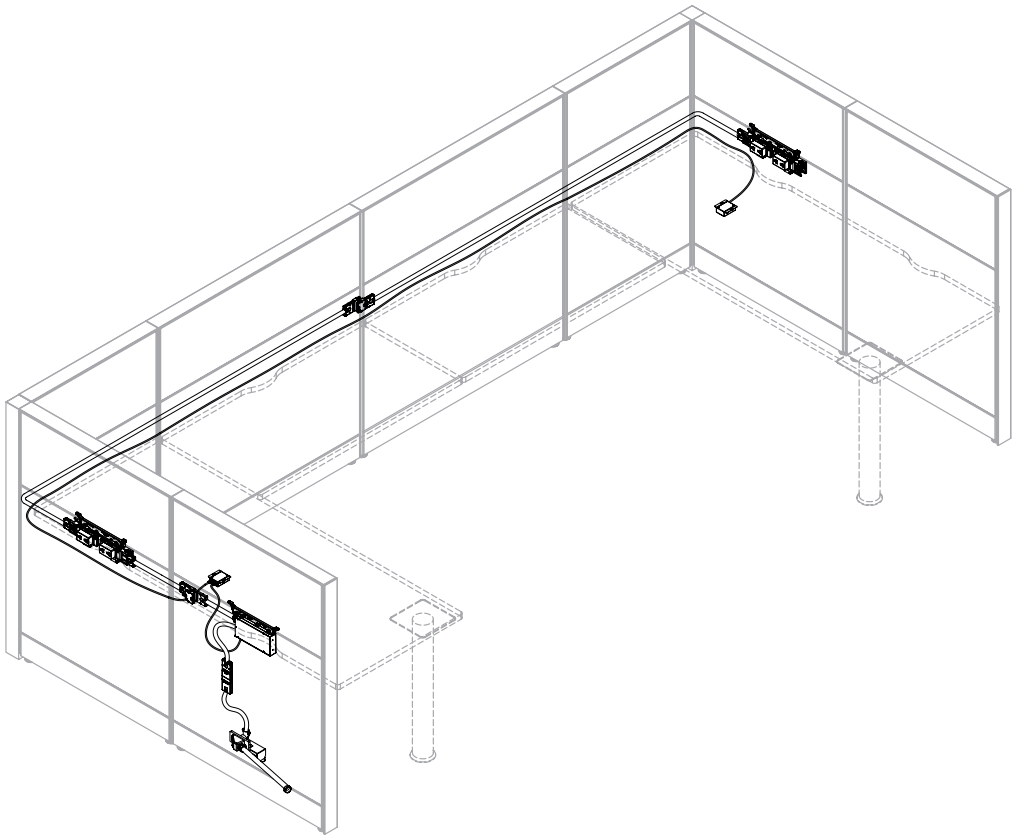

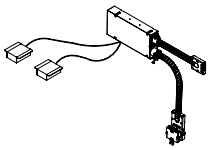

International Communications Mounting Kit (VERZC)

Permits mounting of communications outlets in a standard fabric element (Acoustic Element (KES)).

power conservation system basics

Furniture based solution for the controlling function that addresses the ASHRAE/Title 24 electrical requirements.

Power Conservation System (EKPC)

- Up to two circuits can be controlled by occupancy sensors (included)
- Maximum of 4 sensors can be connected to each individual controlled circuit
- When using the Power Conservation System, circuits 3, 5, 6, A and B will always stay powered on (uncontrolled)
- To get individually controlled stations, specify the Power Conservation System with 2 sensors
- Available with option of 2, 4 or 8 sensors (Maximum of 4 sensors per run)
- Sensors mount to the underside of the worksurface
- A hard wired connection supplies power into a panel from the building power source
- Do not specify receptacles for circuits 1 and 2 at the same workstation when using Power Conservation System.
  Each occupancy sensor can only control one circuit.

