

tone synchro-tilt task chair & stool overview

Quiet, yet spirited, design. Visually soft and minimalist, Tone is designed to blend seamlessly with its setting. Its rounded frame invites touch and a pure silhouette balances simplicity with superior comfort.

Tone allows for an expressive and efficient use of materials. Two different mesh styles are available in an uplifting color palette. Thoughtful in each detail at an accessible price, Tone marries the needs of people, place and planet in an elegant whole.

Tone is available in a task chair and swivel stool. Task chair is available fully assembled or knocked down.

tone luum sleeve, tone chair & stool overview

Sleeve add-ons are tailor fitted to drape over the Tone back rest, utilizing the same chair to refresh a space with minimal additional investment. A curated collection of Luum textiles in a range of colors and patterns expands design options to create a more quiet, or spirited, setting.

Tone Luum Sleeve can be ordered installed on the chair, on the stool or separately.

tone adjustment features & instructions

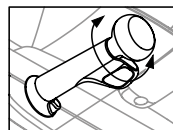

tilt tension adjustment

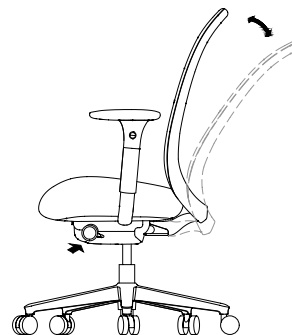

Rotating the knob found under the right side of the seat increases or reduces the resistance of the reclining chair back. Rotate forward to tighten tension. Rotate knob backwards to loosen tension.

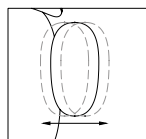

back tilt lock adjustment

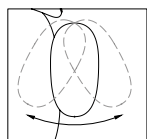

Turning the knob found under the left side of the seat locks and unlocks the recline. Rotate backwards to unlock and rotate forward to lock. To reset the chair to an upright position, unlock and completely recline the chair back. Chair can be locked in four positions.

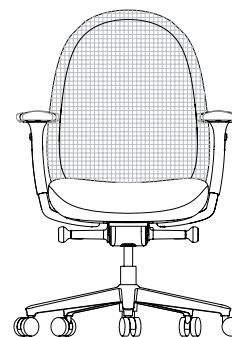

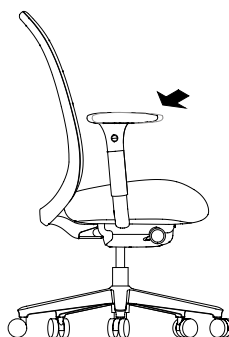

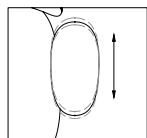

arm width, depth and pivot adjustment

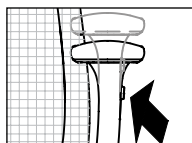

To adjust the width of the 2D and 4D arms, grab the arm pad on both sides and push to the left or right to the desired position.

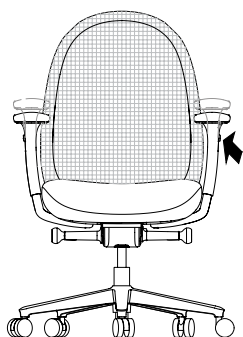

For the 4D arm option, simultaneously pivot the arm pad inward or outward to desired angle. Arm pad depth can be controlled by grabbing the pad and sliding it forward or backward.

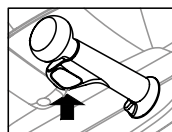

arm height-adjustment

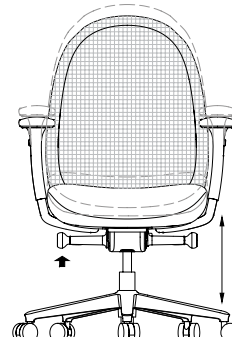

To adjust the arm height, press the button below either arm rest to raise or lower it to the desired position.

seat height-adjustment

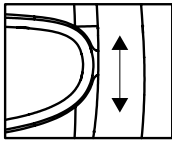

Seat height can be adjusted by pulling the lever underneath the seat on the right side. When the lever is pulled upward, the weight of the body will cause the seat to lower, and releasing it stops the seat at the desired height. Pulling up on the lever with no weight on the seat allows it to rise.

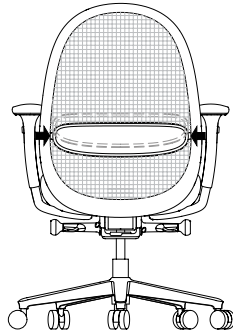

tone adjustment features & instructions (continued)

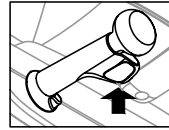

lumbar support height-adjustment

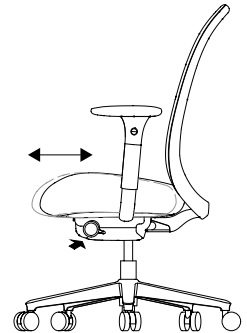

While sitting on the chair, put arms behind back to grab both ends of the lumbar support element. Slide lumbar up or down to required height.

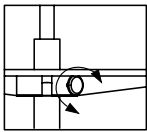

seat depth adjustment

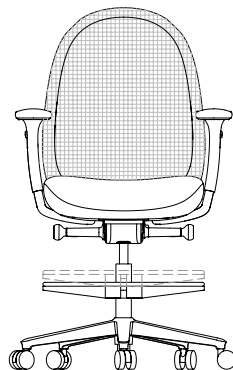

Seat depth adjustment can be found under the left hand side of the seat. To adjust the seat depth, pull the lever upward and simultaneously lift your weight from the seat while sliding the seat forward. For either direction, release the lever to lock the seat in place.

foot ring adjustment (stool)

To raise or lower the stool's foot ring, turn the foot ring's knob counter-clockwise to release the foot ring and adjust the ring until you reach the desired level. Turn the knob clockwise to lock into place.

NTDK
Tone Swivel Stool, Mesh Back
& Knit Sleeve

- FEATURES**
- Luum sleeve comes installed
 - Full synchro-limited tilt mechanism (2.5:1 tilt ratio) with two position lock
 - Reclining tension adjustment
 - Standard pneumatic cylinder provides a height-adjustment of 7-3/4" for stool
 - Seat depth adjustment of 2-3/8"
 - Available armless, with 2D arms (height and width) or 4D (height, width, depth and pivot) adjustments
 - Optional 3" height-adjustable lumbar support
 - Frame finish available in Ebony or Dimpse
 - Swivel Stool includes an Aluminum foot ring
 - Back available in lifestyle or performance mesh, 12 color options
 - Hard casters are standard and are well suited for soft flooring such as carpeting
 - Soft casters are available for use on hard flooring, such as wood, concrete or tile
 - Hard and soft glides also available

NOTES
Caster finish will default to frame finish. Dimpse frame finish will have Grey casters/Grey glides. Ebony frame finish will have Ebony casters/Ebony glides.
Stool is shipped semi knocked down and customer is responsible for assembly.
