

# blink chair overview

Designed in partnership with Formway, Blink delivers intuitive comfort and support without complicated mechanisms. Blink re-envisioned the ubiquitous plastic chair, elevates the expected aesthetics, innovates ergonomics, and prioritizes sustainable design.

Inspired by auxetic structures, Blink's shell is precision-molded in a unique pattern of varying cuts, depths, and spacing, allowing it to stretch and contract with the body's movements and creating targeted flex. The patent-pending Keel Mechanism automatically tilts forward and reclines, providing ongoing comfort as users transition between various positions throughout the day.

# blink chair dimensions & material requirements

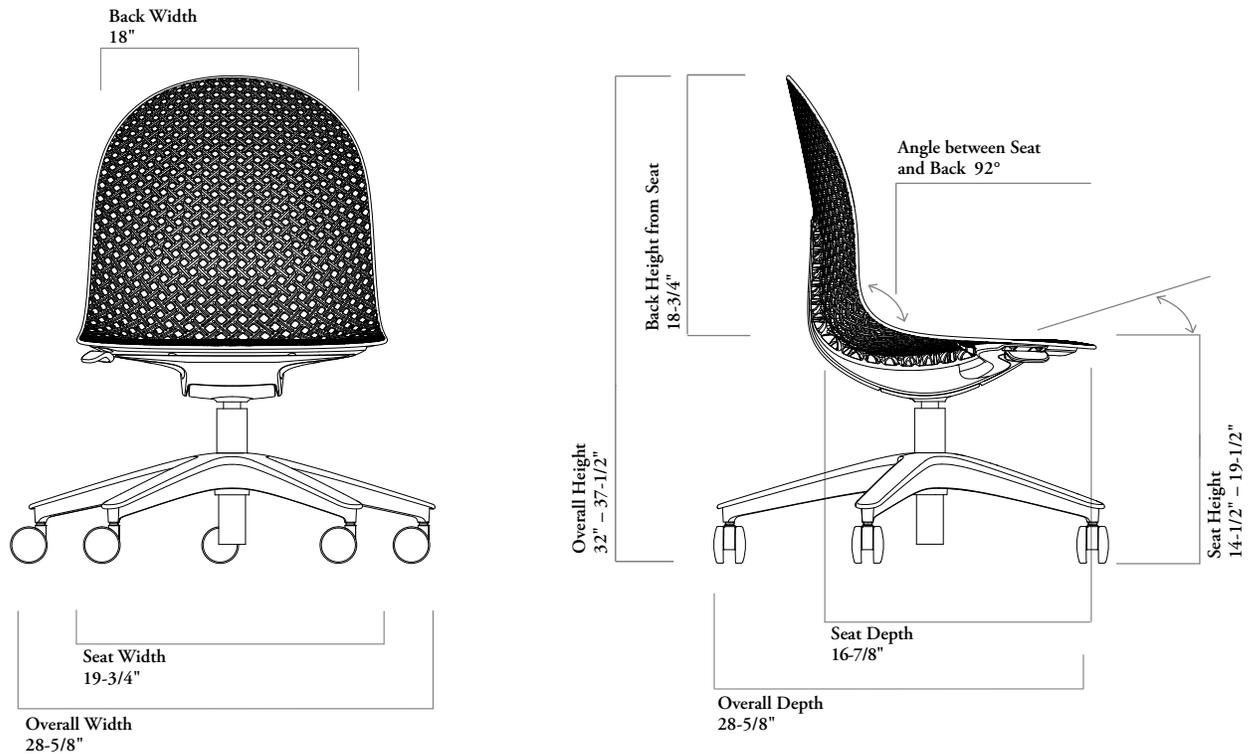

## features

- Designed and tested for users up to 300 lbs
- Meets ANSI/BIFMA requirements

## weight

Blink Chair	18 lbs
Blink Chair, Upholstered Seat	20 lbs
Blink Chair, Upholstered Seat and Back	22 lbs

## Blink Chair

## COM/COL material requirement

The pattern, repeat and directionality of fabric may increase the amount of yardage required.

Leather quantities should always be rounded up to the next hide size, as yields vary from 60-80% and are affected by the quality, size and shape of the hide, and by the location and quantity of blemishes.

# blink chair adjustment features & instructions

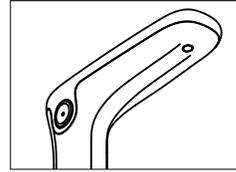

## seat height-adjustment

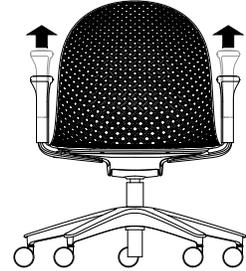

Seat height can be adjusted by lifting the paddle underneath the seat on the right side. When the paddle is lifted up, the weight of the body will cause the seat to lower. Releasing the paddle stops the seat at the desired height. Lifting the lever up with no weight on the seat allows it to rise.

## arm height-adjustment

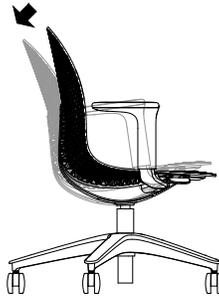

To adjust arm height, press the button on the inner arm rest to raise or lower it to the desired position. Release the button to lock in place.

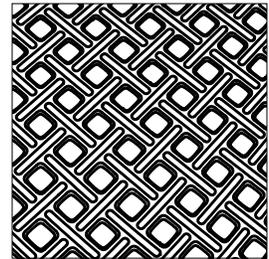

## keel mechanism

Mechanism allows the chair to automatically tilt 8° forward and recline 8° rearwards. The forward active posture is beneficial for focus work while the recline state supports moments of relaxation. Control of motion is achieved with tension springs. Optional "Recline Only" mechanism style also available.

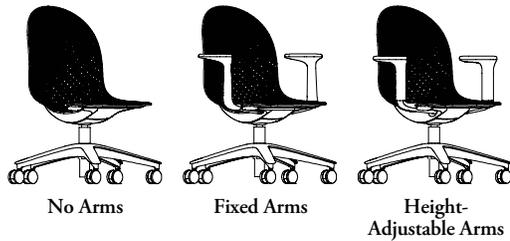

## auxetic inspired shell design

Shell features a unique pattern with varying cuts, depths, and spacing for the shell to stretch and contract with the body's natural movements.

# multi-use chairs

## NBLP Blink Chair

### FEATURES

- Pneumatic cylinder provides seat-adjustment of 5"
- Patent pending auxetic inspired shell, stretches and contracts with the body's movements
- Patent pending Keel mechanism, automatically tilts forward and reclines. Recline only option also available
- 51% recycled polypropylene shell
- 100% regenerated nylon support structure
- Soft casters
- Available in eight fully dipped, color options

### NOTES

Fully dipped chair consists of components that are matched to the same color finish. This includes the shell, arm post and sleeve, mechanism cover plate, support bar, base, gas lift and actuator lever. Casters and arm pads will have a darker coordinate. Mechanism features an aluminum finish.