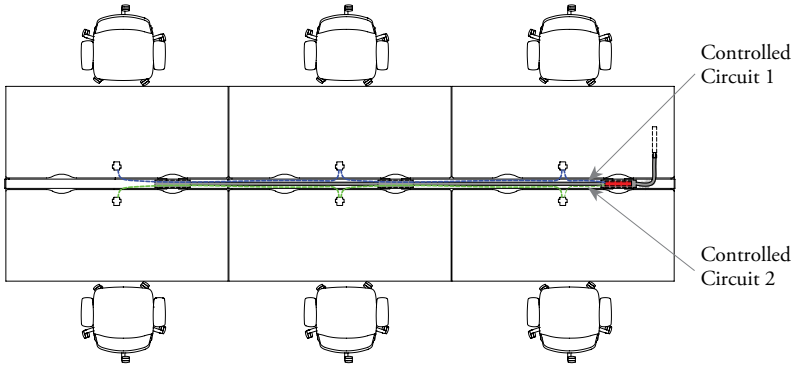

planning with power conservation system

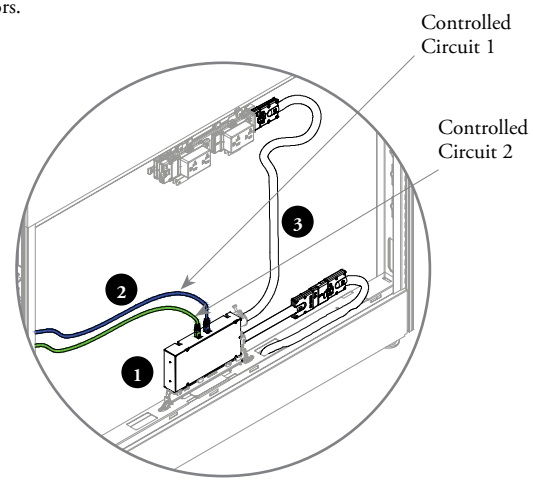

The following should be considered when planning with the Power Conservation System.

The following are two ways of planning with the Power Conservation System.

scenario A: multiple sensor planning

The connection between two power modules only applies on the installation for 4 sensors and 8 sensors.

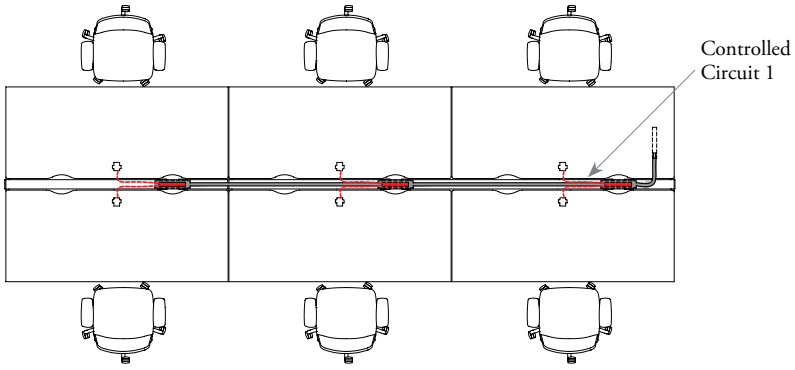

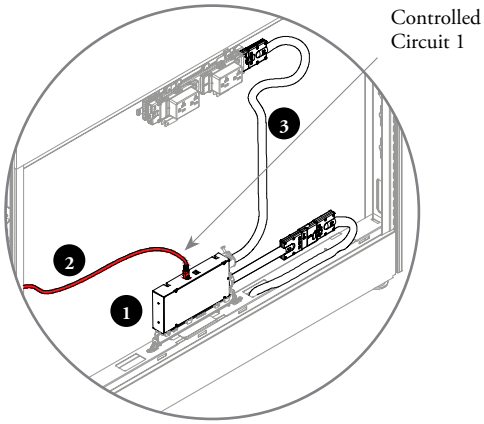

- Power Conservation Wiring
- Power Harness
- Control Box
- Sensor

1. Control Box
2. Power Conservation Wiring
3. Power Harness

scenario B: single sensor planning

- Power Conservation Wiring
- Power Harness
- Control Box
- Sensor

1. Control Box
2. Power Conservation Wiring
3. Power Harness

- Always specify one sensor per workstation.
- Only one controlled circuit per workstation (do not specify two controlled circuits in one single workstation)
- Do not specify mix receptacles for both circuit 1 and 2 in a single workstation
- If the control box and power module are in the same panel, the output arm from the control box can directly connect to the power module, no extra jumper required

panel builder order form

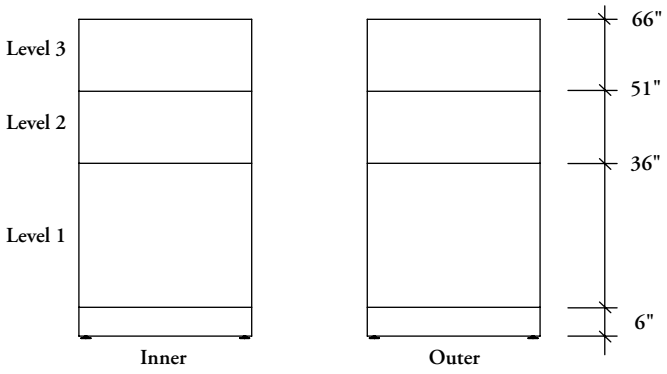

Panel orders cannot be processed if element placement is not appropriately described for a panel builder order form.

