Depth: 24" & 30"

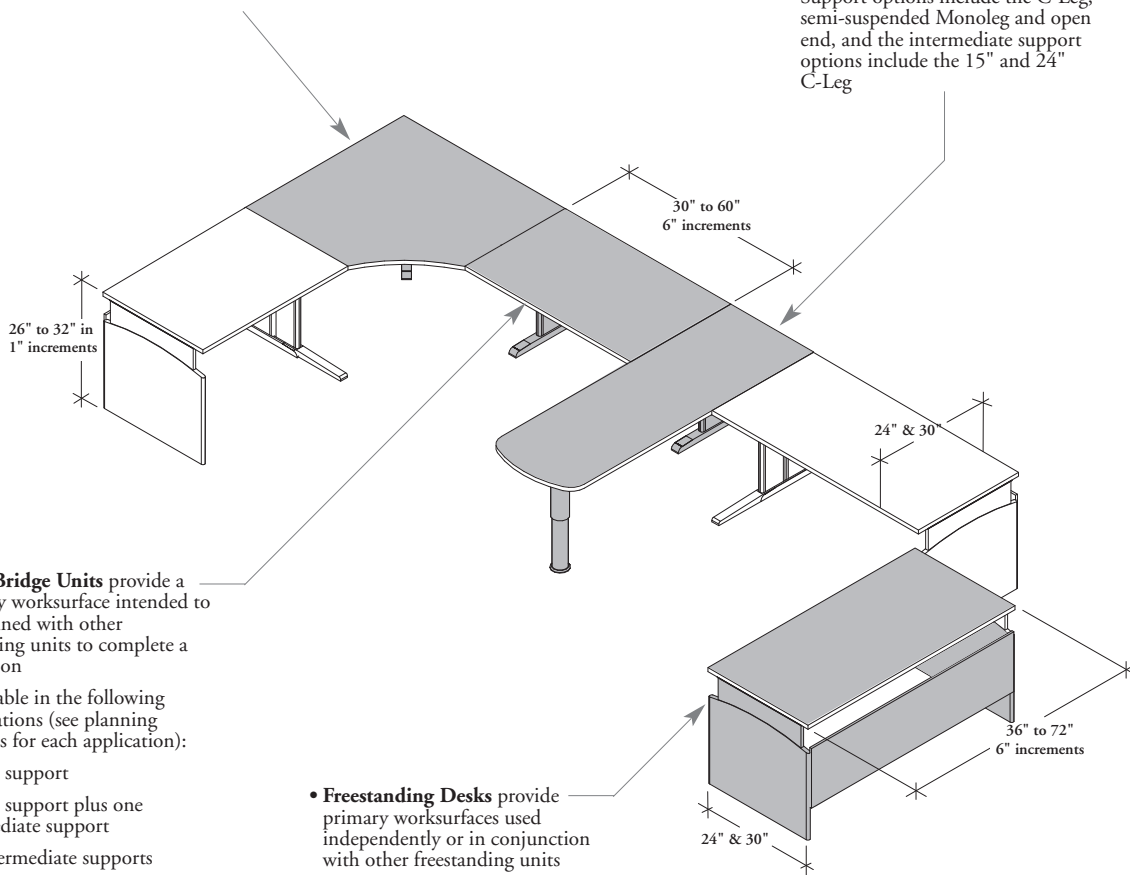

freestanding desk basics

Freestanding Transit is a desking system that can be used on its own or in a variety of other environments including Altos and drywall offices. It combines existing Transit worksurfaces, Modesty Panels, and supports into preconfigured units.

! All freestanding units are height-adjustable

Corners can be achieved by combining freestanding desks with Transit corner worksurfaces

- **Conference Units** provide a worksurface and conferencing area
- Cannot be used alone, they must be combined with other freestanding units
- Consist of one worksurface and one full support, plus two intermediate supports
- Support options include the C-Leg, semi-suspended Monoleg and open end, and the intermediate support options include the 15" and 24" C-Leg

- **Return/Bridge Units** provide a secondary worksurface intended to be combined with other freestanding units to complete a workstation

• Are available in the following configurations (see planning guidelines for each application):

- one full support
- one full support plus one intermediate support
- two intermediate supports
- no supports

• Full support options include the Flush End or C-Leg and Intermediate supports include 15" or 24" C-Legs and the Modesty Panel

• Three worksurface types are available: rectangular, straight transition and EDP

- **Freestanding Desks** provide primary worksurfaces used independently or in conjunction with other freestanding units

• Include worksurface, two full supports, one at each end and Modesty Panel

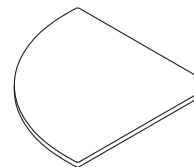

• Available support options are the C-Leg (TLCL) or the Flush End (TLFE)

• The 30" deep freestanding desk with modesty panel is recessed 6" from the back edge of the worksurface

Also available:

Corner Linking Worksurface (TLRA)

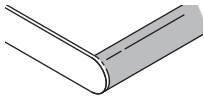

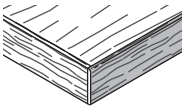

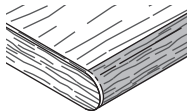

- Provides a means of connecting same-height worksurfaces of equal depth at 90°
- Cannot be used alone, they must be combined with other freestanding units at both ends
- Cannot accept Table Rails (ACTR) or FS Modesty Panels (TLMO) but the Modesty Panel (ACMP) can be used

freestanding edge trim style overview

The chart below indicates which edge trim style can be specified with all Transit worksurface finishes.

⚠ Shading indicates user edge

	Foundation Laminate Surface	Flintwood Surface	Non-User Edge
Flat (8) All Edges		n/a	Finished in a matching PVC Flat Trim
Bullnose (2) User Edge Only		n/a	Finished in a matching PVC Flat Trim
Flintwood* Flat (9) User Edge Only	n/a		See legend below
Flintwood* Bullnose (3) User Edge Only	n/a		See legend below

* Where a Flat Trim is specified for user edge only, non-user edges are also finished with matching Flat Trim.

* If Flintwood Trim is specified with a Foundation Laminate surface, a matching default PVC Trim is applied to the non-user edges. Pecan Flintwood Trim is an exception. A matching Flintwood trim is applied when Pecan trim is specified. The matching Flintwood/PVC combinations are:

- | | | |
|--|--|---|
| 1. Flintwood Flax/Maple Tone PVC | 4. Flintwood Red Cherry/Cherry PVC | 7. Flintwood Medium Sycamore/Mahogany PVC |
| 2. Flintwood Sable/Black PVC | 5. Flintwood Pecan/Pecan Flintwood | 8. Flintwood Dark Walnut/Black PVC |
| 3. Flintwood Chianti/Mahogany Tone PVC | 6. Flintwood Sycamore/Italian Yew Tone PVC | 9. Flintwood Black Walnut/Black PVC |
