nuova contessa dimensions & material requirements

features

- Designed and tested for users up to 300 lbs
- Meets ANSI/BIFMA Requirement

weight

Task Chair No Headrest or Lumbar	47 lbs
Task Chair with Lumbar and Headrest	54 lbs

COM/COL material requirement

The pattern, repeat and directionality of fabric may increase the amount of yardage required.

Leather quantities should always be rounded up to the next hide size, as yields vary from 60-80% and are affected by the quality, size and shape of the hide, and by the location and quantity of blemishes.

DUAL UPHOLSTERED SEAT

COM [yards]	COL [sq. ft]
0.75	13.5

nuova contessa adjustment features & instructions

seat height-adjustment

Seat height can be adjusted by lifting the lever at the front of the right armrest. When this lever is lifted, the weight of the body will cause the seat to lower, and releasing it stops the seat at the desired height. Lifting the lever with no weight on the seat allows it to rise.

back tilt adjustment

When the chair back is at the desired angle, press the lever once to lock it in position. Pressing the lever again frees the chair back.

4D arm-width, depth, pivot and height-adjustment

To adjust the width of the 4D arms, grab the arm pad on both sides and push to the left or to the right to the desired position.

Simultaneously pivot the arm pad inward or outward to the desired angle. Arm pad depth can be controlled by grabbing the pad and sliding it forward or backward.

To adjust the arm height, press the button below either arm rest to raise or lower it to the desired position.

back tension adjustment

With an unlocked back setting, turn the dial found under the right side of the seat to adjust tension. This dial increases or reduces the resistance of the chair back while reclining. There are 1 - 4 settings, with 4 being the stiffest. Rotating this dial clockwise will reduce the tension and rotating the dial counterclockwise will increase the tension.

seat depth adjustment

Lifting the slide levers under both sides of the seat allows it to be adjusted forwards and backwards.

nuova contessa adjustment features & instructions (continued)

lumbar height-adjustment

The lumbar height-adjustment levers can be found on either side of the chair back frame.

The height of the lumbar support can be adjusted by sliding it up and down.

Lumbar responds uniquely to user's back curve depth and pressure.