- The panel builder applies to all panels (KP_T, KP_S, KP_C). To specify panels, a panel builder order form must be completed identifying placement/finish of the elements and finish for the top trim
- Leverage Panels can be customized to meet client requirements. This can be done by replacing the Leverage Fabric Element (KES) which comes as a default on the panel, with any other in the Leverage element offering
- Panel builder order forms may be used for all types of panels, elements or Panel Add-Ons

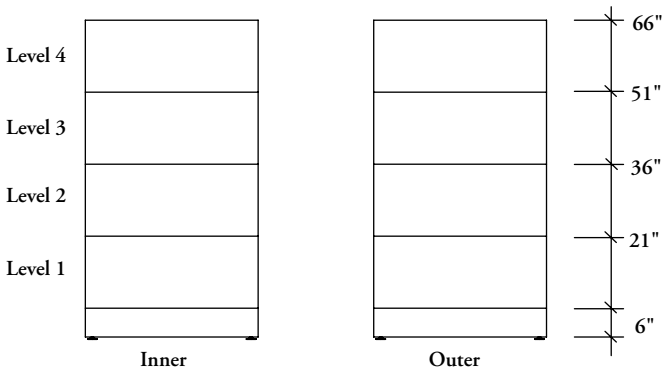

Standard Panel (KP_T)

Semi-Segmented Panel (KP_S)

Segmented Panel (KP_C)

panel pricing build-up worksheet – 32" base

The Build-Up Pricing Worksheet is designed to help you price an order for a panel that deviates significantly from the standard offering of a complete panel with Leverage Fabric Elements. Total cost is not affected by the pricing method you choose.

Standard Panel (KP_T)

Include the panel code of the panel being priced: _____

Inner		Outer	
Top Trim	$ _____		
Level 2	$ _____		$ _____
Level 1	$ _____		$ _____
Frame Price	$ _____		
Price	$ _____ +	Price	$ _____ Total Price $ _____

Semi-Segmented Panel (KP_S)

Include the panel code of the panel being priced: _____

Inner		Outer	
Top Trim	$ _____		
Level 3	$ _____		$ _____
Level 2	$ _____		$ _____
Level 1	$ _____		$ _____
Frame Price	$ _____		
Price	$ _____ +	Price	$ _____ Total Price $ _____

Segmented Panel (KP_C)

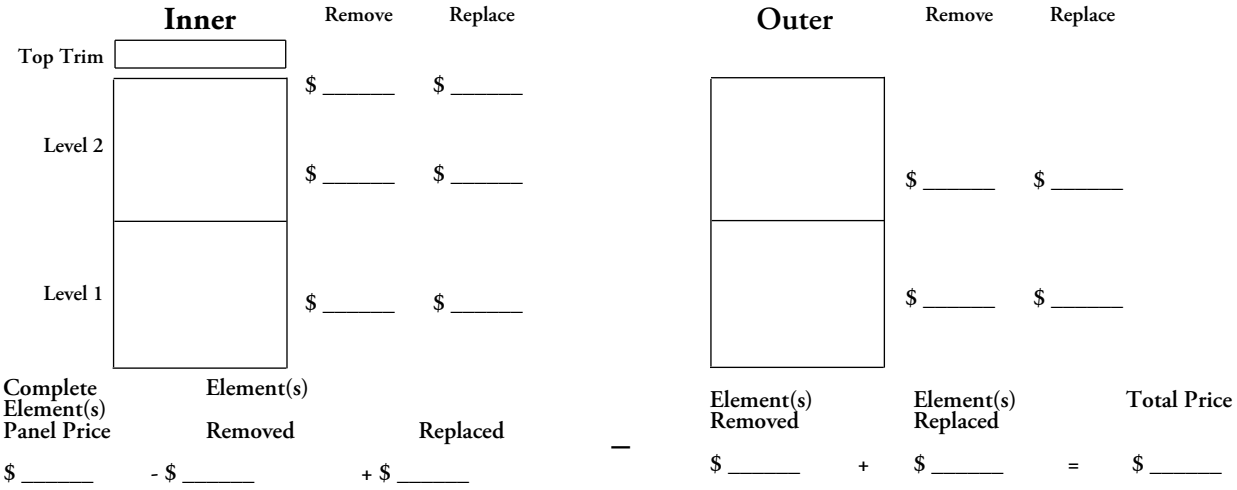

Include the panel code of the panel being priced: _____

Inner		Outer	
Top Trim	$ _____		
Level 4	$ _____		$ _____
Level 3	$ _____		$ _____
Level 2	$ _____		$ _____
Level 1	$ _____		$ _____
Frame Price	$ _____		
Price	$ _____ +	Price	$ _____ Total Price $ _____

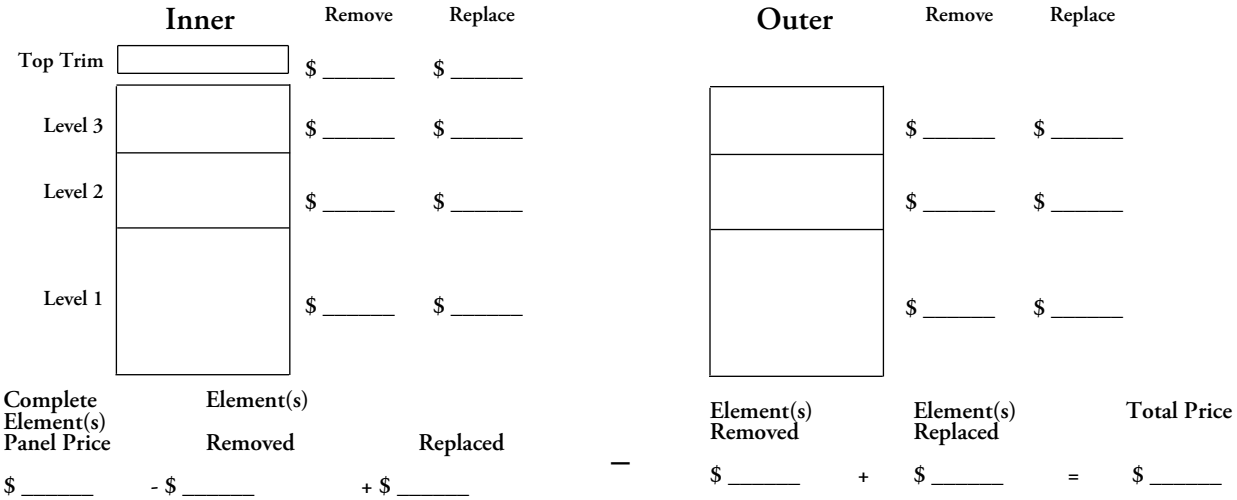

panel pricing remove/replace worksheet

The Remove/Replace Pricing Worksheet is designed to help you price an order for a panel where there is minor deviation from the standard offering of a complete panel with Leverage Fabric Elements. Total cost is not affected by the pricing method you choose.

Standard Panel

Conventional / Universal

Elevated

Floor-Flush

The Standard Panel reduces panel cost if a wide variety of element types are **not** required.

WHAT'S INCLUDED

Bare Panel Frame: (for build-up purposes only) 1 frame, hardware for straight connections, 2 levelers, gaskets.

Complete Panel: Panel frame with acoustic elements and top trim.

WHAT'S EXCLUDED

Electrics and communications must be specified separately and are assembled at time of installation. See *Lighting, Electrics & Communications* section.

NOTES

To order panels, a panel builder must be completed to identify placement of specific elements.

Not all height/width combinations are available. See pricing for exact offering.

Available with Wide or Slim Gasket types.

Xpress Available through *Teknion's Xpress Program*.

K P _ L

Segmented Panel – 30" Rail

Conventional / Universal

Elevated

Floor-Flush

The Segmented Panel permits use of all Leverage element types.

The lowest segmented rail is at a height of 30".

WHAT'S INCLUDED

Bare Panel Frame: (for build-up purposes only) 1 frame, hardware for straight connections, 2 levelers, gaskets.

Complete Panel: Panel frame with acoustic elements and top trim.

WHAT'S EXCLUDED

Electrics and communications must be specified separately and are assembled at time of installation. See *Lighting, Electrics & Communications* section.

NOTES

To order panels, a panel builder must be completed to identify placement of specific elements.

Not all height/width combinations are available. See pricing for exact offering.

Available with Wide or Slim Gasket types.

Xpress Available through *Teknion's Xpress Program*.

KPGA

Panel Add-On Screen – Glass

The Panel Add-On Screen – Glass is added on top of Panels to provide a lighter, frameless alternative to Panel Add-Ons.

WHAT'S INCLUDED

1 glass screen, top trim, attachment hardware.

NOTES

Clear Standard Glass (5) is a clear tempered glass.

Frost (FT) is a single-sided etched tempered glass.

Satin (FB) is a double-sided etched tempered glass.

Glass is 6mm thick.

Cannot be used on a Panel with a Privacy Screen.

Compatibility Kit is required when mounting Panel Add-On Screen – Glass (KPGA) or any "Cable Way" (non high capacity) Leverage Panels that was purchased prior to June 28 2011

Xpress Available through *Teknion's Xpress Program*.

K P G T

Panel Add-On with Thick Top Trim Screen – Glass

The Panel Add-On with Thick Top Trim Screen – Glass is added on top of Panels to provide a lighter, frameless alternative to Panel Add-Ons.

WHAT'S INCLUDED
1 glass screen, thick top trim, attachment hardware.

NOTES
Clear Standard Glass (5) is a clear tempered glass.

Frost (FT) is a single-sided etched tempered glass.

Satin (FB) is a double-sided etched tempered glass.

Glass is 6mm thick.

Compatibility Kit is required when mounting Panel Add-On Screen – Glass (KPGA) or any "Cable Way" (non high capacity) Leverage Panels that was purchased prior to June 28 2011.

Xpress Available through *Teknion's Xpress Program*.

K P N D
Door Panel

The Door Panel allows for door applications within the panel environment, however, does **not** allow for power pass-through or power access. The Door Panel works with Conventional and Universal Panel Frame Styles.

WHAT'S INCLUDED
Thresholds, hinges, 1 door, 1 door frame, 1 door top frame, handle and lock (as per specification) and 90˚ corner connector and trim.

NOTES
Panel Add-Ons **cannot** be stacked on top of the door panel.

If there are any concerns about stability of a particular application, submit drawings to Teknion for review.

Handles, hinges, and thresholds are all finished in Brushed Chrome.

Xpress Available through *Teknion's Xpress Program*.

***(must equal top segment overall width)**

Step 2: Determine Bottom Segment price.
example: 36" wide Thin Panel finished in a Fabric, Grade A is 325

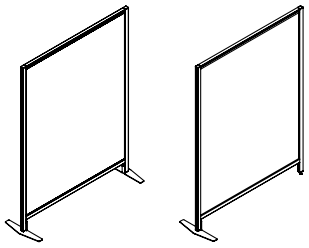

Step 3: To determine overall panel price, add Top Segment price and Bottom Segment price.
example: 325 + 325 = 650

If Mica frame is specified, add 41

See illustrated example on previous page.

Intermediate Panel End Trim

The Intermediate Panel End Trim provides a finished covering to the exposed portions of the panel at panel connections.

WHAT'S INCLUDED
1 trim.

NOTES
The Intermediate Panel End Trim is offered in modular heights to cover exposed connectors and areas left exposed in a change of height application.

Must be specified in the same type of material as the top trim (Metal or Wood)

Xpress Available through *Teknion's Xpress Program*.

K P P
Panel-To-Panel Adapter

Same Height

15" Height Difference

The Panel-to-Panel Adapter provides the ability to create an off-module 90˚ connection.

WHAT'S INCLUDED
1 Panel-to-Panel Adapter, Posi-Locks and spring plate assemblies, off-module change-of-height trim for 15" panel-to-panel height difference option.

NOTES
The Panel-Panel Adapter allows a Leverage conventional or universal Panel to be attached off-module to another similar panel at a 90˚ angle.

Additional widths do **not** have to be taken into consideration for planning with the Panel-to-Panel Adapter. However, the top trim that attaches to the off-module panel must be trimmed in the case of a change of height connection by 0.75" at the off-module panel connection end.

Power **cannot** pass through the Panel-to-Panel Adapter into the attached panel.

Not all combinations are available, see pricing for details.

Xpress Available through *Teknion's Xpress Program*.

Rectangle Perpendicular with Radius Corners Worksurface (D-Style)

The Rectangle Perpendicular with Radius Corners Worksurface (D-Style) provides a range of depths to support primary worksurface applications.

WHAT'S INCLUDED
1 worksurface, grommet (if specified), scallop (if specified).

NOTES
Worksurface is designed to accompany the Leverage Infinity Curved Desk Edge Screen (GXCL). Actual depth is 3/8" less than nominal depth.

Xpress Available through *Teknion's Xpress Program*.

K W C C
Concave Worksurface

The Concave Worksurface is a multi-purpose worksurface designed to be used in a variety of planning scenarios.

WHAT'S INCLUDED
1 worksurface.

NOTES
The Concave Worksurface allows for transition from a 24" depth to a 30" depth if required.

A Pedestal (KD) may be located under the deep end of this worksurface. See listing in the *Freestanding Storage* section.

Not all depth/width combinations are available. See pricing for exact offering.

Xpress Available through *Teknion's Xpress Program*.

KWPS
Standard Corner Worksurface

The Standard Corner Worksurface is a panel-mounted worksurface for use in 90° corners and is ideal for the application of a keyboard support.

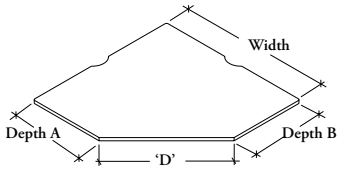

WHAT'S INCLUDED
1 worksurface, 1 worksurface supporting wire tray (where required).

NOTES
All Standard Corner Worksurfaces with a width larger than 48" include a worksurface supporting wire tray for additional support.

Can be specified to provide a depth transition from the two adjacent worksurfaces (e.g. 24" depth to 30" depth or vice versa).

Not all depth/width combinations are available. See pricing for exact offering.

Xpress Available through *Teknion's Xpress Program*.

K W S C
Curved Corner Worksurface

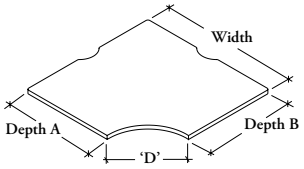

The Curved Corner Worksurface is a panel-mounted worksurface designed for use in a 90° corner application.

WHAT'S INCLUDED
1 worksurface, 1 worksurface supporting wire tray (where required).

NOTES
Can be specified to provide a depth transition from the two adjacent worksurfaces (e.g. 24" depth to 30" depth or vice versa).

Not all depth/width combinations are available. See pricing page for exact offering.

Xpress Available through *Teknion's Xpress Program*.

Split Radius Corner Worksurface

The Split Radius Corner Worksurface is panel-mounted and provides an ergonomic, user-adjustable, large keyboard tray and mouse support.

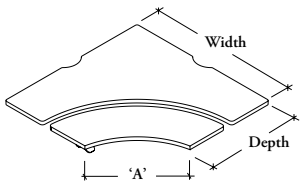

WHAT'S INCLUDED
1 worksurface with keyboard support surface, keyboard support backstop, dual-arm mechanism, mounting hardware.

NOTES
This worksurface may be supported by Cantilevers (CT) and Corner Brackets (KBC).

For a 24" deep corner worksurface, a 12" deep Cantilever (CT12) must be used. To support a 30" deep corner unit, an 18" deep Cantilever (CT18) must be used.

Not all depth/width combinations are available. See pricing page for exact offering.

Xpress Available through *Teknion's Xpress Program*.

Radius Corner Worksurface with Return

The Radius Corner Worksurface with Return is a transitional corner which provides a dedicated corner for a computer monitor and keyboard and can be connected to surfaces of different depths within the panel environment.

WHAT'S INCLUDED
1 worksurface, 1 worksurface supporting wire tray (where required).

NOTES
All Radius Corner Worksurfaces with Return with a Width 'A' larger than 48" include a worksurface supporting wire tray for additional support.

This worksurface must be specified as left or right. The handed end is the longer end (from the user's perspective).

Not all depth/width combinations are available. See pricing page for exact offering.

Xpress Available through *Teknion's Xpress Program*.

KWBT
Bullet Worksurface

The Bullet Worksurface is a semi-suspended worksurface that mounts to the panel at one end and is supported by a monoleg at the other and is ideal for small meetings or team workstations.

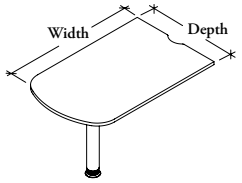

WHAT'S INCLUDED
1 worksurface, 1 Monoleg (CZ29), leg mounting hardware, 1 Corner bracket (KBC).

WHAT'S EXCLUDED

Modesty Panels (KWMP) if used at the end of a panel run.

NOTES
Support requirements for the Bullet Worksurface with Monoleg are application specific. For details on supports requirements, see *Worksurface Supports & Accessories* section.

Xpress Available through *Teknion's Xpress Program*.

G X C L
Infinity Curved Desk Edge Screen

The Infinity Curved Desk Edge Screen attaches to the worksurface on both the back and lateral edge to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy in varying levels.

WHAT'S INCLUDED
1 infinity fabric desk edge screen, attachment brackets, wire manger (if specified).

NOTES
The screen depth is 20" with a 1/2" wire gap around the screen.

Screen is designed to accompany the Leverage D Style Rectangle with Radius Corners Worksurface (KWSD).

Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide.*

Xpress Available through *Teknion's Xpress Program.*

G X D L
Infinity Desk Edge Screen

The Infinity Desk Edge Screen attaches to a worksurface to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy in varying levels.

WHAT'S INCLUDED
1 infinity fabric desk edge screen, attachment brackets, wire manger (if specified).

NOTES
Infinity screen is 1/2" less than specified size. The worksurface wire gap is 1/2", to allow for mounting of select desk edge accessories.

Wire manger is designed to be accompanied by the Power Bar (YEPD) or the Compact Power Bar (YEPS).

The screen is available in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*.

Xpress Available through *Teknion's Xpress Program*.

GQDL
Quilted Infinity Desk Edge Screen

The Quilted fabrics provide a textured aesthetic, elevating the overall feel of an area creating a tactile user experience. Both the Teknion Quilted patterns Pico and Diode, designed by Suzanne Tick, soften the surface of textiles and elevate the user experience in the workplace with textured, quilted designs that add depth and perspective to a space. The Quilted Infinity Desk Edge Screen attaches to a worksurface to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy in varying levels.

WHAT'S INCLUDED
1 quilted infinity fabric desk edge screen, attachment brackets, wire manger (if specified).

NOTES
Infinity screen is 1/2" less than specified size. The worksurface wire gap is 1/2", to allow for mounting of select desk edge accessories.

Wire manger is designed to be accompanied by the Power Bar (YEPD) or Compact Power Bar (YEPS).

Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics refer to the *Teknion Textiles Program Guide*. The pattern thread is designed to accompany the color way of the fabric selected.

GXEL
Infinity Side Desk Edge Floor Screen

The Infinity Side Desk Edge Floor Screen attaches to a worksurface to provide a lightweight, thin, upholstered fabric screen that is expressed in a softer curvilinear aesthetic that creates space division and local desktop privacy down to the floor level.

WHAT'S INCLUDED
1 infinity fabric side desk edge floor screen, attachment brackets.

NOTES
Infinity side floor screen is 1/2" less than specified size. Screen is designed to have no gap between worksurface and Side Screen.

Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics, refer to the *Teknion Textiles Program Guide*.

PRODUCT OPTIONS

Modesty Base Height	Height	Depth	Screen Finish	Hardware Finish
F Floor Height (1")	42, 51	24, 30	Panel Fabrics	Foundation

K S N T S
Solid Lateral Floor Screen

The Solid Lateral Floor Screen attaches to the panel to provide casual lateral space division.

WHAT'S INCLUDED
1 lateral solid screen, attachment brackets, support foot or worksurface connection (48" width and above).

NOTES
Screens 48" in width and above must include either a support foot or worksurface connection.

Support Foot and Worksurface Connection finish will automatically default to the bracket finish.

Bracket location is determined by the location of the bracket in relation to the screen.

Worksurface Connection is not panel supporting.

Left handed orientation will have the visible mounting brackets on the right and the support foot (if required) will be on the left. The right handed orientation will have the visible mounting brackets on the left and the support foot (if required) will be on the right.

Panel End trim (KTE) required on connecting panel.

Xpress Screen Finish Flintwood and Natural Veneer are excluded from *Teknion's Xpress Program*.

K S N C S

Solid Lateral Floor Screen with Shared Return

Solid Lateral Floor Screen with Shared Return attaches to a Leverage Panel to provide casual lateral space division.

WHAT'S INCLUDED
1 lateral solid screen with shared return, attachment brackets.

NOTES
Support Foot finish will automatically default to the Bracket finish.

The Bracket location is determined by the location of the Bracket in relation to the screen. The left-handed orientation will have the visible mounting brackets on the right and the return will be on the left. The right-handed orientation will have the visible mounting brackets on the left and the return will be on the right.

K S N T G

Solid Lateral Floor Screen with Glass

End Mount Lateral Screen Solid with Glass attaches to the panel to provide casual lateral space division.

WHAT'S INCLUDED

1 lateral solid screen with attachment brackets, support foot or worksurface connection.

NOTES

Screens 48" in width and above must include either a support foot or worksurface connection.

Support Foot and Worksurface Connection finish will automatically default to the bracket finish.

Bracket location is determined by the location of the bracket in relation to the screen.

Worksurface Connection is not panel supporting.

Left handed orientation will have the visible mounting brackets on the right and the support foot (if required) will be on the left. The right handed orientation will have the visible mounting brackets on the left and the support foot (if required) will be on the right.

Panel End trim (KTE) required on connecting panel.

Xpress Screen Finish Flintwood and Natural Veneer are excluded from *Teknion's Xpress Program*.

K S N R G

Solid Lateral Floor Screen with Glass with Return

Solid Lateral Screen with Glass with Return attaches to a Leverage Panel to provide casual lateral space division.

WHAT'S INCLUDED
1 lateral solid screen with glass and return, attachment brackets.

NOTES
Support Foot finish will automatically default to the Bracket finish.

The Bracket location is determined by the location of the Bracket in relation to the screen. The left-handed orientation will have the visible mounting brackets on the right and the return will be on the left. The right-handed orientation will have the visible mounting brackets on the left and the return will be on the right.

K S N C G

Solid Lateral Floor Screen with Glass with Shared Return

Solid Lateral Screen with Glass with Shared Return attaches to a Leverage Panel to provide casual lateral space division.

WHAT'S INCLUDED
1 lateral solid screen with glass and shared return, attachment brackets.

NOTES
Support Foot finish will automatically default to the Bracket finish.

The Bracket location is determined by the location of the Bracket in relation to the screen. The left-handed orientation will have the visible mounting brackets on the right and the return will be on the left. The right-handed orientation will have the visible mounting brackets on the left and the return will be on the right.

G N G L
Glass 6mm Lateral Screen

The Glass 6mm Lateral Screen attaches to the worksurface to provide lateral space division and privacy.

WHAT'S INCLUDED
Glass screen and attachment hardware.

NOTES
Designed for a full depth application. Specify depth of the screen that is same as worksurface depth only.

Screen datum heights are:
- 42" (13" height of screen from worksurface)
- 51" (22" height of screen from worksurface)
- 57" (28" height of screen from worksurface)

Can be applied to both flat and knife edge Leverage worksurface.

Glass finishes are 6mm tempered glass.

Xpress Available through *Teknion's Xpress Program*.

S O K L
Set of Keys Alike

WHAT'S INCLUDED
Each set of cores include a lock and core and two identical keys.

NOTES
All storage furniture is shipped with the lock housing pre-installed in each unit ready to receive the required lock plug cores. Based on the product option, lock cores and keys are shipped either numbered randomly or in "keyed-alike" sets. Quantity of lock cores and keys will match the quantities required for the locking components on the order.

Xpress Available through *Teknion's Xpress Program*.

SPECIFICATION NOTES
Count the number of locking components in each workstation. Enter the number of locks into the Quantity column, and then assign a SET to each quantity.

Office Number	Quantity	Set #	Set Total
T1	4	SOKL - 4	1
T2	2	SOKL - 2	1
T3	4	SOKL - 4	1
T4	3	SOKL - 3	1

Total the number of SOKL (Sets of Keys Alike) quantities and transfer each total quantity to your Purchase Order.

Sets ordered in the incorrect quantities that are required for the order may result in the order being placed on hold.

Verify the quantity by reviewing the plan carefully to ensure that all products with locks have been identified. Remember that some products may have more than one lock core per unit based on size and configuration.

For further details on how to specify locks, see the *Teknion Lock Specification Guide* on our website.

K T
Touch-Up Kits

Touch-Up Kits are used for touching up minor scratches and chips.

WHAT'S INCLUDED

1 bottle with brush or marker or crayon.

NOTES

The Touch-Up Kits (KT100) are fast-drying lacquer paints for covering small scratches and chips on products which are made out of metal. The lacquer paints for the (KT100) are non-textured.

The Crayon (KT401) is used for covering small scratches and chips on Source/ Foundation Laminate, Flintwood and Natural Veneer surfaces.

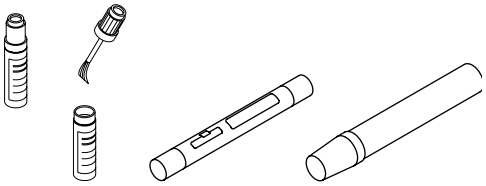

The Marker (KT402) is used for covering small scratches and chips on Flintwood and Natural Veneer surfaces.

The Edge Banding (KT500) is used to cover the exposed sides of materials on Flintwood surfaces.

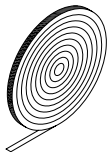

For instructions on the proper use of Touch-Up Paint, refer to *Care & Maintenance in the Fabrics and Finishes Program Guide*.

Fascia Foundation Laminate colors will be in the Foundation Laminate option.

Xpress Available through *Teknion's Xpress Program*.

K D N
Pedestal

The Pedestal provides storage below the worksurface and is available in four drawer configurations.

WHAT'S INCLUDED

1 pedestal, locks and keys, levelers or casters as specified and accessories as detailed.

	Drawer Combinations					
	BF	PBF	BBF	LF	FF	SSF
Pencil Tray	1	1	1	n/a	n/a	1
Drawer Divider	1	1	1	n/a	n/a	n/a
Hanging File Bar (22" or 28" depth only)	1	1	1	2	2	1
A4/Letter Conversion Rails	1	1	1	2	2	1

NOTES

All configurations of Pedestal (KDN) on casters fit under the regular 29" high worksurface, with no obstructions underneath.

A pedestal depth of 28" cannot receive Casters and Counterweight (W1) option. If mobility is required, see Mobile Pedestal (KDWN).

Configuration options (FF), (SSF), (PBF), and (BF) are not available for Counterweight (W2) option.

Ensure product is leveled. If front/door alignment is needed, it can be done by either releasing the front mounting screws, adjusting the front/door and tightening the screws, or by using hinge adjustments to ensure an equal gap.

Xpress Available through *Teknion's Xpress Program*.

K D S N
Mobile Pedestal with Seat

Small Box, File

Box, File

The Mobile Pedestal with Seat provides personal storage and temporary casual seating within a workstation.

WHAT'S INCLUDED
1 pedestal with seat, 4 casters, 1 pencil tray, 1 hanging file bar, A4 letter conversion rails, counterweight, lock and keys.

NOTES
Top molded handle is available in Black.

Yardage requirement for com or col is 0.75 yards based on a pattern of repeat of no more than 4" horizontal or vertical. Larger repeats will require additional yardage.

Ensure product is leveled. If front/door alignment is needed, it can be done by either releasing the front mounting screws, adjusting the front/door and tightening the screws, or by using hinge adjustments to ensure an equal gap.

Xpress Available through *Teknion's Xpress Program*.

Power Conservation System

Power Conservation system provides an automatically turn off to items like task lights, monitors, personal heaters and fans and other non-essential user equipment when they are not in use.

WHAT'S INCLUDED

Power conservation system consists of a control box, selected number of sensors, system connection brackets, connecting cables and a four-way splitter

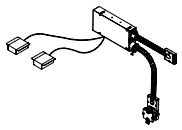

NOTES

Timer is set for 20 minutes for automatic shut-off after area is unoccupied. System sensors are available in Black only. Sensor connection wires are available in Grey and White only. System control box is available in Platinum (Foundation) only. Each Control Box offers two separate output jack for connection of Occupancy Sensors. The first output jack controls power to all receptacles on Teknion Circuit 1 and the second output jack controls power to all receptacles on Teknion Circuit 2. Each of the output jacks is labeled on the control box.

Do not specify receptacles for circuits 1 and 2 at the same workstation when using Power Conservation System.

Each occupancy sensor can only control one circuit.

Xpress Available through *Teknion's Xpress Program*.

Outlet Box

Outlet Box provides access to power at worksurface height. Outlet boxes can be mounted onto a Panel (accessible through an Access Door or an Element), or mounted to the edge of a desk or table.

WHAT'S INCLUDED
1 outlet box.

NOTES
Socket Angles will always be 15°.

When Panel Mount for T/O/S or Transit (P) is selected, the Outlet Box will mount to the inside of the raceway. Access door will need to open to access power.

If desk-mounted option is desired, Desk-Mounting Clip (VACB6) (Electric Accessories VAC_) must be purchased separately.

UPS option is only available with UK Outlets (G).
